Rhodora! if the sayer ark ther why This charm is wasted on the earth x chy, Till them dear that if eyes were made for very Then Beauty is its own exerce for being! Why thou went there, Orival of the roce! I never thought to ask, I never knew But in my simple ignorance support The relf-same Your that brought me there, brought you Our earth in her annual movement around the great or of day & our course of light & heat, doubtless for the multi multimeth time is now just passing the Oct, or mid-autim atation " That place between the roceate Summe huer, and Winter chilly blacks". Our autumnal lints are the finest when we have are fewered with a warm runny, & moderably dry Oct. But there favorable conditions are not prefect without the autum med hazk that spirit enlivene & mobile porticil the whole landreefe. The four reasons have probably formiled the poeter more material on which to turne their harpe than any other one of the many fields wherein the imagination has full play. This division of the year into spring runner, autumn & winter is of the weed as the emblem of life. Spring the ofening of life. Summer the developing, autumn the maturing & beginning of decay, & winter the decay & deith. In view of this cinterpretation of nature, our poits, though perhaps not as a rule, have only seem the combe ride of autumn the most beautiful reason of all & have not described it in the glowing colore, which it so thereby decerves. It is true the autumn leaves are enguetime of the decline attending old age. It is like the bright place that often president the death struggle. It was in this mood that Buyant wrote the oft quoted lines" The melon choly days are come, the reddent of the year " Poets write as impristion strikes them or temper ament leads them. Bryant was moved by a much more cheerful inspiration as will be observed in his someth on October, although a tinge of raduce crops out, & in the how. sound, he he aske " yet me rich smile, & we will try to bear, The piercing writer frost & winds & darkeome air" ! Thomas Hond never would have written the cheerlen doleful duje " how in England" if he had been priviled to see the glowin of an american Indian Summer day. The in spiration of the poem is what we might expect from the combre huer of the English landecepe, obscured by foge & mists.
"No run - no moon! no warmth - no cheefulness "no alin - no moon! no healthful ease. no comfortable feel in any member to shade, no shine no butterflie or beg he morn - no noon he down - no duck - no perfer time of dayno chy - no eathly view no distance looking blue. no birds - november Our own path never tre of ringing the present of the autumnel reason either in . exquisite were or partical proce. I will append a few of there that have a truck me ar delightful reading & hope they may afford our members as much pleasure in reading as they have me. Here one from Helen Hunt Jackson + Some one has said of this point that there should never be an October without it being read.

Pohliametem found mustly in creviour of rocks in most quemin ; fruite in July Leptoby un pyrifone " un dry wihe & meath, along reite and unbackmente Solder rugora leave of this golden and are comented the there of S. Banadenne; both as rough, but there of S. rugue are not-veried & thre of S. Canadinia are parallel-unid, S. Canadinia one proma her leaves rough above & veluty beneath. S. nemache has gray duty stem. Sulmifolie looke abittle the S. rugues but leave are broader withinmer & smooth stem is not so befy S. service looks like S. Canadian but nother is parallel-vising home me the stem are rough, they are glory S. giganter - aten & hence considered with evit him eriophilan plante - plante firmeded with horke acter iricoider has small flower heads one at the end of end branchlet. The on handlets & handher are very suit & needle-like lower bis are layer & most-line of abulate. It is a buchy acter acter multi flows is ducty, might be confused with a exicordic but flower harde are citated close to the bancher, while the heads of a winder grow on the end of the record hancher, a. vini neve grow in met place cini cla to a. multiplan but flower herde we not so erounded, the leave on branche are very smil, the chem have are layer & charply touthed in the middle

O sume & skin & cloude of June. and flower of June ligither Je cannot rival for one hour October bright blue weather. When loud the bumble - bee make harte Belated, thinfther, vagrant and golden - rud in dying fact and laner with grape are fregrant. When gentrans roll their frage tight To rave them for the morning and chesturete fall from catin bure Without a cound of warning When on the ground red apple he In file like jiwel chin ing and redder still in old stone walk are leaves of woodbine twin ing When all the ewoody way ride things Their white winjed seeds are rowing and in the fielde still green & fair Lete aftermath are growing; When springs run low, & on the browne he idle, golden freighting. Brytt leave with noveline in the bruch Of woode, for writer weiting When commader each awest country haunte By twois and twin lagether and count like mixere home by hour October bright blue weather O! rum x ckie x flower of June Court all your boach lighther Love lovell but of all the year October bright blue weather. I have only specifor one more now & that is an old poem by Souch Helen Whitman, which were once pravid by Edyn allen Pie "ar the truet & loveliest poem on nature he had ever known. I believe the member of the Chafter will agree with me that for hearty of expression, delightful measure & smel cadence, this prem has no enferior. I love to wander through the woodlands hoary In the roft light of an autumnal day. When summer gathers up her robes of glory and like a dream of beauty glider away How through each loved familiar path she lingers Serenely smiling through The golden mit Tuiting the wild grape with her duny fingers Vill the cool emerald turn to amethyst the faint store of hazel chining Knidle To light the gloom of autumia moldering halle With hoary plume the clematic entirining Where ver the rock her withred garland fath.

Warm lights are on the sleepy uplande waring. Beneath wift cloude along the horizon rolled, Till the clart umbeame through their frager raining Bath all the hille in melancholy gold. The mont winds breathe of wifed leave & flowere. In damp hollow of the woodland cown. Mingling the pulmer of autumnel showers With they are from cedare allege blown Buile the brook x on the umbered meadow When yellow form tufte flich the faded ground With folded lide beneath their palmy chedow The gentian mode in demy numbers bound Upon those roft franjed lich the bee site broading Whe a find lover lath to say fore-well. Or with shut wrige, though silken folde introdung. Creefe near her heart his drowing tale to tell The little bide upon the hillinde lovely, I lit noiselevely along from spring to spray Silent ac a sweet wandering thought that only Show ite bright wings & roftly glides away.

1900 Sept. 4 Manasquan, n. J. arrived here yesterday about 4. 45 P. M. To-day, we left home about 9 a.M. took the car at See Sent and proceeded to Shark River, at Belmar. We then walked clowly back towards home. We first walked along Skark River then proceeded towards some cranbing boys. Here becides the cranbeing which were in great abundance, we found plenty of Ly expedicion alapsemoider, Drown filiformie, Helianthur augustifolie and Polygula cruciata, after collecting a few specimen we proceeded to the car and rude home. P.M. Left home about 2 P.M. took train for Pt Pleasant the thear the electric car for Bay Head. Here I found Littur gram-889, infolie dubie in great profusion. We proceeded clowly back to Pt Plearant where we took train back for Manarquan. This morning we get away about 10 Q. M. proceeded to one of the tributaries of the Manasquan River and here Mr. a. trid his shill capturing killies. We also walked along the beach and here, I found for the first time See Purclame, P.M. Left home about 2 P.M. for one of the mill punde. Mr. a. showed me has various properties. His farm - quite a wilderness - proved the most interesting. Nothing particularly interesting bottomically was observed. After supper we proceeded to the beach and saw the ocean by moonlight. This was quite a treat, 892, b. It was again after 10 a. M. before we left home. To-day we went to atlantic View Cereting, There I round a pretty P. M. Left home about 1.30 P. M. and went to aching Park. Mr. a. who expected vicitore, remained at home until they called and them he too, came, The trif here, was quite a treat. Sunsit hahe, and also Dul Lake were almong the interesting like from an old tombetone. objecte visited. a. M. I arose about 5 A.M. proceeded to the beach and here abserve grand. Found Lathyrus maritime growing in laye patcher, not for from the heach. After breakfast we went to Brieble. On way found a number of most interesting behave. Two fasticistary fine over were found in Popular alla. 895 P.M. This afternoon, we left home about 1 P.M. We went to 896. Sea brit, where we took car for Snack River. We walked along the left bank of this stream. A very confrience plante was the Best Plum now in full fruit. Sea letture was quite common they the sha

water. arrived at the beach I raw the mouth of the stream There little streams have a hard time trying to empty into the ocean, which, in spite of even mais assistance, blocks up the month and camer the stream to meander along the court, arrived at the beach we were in low, we proceeded though Anow, then through Beadley Beach, finally reaching Ocean lune. From Ocean brown, we went to Arbung Park. Again we went out on the firling hier. This time there were several prihuman out in the far- end enclarere. One of them was quite cuccereful, fine fairly good - eyed fich were caught by him. While on the pier an ocean line came into view paring within eary view We now took electric can and proceeded to Elheron - the house of many million aire. Here we new trankly Cattage - the house in which Pres. Sarfield died. It wer quite dark by the time we reached the case and quite late when we arrived home. 8. This morning early left manyman for Philadelphia. arriving there about 10 a. M. at Broad St. Station. December into the street, I found myself opposite City Hall, I went though the arched way and then proceeded down Market St. 1 the Jurier. Returned then to 3rd St., and here took can for Fairmount Park. Entering at couth entrance, I proceeded along to S. River, pared the boat clube and finily to the bridge. Refore woring, however, I walked onward a short dictance and pared through the little tunnel. Returning again to the bridge I crossed the river and there went into the Zovlapiel Brade Evand an to 42 M St. Here I cam Smith withance, as must beautiful make of art. From the mount to Memorial 14 is only a short distance. Here I spent a couple of home than Bell. heaving this building at 4 P.M. proceeded to station. On may raw henry Book store also Warramahers. It wer 4.45 when I returned to station. Hen two 4.46 train for home. 16. Washington, heft Camden Station on 9 a.M. train arriving in Washington a little before 10 a.m. at station, I found friend Solvine house car and at transfer corner were met by friend Rist We then rude onward to swyetown and here took car for the Great Halle. It was about 11.30 Q. M. when we reached our destination. We proceeded at once

to the falls. There are indeed most grand, rivalling, I might almost

eay Niagara. For come time we enjoyed the heartiful scene before

as; then we clamboud over the rocks enjoying the pietly likens

We now proceeded to the path along the river. The try along this pat

898.

897

is very pretty, Friend R. was on the look out for ructs, mildewe the while I were on the lookout for licheur, Just beyond the dam, we found a heartiful retreat, here we ordered our dumer - have. As we were told that we would have to want at lent on hour & a quarter for it, we strolled orward. On may passed through a grove of pretty papaw true with plenty of ripe fruit. Here too, in our way back, we found reddings of this interesting tree. Not with standing the heavy reed it is brought (raised) above ground, the cotyledone, however, do not seem to become folige leaver, but remain in the seed ahorbing the abundant endocherm. The letter is quite corrugated, after being absorbed, the substance caucing the corrugation remains behind in the reed, The plummle develope quickly and the first pulinge is that of the plummle. after our short stroll me walked back, and got our dunier, We then proceeded back to the falle. This time we can them from another point of view We then proceeded down the river some distance. On way found a frince heftinging on tree trush and on the rocker great quantitui of Authentica Umbillicaria. We spent gome time on the rocke, then made one way to the can & proceeded back to W. after supper, I hastened owned to train. armed home about 9.30 P.m.

899.

18. Decided to day to vicit the Ortrick From locality, Left home at 8.30 a. M. Due to delay in care, it was nearly 10 a. M. before I reached Towson. On way to h. bowhed out for Yarrow and Wild Caret. Oracional Juin of the form were found, have a there, the letter, however were more abundant, at the Gount Vale. Stake Farm, I seemed a good supply of it. Here two, along the old fine year grew everse find likew I two of which I received specimens. There were several others but as they were not in fruit did not seeme specimens. I would along route though the woods. On reverle of the old strongs I found fine specimens of the Beef teak fewgue at your many in found the continued on to h. I found very few specimens of years on way. In field behind the statum I received a number of specimen, but still hardly he of what I meeded. Mede my may may towned Phoening, by the time I reached b. I had received at P. I would the review and then proceeded to sport where the Detrick Form is to be found. I had hoped to survived in time to secure good aprenium hat the starte from he had disappeared. and own of feetile there were but the other from de had disappeared. and own of feetile there were but the starte from de had disappeared. and own of feetile there were but the other from de had disappeared. and own of feetile there were but the found. I had hoped to assume a few then proceeded back to C. where

28. With Botany clase from Dickeyville to Buyun Och Junction, 903 We were pleased to find much Bidone chyzanthemoride in damp place near opring

904

905

29. From Towson to Providence then to Sunformeder. Return by way of Elin Ellen, It was nearly 10 Q. In, when I reached T, Went out Duling Valley Pile to Hampton, then out private though the woode, to Providence. Just as I entered the woods I record two likewe - apparently Physica cherive and Pyxime conditate. On path passed numerous plante appeted with milder Sund cheirman of several kinds, some appeted leaves of Insura of Vitic etc. I had no trouble finding the place where I, in the spring, located a few springer of Equicetion explicition. In this same awampy place grown very much Prichowskie, here two is much Posella primate, From ewamp, continued on ward to Providence them out the main road, I provided almost to the end, Just at the bend in the road there is a path lending into the woods; guite a prominent path, I followed it, taking right hand path where it fished. This walk through the words wer ginte interesting. Coming to a place, where a small path branched off towards a little elevation, I decided to see where it went, and wer gente pleased to find that it head to the oping an the gonze at the water trough. It was quite an every metter to reich the Samponder from this faint. At the spring, I evilleted a putty befatie, It wer a little part 3 P. M. when I were at the water trough. Iweeded now to 3-arched bridge, When I received this

Beautiful openium of Suiden fruite were gotten at Hampton.

2. To Brooklyn and the little ravine. Observed that Long bridge had been messared, at every hundred feet a morniber was painted on the side of the bridge. The bridge is over 4500 ft long. In walking I made leaves nothing particularly interesting was observed.

point it was 3.30 P. M. at 4,30 I was at Hampton and at 5

5. With Botany clase to West. arbuston, Groveland a. We hoped to find the Francisco Gentian but none were found. The hip 906 neverthalers was an enjoyable one. We found the Angallie aweren and the Cloud Gentian,

6. A rainy morning. I at first thought of viciting the Shader of Death, but benowing what a poor trip this is for a rainy day, I decid-907 ed to go to Lutherville, and see the Fringed Gentian. It was about 9 a.M. when I reached ?. Observed that right at the corner where the

car turns, there are quite a number of hunden trees with fruit. I set out at once for h. On way collected variously edged and shaped leaves. Went over the usual route a short dictance, but seeing a path leading towards the deep woods I decided to explore it a chort distance. I enjoyed this very much and found the hip was with the trouble. At one place I found a vice lot of Lyit a short distance, finding in one place a pretty bladoma. Here too were many specimen of Pultique, but none fine enough to be worth taking. It was here, that I ate my hunch. While on way back to path collected a fine specimen of lichen from a tree. Reaching L. I proceeded to the Centien place. Was pleased to find much Chara in the stream right at the railroad crocking, butin were not very plentiful, nevertheless I received enough for all purpose It had now stopped raining and my tip towards Timonim was men in grite near whose home is quite near the tower. He should me his fruit trees. I was particularly interested in his account of the pear tree in front of his home. He raid it was a Keifar, the same as the tree on offorte side of path, but although last year it bore good fruit, this year the fruit is textalers and no good. He accounts for it as being to close to the other Keifer, thun getting pollen only from it; where the other being near other pear tree gets pollen from them. This seemed planible, as the prevailing wind at the time the tree are in bloom would carry the follow away from the first tree. At T. I took path to York Rd them proceeded back to T. On way back a heavy ahomer of rain soaked me quite thoroughly although it lected but a few minister. The sum came out again and the wind blew quite a gale, bringing down the chestrate which were restlined quite freely. Reched 9. about 4,30 P.M. arriving home an how later.

8. A short trip to Columbia an terminar of electric line to get leave of the Paper Mulbury. On may home ment along Bx O. and found tree of that Mulbury at the distillery.

9. To Union Dam. heft home about 8.30 a. M. took can to Rolling Rid. Then proceeded over usual route towards Union Dam. The high winds have brought down the chestruits and in a little while I had collected a vice lot of them. One reason for this trip was to visit the region where the new found Cladonian were discovered. I tried to find the came path, but failed; made however, reveral other interacting discoveries and learned comething of the paths. On account of picking up chestrants & collecting leaves, it was sown before I received the woods. As soon as I entered the woods, I alto my lunch. Proceeded them to the pump home. When I came to the path on right bank

908

909

of the brook, I went up hill for quite a dictance, until I came to a path beding towards the right, I followed this fath them, also quite a dictance. All this was quite interesting, On way head the electric con quite plain a suppose they were not very for distant. Returned once the same route, only when within eight of the old pump house, I decended to the brown & then crocsing, found a wagon fath on other brank, which I followed. One of the first things observed was that the odor of the Colincome was entirely in the flowering top and the calips. That in the calips is by fair the best smelling. While collecting found a dogwood Come floride almost in flower. This is the first time that I have observed this plant to flower in the fall, While going down the hillaide preparting before crowing the brook I came upon a patch of Webera, what was my surprise whom piking it up to find an aute meet immediately under it and to find the capenler granved open and the space remared, no doubt done by the aute, not for from the old from I have I found the rocker, all around covered with Cladonic forth's ata, which variety however, I am not get prepared to say. It was about 3 P.M., when I deaded to start homewood, I proceeded cloudy atudying the father, but although I went of a down reveral I failed to find the one I wished to find. armed home about 6. P.Z 12. With Botany class to Brooklyn. The beautiful werther had its effect and the clase turned out in full force. We took the trip through the little ravine Euronymur is beautiful. 13. To Cecil County to vicit Mr. S. It was 8 o'clock when I armed and Puryville. Mr. S. was on hand with his team. We set out at once for a spot along the Surguehanna to get a few corne of Trillium The country is for more willy them any around near Baltimore, and of course very pretureque. We found the trillium in a futty little ranne mainly on the hillside facing the north. after getting the corner we proceeded to the river, on the way found a Sedum. The vegetation around about is mainly the same as ours. There wer plenty of buch, but along with it there were also the Sweet Brick - Betrele letter On the helliche with the Prilliam was the Christman Ferm. On the bluffer overlooking the min was an abundance of Vivla striate, some still in bloom. We returned home in time for driver and after driver, charted out again, this time more 912 conthrasterly. Our object being to visit a punhis aphagum boy (?) where grew, Calopyn, author, and Poyonia, The sphymm conved area was undeed very pumber, It exemed to be in a ruther wide ravine and get the descent of the stream running through it wer for more about them are generally finds. The hed of the stream wer growelly, and ophagement covered area were estuated here & there like islands; Some quite small, other layer, ste, etc., On way found reveral muchroom; but was surprised in not finding

910

911

where we took the 9,25 Q. M. train. We reached be, a little before 10 o'clock. We proceeded at once to the quarry. Here Mr. Le Fethe took two pretures. We descended into the grany but sam may little as the rain prevented in getting about as we would like. On the rock found Buyen argen term growing beautifully. We now decided to return to b. for it began to rain so very hard, that we had to seek where we truck the 12.35 O.M. train for L. On may been to T. from L. , we gethord cheetunte, annied home 3, 45 P.M. 23. From Dickeyville to Brogue Oak Justion. To-day again we see the 916 sur, the first time fra week. It was nearly 11 A. M. when I reached D. Here men are bury laying the tracks into the village, Ofcome there was much & plenty of it. The car now crocses the bridge I was pleased to find Witchhagel & Itagel on the route. P.M. Went to Clifton Park where I record various fruits. 917 Im. Flitton was getting ready to move to morrow the change in superin-\* v. below lendente taku place. 28. With Walter to Back Show. Secund come fine Springge 918 in pand near Duran. To-day it her been quite blustery. 29. Not wo cold to-day, Went with W. across the bridge 919 to Brooklyn, mainly to get Protocorene, at some time got Crowing the bridge on our way home, we saw Venue in all her brilliancy The moon wer shining beautifully, and Foundheat and Saturn were coming to the manidram. 30. From the Wilking an termine to arbuture, then to Common 920 Road, from where returned again to starting point by way of William av. When I left home it we raining, but it was day turned out beautiful. I observed that right at the car terminer are a number of Sycamore treve with print which can be reedily gotten. On Sulphu Spring Rd numerous hourt trees are to be found all in fruit, so two, on Carmon R'd. Ate my bush in the words offwrite the old hotel: bure, at the foot of a tree I found a putty little patch of Cladonia coapiticia. I had hoped to go through the ravine at Shrathery but decided to foregor this until some other day. 26 A trip with teachers to Mt. Winans. We met at termine of Columbi 921

and line then went to the lake. Returning we went through the woode, but

coming out at Waching ton Road.

when the train would leave we decided to go onward, This we did arriving at C. just a few minutes letter than the train we would have taken. The morning was cool and the air bracing, so our trip was a most enjoy able one. On road we passed a pool frozen over, The trip through the gaze wer enjoyed by both of we. Mr. Le Fi, had his came and took a member of picture. We reached W. a little before 3 P. Mr. and we decided to try to get to Passe and take the 3.38 P.Mr. train, but welk as fast so we could we could not make it. Re it meant waiting another hour we continued onward to T. and here took car for home.

1928,

car for home, 17. To Benfield. heft home about 6 a. M. and took the early train for Slen Burnie arriving there about 7 Q. Mr. The night had been quite cold and the roads were frozen hard. This made the walk to B. mort pleasant. The own had rise beautifully while on the train and there seemed to be every prospect for a perfect day. On may stopped at Mr. Bussings and then took here to B. aring there about 9.30 a. Mr. I proceeded at once to the boiling spring and although it was but 10 o'clock I was so hungeng that I deaded to est my lunch. after dumen I began my reach for behome and wer rown rewarded. On smooth back of young black oak I found forme were collected here and then I returned to the road and entered the words on north side. One of the first forms found here wer a specime of Stieta pulmonaire; upon examination I found numerous little outgrother over a portion of the thellur. I worked my way through the woode, covered the little broad and then returned to road by working my way though woods on that eide. The red maple aremed to have many forms, two or three form were to be found on each tree. a beautiful cructore variety with black apatheria was very common, and I collected a nice lot of it and then two Parmelias, one with cilia and other without them, although other wice apparently identical were in great profusion. While collect. ing I found one one tree a little spermen with thellur of a metallie lustre. Som after other specimen were found. Just at efect where I crossed the sheam I found a putty Coladonic on the tumbled-down decaying and water roughed fence. The tog old reil broked beautiful with its court of beautiful velocity green. The padetic were covered with collecting this putty form, it began to rain, a little shower. It did not last long, but before long there was another little shower and so it kept up the rest of the day. I was, however so interested in my work that I did not mind and before I know it found that it was time to start homeword. This I did collect. ing on my way back, some fine hickory mets and some fine conce It was close to train time when I reached the station

929.

and before long I was whiling buck to Baltimore. 20 To the ranne. Left home about 8.30 a h. Renhing Citamille I proceeded down Hilton av. to path leeding to Bax Run. Found the words for a great dictance burnt over. Wished to issit the Equicetum locality but for some reason miced it. It was when on my way back to path that I found a bluk onk builtfully decorated with supplie. I secould a mie lot of it, also another like accounted with it. I or come time now I tried to locate myself, but insucceefully, I there. upon took path & proceeded towards ravine. On way found one or two more pretty behens. When I reached Fox Rum, I walked down on right side of steam a short dictance and found it very interesting. arrived at brook I crossed at the old . run and here ni come rocke found ewerd beautiful gellow cruetore forme on the rocks wear the ruin and at remetime close to the stream, I wished that I had my chisel, but not having it decided to try keep the fact in mind & come again. I had exten my bunch at this time. When I reached the rine I proceeded to Orange Some, crossed and then went along the Rine Rd. I proceeded but a short dictance for after securing some Marchantie etc. I decided to return to O.S. and then continue ourand to Elcheter, This I did in order to see the new dam. now hing built below I behater. The water power is to be used to generate electricity. In the mind below O. S. found come fine spreaming of Riccia. At I lehester I seemed come fine fruiting branches of Ailanthus. At I town Thitle below Rid to Frederick Rid, then this road to care. On may found Truderich R'd a chort dictance part Thirthe blen R'd. Observed, too at old store on right side just beyond a fine expanse surple in full fruit. arrived at Stoddards about 4.30 P. M.; home by 5.30 P.M. Weather part few days quite marine, cloudy and misty. 24. With K to Holly neck. We met in Highlandtown about 9 a. M. W. were there just a little, about 5 minutes, too late for the car for Back & Middle Rivers, so had to wait about 25 minute for the next one.

930.

Fifteen minutes leter we were at Hollywood Park. On way to the Neck Rd we passed a fine lot of Doghame. At one sport, too, I found a fine apremien of Shallor quite covered with auts. It were menly 11 o'clock when we reached Walter. We proceeded down the road a short distance then turned into wood to eat our lunch. after dumen we continued orward, passed the school house and turned into Holy nich Road, Just a short distance down the road I found some fine spermens of Polytrichmon which I collected. I tere was a fine open spot, and here I planted some tubers of Itelianthus cent to me

by Mr. Road from Ohio. One openine was planted near the fence pole the second from the gate. We continued down the road quite a dictara bu right side we came to quite a laye patch of Pellie endivisacifolia. heartiful people in color, some too, pations covered by leave we green. When quite close to head of ereck, right where a path leade to field I found a black oak, back of which were covered with a best-ful countre bether. We proceeded as far as house them entered the woods and walked over to the water. One way collected come putly species of leaphine (?) govering on smooth back of Red Maple, the under dulation atchings of which stood out beintfully. We now thought it time to start homeward, this we did keeping along stream for some time dictance. After a bit, however, we were obliged to go back to road. It was about 6 P. M. when we reached I tolly wood, after a short went the cere came and we started on our way home.

931. 25. With W. and P. to see the deep ent at Westfort. The cut is now across the road and needs only to be completed, The weather

continue fine. We went in afternoon.

932. 27. Riverside. Space of the Ostrick Fern have germinated. There are at best 2 species of Catalpa here, one with think fat pade and the other with short this owne. Those with this pade deliver earlier then those with think pade. I was surprised to find that pade of Sweet Sur had nearly all faller from the tree.

933 28 Thank giving. With George to Shader of Death. Hollofields

had nearly all fallen from the tree.

29 Thank giving. With George to Shader of Death, Hollofilds and alberton; returning by way of the Dogwood Rd. to Powhatan We were to meet at Rolling Rd but by bit of good farture me met in car. The morning were bright and when we started juite celm, but when we left car and started of the road we room became aware of a strong wind which we were afield would make things quite die greable. This, however, did not materialize. It remained slightly windy all day but it never was disagreeable. We inited the old punh home at Unin Dam. There were a number of pretty views but for some reason a other lew. dieded not to take them. On slope found the beautiful frost flower of the Dittary; and to moth side of old ruin found a fine patch of Marchantie polymorphe. From U. D. we proceeded up the river, nothing partial only interesting were observed however at apring we ate our bunch then proceeded to Hall ofield, I have we learned that the old taver was at least 175 yrs. I'd and the house opposite about 100. We saw the old rum on the hillerde, then after Een had taken a finture of each of the houser we recovered the river and proceeded towards a. We stopped at the bij rock. Here? hoped to find some lichene, but with the exception of a putty yellow one and punhin one new rummit, both of which were not in fruit, I

14

failed to find any, at alberton can the progress made by richard. then returned to Joh Drywood Rd. On way found come beentiful Parmelies on a rock to right of wad side. a furthy find of Moon seed me made in may to alberton between Johnson - Cake & Daymond Role I With member of Md. acid. Science along Western Run. We met at Mrt. W. 934. about 9 a.M. and took the 9.16 a. M. train arriving at C. about 9.45 a. M. We founded at once to Bean Dam G. and then followed the would route I was very to find that a road wer bring brilt from achland along the run to the gage. I was empired at the way the ledie manyed to get over the difficult passes. We ate our lunch at Walftenp. Proceeding up this run a short dictance I found quite a heartiful hepatie ? youring on a water evaled log. Sund at severel place some fine conclore specimin of lichen, among them ceverel growing on rocker. Two heartiful form were found men Warren and were gutter off gute easily the layer of rock accenting favorably in the spection. It was 2.30 P.M. when we reched W. and set out for C. We moved along quite rapidly, in afite of etrong wind and arrived in C. in time to take the 3.35 P. M. trem, the reaching home shout 5 P. M. 4. It slenburne. Left home about 9 A.M. rude to Brookly, and then walked 935 The road was in a very dusty condition. My reason for making the trif was to get specimen of Saulthinia. I collected there after dinner, & when I was on my way home. At first I had much trouble finding any, and the frame aprimen found were very small indeed. I had almost concluded that the condition had been unfavorable and that it would be impariable to find any good specimene when I came upon one of the finite patcher I think I have ever even. I tere in a little while I collected more than remail times the amount collected. all afternoon. The patch is on the wed to S. not for from the main road Just beyond Helmer, a new comer her settled; - a colored man; between him and the railroad, a new road, connecting the two mein roads, is being built. On may home found a Lycopodium obecum in fruit. 8 To the ravine. Day ram and disagreeable. I took the route along 936. Camp Run. I had hoped to find the Equiretum spot, but ha some recome or other again foiled. On way through the ravine collected at two different place afremier of Placendonn. Ate my bunch in one of the little ride rannier. Near the entrance of the ranne I found a pumber trap, hated with a five of apple. The string over arranged grite skillfully around little sticks and it required but a slight touch of the apple to cause it to tighten around the animals nucle. I tried to ctudy ite mechanism but could not understand how the stick will apple stand in place, himing the ranne, I proceeded along Rine Rd and then areended

hillride and visited the pereminan tree new Hamon's. I found tree

without much trouble and received a nice lot of fruit. This year much to do with this. From percurrent place! proceeded to the Sentin region then crossed the river and returned proceeded toward Within an can line where I took can for home. 11. To Clifton. Mit Mr. B. and found him quite agreeable. Seemed epermin of the various compen. 15. To Benfield. Left home about 6 a. M. in time to take early train for s. arriving there about 7.05 a.M. It was very cloudy and looked may much like rain, in fact the weather bureau predicted rain for day. However, long before I receled B. the cum began to chine and there was no rain except a few despe in the afternoon.

937.

938

I arrived at B. before 9 a. M., set out at one for the Schmintie locality. On way up the hill just beyond Been buch I observed some putty Cladonian so similar in shape to C. py sidete that if then had here me apotheric I should have earl it were pysuidete, however, instead of brown apotherie there were beautiful bright result will from to be Cl. common confinition. Here two with it wer much Cl, pyridata. When I reached the top of the hill I rem two negrous felling trees and outthing them of into cord wood. Here on several old trees I found some Cetraria. My must finde were made new the path leading to Bent Ock. There on time water I found a pithy countrie form, a fithy Parmelie or Physicia and at the base of the layer their much collision. Assist at the Schwin their effect I reached for the flat and come found it. I lowhed coufly to reach if the fruit was a being but found that their were not so. We good cafeely were observed but a capsule. I now moved back again towards Bent Oak keeping in the woode. I passed the old remains of a horis shelton and in one of the bonce a fewer found a well- fruited like. It was existy removed and I received a fine specime. Finding myself again near wed I proceeded along it to fath heading to Best Oaks. On way to B. O. I could collected come Paraclic from but of the Pines. att B. O. I found a fine specimen of Strite ampliaring. The temperature now received to be about mitchelle x come of Saulthura and new the road a fine Cladonia.

after again reaching the road I proceeded to Benfield and from there I went to the old mill, on way found a fine lot of betien growing on the ground it remainded me comment of Bacong en, I betieve it a aficient of this genue. At old will I recent rome of mening of the yellow like covering the ite welks. I now proceeded to dam crossed the run

and then continued calong its bank. On way recured two more Cladomas

939

one no doubt Cl. fimbriata, arrived again on amapula Rd I preceded on to blendumie where I arrived in time to take 5.45 P.M. train, 18. A windy day, graduelly growing colder. This from Towcon to the Sunfound and then along it to Warren, brome W. I went to Tever where I took train for Int. W. returning home from there by electric car. On way to T. got off the en at Dr Brinton' place & inspected the laye arbor Vitre but found only one with a few fruite; however just beyond the laye tree on the road in the laye ofen field there are revuel on the hill away from the road; here I found two in print and secured enough for my wate. In returning to road, found new the printe way and main want a fine Retinactore in fruit; one sees at once that it is more closely releted to Change from the to Things, the realis in finit being valuate a not lapping. I now were on bookout for Jumpens in fruit and finally found my first openine on hillinde just before reaching Bumponder. Right at the interestion of roads just at the concerte bridge I pared a fine Fin tree. Othe lunch at the old Still home. Nothing of particular interest live now observed until I accorded the hillride after being Merry man's bridge. a path leads to top of hill and then along stream, I crowd the stream and continued along the Sumpounder Here on ridge I found a fine patch of Ly copodime conflanation. On my may down to chean I found come fine more. Nothing of interest were now obcurred until beyond Warren where I collected some fine hembook after collecting hembook I started on return trip getting to I? in Time to take 4.38 P. M. train arining home a little part 6 P. M. Examine the Umbiliaine near Warren, very comfully, for I hoped to find fruited openium, but found not one, among the hundred of openium It was quite cold, on account of wind, even early in day, but it became

22. Across the new bridges and beyond the school-house in senich for holly. On may observed in several place fine capsular of morning gloria. I was commonly empired to find actually growing on said a school obstance beyond the school-house. I twomed into words at came front as lent year and were again equally executful finding come fine holly with planty of buries. Here two I ate my brough, and found two cruetore behins after seewing holly I preceded through woods, seewing more hore & there. Finally reached award again than took path heding towards Henhini, Franced this path quite intenting and seemed come fine Cladomic aff of several large fuller true trushe. Colleted too a hepatic purishly a Faullania Returned home by 4 P.M.

27. A trip along the Sumpounder and Western Run with several members of bottom clave. We met at Mrt. Washington about 9 9. Mr in time to take the 9.16 a. In train for Cochegoville. The trein was a little late so it was nearly

940.

10 a M. by the time we arraid at Cockeypoulle. Although the westlen was partly cloudy when we left home we felt mu that it would clear before nown. As we left C. and started if the treat towned the bridge carrying word over the railword treehs we felt were more over of it. It was got chilly when we started but higher long our broke welking male we a worm as we could to feel. We precided to bridge beyond abland, the followed want to vive. Amied at vive we followed the stream keeping or right bank. We had not proceeded very far when we were many much auformed by it begins ing to rain. It rained may lightly but witnesseding the forbigs or rether bush and the decaying leave or grown room became west and made our tif any thing but pleased. No me became anyon, however, but we heatered award much more repolly them were at all divinable. It wishing a mine progriting work we gut work it and there at our lunch. It was \$1.25 P. M. when we arraid at a. ready to the trein back to Mrt. W. but me had to forced to bo. There we arraid at about 1.50. At 2.35 our time arraid and glad are were for it had begin to rain quite bridy. Arraid home about 4 P. Mr. On account of worth we really had too little time to make any observations, they were of very hittle ceintific value.

941. I. I short trip to the ravine near Browklyn with Walter x Percy,
The day has been heartful, quite a apring like temperature, such a contrast to
the temperature a week ago, when it was 13° F. My reason for writing the
ravine was to look for Symphosopour. I found it readily enough and in
full bloom. Stellarie medie, although with many capable had no flower.

942. 5 To the Petusent. For some time, I have intended making a trip to the herd waters of the Petusent River. To-day, I decided to make this trip. Took electric can to Ellicott City, then proceeded out Frederick R'd. to

fuit wide stream; this is the Little Petus ent, Just before reaching the stream is brug Rock the home of the Humain. A heartiful row of laye trees borden the road. They were quite covered with interesting bethem. Just

ar I reached the extete I met one of the boys carrying a small hembrek which he found in new by woods. I room formed him quite intenting, a student of one of our city schools. I asked him about the river and leaved

from him that it was worth welling along. I started orward and room resched the stream. Thinking that it was more interesting going up stream I started

in that direction. Finding a fuller tree trush I rest down & began eating my brush. While eating the boy I had met came up with his brother.

While eating I had noticed a premier order and when the boyse came I row learned what was causing it. a poor home had gutten into the quick

rande and although every effort were made to get it out, it finished mesonled having broken one of its lags. I now sched the boys which

may would be the pettint to go and both thought down atream. I believe however, that their was because they know more of this partialer part

it bring right on their grandfether place. However I deaded to go with them. We went down the left bank then crossed over a feller tree trunk

Just where we crossed I found a putty specime of Peltyine. We now crossed the ridge and proceeded along a tributery, but nothing particularly

interesting were observed, at the junction we covered tributing and we then proceeded along main stream. Often going a short dictance they bage

returned, and I proceeded above. a nice piece of woods attracted my

attention, but I must say, with the exception of a hepatic found on a rock nothing of particular interest was observed. Re it were arm

close to 3 P.M. I decided to start homewal, Returning I kept on right bank. When at plue where I had crossed earlier in day I mit a man, who record

to know courthing of the region. The told me how to get to Could Mill

stating that it was futly there. I should stop at berings store which wise the

first atome beyond the bridge and that I would be directed onen a chat route. He to thought that the upper part of the hittle Petryent was puttin them the

part I had visited. He now derected me how to get to reved by keeping along the tributary, I followed his direction and before lay over again on road and about

an how liter mer breck to Ellicatt City.

943

944

8. To Maily. Touch the route by way of the new bridge. The weether all week her been warm, yesterday the thermaneter rewhed 74°, to-day I believe it went about ac high. When I left home I thought of taking an umbelle, but as the weather man had predicted only cloudy weather, I decided not to trouble rayrelf with one but rom found out my mistake. The weather soon became thething thurder was head and before long we had quite a thurch shower.

and so it kept up all day. Wishing to get seed of Pitche Plant

Threwood to the will pand at Frank Home and have I smeaded getting

or fair supply. Morre and Lichen were in all this glong. a pitch

Cledonic were found near the sping and off the slets were Ren. Robins gave I collected a fine let of beha. An in was now almost continue I decided to take their at Marly. This I did reaching home about 4,30 P. M. Head the prope quite planty all day. 12. A rainy day. For some time, I have been auxious to make a trip to Rochy Point, but it were only to-day that I finally decided to under-take this jainet, and a from day I had releated for such a trip. It were about 9 a. In before I got away from home reaching anywith and Levington Sta just in time to have nearly on 1/2 hr. went. This were not very pleasant in the rain, however, the car came in due time and by 10.30 a. he ? was at Walter and ready to make the trip down the neck. The road being in fairly good condition, in spite of the rain, I made quite good time and in halfan hour I was at the church, It was here that I was overtaken by a colored boy in a briggy who asked me if I could to ride, and wer then helped down the road a little distance, possible two miles. I now kept on down the road and in a little while was at its lower end. The Rocky Pt road ergu having faller from the tree, I failed to obene it lying on the ground and went on down the road and did not observed my mustake until I came to the little cheam just below. Sung the direction of the flow of water I know at once that I were on my way to Cedar Pt, I thenfor retraced my steps and entered the woods hoping that I might purilly find a path leading along the stream to the point. Failing in this, and observing that it was now close to moon, I decided to est my lunch. While eeting my lunch I lawhed about and found a putty like on hack of a hally. Heaving more a key which thing, I at one got back to the road and learned from him that I had passed the Rocky Pt. road. I now got my things tryther and proceeded buch of the road, to the road and a fine middy old road it proved to be homen, I hept along it and soon fearmed that it preceded to Portie . At the gate I mut Mr. P. and he told me how to get to the point. Rlong the road side leading up to the gate is a fine row of cedare, on them a yellow like gome in propries

as it we not in fruit I did not take any of it, think, however I finally wer on the point. after collecting a few of the forcil rootell I mude a reach for lichen. The webs excepting one ledge furthert ent are quite hare, this externment ledge, however, were quite covered, a brown one seemed to be accupy the ment of the upper conface, however, am not so some but that there is a little country from also here and there my best find, however, wer mude on the side in protected pation of the rock I found a fine control form with dark reddich how apoltrieia. I could have spent more time on the webs, and I would very much liked to goon up the little welt between Rocky Pt & Ceder Pt. but as it were receiving to be home by 5 P. M. I decided to put this off and started homewood. It was 1.45 when I left the point, at 2.30 ) war o're the road and at 3.45 June up to Walters. I find it taken 35 minutes to go from school have up to Walter. a car came along in a few minutes and by 5 %. M. I wer home. 19. To Brooklyn

945.

946. 22. To Druid Hill Park for home chestant back. But a mie supply from Eaten Plue Square

947.

26. To Browhlyn for Symphoenpu which were found in abundance, in apite of the arrow. Found in small atrem a cet fish which were in wishly condition having had its buch hut. Did not remain out very long.

29 Along Swymie Falls. Before starting on trip visited a home in Walland

948.

29. Along Swymin's Falle. Before starting on this, visited a home in Walhard proceeded them along Window Wille Rol to the falle. Reaching the falle I proceeded along the road to Dishguille, here, I obtained that the electric can more goes into the village, From D. award I took left back of the streem. I found it guite an intenting walk. I have and their green could cloud of Prinkly ash. A road leads as for as the dam but from this point owned there was more, notwith standing it was not at all difficult to get though, and were pulseful amount confirm stone over the fait portions. At one please in particular an out confirm stone over breatifully conceed with Physicis. I did not take any of the specimen but will writ place countine again in men future. Resched Swym Oak an room after, from along which I preceded to care.

rometime along and 2. To

2. To Centic buch and vicinity. Took woul route account the own bridge and then along road to Marley. My main reven for whing this trip was to get apriming of Smut bound a homing the cody excrecemen. Secured some fine aprime just buy and the White Pine woods. Was quite interested in the fact that the ridge were all on the upper surface of the brencher. On homewood trip, I entered the woods just at the little Pine woods. Here I found a road through the woods which were quite intenting. On a tree in the White Pine area, in fact, quite chose

to the road, I found a tree with two fine enotine lichene, the are with dark aportheric looked familia, but the are with the whitwith aportheric I believe a new opinion. Would have been gled to take
the openion, but infutmately her fogather to fut may pendempe in
my pocket, whell try to heref it in mind and secure specimion
on my next trip. The fath found intenting and I man pleased to
find that it led to main road. Nothing arow of interest were
obtained with I got to Centre Bay, I have not for from the car
termina I found a tree with mintle tree. It is empiring that ar
often as I have passed under the tree I have nown before noticed the
mittetore. One for an I could see, it is the only tree around with the
parentic plant.

950. 5. All day yesterday it was morning; about a blyzant; to-day, it is clear but the ground is consend with about 9 wicher of more. Decided to make but a short trip to Browhlyn, securing a few trujo

- 951. 9. The man is still on the ground, the weather her hem very cold during the week, and there has practically been little thawing. I went to Catomaille and vicinity, recurring fine species of hickory, talif and Sumach.
- 12. Coldect day of year up to date themounter registering 9° F. at 8 a. M. Snow is still on the ground but the roads are almost free 952. heft home about 9 a. Mr. for Contin Bay, then set out by way of the new bridge for Elvator. To day, Thoped to visit the big wehr insited and year ago. Unfortunately no one seems to know of them, it is therefore very difficilt to get any information regarding even an affirm winder idea of these wherebouts. At 3-corner I met a man coming along the Marky R'd. He thought it wer closer, to go by many of Marky but the hed no knowledge of the rocks. As I hoped to go along the Old Mill R'd I dealed to go by may of Waterfard. When a short dietence beyond Solleys I was informed by a colored man that the rocks were on Long Itall an Mr. Morgani place. He told me to heef on at the road with I came to green home with white weeheld rear building; this was Freetown. Here were the road to Closelar This road lead in the dietim of Morgani and while was at the Not. R'd This road leed in the direction of Morgan's and which was an the Mit. R'l and evering the main road entered hay Hill. This hill contained many big rocks and is no doubt worth insertigating, but I failed to find my white rocks. As it were after 2 P. Mr. when I get to the hill I had very little time for inviting ation, as I contented myself with the idea of coming again. Coming home, I proceeded to main Rod this took me to Marley the to Funace Brush and finally home by way of Browhlyn I timed myself going from Marky to Browhlyn and found that I could make the distance in short 1 3 hours.

953

16. From the Wilkins ar car termina to arbitic, to and and along the river to Orange Issue, to Catomirlle. The day was a bent's ful early spring one and had there been live more on the ground, it would have been perfect. I are attracted, find of all, by the catolipas as Wilkim ar new the birdge covering the railroad. I was sufficient at the deep leaf seem, also at feet that there were two lays own and one ting one. I do not have, if the letter feet is general with this opinion or rest, shall investigate.

Nothing particularly intensing was observed until I resolut the old hosted where I ate may lunch I here I examined several atems of arising particularly intensing was observed and in very good for this purpose, for although 2/5 seems to be the order of leaf arrangement it was not always absolutely perfect and in very short stems it seemed to be 3/8. On way to arrange and in very short stems it seemed to be fine put clay on his land.

When I covered the river, I stopped at Paulie and examined the willow, I was able to seeme 12 openion.

954

23 Along the Gunpowder from Harford Rd. to hong breen Branch. The morning was cold, a keen wind from the north-cart made the walk mt the road, after lewing the can at Carry, anything but pleasant. However, after getting everand up a little, by milling brickly, the temperature did not seem so cold nor the wind so hem. The trip to the rime was uneventful, armid at the rime, I found things more agreeable, the high hills afforded protection against the would and the conthuly exporme made the temperature delightful. I stopped to is anime the rocks at the bridge and found reveral interesting lichens. Thought it but not to take any or they seemed so fregile, and so will ment the plus again immediately after a worm rain. I proceeded along the road and below these rocks found others one farticularly with a fine Cladonia. When I reached the old factory I proceeded along the bank of the stream. Ate my lunch a short distance below and then continued award. Found Pleadin and Cladonia enteriora (?) in quantity, but found all new beginning of trip, letter there were headly any thing in the lichen of interest. Near the first little tribut any stand a tree with had whitish back (Inglam conine?) on it I found several fine routles of Brullam's a short ditume from it also on same side of path (right side) I found a true with an interesting lishen. I recent a small price but must come again when weether is more feverable for handling a hunge, builer found too that time wer pursung. nothing own of particular interest, except perhaps the fine patitive of Equition byencele, until I came to Long brun, Br. There the sunny

was grand and the rocks were covered with interesting lichens, It was my intention to cross the stream and continue onward to Belan R'd but I found the stones too treacherous so decided to return over same route. Had it not been so late I should have spent more time along this futly stream but not knowing we arthy how for I would have to go to reach the road, nor what difficulties I might meanter especially as the snow lay quite deep in this shely ravine, I thought it but to put this treat off for some future time. Returning, I will ed juite refidly so found that I could make the entire trip back to C. in about 2 2 hours. On way buch I received a small bit of such with are of the delicate likem obrused new the bridge. arrived at & in time to take the 5.45 P. M. car. arriving home about 7 P. Mi. On way home met a Mr. Fine who liver at hoch Raven, and on the dredge, he have C. Water. 26. A trip to Roband Park for episoner of the large willow cathins. I had little trouble finding the place, but consider able trouble picking out the willow. I found it, however, and recured a mie lot of twigs. Planted a mucher of twige in a little depression a chart distance north of the tree. Returning to reihoad trucks, I must out the road a chart distime as I wished to seeme some Beach twigs, I found a tree only a short dictance away, after getting my trongs returned home. In afternoon, went to park for buckye and have chestent. Snow is still in the ground. 2. To Harman and Stry Run. Took electric can to Beachlyn, then proceeded by my of Pumphage to Harman. The roads were in an aroft condition, due not only to the thorong but also to the heavy downfair of rain during the night. The atream, two were very much awallen, and quite out of thin beds. I took the route fait of all to get ofereinens of showh eathlige and then too, to see the country, especially to recif there was any wooded country near Harmain. notwitletanding the heavy rain there was still much sower along the Rime Rd and in the woods. The showh callings was quite hidden except in the few wet areas, so I had much trouble getting them, I muraged, however, to reame some. Here, to, men here of tree I found a hefatic. nothing now of particular interest was observed until I were some distance out the road, when I found on several old dead tree etungs a putty curtare below with yellow apotherie. Just preeding the finding of this bithen I ate my buch. I had little trouble friday Harmone; but found the try most uninteresting, no tren and no would wanth talking apont. armid at It's I proceeded to Stony Rim, remin, rome fine specimin of Symphocarpus in the marky ground rear letter station.

955

956

after accuring afreimen proceeded homeward going by may of P. R. R. and B x O. armid home about 6.45 P. M.

5. To the ravine. Left home about 9 a.M. Task Ellist City can and get off at the witch to see the willows. Often evening a few apremien I proceeded towards Steffadi and the ravine. I took the route part Valieti. On way out a sugger with team lowling for The time can dump. This unightly spot is right in the woods. From the negro quite telleature. "The nigger" he sind " is God's chosen people; you can't down a miger, cause God's with him." He know that this was no because it was in the Bible. Then two, he raid, " Put a might in the pententing for 10 yre, and when he come out, he'll be black just the same as when he was put in; but, put a white man in the peintenting and when he come out, if he come out at all, he is all pale, white as a ghost, he's so blesched." He collected the scrap tim, old come, etc., then he took to a plea when they were commuted into window seed weighte. He east he got \$2.50 a day for the work bringing in one lord a day. after apending a little Time biteming to bie nomena, I followed the little stream down into the ravine. Here I collected a few likers; the most important are being that specie of Cladonie growing or abundantly on the roche. I had to search for some time before I found fruited specimen but finally secured a fun specimen. I get revised specimen from Carpinas, one a susplicie. are it was mainly to get the Cladonia that I made this part of my trip I dieded to return to car termine. On way collected specimin of blader; critata. growing along ride of Cl. leptophylle. During morning it were gente raw, chilly and discogneable, partly alonely, but in the afternoon it became quite pleasant. Ate huch about I V.M. while

on may down the little etreams.

9 an ideal apring day, temperature delightful, sun bright, almost all day. I had to get to specimen of Skurk Cabbye, and some Springera, no visited the swampy ground near Browhlyn. Touch W. with me. We reached the little ravine about 10 a.M. and in an how and a helf had the openiment Springspa was very abundant and I seemed a nine lat. after eating any lunch we started back to the village; W. continuing onward towards home and I towards furnace Branch. It took me an hour to get there, I, here took the road to Marley, this, to took an hour; I man, proceeded to Marly Station, reaching it by 2.30 P.M. Nothing particularly interesting was observed and all I collected wer a number of fruit true trongs. At Mary Station, I received a frew specimen of linear off the apple true I now proceeded to Forest Home. On my may I collected a member of Cladonic, the first one observed was a small one genoing in laye make with almost wish from apothers. Linte a number of these were decaying

958

forming black irregular patcher, all own the plant. The next form were found just before reaching the stream, it remember me commented of Cl. digitate, but the apothecie are so much darker and the podetic so much conver, parily it is a variety of this form. Evening with it from, no doubt to be some form of Cl. agramora at Faut Home I collected twige of liles and then started on return trip, going by way of the old will, through the woods, and the along the railroad to blenburnie. One may collected two more Chidamies one at the bace of a tree, reminding one way much of Cl. campitude and one in the few woods new the railroad, some particularly fine spenin of Cl. leftophylle. Revolut bludine about 5.30 P. In armid home about 6.30 P.M.

12. To the park for twigs. Secured some fine prothalli at the 959 ing antheridia and archegorna in all stages.

Secured also a mice specimen of humbarie. 16. With K. from Monument St and Long's Lane to Philadelphia Rd to Blue Ball an them to Trump Will, Sum Sping Will, Putty Hill then to car at Fullerton and home. Blue Ball are is the part road 960 beyond Roudale possible a mile from that village; a black smith a shop is right in corner. Trump hill R'd is the first road branking to right. The day wer are ideal one temperature delightful, annohime all day. Met 12 at Longs have, about quester of nine o'clock Q. Mr. The citys

outlet sewer is under construction at this faint and the roads and streets around are in a frightful condition. However, we soon get out of the dictrict and com found the roads in fair condition. The trip along Phile. R'd were very ministrating, the runny being mainly a change of farms. When we reached Roundle, the scenny became more interesting a putty would to the right looked very inviting. We cook came to the run begand the village, here, covering the old wells we found Dellace atropulpus, in most flourishing conditions of the old wells we found Dellace atropulpus, in most flourishing conditions as it was now nearly now and the little glade nearly was so uniting, we decided to stop and est our lunch. While we were cating we heard the distant helle and whitler announcing the hour of non. after eating my lunch, I examined the atream and secund a pretty attached alga. Through with lunch we proceeded owned and coon came to Blue Ball an Our trip now became more interesting, stupe of wordland aladonia. Zuite close to Phile. R'd we found a Poplar in bloom. after going a short dictaire, juit before reaching the first house we turned

into woods and here I found Cladona papellaria in profusion, two venitie

were collected. heter neve of it was observed. Other Cladowin more collected

as we continued nor trip. In are aport a Cl. pysidete may rimilar to the ine found last week at Fruit Home, and a Cl. furbiate (?) consentat unite. Here too, grew a Cladamic apparently rimiter to the me found at habed buch in the Mayathy. I did not take openinen and in the trush of a tree Frullanie aryungane. Our intentions were to go to Fullata diect, but me mised the road and so we finally found ourselve at Putty Hill. Here grew a fine Willow with fine cathing. nothing particularly interesting were observed in trip along Belain Raed. We reached our short 5.15 P.M. and were home a little after 6. P. M.

19. To Brooklyn . Heavy rain all morning. Visited the little ravine 961. for Skut Cablege. Found May apple coming up. after getting my specimen, proceeded along the river fath. On way secured a Justing Cladoma, it reminded me comewhat of the form around on Saturday, found in this, however, that the primary thallur was much more developed. The view of the river to-day was grand, When I reched the road, I went out it a short dictare and secomed come fine opening of alder. From the appearance, I should cay that it were in bloom. after getting the alder, retained to city and ment to park, where I got specimens of Popular. arrived

home about 1 P. M.

23. along the Sunpowder River from Harford R'd to Look Raver the home 962. by my of Gronwell Bridge Rd to Yowson. Met K, at Hamilton, we then proceeded to Coming from whence we walked to the Sunfander. On way while examining the reeds met the owner of the hotel nearly, he told me that the reede at one time were for more numerous, and that they still were fairly common in the wonder faither. He know the puils ledy chipper and raid it wer a good remedy for parion oak, rub the atin plant on the affected sport. When we reached the river we evered it and I received a fine Cledonia from the cremin of the rock

The day wer very warm so we proceeded down to the spring, here we ate our lunch and drash some of the good water. We then actioned to I dangered Rd and proceeded along stream, Keeping on south bank, The triffe rocks here were clothed with forms, morrer and lichens and we spent some time climbing over them and examining the various species. While in the way of atream seemed

a fine opening of courtre between; no doubt same kind or found father of the atream with Plandian amontacum, while to day, two, was found closely. The day was awfully warm and in spite of our going claim we found that we were clather entirely too warm for such excition. The most interesting part of our tentimes

below the railroad bridge, from the bridge on, it became less ro. When new the Commell Birdy Rd I seemed some fray eyen, Here we went up to the

old mill and got some water. Alder and Hold mer in full blooms.

of On way seemed a fair afreeing beach tree pulally a spirie of Formers.

Builes there two, found also aux dangerfrom, Stellam medie, Lugale computin and Druke werne. It was after 6 P. M. when we nested T, and after 7 P. M. before I arrived home. 26. To the ravine. Trif we made mainly to visit the little poul 963 and get fugi egge. The day wer very pleasant. From I Sepatice in bloom; observed in me care what appeared to be one plant with two kinds of flower, deep blue and white. Digging of the plant it offered as if we short of the plant had the white blossom, where an other had the blue colored once, however, when I examed the speamen very curfully I found that there were really 2 plants, growing as closely together that I thought that their were but me. Sangin are Considered You fly were, we clow found in flower. The Elme, not silver maple, and Capulous alle also are in full bloom. 28 To the rocks at Elvaton. Left home about 8.30 a.m. took can to Browhlyn then proceeded out amapahi Rd to Furnace Branch, thence to hoad leading to Elucton. I found that it took me 13 hre to go from Brooklyn to Marly. armed at road leading to E. I proceeded to school-home, then took the road going eact. This road took me right to the rocke. It was about 11.30 a. M. when I arrived at the rocks. I at once The wine chady work and ate my lunch. Ofter dumen I examined the rocke. My most important find wer a wie lot of Umbilicina papilora. I seemed too some nice cruetore species. There were quite a number of interesting likem, but they were mut getter off windy. Brides the likem there were several spiens of more, one or two hefeties and two forms. After spending nearly time hower at the roche, I proceeded towarde Waterfood. To get to W. continue along road pring the roche until you reach the laye ceden tree new the old short; from this point you can see the road going to W. In did not take me long to reach W. I then proceeded along the Old In it I I to the proceeded along the Old Will Rd, It were my intention to enter the words and cullet a few Cledonia near the old ruin, but I mised the place comehow or other, no doubt on act of the devartation observed, for all through the word beautiful chestrate tree had been felled. When some dictance out The road and close to the open country I found a pretty patch of Cladarie wetterlate : at armigin I beared that the stress went of Roch Couch ar I decided to go to the head of the creek and there take bout for home. I arrived at what about 4 P.M. and hed a wait of 1/2 his hefre boot started back on return trip. We arrived in Batte about 7.15 P.M. Stemm gon to R. C. every Monday, Wednesday, Thursday and Saturday and to Stone Cuch, Turday and Friday I found that it took exactly 30 minutes to make trip from boat home.

965

30 % Benfield and vicinity. Left home early, took 6.38 a. M. train for blenburnie; arriving there about 7 a. M. Sit out at once for B. Before reaching achool house twent in to left and picked my way to Obrechte raw-mill. This was not a very eary undertaking but ance ded finding the place. Arisind at the mill and stopped for rome time to see several loge converted into humber. I then fished out one of the several roads beding to the mill, one that seemed to go most nearly south, and followed it. after a long walk I finally reached the road, right at short where I turn it to find Schminitgia. To-day, however, I did not feel in human of visiting sport, for day were very hot, besides, I had other things in view, so continued out the road to Back Ruch and proceeded to the Boiling Spring where I ate my hunch. after dinner I proceeded along stream to road collecting two behins on way, arrived at road I contined in to B. then to old will then to dam and then up along right bank inde of streams. by godin and arbutur mee found every where, arbutur an billide and by goduring generally at foot, The trif along stream was grite trying, but finally came out at road. Proceeded then to b. where took their for home Is. One of the most disagreeable mornings There experienced for a long time I wished to go to Lutherville, so took can to Formion. The try along road from I. down to where I enter the words were wided most trying, even in the wonder it were had to feel comfortable. I was on the look out for propegge and soon record a mice lot. At lest food, one protected from north and north-unt winds by a tell embanhment? formed it quote pleasant, es stopped to cet lunch. Thee I observed a nice lot of stammate & putillate willows. after eating my lunch I proceeded to L. there along railroad trucke to the swampy grounds just beyond station. Here I received some fine specimen of Skunh Califye. Here too, I received some fine Toriza of willow both stammate & pictillate. Towards more the weather became bloom. I we surpried at this for I thought that then would be some appreciable difference in time of flowering done to locality armied but in Tomm by about 5 P. Mr. weeking home an home letter

967.

966

3. First trip with bottomy class. to Clifton Fash to atedy confere soften showing them has to diction good different familie we stated as return trip. I have then 30 members were present. The day was delightful.

968

6. A trif with K. along Herring Rune. Conother change in the weather. a could h. E. wind blowing, air raw, and disagreeable feels like maw. Philadelphia road covered with an wich or two of dust, every team that passage raises clouds of it which the wind carrier to one cide. Notwithstanding our walking on the windward side we found our trif most disagreeable on account of it. When we reached the run, we took the right bank, going our same rout we took on a present former oceasion. I had hoped

to find pays eggs, but failed to find any. Was on the look out in field near shot where we ate our lunch. Before enting we wilt a fine and found it most agreeable, after durine ? sumed a specime of Symplocarpur, this was quite a task, the rootstock being fully one fout below the surface, after recurry sprime we continued our trusp . Soon came to spot where Podophyllow was quite abundant and I received rome mice spenimen. Here two, grew Sangumarie but could find no Indian Turmy, When new railroad (P.R.R.) we found a little Cubutur. nothing more of interest was found and when we reached Eastern hu, we went to Hollywood and There took car for home 7. To Brooklyn to get from eggs. Morning raw, but not quite as diagreeable as yesterday. Searched the little ravine very carefully but found no eggs. At the spring I found Pelia in fruit. 969. I wished also to get a few specimen of ariseme but could find only one specimen, Smilacine, however, were to be found in quantity On way home, it began to rain and did so rest of day. 9. Rain and Snow all morning. Had hoped to make an extensive 970 trif to-day but weather was too disqueeble. Left home about 10 a. M. took can to Catan an. Visited pande in woods, with the bope of finding a few frozi egge but failed to find any. At my hunch in a little revine in these woods. After dinne proceeded to Landown. I hoped to find the pands but did not get to them. although the region booked very similar to the one where they are. The spot that I finally reached were they are. quite an interesting one. I visited the little pords but found no propy year. The cedan however with their ceder apple rending out those long foreine were most interesting and I received a number of exercision. This? think is quite early for them to be no conspicuous. On homewood trif, took route should not. Winain and Weefast. Visited the deep cut and saw the turnel now nearing completion. arrived home before 5 P. M. 12. With class along Buymin Falle. a cold new wind blowing all morning 971. about 3 P.M. a drygling rain, continuing about I hour. One member alone brane roeather. Elm are in full bloom. Prickly ach just beginning. 13. another unpleasant oping day with much wind; much more pleasant 972. however than yesterday. Left home about 9 a.m. It wer 10 o'cluck when I reached Hilton av. I had decided to take the route along hox Run visiting on the way the Equietum locality. Failing to find the shot, and seeing that a portable row will had been creeted in the ranine off to the left, I made my way in that direction. Here, sure enough, was a mill in full operation; here, two, a stone crucher is soon to be cruited.

The mill has only her in running order two days, but already one sees ruthless destruction all around; what will this he in a short time Having once entered the ravine, I continued through it and found as I already surmised that it was he head of the ravine of hox kim, ate bunch at some apart when let in the ranne, on a laye fallen tree trunk spanning the stream. after durine continued orward, stapping it the spot where I had transplanted the Ostrich Fern and also at spot where the Calla had been planted, but I failed to find either. Toollowing blants were found in bloom: Anemonella, Ey thomism, Dentaria Luzula, Lindera, Diria, Poa, Hepatria, and acarum juit as I was leaving the ravine, on the railrand embankment One reason for taking this trip was to get specimen of Egunetum awaring There can always be found along the railward new the ravine and I room had my decired number of specimine. Fittle specimen are room getten but it is quite difficult to find sterile speamen of any size. I kept a lookout for three and later found a nice lot of them in the opingy ground along the Rivin Rd at the efot where I had planted a specime of Calle.
Here too, I failed to find the plant, fear, however, that I did not look in exactly the right place. While on Rivin Rd I received come fine exercises of Engthworning, found also plenty of Dentine, Viole scaling and is just coming into bloom, and so two acadis tenfolis. Decenter and Vegeta bluhome were in pull bloom, as two, Congolalis flamely and Luyale verniling. Vicited my Trilling grandiflorum shot and found one speemin coming up. I proceeded now along river to Pataprev. Here alag P. R. R. embankment I found Equiretim around in great quantity. I now started howevered, turing off only at path leading from north ride of the railroad bridge. Here in the allowed evil along the little stream I found rome more nice, specimin of the Equiretum and again later at the B & O, visdut, also in mosel ground. while on my way home I noted various spate where I could get aprecious of Equition and observed that I could find them about all slay the rail and, particularly favorable aporte were the following at high bridge crossing rails and mean handown and at rails and bridge mean but Winan. Realed home about 6.30 P.M.

973. 15. With Botany Clare from Windson Wille along the falls to Deed Run; along the run just a short distance, then back to the falls then to Walbrook. The afternoon was quite pleasant and encybrody seemed to enjoy the trip

974. 16. Along the bunfowder Rim from Harford Rid to hong breen Branch then along the branch to Harford Rid then buch again to the rim and finally to Carry. It was cloudy nearly all day. I was particularly amison to find Equiette and by thronium. Both was quite hard to get, a. The Equiettem was obtained

here and there, in small quantity, by thornin was very hard to get. a number of place wie passed but never any flowers; at let one short was found and 35 blocsome obtained; then again a number of patelin and no bloccome but finely right at one of the tributions the one before Long brew Rem there was a whole hillaide of bloccom Egnisten heide mer formt skedding spore. To-day I decided to go along Long Green Rim. The evening here is very futly only the distance is too what. On the works many lichen were observed but I runed only one. at me spot, too, some Trilliam were coming up. This little raine is worth a more coneful annuy than I were able to give it to-day. Reached Harford Rd at a point about 13 mile from Baltimare, 5 mile for Carry. The trip back to car were rether unintenting.

19. A driggling rain all morning, but towards 3 o'clock it began to clear; 975, at 1/2 port 3, thurfore, I took can for Window Hills. 4 members of the bottomy class were there. All seemed any ion to take the trip, notwithstand ing the dampine and raw atmosphere. We therefore proceeded to road, crossed the bridge and then went along the falle towards Franklin Rid, then along Franklin R'd to road leding to Bonnie Bree, a number of intentig things were observed. I were glad to get a few sterile specimen of Eguntum arvene at the springy shot near Baruth's 20. Along the burhowder River from Harford R'd to Boldpir R'd

taking wouth side or right bank, The day wer fretly although the in we cold and then was much wind. Right from the start I found the trip in-teresting, a well-made path maker travelling every, and yet it was sufficiently over grown not to detract. On of the first things that I looked out for was the Mertenia. There was so much of it seen on the offorte shore, so, here two, there were very much of it. It is now just showing bud, but in two weeks time, it will be a owner of flowers. It is interesting to see how drouped and coiled over the tipe of three plante are, as if hugging the ground to heep worm. I had not proceeded very far when I found opening of willow, pirtillate, My next effort was to get specimen of Equicitum arvenue. I had much trouble finding opinion; finally however, at two flacer, I found very much of it, atvile ponde, however, which I were farticularly and wine to obtain were not observed anywhere, notwithstending my very could reach and my experience of finding them generally (that is now so early in season) in springy place. Equisition

hiemale was observed in several places but not as abundantly as on the other side. Camptosom was abserved in a number of places. Brother interest ing fact was that there were so many more Eagthornoon on this side and so many more in bloom. Dientra was found, just as on offinite side; but only a few plants of Congdalia. Many side naviner were crossed and all lowhed interesting and worth further study. In one or two places were futly careadie.

976.

The carender were very pretty, one particularly ro. I climbed the hill to are it along to entire dictance, hoping to find comething new on the way, but the acason is too early and two backward for this. I likewise followed a stream up one of the ravines for quite a distance Interesting swampy aboute were observed covered with showth carbige and Veratrum viride: I hoped to find Calthe palantine, but none was ravince, where a very laye colony of Ortrich from had become establish hart your futile fronds were still in indence. Coach from stood out boldly from the ground showing a minature truth, Continuing oursel along stream of came to what still remained of a one-time saw mill The file of canduit, the cut-side slabe, little cut-off price of wood and a few fogether plantes, now all moldary into dust showed what destrictive work was going on there year ago. The interesting trip finally came to an about clase, a large field ed the field the bridge came into view and in a little while I was on the rand. I was quite surpried whom looking at my match to find it was 5.15 P.M. . a long trip of & mile along a duty road was not so very agreeable, reprintly as after feeling tried, and a strong wind maken I was mutaken by a man in a buggy, who handly asked if I could to ride, This offer was should, accepted and very soon we were moving along a little more lively. My trif to the can were made in an home and a quarter initied of once 2 hre, as it would have taken. The man had come from beyond Belier a distance of more than 16 miles in 2 hours. 22. With Monday Section to Blue Bell hill, West arlington, then through work towards Mit. Hope grounds to Liberty Pike, then to car at Beryam Oak Juste The day was pretty but towards evening it became cloudy, Blue Bill were quite crace, too late in ceason and too many pickers. In woods we found anema nemove in full bloom. Also Engthrousin and Dentarie 23. During the night it began to rain and continued to do so all night When I got up it still was raining, but by time I were ready to go out it was only cloudy. My tip to-day were from Forozan to Hampton, then though words to Prostidence; then out the road a short distance and entering woods on the left finally crossing the ridge and getting to look Ram, just north of the water trough. I then proceeded to blen Ellen from whener I proceeded toward Hampton and Tomon. When I turned in to each path leading to Providen I proceeded up the road a short distance to the Frullain Britain rocks, where I collected more of this hepatic and also a lichen. My ider of going up this path inited of going past the home were to find that amell path leading through the woods, hot finding it reedily I entered the woods & maked

977,

67 8.

my way over to it. On way picked uf two very frethy woody fings. The damp atmorphise, the heavy rain of let night, were just the things to bring out the low form of plant life. There wordy fings lowhed indeed heartiful and so too did all the bihim it the befitier and the morees. I ate my lunch on a fellow tree trunk lying across the path . After dime I continued award to Providence. In woods found had a thing blooming. The swampy arese along the stream lowhed very putly with their new growthe of Heratum and Symphocarpur. On road beyond Pravidence I was able to collect a few cherry bloccome. Here too, I met a former who was very everable. I do not know if I mind the old path or not at any rate I prouded all the may to the opening in the fince . Here a will marked path but luck into the woods. The path room folio but I took the left head fish and did this each time I came to a fuh. This part of my trif wir most interesting. Throughout the woods green Pyrole in the greatest profusion. In one place I found a plant affected by a runt. I thought my fath would lead to the spring at the water-trugh, but I man mistaken. Had I me doubt take the right fach just before going of the hill I would mo doubt have gone to the sport. On it were however, I covered the little browk I rewhed the cut of the hill; here, lying before my over the putty ctream. I had come to Earth Raw just at the big bend a chost dictance above the water trugh. My path wow had along the libride down to the road-way. around how I continued my trip by haverding along road to the 3-arched bridge. On the hilleride when the Lycopodium clavatum grown I collected reveal Clademe. Diente the continued orward to Blen Ellen. I had arem byone to rain, & continued to do so the rest of the day. At hime it I found him very pleasant. He is tended to me a most pleasant inarrived home about 6. 20 P. M.

979. 26. Another portfound trip for the botany clave. Just as we were to meet, black clouds appeared in the west and before reaching an destination, it began to rain. Some it were coming down in torrests and Park Heights are bonked like a flowing atream of water. Notwethatanding the downfour, however ten member appeared ready for the trent. After the first chomer, it bonked as if it would clear and some were ready to risk the weether. In feet a number of we started, but distant thunder cannot all to turn been but I'X & song oulf. We had must proceeded for along Brea Spring an. before it began to rain I continue

980.

981.

to do so until we reached the car tracks. At times it found down, so we were quite roaked by the time we boarded the car. The trip is quite interesting and had the weether bear clear we would have enjoyed it very much. I was pleased to find a laye colony of Equietion assure still in good condition in left ride of road just a short dutance beyond Shirly Lane, Cherry blocson were not lowling very good, the rain having injured them. 27. Rocks of Den Cuch. Left Baltimore on the 7.30 a. M. arriving at the Rocke about 9.30 a.m. We at once (Member of Read) set out for the high rocks. Our first find was made on the way to the bridge, here, on the right eide of the road on the rocke we found Deplenin montanin, at first I thought it night he a. Bredleye and it was only later that I can that my specine had elipe only from and not from throughout at is the case with a. Bully after evering bridge our finds became quite munerous, brantiful patcher of Dicentra and of Enythronim were found all along one tramp. At the stable, we climbed the hillaide and before long were at the top. The view from these high rocks is rufuel. Every body was anxiom to see the King's chair and the queen's chair, and to sit in them. We ate our lunch in the comcil chamber. after dunner we decembed the helbide. We touched the road right at a cottage. Here we asked about drinking water and beamed that there was a spring below the house. Here we got a drink and cultitud come fine specimen of Englithmorem. Right close to the home your some fine Veronica Baybamie. Coming back to the along the road. Coming beck me found a nin spring on the left back of the road. Just beyond the bridge spring we found a hillinde could with Engerfrod no doubt be very profitable. We findly get back to the station but having still a wait of 20 minute, some of me divided to go down the the to ach a short distance, this we did returning in time for the train. The rock was covered with Untilicence partileta.

28 With W. a P. to Catomille. We got off the car at Ingleside Ro. then proceeded towards the Relay Rd. The reason for taking—this trif was to get change blockome. Linte a much of chary their were found to that by the time I reached Williams an. I had executed enough specimes. We, thenfee, shouted on the return trif taking Wilkins an. for the route homeword. Violets were for everywhere, but at the interestion of the time are they are no professe that the ground were colored blue. I have now before are them so plentiful. On Wilhins an. I pound ture very futly change their a med down the slope of the hill on the try right cide of the road, and the other guite a small tree and no doubt an excepted cultivated variety on the left cide. Dogument in found almost in bloom in a member of places. The Judes tree ones almost in full bloom. Pear true are now in full bloom. The day man cloudy, rather chilly, and from eat.

982. Dr. Genie brought a frainier of Helleborn visidie, which came rom Falleton, Narad Co., Md.

983.

29. With Botany Class along Herring Rem. The class was well attendet. The day was perfect meither too cold now too warm, in fact an ideal spring day. We took the wend rout. To-day spring heartie were in all thin glong. Nothing new was observed.

in all their glory. Nothing new wer observed.

30. Forest Home, Waterfued, and vicinity. Left home about 7.30 at animing in Browklyn 8 a. Mr. I, at once, set aut for Islenburine, arining there a little after 9 a. Mr. then I proceeded to Marky. One way found Iris verna in bloom and collected afrom Myrica asplantation. Armed at Money I proceeded to Front Home and from these to the Itelomical locality where I found the plant in full bloom, then were fewer blooming plants this year than last year, I headly think that there were over 50 plants in flower. I proceeded to my marked locality and noted the following

Orly one blooming plant wer observed (0) [See pp. 80, 164, 261 in other bunks Okenie is nown in bloom and Maiathermen in coming up every where. I am stated as return trip, seemed time Savacenia plante new the bridge and then made my way to Electric. On way much Mr. Wood . The her aged very much since I cam him last. From Electron I went to Weterford. Keft a charp both and for apple & peur bloosom but they were mot to be hel. When gent close to Waterford I passed several there, but they were too new the house to get aprecion. I had out nown to defend for afreine whom those new the old hat. I have I remed some fairly good blovecome. Charling at my watch I mutical that it were about 4.15 PM. so I rest out. for the host arising three a little before 5 P. M. The boat wer quite lete and ev it was about 7.30 before we arraid in lower

3. With Botany Clear from Dichyville to Guynn Oak Junction. Although the morning were very cloudy, it cleared before moon, and the afternoon was almost perfect. The clear showed up well. We started from the far side of the new bridge, but room learned that we would have done bitter to start faither up the road where the can leave the main road. We took the armal route. A great many flower were found and every body was pleased. As we crossed the field we came upon Vironice pergins in goet profusion; here two was a fret

984.

May 4-14. - 1907. 36 more, which was quite new to me. Physicometrine tubication - Ulm More 4. Through the raine beyond the leaves Morning stightly cloudy, Tooking like rain, but clearing before reaching It Thomas only to cloud up andderly followed by shower of rain, there in turn followed by heavy winds 985. and clear weather. I touch the went route. On way found a flow Enythonin still the in planer, and executed some for clear work. I were on the look-out for apple blown, but although I found many there is full blown could not execute any, as they were all in orchards. Drymond is now in full bloom, so I record some for clear works. Nothing were nower noted until I came to the conducy road. There in bloom Hound Stieta pulmonaine. one found a great profriend of wild folion in fell blown. at the Calthe plan the sport men yellow with blossom. I ate my lunch at the spring, then founded down along the left bank after being the raine, I proceeded towards Piliwille where I took Can for home 7. To the Old Furnace and vicinity. My trip to-day were mainly to get app 986. blossome and Dagwood flower. Dogwood of come was very common, but apple blossom were not so common. The following place, however. \* One also beyond the spring before reaching the branch. were noted, one short were helie, then on sub ride of road new Stallings next at old furnace, one at spiny, one in road and one near the branch. In write is in full bloom, Found Cypinfedium acarde in bloom. my best find, however, was the finding of Paralle Bouri we reducte in paint, it was growing on a Corum floride, Infirm we about in flower, the color of blocom being clearly seem. took the and route as far as the old will. When we reached the old will 987 mont a few of an decided to go on along the stream. This we did & found it 11. Along the Sunpowder, heft home for Carry about & a. M. but 988 through an overright mised commution at Hamilton them rewhied C. at 9.45 I set out at once for the sunpowder. To-day decided to go up stram on left bank. The trip was quite a putty one. Not for from the road I came whom a fine patch of Valurianelle. The hillinds was consul with pretty flower but nothing particularly interesting atruck my fanay. a much of please were passed, that sumed particularly rich, but in ech cree I was rather disappointed. For some ditame a well-maked wayn path leads along the river, then leave the stream and arcust a side ravine. Just bey and this point it quite a regularitie little area, quite a pretty place to eat lunch, For some distance the river is quite putly, and and two fellow companion - I was a to the railward bridge, here a wide stream cells a hatt to further progress, and I was obliged to go up ite a short

dictance before I could crose . From the reshould bridge up to Commell bridge is a lage meedow, bordering the river bank are beautiful trave maily welmts a sycamore, both were almost in flower. On the back of me of the walnute I recent two lickens, one I think a Phyrica but the atter ounters and apparently new to me. Armid at Conwell bulge I crossed the stream, must up to the apring them returned to Crimell Bridge Rd and proceeded to Lock Raver. In reverle place along the faction of my trip, I found Mortenie in full bloom. Here too were gellow violet, I believe true V. pulmen. Arrived at hoch Ram I left the road and continue along the river. Went the Sate House I met Dr. J. his unfe and I companies. Nothing particularly interesting were now obscured until I can to mud machine, located now just a short distance below the water trough; here I found a futly evertue laken. I continued onward to the path beding from top of the hill, the one I came down only a short time ago (v. apr. 23). I now decided to retrace they trip taken in that occurring, stoffing first at the spring which field the witer trough, but this soon fund impossible, When I looked for the path buding to the spring I failed to find it so decided not to investigate until some other time. West I failed to find the path taken on that occasion it, no doubt were a narrow path, but I stuck to the board path ; very come there were two broad poths crossing each other, one arounded a hill side might. The me decending was very interesting and the little result close by rund rich in intructing finds, but I come saw that it no doubt for ended down to the river. I thurfure took the path according and found that it were taking me in the right direction, although not the one I had take previously. The path led me through some pretty pather of Underice a Obolarie. When I finally came to Providence Rid I can that I were some dictance below the fath I took in opinil. The trip and Cyprifiedin in blown. Observed two severel places when I could have gottin apple blorrome, When I arrived at the of it where in former year ) got Paymir verticillate I much a hearty Rearch but failed to fail a ringle plant, possibly it were because of my houry. armid at Turn about 7 7. In and home it about 8 P. M. 14. a trip along the Pataprev. Left home 7.30 Q. M. and arrived at Rolling Rd an hour later. Proceeded over went route to the old pumphouse where I looked up the patch of Marchantia, I found it, but it was an ruch a hed state that I fint paned over it. I now proceeded along the river, hound arisame triphyllum everywhere but a. Dracoutism was just perfing above ground. Here, two, I found a number of Viole acabiciocale atill in bloom. Papar is just beginning to bloom. It Union Dam quite clase

989.

990 17. From Roland Park to Mt. Washington with Botany Cleve. The afternoon were most pleasant. New cottages recently fielt have could the destruction of that petty statch of woods that we parcel through lest year. We had therefore a long statch of wounteresting well to make before we could enter the woods. The face of woods beyond the car bern proved quite interesting, especially that pat new the sout shouts of Mt. W. here we formed a most bentiful patch of Vivile pedate, and among them an alling 18. To the Falle of the Potomae with botany clave and section of

18. To the Falle of the Potomae with botamy clare and section of the Academy. We left Camden station on the 8 R. M. train, ariving in W. an hour later We proceeded at once to the botained gardene where at left an home and a helf were spent. Just before reaching the entrance we parced a Palif tree with ovate lancolate leaves close to it were severel of our ordinary form of the tree. In the garden were many things that intended we, but what, possibly interested as must of all were the putty tree form in the conservatory. After leaving the garden we took the Seozetown car (green car) and in about helf an hour were at our destination. Here we were in time to take the car for seent Falle, but as it were co considered

we decided to want for the next. This we did and in due time arrived at the falle. We proceeded at once to the rocks, there to enjoy the beautiful owner before we. For come time, this recent to be upper our

enjoy the beatful owner before we. For come time, this reund to be upperaind in the minds of all, We then found a khady short and ate over lunch, after which a transparing the rocks and towned a short for something to drink On the rocks we found Sedum ternatum and Phlox subulate, both in great profusion and along the path Eupho to the subulate.

commutate, Ellie Mydelie, and Phonelie pamplon.

Ofter reperhing ownelver, we started on our little butamical trip up the riner or far as the dam. On the way a rumber of intenting things

dentete Our trif up and down again along the river were a must enjoyable one. When we reached the felle again it was close on to fine veloche. In the coft light of evening arm they remed to be at their best, so we cat among the rocks and fett both to leave the beautiful views before we. We get together the remain of our morning bunch and made a short report, then started aboutly and reluctantly back to the care. It were almost 8 o'clock when we get buch to leageton and about 8. 15 when we reached the Conquerional Library where we apent nearly an hour. I rom where we made me way back to the station in time to take the 9.30 train arriving in Balto. about 10.30. On trif, beide finding 11 new plate, found 78 plante in blown. Just as me imme starting from the fells me four member found some frie spremin of Square Rout. 20. With bottomy class to Centra Bay. We can the Midletue on the bij gum true and were pleased to find again a nice but of Myonothiourne after making a trip over the wend route, we preceded toward the big free and then walked along the chore and towards Stonehouse Come. The Trip was enjoyed very much by all. 21. A chart trip to Browkly and vicinity. Will change blockown were collected, heide Mulling, Pape Mulling, etc. Mit Dr. Rohmin and mule arrangement with him to go to blenburine with him next week.

22-24. Afternoon of 22 after the academy onceting started for N. Y. arrange there in the evening about 11 P.M. Through the kindness of a fellow passenger learned that the Victoria 27th St and Broadway were a first clase hotel and decided to go there. On 23, proceeded early in morning, to the ann. Much of nat History, where the delighter of the various cociding one to meet. Here I met Dr Honey and Dr Bretton and mee directed where to meet the other delegater. Before this meeting, however, on Is M. B. C. had a little meeting of ite own and here, I met beside Mu allen and Mr. Matin, Mif Kanfinen, Mif holl, and Mr. Holy hoff. Mr. H. het prepared a mie paper which we reed by Mip K. after reeding of the paper we proceeded of etair. I joined the delegater and at about 10.30 R. hr. we made on way to the room selected for the excession, There the ax pression of good wisher etc, brought by the deligater were reed and I had offortunity to read my paper upon the humledge Lime had of our had plants and about the plant he called Battimore recta. after the reports of the deligater came the address of the morning with experient reference to himin Brong. Then a trif to the Hermitye, where we had a very good driver

992

993

994

After driver we proceeded to the main hell of the Botanicel Here we had a chance to see pured specimen of himman plants Too little time had been allowed for this and I can but where little of this interesting collection. We were sched to an arembly hall and here again we were treated to some more himmon hictory, Then a number of the most beautiful clider I have ever seen were exhibited. after there exercise there was a harty trif though the gardene to the new bridge dedicated to Lumini. The more exercise was obrused, after which we had a trip through the Zoolegical garden While we were observing the exercise at the bridge Mr. Elle put in his appearance. after a bacty trip though the zoological garden we started down town, that is the member of on B. M. B. C to have a little remain of our own. Mr. Elle found a min rectament, where we had a min little dumin. after dinner we proceeded to the agranin here we met me a me Hologheff, Mip Brained, beide Mr Spencer the cutodian of the agrain, and a Nip Burn of the teacher training school at Jamain. On how a more at the agrain and then we started brommand each to his respective domical. Were Mentin and Mr. allen left fait in feet Mif Brains did not accompany we are her counte were
toward Brothy. Then I left. The day had been expect must enjoyably
On Friday 24 made a trip down town, did not vide as I wished to see
the city. Here took can for Brothyn and with Brothyn Wigh School
for Bryn, where I met De Grant hinder De Itale the teacher of chemistry
his architect ste. Left D. S. and proceeded to 78 Orange St and there net Mr Smith & Mij Warner. spending a must enging alle Ih he with them I was started back for n. J., on I had planty of time I willed. This station and due time home.

25. With Ruch and other on the Delight. a cloudy day but 995 neverthe bur enjoyed & full of incidente. We proceeded to Chain wonde when I succeeded in getting bot an cal opinimum. Cypin pedim search is still in bloom. Armiel home about 7 P. M.

27. With botany clave to woode new Holly wood Park, Back Por Lew cother racewore was found in Jull bloom. We took the route as on the Journe occasion. Pogonic verticillate was still found in bloom and also a specime of Cypripadium accule.

28. To Islendownie. Dr. R. was anxiom to are the Pitcher Phinis bloom, called for him, therefore about 9.30 Q.M. He was ready in a few minutes and before long we were on our way to the por 976

997

We turned in at Wagner, and then the doctor tound stild his brace to a tree & we walked along the shore to the Sarrein breakty. They were in full bloom and we recented reverly fine specimen. I took the doctor never brech to his carriage and he stuted back for home. I now proceeded through the woods. Atte my hunch in the old mill rang and meet by collected a putty Cladonic. I waked my way back to the road & the attend the woods in ent side, found laping premise in full bloom and in great profession, found Kalmi argust form likewine in bloom. I enjoyed this part of my trip very much and covered some new ground. But back to the road again and walked along the new road to the branch, where collected some Jack in the Pulpits. On way back to the road passed things Welmin. Stated new howevered, but at Pumphy again entered woods and cut assom country to the road to P'a station. In way collecting fine specimin of Jack in the Pulpit. Among home about 7 P. M.

998

I publican found near the love when the one lameh.

Decoration Day. With bottomy clear from Pornous to Lick Ram.
We must at about 9 A. Mr. provended along Dalamy Wally Pike
to Hampdom, then they I Hampdom and the menor pall to Principle
While passing through H. we met Mr. & Mr. Ridgely. I had no trobbe
failing the path. When we received the consumply are we atopped
a from moments to are what might be found. Here a petty application
was found. I seewed moment for the Equiration exploration and
after a little security found it. On it were getting men to 120 clock
we lacked for a fetty work on the hillaide and ale bunch. After
during we started owned passed through Providen and then turned
into the woods. I had held to find the fatty forth through the
Pyrole region but mind it so touch the same route as on my
last trip. This time I had little trouble finding the spring
We all decended the hillaide and there unjoyed the coul write. We
then task the fatt december the hillaide. The view wome is an
longer as futty or drawing the winter the true obliteating all eight of the
stream. When we were on the round we started for the station, but so we
had plaity of time we moved along quite slowing. Our 100 plants were found
in bloom:

31 With Boten, Wales from Shirly have x Pinlio Rol Te Woods

999

31 With Boten, Color from Shirly have & Pinhio Red The Wondling Duly a few members were present, no doubt third from the all-day truly yesterday. The few that were present enjoyed the trip as unach the more. Nothing particularly new war observed. We had a chance to compare a few species of ash. as the whote the blue, and the blue. Threathering weather, two, may have been partly the cause of the remallows of

1009.

15. To Mayothy Bodkin Point by way of the Delight, Left home about 9 a. M. met member of Botamiel Section and of Botamy claver at 14 Juliand town. Started for Riverview at 10.15 a. M. and we able to Here about the boat by 10.30 a. M. For a time things went mind but sometime before reaching the white rocks we were becalmed and the form but wer called to our assistance. We ate bunch while lying off the white rocke. Som afterweeds the breeze strong that and we your started off reaching on distriction at 2.15 P. Mr. It were now our intention to go to the buried frest and then to the light home. This we idea however that the fruit locality was so for off and are a consequence we were able to see it only. Ofter landing we covered a fild and after rushing a fath followed it around to the main road. this ted was followed until we came to the woods where a faith was taken which lude about directly to the facit. The path reacher the bay at a little distance below the faut and to see it in its entirity we had to walk along the shore this was not so easily done as the tide was juite high but several who were ahead made the trip and we all followed . On this part of one trif Mr. n. but his watch, and did not notice his love until after reaching the road when he thought it wales to try to re-cover it. By the time we got buch to the boat it was after 4 P. M. but by the time we were under way it was after 5 o'clock. The trip homewood was full of incident. the wind what little there was, was deed ahead. Still as long as it lested we misade use of it. With the setting of the run it died down completely and without the aid of one and thing we would have been left completely to the mercy of the tide This little boat, homen, did good work, and for a time all went well Some hower, the captain noticed that the exhaut was not working this meant a delay of one half an how. I tommer we were not own any in and after the delay started owned again. Things were
going mich when the gasoline gave out. Fortunitely we were with
calling distance of Florida, but as it was already after 9 P.M. nearly
all of the members were consided into time bouts and taken as have the
few folks about their get the boat under way and slowly started on ward. It was gite a while before the power boat appeared again It reems at if some difficulty had been at period in getting the gradue, homen 3 gal. had been obtained and we again started owned with the transition of the power but. At first it was decided to go to Rim Vin, but when it was learned that the case we doubt had stiffed running we decided to go onward to hit Melteny. Their was done realing it about 2 a. m. It did not take in long to reach shore and start homeward, By the Time the car came up I was so meanly home, "I did not take it, reached home about 2.15 a. M.

1010

The day were disappearably warm and we shortened one trip accordingly. We first visited the old comff smill, more an old rain anagement with vinite who the path leading to the oping. The walk clay this path were gente pleasent and we found it gite a relife to be out of the run. We did not continued along this path homeon, but took a side path leading to the car, crossed the trucks and artered wonde to one right. We preceded night though the winde to been Sp. and then down the assert Believe to Believe and out the truth were to continue orward to Shirty have but the temporative was too host, so we decided to go out Believe and and tale the con at the Diving Park.

1011

21. With Botany clave to the ravine. We must at the terminate me about 3 P. M., however, by the time we started it was nearly 4 o'clock. We proceeded down Hilton an to the path leading to has Run. My intention were to go over our old route, but the road her changed considerably since my last visit; a wide deeply rutted wagen path lede to the pine. We followed this road. I kept a sheet look out for the old path but mused it. I had thought to work my way to the main stream, This was easily done. When I reached The trif though the revine was enjoyed by all, Kalin was found that the ripe carpile of the Beramin. Bestift ferms were found in the greatest profusion. At two different sports a putty Clavain-like frague wer found, pulipe surgloceren the would better decembe it, only they were white with a poundary spore-like powder. They were growing on decaying hark. It was about 6.30 when we reached the mouth of the rame and we were ready to climb the hill to the Observatory, where we ate one lunch. We remained on the rock for some time, in feet, we hy returned to the railroad. I had intended going home by way of the puth along the creek of the hill, but as it was no late decided to go, instead by way of Wilton an. This we did. The moon was arining beautifully, and one trip up the road through the woods was a must enjoyable one. We reached the care by 9,15 P. M. and in how late most of us were home.

1012

Station in time to take the 8.45 Q. Mr. train. On we all thought that the train left at 8.30 we were fully 30 minute ahead of Time. On this was to be one last trip until the fell the member turned out aftendidly, in afite of the cloudy weather. Another recom for members to show up so well, was that we intended suckey Mr. K. who

here let we have the we of his boot so many timer, a present. When the time came for leaving, friend 14, had not put in his spread persone. This was very unfaturate and most of we were kearly disappointed. The present we wished to give him was on hand, and we had intended tehing then it along with we, but as it were and we had intended tehing then it along with we, but as it were we decided to charle the package, and I made arrangements to get friend K. at station when we should return to the city in evering at 8 P. Mr. . We were boarded the train and are home letter more at R.B. My first intention were to visit the Poyonic place men the Mayethy and then letter go to the hitel but are meanly every body had a large parkage, besider an embelle, for it looked very much like rain when we started, we divided to go to the lottel first and leave our packages there. When I left the can et R. B., I observed that the station was not longer at exactly the same spot, the tracks had been straightened and this mude comiderable change. a colored man close by told we how to get to the station hotel. Our way led through a pretty wood. Mr. h. where sheed, he had been over the ground before and so should have known excetty how to go to tiplace, but for some reman or other, he had forgotton & when he reached the old track which heed down to the grounds he turned in the officite direction. When I resolut the spot I we tild of it by one of the ladie in my certian. I at once trued to find him, calling him a number of thomas, but getting no arriver I thought that possibly after all, he know him way & were should at the beach. I went buck to my section, but ar Ming B, invisted that they could not have getter ahead of one, I went back again for them, but as I still get no amount I decided to by no larger, for they would everly some been their mintake and get back to livel, the I: went back again and in a little while were down at the hotel. We were here fully helf an how and as Mr. n. with his party still died not put in an appearance I decided to look him up. This I did and findly I heard him. By the him we were all together it was 11 o'clock. It was wom to close to dime time to go for away so we walked along the shore towards Howards. An intenting observation were here brought to one notice by Mm Mayor. She found that the Verm horhing below discurrented the such rather peculiarly. At the bottom of each capeale was a thin manbrane which broke away and the reeds dropped out through this opening. Then too we found Samolin. We got buch to our camp by noon and then we ate our lunch. After durine, one rested a little while and the started on our botamiel trip. I took the norte along the above, then though the words to railroad, then men to the evenberry remainly, and back to the hotel. Over 70 plante wer found. Mittalle wer in full bloom

and we had offortunity to see the two forms of flower - those with lay stamm and those with lay styles, we observed too, just as with Houstonic that some of the flower are concline 3 - patel, and rometimes 5- pated. When we started for the cranbung sweet, I had a little difficulty finding the path no doubt because of the straightening of the road, and after finding it deafterwards but my may. I had the ledin : to be certed and hm h. & I. went back over the road and finally I found want route. Mr. h. the went back for believe and one went own the rest of my to the by. By the time I get beek they were wally for me and me all set out together. The whole centery again comed much intent, also the exposer and the fully magnoliar. Before suching the bog me stopped at the aping or repealed onceler, here two a few decided to rect and await the action of the other. Everybody that went to the boy wer delighted for her the Poyonier were in full bloom, also the cranburus, and here too we found Tha. We now returned to our companion at the opining and then we started buch for the hetal, On the return I saw where I made the mital the path I ahould have taken mer pathy overgrown & passed it We get back to the lotel by 5 o'clock, We now had a nice little rest until nearly 70'clock, when we started for the station. Our train was we time and a little after & we were back in Canden Station, here we found Mr. K. aweiting use and in a little while we were all together a presented him with the cups & samen, all rielly insented with O elight of Bello. He appricated the fruit very much. 28. With Mr. h. want Mr. & Mr. Malong Western Rum. We mit at T. at 8.15 a. M. but as we expected friend Koline awaited the next car It was therefore almost 8.30 when we set out for &. The moning was cool, but we room felt that it was getting warm. I took the usual route through the woods. With the exception of a hope heep of fungue at the bare of a tree, knowlking particularly intenting march. It took we about so minutes to make the try. It was 15 minutes later when we armid at C are me wished to rea the markle granier we remained in can getting ant. It ameditare dom'the curve. after reing the grance we returned to and then started on our trif elmy the strams. The ground wer quite wet with dew ind before dong one feet were quite wet: Just as we stated on our try we found a new pinh. We hertened over the usentwesting stretch and by 110'clock were on the rock at the beginging of the goge. It was so futly him, that we decided to rest a while and then to est our bruch. after eating we continued our trip, but nothing patientally new or interesting was observed until on our homeword stretch, when another member of the pile family one found. We returned to Co about 5 o'clock. then trok 5.37 P. h. train arining home about 7.45. P. M.

1013

1014.

2 To Round Bay and vicinity, Lift home early and touch 6.38 a. M. train for R. B. arriving there about an hour later. To-day decided to see comething of aurounding country. I took the road thus-fore beyond the station, Hally beine is right here, and followed it in the earterly direction. Thought to come to interesting collecting please but were downed to dieppointment. after a long walk I came to Dividing Cruck, but the place did not look intenting at any rate out to from the road. a chat dictance beyond a road leade due month to Frany Pt on the Mayothy, but Here the road fuhr, me fuh going to Forked Co., Duf. Co. etc., and the other gover tomach St Mayarts. I touch the letter reaching it about 11 o'clock, I then made my way toward Will Creek. This part of my trip was fairly intenting, the road leading though a pretty would, but it were too short. To in daing a pretty most Tate my limb, after drive continued orward and soon came to mill buch a puty, wide stream bordered have on each side by stuf backer, but other wire uniteresting a lentered the woode hoping to follow the etream but som came out again to road. I now heft in wand and finishly reached the long bridge crossing the Lever. I now decided to return. For some time? remained in same road, until I came to sand crossing hall be. I then took man wed until I came almost to Winchester John I took the wad leading again to St. M. and coming Mill En. faster up cheen. When I nearly Mill Co. I entered would For sometime this part of my trip seemed interesting but I come became trust of it, especially so as day was so very warm. I mun returned again or better made my way towards road and finally reached rectioned at Windhoten, The trif along vailound were However nothing of value were observed and after a bit I reached Jones where were bring putting down pole for the clicke wed, It were here that I decided to hung owned & letre train at Robinson for home. This I did, nearling home a little often 6 P.m.

1015

to To notice Dame with it heir a hif hinh We arranged our plane ro as to meet in same car. The morning wer warm and there were much humidity in the air. As we approached the consent me were met by Sixter Enterhum and Sixter — We were received most cadally and were first of all invited into the great building. Here everything was found in the most rigid or der, everything compulerely clean. There were a short visit to several rooms, one especially interesting was

1016

Sixter Eart whim's class room and study. Here love of flowers still manifested itself for at the windows were numerous forme, a cacher and reveal other plants. Among the letter the most interesting were a number of fine reedlings of Mahoonie Jafonie. The gave to each of we one to take with we . another thing most interesting were two boxes containing fine painting a, representing the various plant familie accord. ing to himaem. There were a west to the little chapel and then we mude a tour of the extensive grounds. Of the momerous trees the two following were most interesting to me, a ent-level variety of white buch and the bald expuse. Our trip touch some time and we were responsed to learn that it were 2.30 P. M. when we left heaving the grounds we trok can for home; I deaded however to go first to Winter Heights. I have I remained but a short time, can them friting of the bridge and proceeded as for as old rum in the Barnett estate the returned to car arriving home about 5 P. Mr. 10. With Bars. to Emony brown. We arranged matter so as to take the 8. a. M. car. and arrived at l. B. about 9. 30. We get out at road near termine and then proceeded entered. Mr. S. had a certain woods in view but it we doubt had been cleved away. Remembering my experience with the unknown legiminum plant on my write our ground a year or more ago. I told Mr. S. about it, how confined I were to find that the flant in question was nothing more or her thick Coramble warie. My it was not in bloom at that time I cannot explain, unless it was due to cathing it down. However, here it were to-day in full bloom very where, in some plue unimous patcher of it. How it were get there were had to colve. Finishy we track it to the old Worthing to form. Inquiry revealed the following factor, that the plants have been the own 20 yrs, (23) and that the plant had been introduced as an experiment. It is considered a most troublerome weed. The big patches looked very putty, the volve of the flower was nomewhat affile-like only very strong and blanded with it their seemed to be still another odor, strong lemon or temporal

and blanded with it there exemed to be still another odor, strong leman or troper like. Wheat is just being cut and that rather green. Every body rays this is the letter that they have one known for it to be cut.

On the part of our trip me had revered chances. From It. Thomasse Rusch.

we procedy to car, arriving home about 5 9. M.

14 With Watter along B & O. tracker to Carroll Switch, then to Westport and finally to Clifford to ree new electric reclinary. The work is progressing quite refidly. When we arrived at b. I can that the Q & B. S. Y. were also making a road wito Baltimae. At b. too, I much a short try wito woode, but nothing of any particula intent was observed.

1017

We returned home by way of the Shut him and Old annapolis R'd arriving there about 6 F. M. 17 a trif to annapolis, had been arranged but due to the endden Mun of Men S'n oldeet boy it did not take place I decided thought to take trip to Sung min Oak Park. May idea being to see laye plant discovered on the trip during June Everything went meily until a short distance from Dickeyville, when I obcurred the approach of a ctorn and Tifue I reached the mill wer upon us. I found chetter near one of the buildings and remained there until stome wer . The down pour war very heavy and every thing were throughly worked. Often the storm? preceded orward, but I found way thing so thoroughly cocked that I could not enter the woode, proceeded owned therefore to Sugar Ore then to the juiction and then took can for home. 18. To Woodlam Buch, then to Bay Shore. The Sunday Sahal had the prime at W. L. B. The day were culting and there were in dication of the duster weather, We arind at W. L. about 4.30 P. M. Found the place as dirty that all pleasure of an outing these direplant. The place and brash is gente fretty but the filthy condition of it were countring amful. We staid there however till about 6.30 P. M. when we lift. Took can for Bay Show. The trip down wer enjoyed very much. Seeing that the storm were rapidly approaching we decided to remain in can and go right home. We had not proceeded very for when the close broke one we in all ite fray, although only 7.30 P. M. it was ev dach that nothing could be even many feet ahead of we Ridning along under rush conditions - anddenly there came a fearful crash and them there was attenderland and the car came to a standatill. Every body fell formed and the there were crive of alarm. Except for the shock, nobody in our car apparently was injured. I could form in idea as to what had really happened. We rom beined however, that an care had collided with a car standing ahead. All traffic now can came from city to take we home. Finally, however, the can came I we were taken back to Dundelh and then by way of the Rivinium rante brught into the city. It was after 11 P.M. before we received home. The storms were one of the revenent we have up permised for come time. We leaved later that the case ahead of we had been disabled due to an electric discharge through the controller and before it could be put in order the cresh came, The chock was felt here perhaps more them in our car, several people were injured, one man had the shoe taken off of his foot,

1018

a glame at the roade showed that they had not hem visited by the himy we

that had visited up the evening before. We kept at a fairly good pace and reach

Bodkin the home later, Quite a member of interesting place were parced. We however, paid very little attention to them, letting our object he to reach Badkin as com a possible armed it the point we accorded the light-home town and there are one lunch. I were vony to find the little latter carried off and there presented reaching the very top after eating we descended. and started homewood. That is back to Brock Cuch: Just as we were about to start, and I had stood of from examining come of the algre on the weeks I can Koch on his bryege Delight entering the river. On homewood trip I collected between from several place, twin along the shore and then your at the orchard The trip back was accomplished in about came time after allowing time them of in cultisting and we reached the wharf some time aheed of the arrival of the Leven. Shortly after leaving what The principles at Fair Ven had a very diagneeable time of it, for just are the boat landed it were raining the hardest. Our friends Mr. Mr & his wife were in the crowd, and when They came about we learned that they had been prevented from making connections in morning by a five blowing out. We receled Balte about 8.30 P. M. It was still raining but not so hard as at beginning of claim. Reached have about 9°P. Mr.

5 Again to head of Roch Creek This time about the Petul
and with friend Bibbins to visit the rocke at Elvalon. When
we arrived at what we took steemen Petul as it were one intention to go to Stony Creek. But we can beaued that as the Seven had been chartened for the day, the Petrel would make both creeks, find Rock and then Stony creek. At first we decided to want till boat reached heed of Stay Cuch before landing, but when we considered time we deaded to get off at head of Roch Cuch. This we did army at heed of cuch about 10 a. Mr. we walked limely to warch my. Rid then towards armigen and the Old Mill Road. along Old Mill Rid, I stoffed frymently collecting Cladamia. Several very interesting once were priched up. Then we staffed at the old rum and decembed to stream to collect a few specimen of Lycopademin, It was therefore, now when we reached the old mills Here we ate on bruch and finish B. decembed to the gorge at the waterfull and examined the strate, There too ? collected a few Cladamia. Ofter lunch we writed the old mill and from off its north wall I collected a fine opening now waked me way over to the rocks. Picking uf on an way some

024

of 5 variously erzed applie, the entire cluter, easilying 3 a 4 times as much

on the average-sized single one. I marked the short when they were found by blazing the new-by white walnut and breaking down the lount deed limb. As nearly as I can remember the place is between the licher could with x. Fox Br. On my howevered trif? found that I can avoid the rocky shore by taking a fath own the cut of the hill

18. With the boys to West port and then along the new electric line to Pumphings, then home through Brushlyn and the long bridge 027. We stopped to see the weeked bridge at Pumphings. The day was

fine and we enjoyed the trip very much

28 Manaequan, h. J. arrived here to-day at 4.30 P. M. with VO28 family, after short next took a little walk or for ar Sen Sent and back. after supper went into villeye and then to railward station with Mr. a. & his com-wi-lum

29 a.m. Proceeded this morning to the beach, when we spent several 1029 home welthing the wave and looking at the bather

P. M. This afternoon we went to aching Park. We hoped to get down in time to see the "Baly Parade" but arrived the too lete. 1030 However, a few of the "babye" were cien in their gay continue on the board with. Some time was apart here

30. Went with Mr. a. this morning to Spring Like where he was 1031 panting a ergn. While he were painting I welked over to the lake and sport the time examining the trees for various likewe, a young Swede living new the station accompanied me. Towards moon, Mr. G. journed me and we went around the lake and then home.

P. M. This afternoon M.a. & I transfed around in the woods new See But 1032 It we only a short walk, but many intenting lichem were cecured. Wild chanie were in full fruit, some of them of a delicion flow, other homen, gite actinizet. after earpher, took with with W. and the bely

down to the buch but did out get there as allen fell asless. 31 Q.M. I hoped to reach station in time for a trip to OH Pleasant with 1033 fairly, but arised there a little too late, as must true would give un to little time we decided to go come other day. We therefore, welk-

ed down to the beach and afrent The morning there.

P. M. This afternoon, I hoped to have a fine trip with Mr. a. commender, but 1034 as he felt to bed, I decided to go alone. It was 4 P. M. when I left home, as were not able to go very far. Walked at South It torned bremmed Centery, from the top of the hill a beautiful view of the ocean may be had, I continued out the road some distance to a point where it bends towards Brile & Pt Pleasant, Here, I crossed the field towards a this woods. I wished I had tood time to enter, but it was getting lete so? decided to return. I much of fetty hihm were collected.

I a.m. Before breakfact took bely on a little tramp. We went as for 1035 as atlantic Viein Century. On the may I collected a few bichens from varion true. Turken liturally come the tree has, a feety Physicis being very com. a.m. after breakfait, M. a. and I started on an all-day trip, as he has 1036

to deline a comple of signs to a lady living at Brief we proceeded first out South St, over the same route that I took Sat. When we rewhen the bend in the road we continued moved, entered a printe way new the river and then wolked along the beach to the bridge. Reaching the bridge we crossed the river to Pt Pleasant. We then founded towards Clubic Landing and the river. For a little while we walked along the river chose and here we ate on bush, Buch Plum were ripe and a few colboted, after a lit we entered the woode and remained in them. Our good direting was now towards the middle bridge above the wiland, Then and there we came to once of fine Barren" and have I willed

come fine specimen of biham. Here two were great fatcher of Hudsome tomentose and many a frethy fatch of Pyrice with him and there are occasional flower. Cladomin in many place confeted the ground. Found on this trif for the first time Polygonella. It was 6 P. M. when we resold the acidelle hide and the trib

the middle bridge and started on our return home,

2. a. M. This morning we started on a trip to Life Saving Station and the 1037. to the light House. On there were taget fretie going on at see lent, we did not get to the Light Home. We, homen enjoyed on trip along the bear The morning wer cloudy, but towards noon after a little chown it cleared.

9.M. To Point Pleasent and Bay Head with whole family. We took to 1038 to Pt Pleasant then electric car to Bay Head. The wind wer blowing gente strongly otherwise our trip would have been more engingable. at Bay Head? walled along railroad to when a short distance. Thether was duke being in full bloom. Returning, we all proceeded to the beach. W., P., and I, then welled along the beach to Pt Pleasant while the other took can buch after a brief stop at beach at Pt Pleasant we proceeded to Clarker Landing

then to the station and home.

3 With ma. to the white ceder awamf. It was cloudy and occasionally the 1039 was a little chower, but towards now it cleved. We proceeded along ranhous track to allowood then though the estate of B . - alle, a reconscious of h On the fine raile reveal fine betiene we getten, we then proceeded to the river The little ravine here were pretty. Here we ate on lunch. after during we favereded towards the cedar revant. This wer quite a treat. We here cell the tren aghren. The tree were of fine proportion. On may of the I found & opining bethe . Spenin gette intenting were found on other true Here to were found swamp hubbleherrer, and dangle-burier. I would have been glad to stay much longer in the arrand but we were anxion to get buch by 4 P. M., is we started homeword, aring there at 4.30 P. M.

P. M. after reaching home, I changed my clother, and awaited folher for a 9040 try to the Lighthome. It was after 5 when I started with the two boys and B. to the Lighthon arriving there after b. P. Mr. two late to go up to the light, We then walked down to the buch and after a short stop, slarted homewood, 4 Rain all morning, at times very hard, so had to stay in door, towards 041 nom it cleared and the after noon was fairly pleasant. In afternoon he and I accompanied with B took trip to Pleasance Bay. We arrived at P. B. just in time to ree the Elberon start for N. J. On the return we stoffed off at Long Branch and then again at Elberon 5 With M. a. to fine barrens. The morning wer cloudy and there wer an 1/042 occasional little shower. We took the route towards the Middle Buige crossed the river and then intered the woods. Mugheton were in full blest. To make of for this lose, we found a fine patch of Benbury and bested to that the fine plant growing with Hudsonie tomestone was It. or wider We returned some way as we cam arriving home at 4 P. Mr. J. M. We had drive as com as we returned and at 5 P. M. No, and I will 10 43 B. welled over to Spring Lake, can the ocean by night, also the fiely white home of Mr. Maloney. We the stoffed at the ice were place when B. a. is, We returned home by any of electric car.

6. a. m. Will W, and P. to the beach. We then went of to the inlet 1044 Brile and returned home by that every P.m. With n. and B.F. to Robing Pak. ahopping We proceeded to the Loand-045 well and took a last view of the reem. 7 Spent the day in Philadelphia We left Managum on the 8. 12 a.m. 1046 train, changed care at Frenton and arrived in Philadelphie about 11 a. M. after checking packager and getting comething to est, it were noon, We then went into Wanamaker remaining there to 1.15 P.M. We then went down Chestant St. to Independence Hell, where we made a brief stop. We then bould can and went to Zulogical Baden From Zulogical Barden we went to Farmiont Pak and then took ride around the Park. The station is a short distance from Memorial Hell. The trip around is gente an enjoyable me. Returning to the station we took a sub-way can and get off at Broad St. Station. It were nearly 6 o'clock. Yourhing at time table I decided to take 6.18 train for Batto. Let were told that as that train was 45 mi. lete it would be better to go to West. Phile. and then take 6.52 train. So we took culmy train again and rude book to West Phile. I have the train come along in done time and in a little while we were on our way back home. Train rewhel Union atation on him It was about 10 P.M. when we arrived home.

1047

12. To Mr. Neepine at lest meeting of the Bot. Set. of the Mrd. and of Scenier, Mr. M. institute on to him home near Ellicott City and from the the a trip to the Peterper. The day wer an ideal one, newther but 7 medium were present, resely to take the trip, al are one gite bate in othering, done to one voisiting, before one stated intend of 10 a. Mr are planned. While many to sever we found a min spring and have we ate our lunch of the eating we continued on our trip. We received the series, by way of the old purpling alteria. Inte a mumber of pretty flows were observed on our way. Arraid at runs we welked to the dam, the made our way of the atreem to fait tributery. Here we were joined by Mr and Mr. Salad. We wan crossed the fell al atrived to Union Dam. they made on way slavely back to the house. We made can to the poster. The time forced very quickly a before we were quick into the poster. The time parced very quickly a before we were want to it into the poster. The time parced very quickly a before we were aware of it, it were time to slat for home. It was about 9.30 P. A. when we took care for home, receiving it as how later.

10.48.

14. To believenine and the old furnam, then, for for grape. Left home about 7.30 a. M. reading Browledge about 8 o'clock. An hour late I was at Furname Brank. Here I twend in at the oping and for an hour more broked for grape; succeeded in getting a mine little suffly, mainly armong the break went of the oping. I more preceded along the break towards old furname, but found only a few grape. At lemach new the Orantim boulty. On these were so few grape to be found new old furname I decided to go amound to Marky and then return by way of Marky Rome I visited the old please new the round heading to Sollay's. I keek, two, I found and then again rome new the round leading to Sollay's. I keek, two, I found and the large bicker the same bisher found on the bicker in he Juny. I was much flessed to make the find. On road to collected a mine both of Solidays banademin, which is now at in best.

The collecting of for grape at this time of the year, is another as another for the what yield ready to be cat, in fact catall common to get for grape fully a half must ready to be cat, in fact catall common of get for grape fully a half mount letter than weally. It was ready be clock when I readed the car line, and a half how. Let before I arrived rome.

1049

IT To the ravine. Besides collecting wild care & yarrow I made an effort to get a few este of bearer and averaged getting runds, clerking and perforhate ones also a few interruptedly primate. I writed again the old house in the woods to the left of Hilton an. To day I tried again to find the Equietum him ale locality and this time encuded. It is close to the open

field and should not be difficult to find. I were very gled to find the place gain and reached at once for the chots where experiments were going on, but failed to locate them. It was me of these warm strikes days and I felt little interest in out down so made my way to ravine and then homeward. Asome of black oak are ripe and beginning to fell. arrived home about 5 P. M.

050

21 With member of Bead. of Science to Elvator and then to Waterford. Often 3 days of cool, but cloudy and raining weather we are having a sunshing day, but how chicky! We certainly choice a disagreeable day for our fait fall trip. The weather-condition and no doubt the Beforeme left the station we were of a warm day and our expectatime were more than realized. It was 8.45 when we left Conden etaline arriving at Elector about 40 minute later. We at were started on on botamial trip, taking the road leading to the ceharle home, On the way we had offertwity to see specime of amantin, two african of which, me of a dark grean color, and the other of a dull red, being gente about dant, Is viewed, boldened, and beter one also very abouted but it was the amarature that received most attention, at the achieve home we trust to the right and took the road deading across the field into the woods, for this was the road that lead pare three conduful rocker similar in affermer & formation to those found at the enterer of Rock Cuch. On the way two mie finds were made one Gudwigie alter file the cuther and the other Rhesic Voyance Chrispafin in profum were found and I had receive result time to alif and collect some fritty behin. It did not take in long to reach the hocky region and we at once wedded our way towards them. On the my me collected fine blue buier, lucin beyond description arrived at the webs even one felt retified to make the their first stopping flue in fact some of we thought it might be best to make this own only stoffing place for here, among the rocks it was coul and placed and the beautiful trees and wehr were most pleasing to the eyer. a it was we armained how quite a while finitly eating one huncher. After demine we started slowly on our way to Waterfad. It was now the huttest part of the day and very glad we were, after leaving the frethy words and while arrange the sends field to come to a large apple tree and There while a few minute its ite shade. Very thankful we were that the entire way were not though sandy fills. Our next stop were at a repealing spring. We had now but a chat distance to go to Waterfad. We at once went to contesful, and here we stepfed for another rest. We now went up to the fun region where we collected a few opinion of various ferm. a few of

we now preceded up the road a chot distance and when we returned all started slowly beek for Elvelow. On may beek we again cht ed at the oping, that is at the old shorty new the spring and have we spent gite a while for me had abundance of time in which to reach the station. Ever as it were we reached etetion felly me how about ofter But the born preced grinkly in commention and ster gazing for it were quite dark when on train came along are me were the winting the morn arose and quite beautiful were its cloud effects. Our train must now been a little lite for initial of reaching station at 8.10 it must have been a little lite for initial of reaching station at 8.10 it must have been day's outing. White Prince concer are ripe 24. Heft home about 9.30 a. Mr. for Catomville. On may down 1461.

1051

24. heft home about 9.30 a. M. for Catomwille. On may down 1/20 av. collected specimen of Wild Carrot, also learn of Chestent Oak and ach. Noted abundant african of Elm, especially men termine at Oranglance. As it was so late when I started, it was (about) now when I was abill mear the old stone well, so I entered the woods close by a ate may brush. When I arraid at O. S., it was my intention to come the review of along the River Pid, but the bridge over down, so I was obliged to change my plane. I therefore proceeded along tracks to be low and there exceed the river. Once on River Rid, I faint went up the runin as for as the learning plane, then back again and crowned at the again duct. On way collected aprecious of Homey Learnt leaves and again and break of many of B. 4 O. Observed that I walked fait 5 miles in one home by way of B. 4 O. Observed that I walked fait 5 miles in one home by way of B. 4 O. Observed that I walked fait 5 miles in one home hy way of B. 4 O. Observed that I walked fait 5 miles in one how then next 3 miles in one home. The entire tent took 2 4 hre.

1052 25, hift exhaul about 10,30 a. Mr. to do collecting. Spent the time callecting along Franklin Rid. Towk Ellicutt City can and got off at Walnut an. then welled over to Franklin Rid, returned by way of high step at Mt. Hully. Collected various sprays showing leef arrangement and mosairs, armied home about 5 P. Mr.

1053. 27 The

27. With Botany clave from Pinilio Rd & Shirly Lane to Woodburn The afternoon, although cloudy, was very pleasant and member turned out quite well. It was nearly 5 P.M before we started and an hour and a half later when we took the tripper.

1054

28. Left home this morning about 7.30 a. m. and took car for Centre Bay. arriving there at 80'clock. It were now my intention to go to Swan Cruck and from them to Stony Cruck, when I would take boat for home. It was cloudy a threatening, as I had to collect expression of Wild Carrot I did thin at once, securing all I needed before reach in the record bridge. There I thind up a had I known that I would return later over earner route I should have fut them in safe place and rand my rely the trouble of carrying them. As it was however, I expensed my rely the trouble of carrying them. As it was however, I expensed

to return by way of the steemer. It did not take me how to reach Swan buch, reaching it, in spite of my collecting at about 100 clock. I now went to the outlet and here I record specimen of Ekoder and Improphyllum. Hed I now continued my trip by going part Hancockie I mo doubt would have reached Stony Creek; but, as it were, I wished I would the woods on with ride. The tip was not a profit ble one the trees being about few of this class of plants. Just as I entered the woods I found a few nice openion of Pysine roudiate, and then a little while later come nice openion of Cladonia. This trip took much longer than I expected the undergoverthe keeping me back very much. hay blue daugher are still to be had and never found in great profusion. It was nearly two o'clack before I finally reached the path and got out on the road. I then decided that it would hadly he profitable to malk that long way to stony huch. So I reented to woods, visited again the old faller tree trunk, returned again to road by 3 P.M. a then started homemad. Second a nice braffix from Churtmet tree. I had not proceeded very for, when it began to driggle, and when I was a short distance beyond school home it began to four down. This it Kept up the rest of the day. Reched home about 5 P. M. 1. a beautiful fall day. Left home with n. and the beby about 9.30 Q. M. for Herring Rem. We got off at Weber Park and proceeded down to the falle. I made the trip mainly to find Chang but none wer to be found in the little pand where I found it on a former occasion. after collecting come Wild Court and a few action we returned to the car. On may home, I stopped at Clifton Park and have I got a number of water plant. Salvini, Water Hyacinth, Poroto Frether te. afternoon. Left the pak about I P.M. and presell to the panch out Columbia av. Here I found plenty of Duckoud and I recent more Wild Canat. I misted the old in find but found nothing of interest as the water was two middly and rather deep. 2. Another beautiful day Proceeded again to the ponde out Columbia arem. Seemed again come Duckwood. I then went to the fond at Int. Wina. On way got some Protococon from them and from the walls of the old ice-house. Right at out let of the pand I collected some Spir-gyre and here ton, I found Chave but we little, that it was not worth collecting. I then proceeded along bomb, collecting at another place, some fine Water nut and another filamenton algae. At one place in the ditch I can a fine colony of what no doubt in Chare but I could not get to it enily, I went all around the hand. While going along railward aide I collected several met of Spir gype. A bestell coarse layer form. Returned home by way of railroad.

1056

1057.

October 4 - 16 60 4. With Botany Clase though Comwelli estate. During early 1058 part of the day, it was cloudy, in fact, very surly in the morning the was rain; but towards 3.30 it began to clear and by 4.30 the run was shining. Due to the weather, there was only a small at tendance, so I dicided to go through Cromvelle as a change and way plead were way are. We all admined the avenue of true and every budy was pleased to see the tree new Mr. Chaneze. The Brigho, perhaps, were admined mort of all. I was pleased to find so many young tree all around under the tree and many of an took some with me. The English walnut here were admired too, two ripe mits were taken from the tree. We cogginged one trip along the river, and would have been pleased could are have continue, the entire way, but we found it almost informable to come the brook at the ravine, so I deaded rether than exert answhere to to great an extent, we would return by may of the revine. This we did; we came to the road at the old sharty; reached the care about 6.30 P. M. and arrived home about 7. P. Mr. 5 along the River Red from Relay to Orange sine, then to Citom will 1059 by many of Helton an. Took the 1.25 P. h. train. He trip along win ver injuged very much. The day war ideal.

8. To Brooklyn. During the night there was rain. This morning it began 1060 to clear with heavy wind. Left home about 10 o'clock, Collected opening of may twig, record a mice lot at road just before coming to berry peiken house After getting twige I went through the little ravine and then received come was Reached home about 1.30 P. M. 9. River Road. Left rehard about 9.15 a. M. took can to Catorwille. Proceeded. 1061. down Wilton an to Orange lame when I could the river. Before crowing received. of Outhours. I had much difficulty to get afreming of Poly polini, menenthe beer reund come of them also by the time I reached Elliatt City where took the can for the city

11 Dickey wille With botany clase. a trif wer plumed for one
from Disheywille to Buyon Och Jonet. Unfortunetely of jint are we were
ready to start it began to rain We: contented measure with booking
around onen the terminum, hoping it to clear away before lang! he this we 1062 and disappointed as we took cases but for home.

12 To Providence. heft the laboratory about 10. th. and proveded at once to Town. Assumed there I went out Duling Valley Rd to I Kampdon. It was quite blusting. I mone took path to Printern. Just before reaching the stee 1063 hollow, I find a plant of noney for , anche pretty little plant, that I marked the place and hope to get it some time. Faither on I found another plant with glore

heat-shaped leave which I failed to recognize, no doubt it is an neape. Reached Fromidence in time. I now started on return, expecting to go directly to Joffe Ro but for some never or other I mind budge Rid, this of course link me much out of my way Hower? I fully willed Power a wer come on my way home. It will. To huthwille. On account of Home coming week the relate have me serin chain iving at 12 M. Member of botany class and the of the botany rection met at 1 own at 2 P. M. From whom we proceed to huthwills to visit the Bution bocalities, notwithstanding the blustery weether none than 20 member was present. We with the route though the words and an way attitude the many interesting things that came to one observation, arrived at 4. it we only a chart trif to the bentian but here we were showed to displant mut ready a dayor plants being found! We wented all of the place, but only a very fire were to be found, lefter about two home efect them we proceeded but to station where come amented the train, whilst a few of we forted it buch to 15. To Elemburnie. Left home what 8.30 a. Mr. took can for Bucklyn and then proceeded sport, realing to wrome Br. whout 10 a. Mr. I more entered the wonde & posseded to bank of stream and cloudy would my may up stream. I are particularly intented in the Chichem and collected remail fine specimen. Although only 10 R. M. when I. my hip was quite intenting and I stoffed frequently; it we , after one o'clock before I reached the road. I then took The easy route sum to the fond and to the Samuel builty, where I aremed tur specimin. I mum mude my my to the station where I had usuly come of the fine walnute men-by.

16. Another beentiful spring-like day. Left whom I at 9 a.m. reached Duhayville at 10 o'clock. My intention fait of all was to go out browhlin Road to homie Comotory, but are I wished to return in time to see the pande I duided to go to Suyme Och insteed. This I did collecting in the way some fruits: - never brichary mute, reedling, wild carrot, ite. ite. I were roung to find them bridg collecting the lucse ruck for the ernsher. The road was of course, in month use, and all benty had her crushed out. I think, however, this is only temporary, only no long while the wand is being part into order. after reaching the men road I proceeded along it, back to suyun Oak Junction where I

1065

064.

1066

took car back to city.

1067 18. With Botany clave from Dickeyville to Brogue Oak Spenction.

We met at 2.20 P. M. at Dukeyville termine. Our route was

the wend one tehen. When we found the rocks we examined them

for Woodine & Chiefather. We reached the junction at about

4. P. M. and were home about 5.

1068

19. An afternoon trop along begins Palle. I were in court for algorithm with the weaptime of Springere, nothing she was observed. It was about 1.30 P. M. When I get of the car at hit Holly and decembed to Windows Mills Rd. I then consed the falle or proceeded broads Duhying Observed on may Blacia a Athornoon. At D. I think cu for Lurine a mile and a help dictat. Just where the ear leave Warden Mills Rd is a large estate and to be planted with various links of wagnesser. It amely would to worth a wrist, abraid at L. I folled the run for a little while then the road to Wouldeam. One tree was presed with a great deal of Physics. I think come of it for determination. From M. I proceeded to Bayon Och where I covered the fulls and visited the former Chane food. The water was very class and I could not see whether any went than most. I then east through the words to the can have and continued mound to Dungan Och Junction. In the meadow just before reaching the obtain, I were pleased to find the blue fringed Earting in profession. Browned at station, I were pleased to get come Springere from profession. Bringere for the boys were asked to get come Springere from

1069.

a find at foot of hight St. but as the metad they brought were worthless, had to get some myself. Decided to go to Mit. Winin as a come place of get ting what I wouted. All afternoon it was cloudy and so it hapfured that had hadly reached the village before it began to rain. Although later I man that the laye mate of Springger and seemed a mice!

By the time I needed home I were thoroughly routed.

1070

By the time I needed home, I was throughly wished.

22. To the rawine beyond "The Cauce", heft home about 9.30 a. M. It were about 110'clock when I left the car and stated of the lane to St Thomas Chi Uf the lane, a chart dictance, I collected afreement of bisher from the fewer, the oficient we wind me very much of there collected from the old mill at Waterfard. When a chart dictance beyond the old entire of "The Cauce" I can deat the woods x ate my lanch. I were commented empired when I continued my trif to find rife churtments on the recodicide. On I continued more found so that I enceded in abletting at least 14 ft. fushife more When I finally washed the coordinary road I turned toward the pand and have I will washed the coordinary road I turned toward the pand and have I turned I was ready to proceed award it were 2 P.M. My trif through the remine time I was ready to proceed award it were 2 P.M. My trif through the remine was found flutifily anough and I and wiched that I had more time to do just to my collecting. I collected guite a cumber of pretty things, but I were fine summer boward to examined carpably even half of what I remy. It was fine

o'clock before I reached the little dam and half put five before I came to the railward, It took me now 40 minutes to reach the electric car. It was ; 6.15 P. M. before I get into the electric can and it was an how and a greater leter before I amid home to ound on tick come heartiful by corpodine buildulum in fruit, also rue pretty Trichowha biside trullain augungane. 23. another pretty day Left the rebuil about 9, 15 Q.M. for Graymin Falle. I started in at Frederick Ris fait going monthwand at for in the railward. I hopel on this part of my trip to find some water create but failed to find any. after eating my lunch retired to the road and then proceeded routhward following the railrand. Very little of interest was obraved along the railward, no doubt because to recently built. When I arried at Int. Winiam I preceded to the pand. I obrand that a board had been arranged at the mouth of the find so are to raise the water fely b wicher. This is done always before cold weather retain so as to bring the level of find even with the pletform over which the six is carried to the six home. Then the by the anagement of to my lowering the level, they are better able to control the growth of grane the new the edge of the part. There were now being cleared away While looking at the variou gunthe new the month of the faul I found inne Chara, Leter I found serve in the brown fathe authorit. I tere to work a mice let of Polomysten. After getting on little Apringin I received the head of hand or here I had a lettle chiet with when who was clumy out the find. He raid that for outer he always used "tyrbery". and for by enter them we mothing better that . Another theory on to takes smuth a plany to. He take the fixe dust a offly it to the word. Then for big cute he had another rewidy, fat because ite; as the fine dust. This theory was that we were made from dust & would turn again into direct so why should not dust be the very thing to use for a cut. I would like to have head some wine of the wine caying of the old fellow but had to hung much as I willed to attend the rection weeting of our botany class. I proceeded, therefore around the fall the falled the tracks homeward, arring then before 2.30 P.M. 25. With botany clase under leadership of Dr. Levin to Waltin estate. Woodborn an. I ovantown. The afternoon was pleasent and the member turned out quite well. For some time Dr. L. her would me to visit Watter fine place, but it was only today that we finally arranged to go. The place is well with visiting's numerous fine & chower all varieties of Japan wrafte, ite, ite, a heater ful Turkey like with the party scorne attracted on attention, also

1071,

1072.

trolly will be in full ofertion.

1076. 30 To Cliften Park for fruits; exceed some fine opening
of Sweet Sum & Catalfre without any trouble as the lang
with had done the work of taking them from the tree.

It seems that in order to get fruits of the East. Maple I must
try to collect them earlier. For I found only a few fufest keys
with remaining on trees.

I. With Botany clin along Buymis Palle from Edmonden a. Bridge to Balto. St. The afternoon was eather dainly and the clin did not turn out as well as growthy, 12 member were present. The plant that intented are most over the Witch hazel which we found in full bloom. Secundly, when taking this high we go as for as I reducish an tinday, however, reveal members were and come to get home early so we decided to go only as for as Balto. St. We arrived at this conclusion too, because of the Peller atrophymum, which I remembered reining in the little stone hidge and which I fromised to show them. Arraid at Balto. St. we; without of to the tride of the south of the three cases and them to the hidge. The Peller is still there and is growing finish. It is to be found on both side of the south wall. The ride facing the south in the more busined. We record

5. Election Day a top along the Surpords Run. The day was an ideal one mithin too wom our two cold. Left home at 7.45 a. Mr. for Power. It was my intention to go the directly to Luthwille, when I won feel of some the formally is het, the case were deleged and as instead of of their, I thenfore decided to go not the Dan bring Pallay Pike and them go by my of Manyamin Mills Rid to the rime This I did and a very sugging able to the And. My first collection was used from the old raile of the Stock Frame; two putsy linkers of were obtained They look a little familia pulp I have allected they before. My work find wire made near the old growing; have as the calcaner rock I found a way black hile with any black apollecie. The tellow, although rother thick was still not so carried remarked to get sweet much; home, with the right of a cold chief I managed to get award rime from my most finds was now more to take the still kneed. I have a Justice course, I found one a two lake breach suffer. I have a Justice course, I found one a two lake with schill kneed. I have a Justice course, I found one a two lake with schill kneed. I have a Justice course, I found one a two lake with schill kneed. I have a Justice form I have adopted to the wind a most of four bride a petty foliogon. I have adopted to any a course of the limit is posted in the sound of a most of the wind a most of a most of the Marie Dilliani who was a soundate. I have I found a most of the Marie Dilliani who was a soundate.

1078.

trif from Winden Will R's to Edwarder the armid home Mus 12 M. 16. With Wich & anothe student from Holly wood Pak Back Rover to Stemmers Rom then to Below Road. a bentiful afternoon. 1083 12 plate found in bloom. Only this of interest to me were to find some fine willow at home standing it interesting of weed and the reihard right at the bridge, B = O. R.R. We realled can before date. suring home about 6 P.M. 17. With aller to pard at fout of Hanover It. Here some beautiful Waternet is to be had, but this morning there were little to be 1084 had due to the cold. The pard wer covered with a this covering of 19. To Rocky Point, a heartful fall day, lift the interestion of Garten an. x Back Rin Nech Rd about 9.30 a.m. Steffed fry the 1085 to examine the true for lichem and made armed collection. Man collection, bonne, was made at the point where reveal fine rook sollection were gother. Returned home we same route 20. To Sugar Falle & Mrt. Winner. collecting. Day clody 1086. torade noon 1087. 23. With Wich in boyunding from Estewardle to Elehater then along rime to Orange know & wach to Catumoville. We met at tem une what 1.30 P. M. It was cloudy to as we started out the road, it began to druggle, room it byen to rem right had and this it light up the nest of the day, On the we out we found althre in just & seemed a nice, lot of the reform. At the old house quantities of the justs can be hed. I about sixtamen faither on the it, side of the road starte a excamor maple with fruit some of which I cremed. At Ilebuter I hoped to find ailantim in fruit but I failed to seeme any. This year no dolt being a bad me for this tree. From Eleberter on me had a very mendaly road to track and the rain came down at time very hard, we, and we were my intertion, towards are were my intertion, towards and are were my intertion, towards. We would here t 4,30 0. m. and have by 5.30 G. m. 26. Left home about 8.30 a. Mr for Browleyer from whener I ilented in the direction of Ferrage Br. . The rain during the week pening 1088. pitty wit and med wer every shore. Worthwhen the day wie all that could be decired. arrived at Furner Br. I forward morgan & he kindly rolling as fer as his home, I then

contained oneward to read leading to Metaful. Armid at W. about 1.30 P. M. I now preceded along the Old Mill Red, otophing at the old rum and various other places for lichem but it was two dark to see well a I failed to find anything new. It was 3.30 P. M. along I seeked the not Red x were ready to start howevered. I want turned myself a found that in 15 minutes I reached the read leading to Contin Bay. It took are home & fair minutes to reach Solly's; we have & twenty minutes to reach the Maly Red and are home and faty fair amount to reach Hashin Pt. Red. From this point to the care to take 45 me minutes so that it took 2 to her to go from Damain to the care. From the cas termine home it growthy takes help or her but to might we had a collision on hight sit. To that it was about 12. Mr. before I wind home

1089. 27. Po Clifton Pale oblisting. In green home may me be seen a feety borname plant in full fruit. Second to-day comes of Mar way afree & Puly lie. Also a few otens to show monocoty belown structure, and a few Mayurlie fruits

From Clifton I proceeded to Montatello. The I counted to Spine

1090.

29. With muber of Mrd. acad. of Same to Cockeyportle. We met at Int. Washington, in time to take the 9.17 a. In train aring at C. alust 9.50 a. M. We remained in train as it backed down to the Y, and go If at its terminm. We then proceeded to the guarry. as this was quite new to all of them, the sight was well enjoyed. We then state at the road and finally reached Buyenin Rom. The object of to -days trip. On me want of the stream me walked very slowly and ? stoffed examine the various rocke & trees for bethem, hender enterlesse wer form in fine condition, but what interested me most of all were the finding of davos partly who believe, ones, with brether gellow whole which I think may the same on the one hand along the greenfounder below the find Rd; and the or will orange and middle which I believe the same as the one found on the my to Women on Juglan compie. Neither were found in fait. We found to de ing by heartifully could with Claderic didgon at flat of the of the foliam with builden a complan him. We ate our lunch on the top of a high who, another fine bither was obtained from the truth of Justime was and the the level, In feet, it took we 3/2 hm to make the trif, but coming back we went a little feeter is a the try in but then in how. The try beck to the station was made about an hour. aring the about 4:00 C.m. we take the 4:05 their arm I mt. v. dut 5 0. m. in how leter we were buck home the day . a mortagreeable one, the temps two most delightful, got nought of enachine & chalder to make things please int.

- 1091 30. With Walte & Pray to ree the new W. B & a. Chestic Rd.

  We left home about 9 a. M. Proceeded out the B & O. RR to the

  Canall Saitch, then down to the electric wad. At the eff when

  the west concer the Shot Line we manyed to get to the woodway.

  and then continued along it, to the Palapean Rain, How we can

  the trouble they were having to make a valid bed server the rimine

  flood plain. Armid it Prophy's we took the west to B. and the

  home, wining there about 3.30 P. M.
- a few come. I mitted the see him pende for chase, but the ice punted me making my close observation. It was rether new and very disappearable after leaving the food, I founded toward been Sping and at this avenue I continued orward to 5th avenue from whose I forested to the care.
- 1093. To the Patepew by and Hollofield with Wx B. We left the Univenity a little often 12 M. and presented at mee to Pountate non Wondlaw.
  Arriving there about 1P. M. we ret not at once for the river. The day
  was a most pleasant are but the read were in a most wretted
  condition. At one of the streams I found Cladoffens in small
  quantity. Amid at the river we presented up as for see the laye
  rock. Here I record as fine specimen of Asplemin Bredleys and
  one or two of a montaneous. A result for bishers was retter fruither
  On way have we decided to go towards Elbrith City by way of Holls.
  fulde and the railroad. In one or two places we found a lay statch
  of rivor very little of it having melted. showing love cold the weether
  her been during part week for it was on the 3rd whe it swould
  We reached E. C. about 5:30 P. M.
- Proceed to the little ravine. Seems a cloud of Polytrichen then started homeward. Stoffed at Rimide Park and their second a find of Cycu wolate.
- ogs. 17 Along Western Run. Reached Mt. W. in time to take 9.164. Mg. Train for C. when I arraid at 1.40. Set out at once for. Ben Dan Run x took the route usually taken from Western Run. as I wan auxum to use must of time along Western Run. we arraid there in a very that time. The beautiful would at the head of the gaze is being themical out & no longer is an object of beauty. I wan very much surficied to find the ground covered in many place with mow. This work trensfor retter disquestle for in a short time my feet were not only very cold but juite wet. To-day I proveded along a higher level and quite a fine treat it proved to be. On one of the rocks I found

Umbillieani Dillini, but it was not growing as finily as it down on the rocks below Waren. Soing as I did, I mised that dayson climb at that almost perfendicular arend. The views were superb. Stalactites & Stelagister in great profoun. at one place in parties the route led along the hore of almost perferdicular according rocke and then through a deft rock, the lower fotion of who revoled almit down, for below flowed the river. Soming as I did I met with few difficulties. Here and there, I found a few below, one par tremlarly interesting one were gotten right off of the rock, it looked like Barang un, in fact some few prin were collected which I the will prove to be B. ours; still, I have never reen. B. over you on had ruch.) but the color of the afother was yellow rather then pinh. From to day for the first time State condite growing on wich. When I reached the Bunfonder, I willested rome fine specimin of Hembook
When I came to the stream coming down the hellide ? chailed " around it, & world a road what I followed tourd Warren. It brought to the the holding to Colognille. By refind wellow, I made the trip back in half home, then reaching Cinter for 5.35 P. M. train a got back home by 5 P. M. day overhead, but underfort the wade left much to be decired. We tried to leave the University promptly but notwithstanding failed to reach the Middle Più can termini in time to take the 12:30 P. M. can. We had therefore to want p the one baining at one o'clock. This brought we to the Back Rim huch R'd about 2 P.M. We cut out at once for the Mitheter upin. The first her a came to were entirely too difficult to chimb so we kept on our way. One true was finally reached which did not present so many difficulties. It was com chimbred and a number of mice piece of mitte toe were obtained. We then continued on trif down the road finally turning in at the Holly huch Rd. Out this road we went ginte a distance turning into the found with plants of horizon on here we seemed reveral find openion. We the stated homewell, in the way I receil a wrie but of mon. Ruched the en short 4.30 P.M. an amounted the one haing it 5. P.M returned to city about (. ?. m.

1097.

1096.

28. Through the ravine, then along the rive to Govelow and back home by way of Sulphin. Sp. R'd, the railroad and Wilhin an.
The day times out to be one of the warnest this mode, nother were relatinguestle and the tip as a whole were not one of the pleasantist. Upt home about 8.30 a. M. so reached Catanwill about 9.3.a.M. Pro

own the usual vorite towards the navie. Ate lunch at Oul spring. Tonday I devoted some time collecting bether from Jylan concer and rund severel, some possibly new. After being runne, I presided to O.G. and there consed the runs. May main reason for making the test were to visit the person men boakty. Instead of going of me of the ravine as I have done on former trips. I to day wended the hillide, which was much associated done . On may of received core lichen; - heider, a Cl. didgue. Almid at tof. I made on one to that it was true water to which amy. However, I did reason a few Looking about me, I found several and them were by just bedow with fruit. I could gente a let. I then proceeded down to the Roi Rd cound the rin at a let. I then proceeded down to the Rin Rd cound the rin at a let. I then proceeded to Sulphe If Rd.

Northing fulthe of interest own observed. Result can shart 5.30 and home by 1.30 P. Mr.

one aide then on the other, but very some I get on the right bank and the day an ideal me for the trip, nothing particularly interesting, however was found. after a little while I came to the farm on the left bank and now I came to a stretch of very open wouds - a huge file of raw dust war sufficient reason for this state of affecie. I we now at a point where a branch entered on my ende of the rturn. It was quite a wide me, that is sufficiently wide to find it difficult to come, and ar right here was a little bridge crocsing main stream I covered and continued my trip down on left bank. Here too wer more ofen wonde. In one place I found a wie patch of Cladone; here, to, I set down and rected for a little while. after the brief stop I continued onward and for a time I thought I would have to remain on that wide, in feet. I had about deeded to make my way bock to the old will, when I came to a faller tree lying arms the stream, this afforded a mic means of crocsing and I were again in the right bank. after going a chart distance I came to the old hed of the D. P. R.R. and here ? found plenty of Cladamer. For a short dictance this old road way were an ideal mean of getting inward but before long it covered the atream and I had to live it, and this right at a point where another triber uting entered. To cover it, I was obliged to go up the stream a short distance. After it was covered, no other difficulties presented themselver and after a little while I was again on the main wed I now stated for the stelin at &, and in due time armis there. The trip was a most enjoyable me and many of the spots were with revisiting. 22. To Broklyn. Visited the little ravine new Bullyn. Skuch College wer for I in fell bloom and a member of Exercise

1104.

105.

of Palef tun bods.

25. "heft the Universe about 12.30 P.M. for a trip to the Palepro.

It was to be a trip for maker of the botanical rection of the Mod. and of Scrien and we were to meet at the interestion of the Rolling Rd and the car line. Although the dry was beautiful and the leapurture delightful but one member abound up. (a.C.) The trip was thurfur like by us. At first I thought of changing my place a injured of young along the rime, take the trip to the comic rount, however field decided to the the trip originally pleased. We therefore take the route of the round and very pleasent we found it, in spite of the round of the mount of the course that presented other members from presenting them solver. Even in the woods the round other members from presenting them solver. Even in the woods the round of the round and only pleasent was pleasent washing though

it. On the way down to the pump-home, rumeron bepeties and between attracted on attention. haide of the old from home a found Marchantie polymaphe. We covered the bunch at the dam. and then proceeded down as for as the west tributery, when we start on the return try reaching the can about 5.30 P.M. (1110)

28. a visit to the crow wort at arbitu. Left home about 9.30 a. M. and rude to the termine of the Wilkin am can line, then proceeded to the P. R. R. tracks. In a short time I were at arbutur. I questioned the watchman about the crow-rout and as he said it was between the station and the Washington road I proceeded in that direction and in a little while were in the words where they rout, ... The woods is of recent growth no very tall or large tree are in it, which we somewhat surprising to me. The layer amount of excrement and the many crow feether scattered all over the ground, seemed to me ample proof however that the watchman over right. I had no trouble funding my may across the country; and in two fleer found Cladon armid at Warhington R'd I mude my way towards Sulphus Sp. R'd and the towh the path buding to the Bro. R.R. along which I proceeded touch home where I arrived about

4. To the ravine, heft home about 10 a. M. reiched Stoddard's about 1107. on how later. To-day took the old route by way of the Temp House. I hoped to find some speamin of Hepetic in that were spot new the spring, but the cold wer too much for them & none were found that could be removed. I was very much confined & rong, to see the woods around the little find being out down. Woodsmen there reid that the flow had been brught by hm. Stoddard and that he introduce making a park. The ramine were pretty with its covering of staves. and the brook with its ine formaliers. I stoffed at severel place hoping to get Charten from the, but it was a difficult lich. my fut to been very cold for the mon melter its way thing the rain our well with liking, and our enjoyed. After being the rain I preceded to Orage have on the west of Hiller Chr. buch to

the cer him. The former bentift blemi woods is feet diaple ing. Let this wite there will be little left of it in a few more you armed have a little before 6 P. M. 8. a short try along Suy mis Falls. Left the Unimarity about 1.30 P.V.

for Windsor Wille arriving there about 2,30 F.M. The ground every where

more covered with snow for on Wed. but we had guite a heavy snow storm possibly 6 wisher or more, orien then we have had nothing but cold, Ice over 5 wisher thinks a various pends. The falle in its winter goal is beautiful. My intertain were to go along Franklin Red but the more were too deep so returned after reaching the weed and want back to Deily with them along the car track to car term win where I took can fur home.

1109, 11, a trip to Browlyn. Some still on the ground and the rice fragen. Sund some Springer in the wear spring water both of the but. But also springer of Talif & Heling.

15. Left the University about 12.15 9. M. It was to meet other member 1110. of the Md. and of Seemen for a trip along the Patapaco, We were to must at the Catumaille can termine at 19.M. During the early morning it was cloudy therating just as it her hem for two days part. What 10 o'clock it became very dark and in a little while it pound down and for more than an how it rained. I felt some there was little chance of a trip. about 11.30 it began to clear and at noon it were hight & clear and the zum were shining. It was indeed most beautiful overhead. I took the can; but was rather disappointed that there were no familia four mide to great me and was get more disappointed when on airwing at the termine no me was there. It was at the time just 1 o'clock, so I thought pulle they will come on the next can, so I decided to went a little while. The next can came and still an one, nor war there any are on the next, but on the third can came some one and I won any gled that at least one had come. We them wanted for another car and ar no me she came we started

off on one trip together. We proceeded down the arems then consider the open words to Italian an. On the way we picked up remail fine cladonian and right at Wilton an. we found a fine specime of Bacangen rown. The trip down Wilton an were taken very bring, we found many things of interest. Once while we were bury examining a rock it rained a little, but so very little that we did not mind it. It

wer 3 P. Mr when me ruched Orange knowe and stopped at the old mill to see the Marchantia. We then admind the swollen river,

here renting over the dam. Coming the wine we continued our hip down the Rim Road. Here we had plenty of opportunity to admire

we were oblyid to go up on the hillside, but this war only for a short dictance. Dure polartin were collected and also many opening

more and beken. The mumour little water falls coming down The

San freye was found in bloom.

the harrow eide ravine were much admired. At one of there little ravinic Conocephalus grows is quantity and are had offertunity to exame it and note that when conclud it gave out a peerlan ador. Its taste. to in similar to its odor. At another place Black puille war collected and so it went an all along the road, no wonder it two we nearly 2 home to reach levalor, where we stoffed a short time collect willow wands. At avalar we could the bridge and proceeded clonly of the hill and then along the Sulphun Sp. Road let the old hotel we mad a bright to we what still remain of the once famour structure. We had hapful to reach arbition in time to ere the crow rout but it was note duch and we still had a little ditame to go. We now row reached arbuter bis as I frank it was too lete to see the crown. I more decided that it would be better to go along the tracks, which we did and before my lay we were at the Willein am bridge. Our commention dig ed to varion subjects. It was an afternoon most pleastly spent. Boy use were on our way home.

1111. 18. To Browhlyn for twigs and for rhysim of Podophyllum petteting. Podophyllum wer found in quantity. Skench Cabbaye too, way where The day was heartiful almost spring-like

22. From Carry to the Gumpowder ther along the right bank 1112. to a point about a mile below them returned over the same route. It was a trif with member of the Mrd. and. Series We met at Hamilton at 1 P.M. as weeked Carry et 1.15 P.M. The wind was quite cold so built welking were not objected to. We reched the run in due time covered it and examines the wehr on the nutt side. a few behin were collected by Mit. C. We record the bridge x then proceeded along the right bank, Inom hun evened the ground everywhere, but as it was findly fragen, it was most pleasant to well over. The cracking of the fragen priess of enous under our feet made count agreeable envise. We had very little trouble curring the stream and all were pleased with the beautiful view from the hill-ride. I wished very much to go are for as the rocke, but as several of am party were fishing cold deemed at wise to return. Beautiful of remine of Pyxim conductor, Brullanie, Dadalus, ite ite But what pleased me most of all were come fine opening of Physics observer (!) found on the decaying trush of a Juglane conince. It was just beyond this point that we dried to return. On the way back I get some fine of arthonia from the truth of a Hornbeam. Although there were 10 in the party; on the homewood stritch there was in gradual expanding, so that I was finally left alone with my C. my 5 x my We walk more living and on the homeword statch as the steer gradually affected had also a little tells on actionary. We felt were that the other members had by left we what were our empire therefore to find them all at the little station having arrived there but the minimute ahead of we. Ever after we arrived we had still 15 minutes to wait. The car however come along in due time and at I P. M. we were back in It. and by 80'clube or doubt all were rafely home.

1113

25. To the woods along the nine beyond Browhyse. It were as little cloudy and the wind a little chilly. It were my intention to get a few efectives of Symplorespece fortides. we instead of going to the little review proceeded to the spot beyond the course in the word where they are quite plutiful. When I entered the woods, my attestion was attented to the futty of entered the woods, my attestion was attented to the futty of frame in a little other, letter of sping ground, I found a opining of Junion, I knowing that the fith of frame is made up of breiffe attellate cells. I took collected a member of the leave. Here two I found reveal Cladonin, Cl. campiticis, Cl. lifter phylle and an unknown one. It was just pleasant in the woods, and I open considerable time looking about for him he would be a ideal locality for lishing, then are not many form of their intenting pleate, Com it provides be due to the close fortimity of the city? Purple so, let any note that are het very four confirme form. I had get, I was comfained to find here Paralie expecte, only a weight title of it it time, attle here it were. After colliciting a few specime of the Stack Cellyse, come Doddow and a fully opining of the lamie arguing area. I started homewood. When I arrived about 2. P. M.

1114

3 A trip from Browthyn, along the rime to Patepow then by way of the P. R.R. to Frederick Road.

I left home about 8 o'clock 20 weeked B. about 8. 15 G.M.

I proveded at once to the Padophyllum locality and wented a min lot of specimin I then got back to the road, on the way finding a fine specim of Rividence the first of its Kind own find in print. On the way to Pumphaye noted that the alder more about in flower amount at P. I was pleased to see the advance made on the new chetric week, the weekeed wiving seems to be con-

pleted. I now took the road leading over to Patefees.

The portion of my top to the word to Landedowne was wath uninteresting, but just beyond this ward. I have it found a few of Fullacine, a harber, and a hour a flower, Nothing; more of what was now found mall juste near to P. when I found a new patels of Catherine mobileto. I observed that the ester is cafeely are for founded. At P. I would the blue brish as quest member. I me P. to M. K. was not only another or great member. I me P. to M. K. were not only another. I stoffed to see the old burief ground of the Radelle and observed a number of charge. Calletted on the way a min specime of Catherine argueleto.

7. A trip along the Sumpounder in rearch for lichem with my C. my S. a.

1115.

7. A trip along the Sumponder in reach for lichen with mip C. my S, an Imp mes. We were to meet at Hamilton in time to take the 10'clock can for Carry. I left the University about 12.15 P.M. and hurried award to the corner of Balto. X Hanoun Ste. where I had to west while 12.30 before a Hamilton can came along. The car, in fact, was so slow coming that I felt rue that I would not beable to ruch It. at the appointed time, however, when I bounded the car, I felt accounted for I veryunied the conductor as the same whose car on the last occasion brought me out an time, at North an Imp C. bounded the car; she too, thought she wer late. We reached It, a little after one P. M. but the can wer there and here we were joined by Map S. x Mip Mo.S. We hurried into the can and 15 minutes leter were it C. The road was very muddy and our rubber shoer came in hand most weefully. Our first step war to admine some birds on a persimmenties, My C. thought they were but or she was more a bur in doubt we styled them Persumon birds. They at any nate seemed to be enjoying the first, a quentity of which wer still on the tree. Factor on we stopped again to examine a persumme tree, but this time it Here wer Physic, also because, and Pysini, and several Parmelies. They were not rainly collected however, for the back of the tree was so come that in attempting to cut it, it hope into romall frequents, and the of like runed. There were no stope now, until we bank. There were some delay crossing for the stream & was quite under, we homen, got across rafely and at a point where reveal laye when covered with believe, Bome time was spent here collect them, Bendes the lichens there were also several hepaties, the pe ent being Porella platy phylle, which was growing in profusion & most

luxurently, On little behen intented me very much, but it was about inforcible to get it off entire. I believe it to be the same spin found on the who on offinte back of Sunfouder at the bridge. Here two, the ladin could not resist eating some of their lunch, but, it was here from hunger then for the purpose to get ride of these package. We now went intoad and before by we at the pretty webe just beyond the old stone home. There were must beautifully confeted with momen one between, befatic and more. That we enjoyed omeline here, may be reality seem, when I record that fully to home and a helf were spent here. Here were Physicis, Pettyin, Placon dring, Gream, Strete, etc., etc. Peltyre after wer found, & I obused that it was a beautiful green even at the season of the year; no funts were observed but its frenchin want like out growthe made is early recognized, the other Peltyne we more a bis reddet - brown. I wan pleased to find State am pleasured it growing on week. The exercise observed had but from apotherie, whether this is pearlier to work forme or not could not be berned. Here in one rock in an about in accereble place grew a fetty to wellaine. It grew in profice and I record much of it. not withclinding its in accombility I managed to chick along the rock and I war fleved to see up C. manye to chil fact likewie. We had spent so much time here that it reemed hadly possible for one to go over the route planned, but I wished so much to do wheel really seen my little of the river. It were now 69. h but notwithstanding, we could see fairly well. The wine were must beautiful, arowing along so repidly; the send, too, every when along its book showed how high its water must have been previous evening. We could see too by the him of demarcation separating the self from the wood soil with its covering of leaves how for the rive had view. This pat of one hif although is interesting was marred by the mend. although there were no complaining, two of the ladin, at any rate, wiched it were not so muldy. After going a certain distance, I thought that, after all, it would be wine to return, this motion was promptly evended and we some made all possible hate buch to the wed, and which we reached without any with of. The air along the brown were surper changed with the order of either the

dake and the steer were ching, briftly, Our howard tif war then of in witching the steer are they gradually made their affection of its witching the steer are they gradually made their affection. Int with a chart distance of the states I observed the can a heatend orward to Hold it bed but before I could reach it, it stated off and my colle for it to etf own of my awail a Nothing were bift is but to swing its rate. The helf how were afect in chattering a formed yinte rapidly. We were all glad to see it however, a heatend with it up to the return. It minute late we were in It. Here again we had a want of at best 10 min, but we were field as one way home where are all armind in due time.

10. A trif to the ravin bey and The Cam. Heft hom a little before 8.30 G. Mr. Took 9 G. Mr. can for Every Same reaching It I. Church have at 10.30 G. Mr. I took the wend rout to the rim.

Very little time was afect along the road, atil steffed to seeme some Physici from bounts men the church, and a specim of Parmanic round distance for the or a larvind at the cooking was

I seemed some of presion of hogel. I now entered the little was

form, a bromish one attracting my attention very much . This

besty require further study. Just before reaching the spring I stiffed to est my buch, and here I collected a fine Cladina

from a decaying true bunk. I had had a herdecke but it more good

uelly left me and I began to feel more enterest in my work.

were way where observed, and I received many fine spremain.

I doubt to go along the right bank. Beautiful Cladonin

On the rocker, too, were rememon hepatice, and I again had an

offolimity to are Itiete auflicione growing on rock; here again a

on Saturday I found but few apotherie. I proveded along this bouch with I came to the little bridge. Seeing the path going of the bullide, I decided to beam where it led, but on making the attempt

I found it would take too much of my time, becide the beautiful with close by were two much of are attraction and I provided to them.

Here wer much to admine and I spent much line looking at the various

plants growing there. Here was plenty of Collema but none in fruit, then

then were me with a carmine colored medulle, but I could find in fruit

ed epenion. Here two on a decaying by I found Philidian pulls rinum in quantity, also a nice lot of Cladini didgma. I now crossed

the shear & visited the laye wich on that wile . after collecting a few

Clademin from a by and some Parmanin from the tree timber I started on the return trip. It was fine villable, but as I could do but my little collicting now I made good pager and an home and a half leter, I wan reedy to brand the can for home I had nearly 20 min, to wait for my can but it came along in time and row I was expending home ward, arining them at 8.10 P. h. 13. A trip with Botany clase to arbutur to see the Com Root! We met at the termine of the William an Carline. We were ready to start at 4.15 P. M. and by 5.15 P.M. were near arbutur and new many crown already routing. On Time any win to show them the little cemetery on the hillinde. I decided to turn it there rather than look up the com. Here we found reveral plants in bloom. Drahe vema. Itellarie media, Hazel, and Capaelle. On our return to the reiland we found several Cladaria. It now was quite dark at any rate ro duck that we could not are the crows and as a result we failed to get to the rout. However we all seemed to have enjoyed our trip and the homeward trip was must pleasant. We record the case before 7 P.M. and were home before 8. Our day corpus is now in bloom. 14. a short trip a little work at the acad. Scrim with mp C. to Brooklyn. I was oblyid to get spremium of Synthouper otherwise I should probably have gone somewhere also. I suffer it must have been about 5.45 P.M. who we received Brushlyn We at one set out for the little ravine which we would in a little while. On the way we found Stell in medie and Drake verne in bloom. at the Spring I set down on one of the when to fet on my rubber chur. - my confamin not on the other and I red to her one of the accounts ofrom my transfer. We then continued on the through the raine. I found some Palie in fit and send a min ofrein. Symplecafor were found in profining here two, we found allow in bloom. While collecting the Symple. carpe we hend the fining off of a gum, and presently some two young fellow coming up though the rame, room afterwards we found a for little bird bying stiff on the ground. It had been died some hime so fourthy the ten we not with the gom were not girlly of its death. after being the raine, we took the path along the raine. The day over delightfully please to and at this time of the day the raine booked most heartiful. We stoffed a mumber of time to admin it. How beautiful it looked winding the way along in grounded covere ? Let one spot particularly it booked very feetly with the beartiful chaddow of varier dentile thrown

across its born. We finally reached the read and the stated homeward. A short stop was made to take up the Sy-pleafer and then we havind orward. Jufita and Venne were both showing brighty, and just eastward of the Jupiter was the moon. When we came to come we had it a monet to wait as a car was already their and 15 minutes letter we were at the transfer station

- 17 St. Patricki Day To hutherthe Temain, and vicinity before about 9 a. Mr. for Town. I beautiful it to there 42 air schedule to to go from Chala & Fayetto Ste. to T. arrived at T. I ret out for it when I welled in Just lie. I am writed the samp gout to the most of the village or how I get Symphery in profession after evenice enough of coming I founded to T. and then welled now to the word little trouble getting to the first him would be I the trouble going through the and at same time keeping parallel with realised When arturing the wonder I first of all ate my laurely. The word have central way of the briles is many old fine and after the Penfils again. On the general trip ford of the wife two Points and the Point of the first of the world way for the I chant to the well of the wife two for the point that I chant to my trip but of the careful and many of the briles in my trip but of the careful two real beiding to Pro. In a little with I win buck again to T. and a little lite healt to I. Ruched have chart I P. Mr.
- 1120 21 I trip to the Compounder with Might a My S. We must at Power at 1.15%. On we as puted two men in our party we waited with 1.30 then atested on our tap We took the want to more to Homphin, on way stopped to collect aprening Thelocalists by chance. Person though Henften we took the route through the words to Person. Person though the for mande at the rocke and they were evan wid in the hope of finding come good aprening of Fraultania Buttonia Court thing were no dry though that the opening did not about a found. One coay to the path I say plained the repulsation of more and avon found a little word with it. I have two wine Symphesistics of more with the required more a collection of Table two back and in a little while had the required more a collection of Table two back and in a little while had the required more a few lower of the back and and wome entered the wonds again. Here I collecte a few lower of the hold for the little trouble fishing the big apony when we use had a draite. We then took a view of the bound and from the top of the hill. It was now to P. M. at tone to atent home went. This we did, relevancy faitly own the way come what I stored the wonds right at the bead in the road.

For some time, it lowhed as if I chould not find my way out, but after a bit came to a bridge which I recognized. The wed had of to Humpton and in a little while we came to the by monsion. But ing doze disputed one way, but me fund award and after a hit entered the broad fath biding pack to Dulang Valley. The standy this time were shining brightly and we stopped frequently to admire them. By the time we reached T. int were about 7, 45 Phy we reched have by 8, 45 M. The day wer a most builtful 24. auther beautiful day. Left home about 9, as, Mm for Catomiville. arrived there I proceeded part Valiatio to the ravine In the wet place just beyond the house I found from eye. from this place I went by way of the old pump house with the rame. The woods just below the fund have have all been clined and the wond is now being hauled away, ar I was in no patienta hung and had already found the for yes, I proended very becoming keeping along the right bank of the chim at the read highland I found a putty behan on the surface of a ruch, but having no chical, I decided not to attempt githing it off. and chall try to think of it in the new fature. at this point I comed the browle and preceded around keeping on that bank. A search for Eng thomine was only partilly severes full, many plants with laye back were observed but none were found open. Hepatrice wor flutified and I observed mainly two colors in the flower - white and blue. The white own Junit trace of put. Bolder car if ye was found in flower. During the afternoon the arm shows beentifully and it was west fleerant in the woods. Collected a few beins that the in church a set to the the the in church a set to the the the to the the to the the the to the the the to the the the to the total the the total the tota faid very little attention to the time, started homement about 5 P. M. but it was nearly 7 before I reached C. and was finally on my way home. Rund home about & P. M. 28 From Dwynm Och Junction to the Falls. Over a week of healful weather. armid at the falle I proceeded along the left bank until I reached the first bridge. When I entered the field at the junction of the rand & the felle I was at once attracted by the mumerous Thehen on the rocke I believe Paralle compens is the one must common I hoped to day to find Physician hypolenea but some how or other did not

but notwith standing my reach did not pud a single plant. all day it has

hem more or beer cloudy so much so that I took an umbulle & very heady it

1122

1121.

came in now for every little while there were a light shower of ras ar I made my way up the stream I hept a look out also ar to to appearance of the other aide and thought it well with a trip in the new fature. armed at the first bridge I heatened amound to the fish and returned back to the junction when I took a car for home 29 a short trip to Broklyn and the little ravine for Gods-1123 phyllim & Lymphocarper. ar I finds to find there opening yet day I were obliged to go for them to-day. It were needly 11 h. Mr. when I reached the little rive. Englosphyllim is well not of the ground, and on the way I found Bachere as full blown, I here in the little rive of Bach and Lymbe were show found in blown. after running spremin of the Podophyllen 2 got the Symplocaryon. Twice on this trip I found progressith their heads extens off and this stomache bying close by. In first case the fry wer on the ground, but in the record core it were bying on a tree truth of least 1/2 ft. from the ground. I have no idea what could have down this. The morning was extremely culting so I was not at all emp at the endden & heavy down four of rain to which I were treated an by way homewood. I had but a short dictance still to go to work the cir, but the rain come so suddenly & with so much free that notwith stading may umbelle I wer will routed. Rechet how chut 1.30 P. M.

1124 31. a.M. another trip to Burklyn some or above, this time to get . Springer. after evening a lot, also openin of Denteria, Burker + Drube I returned home.

31 P. M. again to suyour Oak Junction It was 12,30 P. M. when I 1125 arried. I proceeded at once to the little stream just beyond the tole gete and here were the oping ate my buch: after esting my bunch proceeded along the brook a short distance. The trip was fire, the recur most beautiful & well worth an afternoon trip with my class. The man rock clothed with like a hepetic were very interesting and I received severel fine specimen from them. In the low ground, two, I found Symplication & recent immeron specimen, as I were any ion i revisit the falle I heatened back to the food and hurried ownered end in a little while was at the falls. Here I first of all examine the stone wall & rund a Cladina, I then examined the runder I below one of the opinion is most certainly Paraulie consperse, but with it is an other, looking comething the conseque, One of the like being juste laye & with laye apotherie, the other much smaller, browner, and with small apotheria, the larger are looked a little like P. capute but it is not black on the under side but whitied; the smaller licher is also white'd on other ride. Can both be comprise? They savely both like different of Still both grow bythe. after evening specimen I returned to the road, speciment the bridgest & proceeded along the right bank of the felle. This is a fine trip and is some respecte bother that the the one along the other ride. The minim of the street have been by the still to the reserved were particularly fine. One of the little tribut arise crossed were show my pietly a most intensity will its had of must could route, all of which would have required more this like I want to give them as the version. When I result the little bridge I proceded up to the road as as my trip of Sit. Man. 28, The fine mist having one way they last a particular charme to way they to day. The full at all ports was good, and I must some make of the trips along its banks, expeciely some below the bridge. Returned to the trips along its last of 5,25 P. M. x was home at 6,30.

126.

4. Through the ravine, crowd win at Orange berner then along Rimin R'd to Eleberter and back to Catonwelle by way of I hathe Slew Rd. We (Mp S. Mij ms. My S x mije) met at Catmaille terminim at 1 P.M. It was a beautiful afternoon, a little windy but not too much es. We proceeded by way of V's and the wonte part the old pump home. at Out Sping a short stop was made and the sping closed of the men of deed leave. We awant the book at Plymonth rock and paid a visit to the old site of the hut, and to Camp Cong. before crowing we stiffed at the month of Camp Rum, and the I red a few articles from Ball D. Our trif though the ranne were taken so slowly that it was after 6 before we rewhed the river. Along the rathered tracke I collected Equiretum aware. Here too we found. Coydalis in blom. We crowd the rime at O. & & priceded along Rimin Rid towards Elehester, on way the class gradually came out as that i by the time we rech I they were shining in all their glory. The new dear at this time of the ever ming is juite heartiful, the wishows under the water are seen at thin but. Then too the futty chedown in the water how brankful they looked. To-day there we a most breakful conjugaction of the more with Verme & Mare, the letter also being in conjunction aldebran to war not for off, all together, the view of the star them plante mand the moon now new wer a most heartifle one. Then Jufter and Sirine, and Ovin, all were admined On well of Thirthe Islam Road wer a most pleasant one. On me mend Andwich R'd areturn became windle and the contelle him Britis. Som Spice wer even and me had apportunity to see the fretty triangle found by arction, spin x Denebule. It was

but about 8.30 P.M. when we reached the car termine. On home late.

1127.

7. A trif from Stony Rum to Slendwine. I lift home about 8. A m.

Provending to Frederick Ris Station I took the tree to Stony Rum.

The day are bot, rether striky, so not one of the minist for temping.

At the station not a young falow with distingula he was centing to

20 mile from home to him them in flying. By are tolem away on the

trife during the server, fait a short distance from home, then a form

mile, then 5 mile, must 10, must 20, and 20 on. It reams as if the

reintrode ( of any rate the Presen) have some agreement with their prime

formine and they undeather the work. I been that the Aleminium

hand is plend on the by of the bird when it is bird 8 days olds. I

list head; there of the male being more convers or rounded.

Wet 5. R. I spent a little while the stated out the road bounds to

North; hartically intentify were observed. Reached by what is

proveding to the head of the Presence Ruch. I called some

Baggaini to the head of the Presence Ruch. I called some

Baggaini to the head of the Presence Ruch. I called some

Baggaini to the head of the Presence Ruch. I called some

1128

10. To Samponde Rine. Weft the Unimenity about 1 P.M. I proceeded at once to Tower. It was my intention to go out I Dulany Valley Pile to the river but come how I got the id that I had to go yok R'd. While on the way, things reame a little atrange and finally when I reached the tall-gate at I. minimis I fully really my blunder, I now when I show I to the total years of the continuence of the c The little trouble finding the road heding to the bridge and just are I weeked it met a man with a term, who haidly find a min spring; found also on the fuse rich two pretty hel and last, but not best, a futly more on the line stone when near Many min. I som M'r, I proceeded at once to the bridge x them by the mer. While on the part of my trip I found. Dice in fell blom. I kept along the back of the ine and must interest ing did I find it upuilly at that featurement when futing. There grew Coffin Trichman must heartfully. I som unched the of attle home and have I got Egentum aware. It was now close in to 70 doch and I for I'd going withen dach so decided to heaten or wal to I. On my sam a fully mater. amind A I. last 8.30 and have about an home leter. On way not the word blem about a gale, hope plu of dead word were found blow from the heri

1129 12 Po Catamille; O vege learn and reliem. Left how about 2 P. Mr. The wather charl. I get at the sea at Blooking R's and founded ship of to Catamille and then also Cate will are to Comme Rid and to Change bloosome and Eguneteum. Change bloosome are to be had all along the roote and I mand a mine let. On many along rich. word I get the Equintum, have to I found a mine let of Vile tricolor an armount lefter remains afrom returned to Cataminally by way of I bilton and along Dard Rom. Send some fire afrome of Experimental Springs as at the stone water; better along as amount and the minor curfe it was found conjugating. On way at armost appearing of Experimental Room the stand the market of lefter walking along the roote studying them I made my any transfer to which along the Elile.

1131

tulying them I made my my touch Enhance, the day the Etilue line to Bomin Bur where I tok the can for home 16. With Bitery clear to Globin & visinity. We tok the 9. 104. Mr. being. The many wer quite bletery notwithstanding we enjoyed our trip down the track a server the country to maky budge. arbitum wer found way. in we armining the larger for pitallete outher. Out first more could be found, but work some were find a then we for them juite from the war for maily. On many bound at Coder apples. The wind was now her blustey and the temperature in he miller. We wind after a bit ato Muly Station Thea little short stop was unde & then we hatend would to havet Home. The first of all, we paid a visit to the Lygdine place. The form is just coming up; the old produce withough without the wore for were, still were well enough personed to be admired. I som the few region we proveded to the daw and how must of them weter while four of are hip South, hip willer, Mr. hup a get present to the Helmin sweet. We found the plat in blow & viend a few specimin. On the return, in food that the other had seand a few Potelin Plants in our above. We man Il stated buch to Muly where we took train for home. Wif Wille we estated as historia. Mijo M. we them reder a year or more ago x critical fully revery the every that can under her enting. The tender main of women! They wished more aan opportuity to criticis one of her production.

1132 18. On afterment the te the ravine at believating. It was alonely when I left the University but it had been we all morning, but must no much no are to expert win. However the if the aftering it became more blackey we track two o'clock it began to shower On I had made of my mind to go to the ravine, I kept on my

ride. Here I faturately come across a rumber of the spicemen. Mr. S. took several specien to transplant. Ofter recurry epiemin we started homeward. 28 To Franklin Road. Towh can to Winden Height the founded along Franklin Red to the old bridge, crowd, & accorded hell to Welbrook a much of birds were observed as alex in Sunday morning when his. S. called my attention to the chichadeea puty little bid in gray with a puty black cap. He also ported at to me the chiffy - a sperme with a reform creet. both of the bide were for sales to-day as also wer the cary 29 With Section B. aley Hong Rom. Here was quite a laye getting. The day was profest. We found an very way to chil the hillide and no me growelled. Everylody seemed delythed with the top. Returning we would the live bell grante.

1 With Section a. from Bonnie Ben to Fraklin R'd them to
the hidy arm Deed Rom & beach to the can on Edwardon an. The day was an ideal one. We proceeded one the roote would then. Whe new the grang we were would not to go on an they intended to fine off a blent. We ! toffed a shot didne from the grang x winted. after winting for juste a while x no blent still height of I decided to freed and I the grang by joi, of the hellicide. This new route freed juste a same in a second of the hellicide. This new route freed juste a same in a second of the hellicide. This new route freed juste a same in a second of the helps crowing bled Rom I fere we trans in to the road bading lived Corbinille when we took can for home 2 Mith hipe, 3. 3. x MeS. along the bumpowder. We met at Hamilton about 9.30 a. M. and there took can for Carmy where we armid 15 minuter leter. From C. we started for the Sunfounder. We were in no particular hung, the day was bright and we were out to enjoy the day, so stepped frequently to examined the things along the magnide; no wonder it was after 12, before we reached the river It were our intention to go along the right bank towards Belie Red but, on there is a fine oping on the left bank I decided that we go to it & there ext one hunch. This we did. It wer 1.30 P. M. by the time we were ready to steet. On already stated the day had been treatiful, pulife a little rulting but not very much so; we were! very much ruspined to note rudde cloudines & now as we were reedy to recure one tramp, the fell of rein. I ortimately a mir shed was not for off & thether we went for sheller. Some it rained harder & them it continued for nearly 2 hrs. when there were a little let up, & before long it looked ar if it wer clearing, We.

138

139

1140

141.

1142

1143.

home a lage patch of Meeterie was observed in the allumit soil not for from the river bank. We all in a little while were brug col ing the futty flower. While there enjoyed there were a endder down for I off we stated for the ward again. Faturately Mr. Con was at her down in inited we into her home, which we glidly sufferd, It now record that we were fixed for some lane, but finilly about four o'clock the rain seed on in a little while the em shone. The set of after noon wer grand in fact perfect & we had a fine only in fite of the wit We fint turned it at the bridge. Here I for Valeriandle & on the hillerte Orche epetable in great professor Several frame with pure white blossome were found there was facts a min little find. We then covered the bridge & prevended along? mysto bank It were 50'clock when we covered the street so we could not yo as four or I had planned nevertheless we get as for an the water. This trif we added an ideal one & one worth to ing again under better circumtanon. In after of the west one engage it in much. What a profine of Meeture, thousands of the best full flower every when. Then what a fine let of Coulfhyllum. It was after 6 ?. M. when we well the weeke x I drieded this we had better dut on the return. I was any in to reach the O tail from breelity but thought it would make it too late return my. after we could the other again on our return we stoffed gain a little which & ate the remainder of one luncher & then too for C, where we arrived what 8.30 P. M. at 10 P. M. I were home.

3. To Herring Run for Chare. Ofter arriving a wire lot I med a short trif of the atreem this time soing clong the right back I for I'd just enterething and not one difficult.

5. Whon, Deed Run as for one the bridge them into Winsin eiter I much that they will the up fait him of finding Gh. for home. In this I want to the parting from men found. hear the top of the hill ride I found a prominent path, I followed it bound that it led off tomake Winden Mills Rd. The path wer a more intenting one a Takell keep it in mind, as one of the one which I can take my botany class.

therefore decided to start orward. As we were nearly offorte home

1144. 8. With Botany class from Roland Pack to Wondbrook. We went one the wend route and found the wend plants. Or some of we we amy win to go on the trip to the Falls of the Potomes on the movement we did not take the trip to the Raylum.

1145. 9. With member of the Botanical Siction to Great Falls, We at Camden Station and took the 9 a.m. train. There were 11 in a

party. We arrived in Washington before 10 o'clock. Here Mif C. we met by her friend and she got rid of her valice & umbelle. We were pleased to see the new station and spent a little time lowling et its pretty interior. We then started for the electric en & by 110'clock were et the reagetown terminal ready to take the car for breat tralle. We had to wait a little while before a can came as a consequence it we 12 o'clock before we arrived at the Falle. We at once prouded to them. What a grand right by them before we ! How difficult from lest year! The incremed volume of water about could way thing. It this respect I thought think the view last year futher. after my'ny inj the same for some time we related a spot new by and then we ate our lumber. after dinner we took the trif of the stream or for as the dawn. Now we had a chance to are what an increased whome of water war rucking pay to-day, insundating the bank in many places even as for as the path. We enjoyed the trip very much not only up theam, but also back again The min at the dam was comething grand. How madly the water hardly think that this mighty runking & happing of the water were merely a river. On the way we found again the petty plante we found in our hast trif and besides two new were a little wouldliferom plant Chaerophyllum procumbeni and a hundram leguminam plant Lathy-rue venouse. The trip back were enjoyed about as much as the trip of. When we got back to the Falls we decided to go down atherm a short distance and search for pot-bolis. The screenble among the ruche and climbing over them & to their highest points were keeply enjoyed Her sweet fine pot like we found - one in one one one 4 ft. in diante with another close by one 2 ft. in chain. One of the member found the Opentie. We now started but for the station where we took can but to brush to be station and finally the wide but to Beltime, where we arrived at short 9 P. M.

46. 12. a.m. To Broblyon, Visited the brityto true at Change. Thefel to find them in bloom but there is an yet no tree of blooming from Mr. Change daughter. I get 4 min readings from under the tree. I now wellhed award the plan ma there well water to the sping the. but t wed a Broblyon when I took can for home.

47 P. M. To the Potapeer at Union Dam. I took can are for a Rolling.

147 P. M. To the Petapres at Union Dan. I touch can an for a Rolling Rod, then proceeded own wend oute to the Part Home. I then founded up the stream or for an the spring. arisame Dresontenin is just coming into bloom. One Jackson theofulfit were found with a few sted buf

that is two grown together, it therefore had be leeflete, witeed of three wer setter worm. and has but 6 P hr

13. With Botany clan from Roland Park to Falle Road. Jus as we were coming together we had as little rain but it coon ceres & we proceeded out Roland Rid to Dohmi estate. We entered The estate & made one way through the wonde. after reaching the in pour we proceeded along the woods to the north then we crowd the open file

and took the car for home. 16 To Benfield & vicinity by way of the B. W x a. trolly line. The morning was cloudy and looked very much as if we were to have a raining day, or a consequence only my s. should herelf at the term wil station. We hoped to take the 7.45 a. M. him (can) but as we were in laper that at best MyC. would also come we deaded to want and 2 it was 8.30 a.M. before we left. It must have been about 9.10 when. we arrived at the new Namel academy Junction station. The conductor let un get off some dictance from the station & so we' had me idea of the really being a station. I was surprised, but thought that as the r were new, none had as yet been brilt. I inquied of the reach or by the direction to B. but none knew, to them this was assentively new land. Seeing a cottye close by I divided to inquire there but here too, the name of B. was unlenown. I thinfur asked the direction. Oduton, and wer shown a to nevou patch leading part the house. I know that after I had once a definite point to start from I won port another home, here reing a man standing in his downway I again in grand how to get to B., and again was greated with the same he culin smilet, am obained the third time, & with the remake that he did not know. The peulia mile was no doubt the outward mainfest a? of a rather complex is said feeling, possibly of fity, compassion, and what not. However, he should use the direction to O and we proceeded buy reading the names of the wild flower that we were finding, aheely she had grite a formidable list. Possibly it was the box in he had it may hard that also helfed to and no doubt the troud I had in my hand that also helfed to came those peulin smitur smiles. However, I must say, that for true heat felt greetings let me meet the lame andle counting all i time . When they great you, you with feel that they welly were please to reset you. A transf two I will spend no now time whom the train thought that are now But let we herten on the path brought we the railroad and I was now able to locate one porition. I decides to take go along the trucks, knowing that according to the Harrely, I must

room ruch a road that would take in to B. The recording of plant namer now became gite an interesting months dity. Here your having in gite a large patch, It was so futly I thought it possibly countling mm. In a little while we were to the new obstrone, What a fine place it wise. We are confined that we had been allowed to get off so for of the teche. We continued owned, but had not proceeded very for when I was attested by the right of a futty plant with yellow blown. in full blown. In room or I can it I know it must be the Sorteh Brown, although I had new yet veen the plant in bloom. It did not take being to descend the hillinde at in a little while collect commend of the hadrone flower. The flow has a delaytiff assuments around for properer, who married by them. I have too our found a fun by second or them. I was sufficient to fit them for I thought it too late in the reason for them. But, in this I was mitchen as we care learned. We contained much now and before by came to a futly path. It was just one of those pathy futher that I along fullhe unitigating and were just about doing so when I thought that privily after all, I had better go much. My week som should me har for I had to go to the mad, at that we are objective hand the Siffighter. From menting we had been seeing hand the willeted petels of the just now we came upon on immene patels. What a breatful right! I had already fryently seen just each pretty patcher but not so My S. I'men pleased that she to had more an apportunity of seeing this patty plat at its best. We thought of me mining friends & willed that they too were frent to enjoy it. We began gathering some of the futly of thee and in a chart while had beetful lary boyets, but we could not ree our denut aline, for way-Cyp. acouste and we divided to take a few of the blooms. We now wiffed up our flower & the time laye prehuge were suidden amy to amost our return letter in the day. We again started on our trist or in a little while came to the little station and to the road that was to take in to B. We um left the tracker and made on way up the hillside. Before by we were at the school have and have the red faked. I get at my of, bet mitching withthe turley made a little mitche, but som became awar of it. I atmetily two a farmer has overtich are x now for the first time we not somewhat who really had head of B. & was able to dient us. In a little while we were back you to the school have and on the right road. How fretty were the Locat tree right here! We could not exist teling some of the handrome flower. At the exhaul have the were some putty Gh. I we decided to take some on one way tack.

Here two I cam one of the smellest Cop. I had we found in blin The filing of such plate, pot aside all thering; I have almost thought that the plat and rent a certain ge before it was How, at any with the must be a certain and of thed up How, and for that reconst plate that at How way year, a for that were also there were may shoutly what plate a in blown. Here, howen, was a most during their plant with a on my return bet wate following, could me to love into of Our fath, I can hadly call it more than this, although on the met it is maded down as a full-fluged country weed, wow led we through the wonde, in feet we had been in the doorde from t to se lft the sile od. The butfit tun on either wide of an earled over to us for alone on beach, so we had the and her aling, we would have had a most beautiful study of few land but for a best four wiele. Jet this of a pute with ight through the deep work and of each a length! I do with men to B. did we can to fields and there were bode by the about and wenter would and one wide. The trip they the work one buy upjed, there we would of interest. I tow me flow them are, when a little ich excurin might be mile! wer all been to me xall estanting. What intented me most were the many butfl Gf. What a butfl about of date he I can aly the of them are of a light shale of file. It was for 12 o'clock also we realed the ope fild you & I have me by the forme atill had to go to B. My & we trying; to full the had be and had at will we would the the little eft ? hed in ind for our web; place. We were wor to old will. How fishingue it bothed! They were not working but the typ hing aread, or the paladher, should that they had! been water parily in the money. a the little well is we were in B. From B. to the billing of is did not take we very long for we had now weeled that stage that when flowed eights & enemal besides of Notes no logue were confusion. armid of the oping. not down good a nin little fort on the billile above it and i a both we doing justice to the god their that being hunds had but of in the wing. The five the the water, and the at, was hid its affect - the tild feeling, his offered in use were to drink in again the bottel were and we so they again

the fitty flow. Inft he we am it tod, who for flat the effects of one by wells do in the sound for the Shell the in the pix am hatfel had in the sound for the pix am hatfel had in the sound for the pix and the pix am hatfel had in the sound for the pix and the to the oping, and the remajor of this time continued are fith the ada Bet Och. I also like this path & I am flow that 1/1. liked it to It led an along the river & we again had a chant zee. I don't lady, the blade & - Shell Hady. How fluid the a better like. On the my I had ffet ity to also my s. That betiful Parlie fetere, at also F. apple. Orived at B. O. on the the path but to the wed. On the old true to be me find State anplinia & opinion are collected also for the that were alex. The fith taken though the fity fin. On this take we find of the fith of the fith of the thought for the thought for the other wellings the day we thought how the other wellings this on that, but I believe it was right here that we thought of the and fell. It was flow 4 P. he when we were you at of the work & on the word how and. Before by in were buch to B. The again to the old will, to the ope from x at but to the ande. We were auding and good time we were empired. The path though the conde was again anyigh, It was an good and was in the for the faith of the alter - went to fix them, but to day here they were - It was such a win edge to our trip. In the residence a fitty fil x me you are in the often. Before lague were you buch to the railroad at a little leter to the plan when we had little our flow. Those one row found and som on set don't est the little land left for the wing. The came the pading tysther of the flow on the try to the an to to 7.15 us me ble in Belte. about 9 a. m. rude to Brooklyn & then well I lived at pick ledy to the good I to din & in a little while were at pond. Here I stoffed to cut my brock and while has we had am first title shown. This first shower did not lest y very long but even after after the being above there was no more rein. My trip was made to had my of services, girle a min lot of them. Ofthe securing them I proceded toward b. them to hops, arrived home before 6 92 M.

96 May 20-31-1908 20. From Dichyville to Suymo Och Juction. Just about the time of 1151. meeting me had a heavy abover as a sent only two member came. We took the route werelly taken. 22. Again a heavy chower but this time a few more came. The ting we along Herring Rem. In spite of the striky weather it was enjoyed. 1152 23. The trip proposed was along Western Run and we were to meet 1153 at M. W. at 9 a. M. let the appointed time only mp S & hip he were on hand, Mife C. Mup 3. & Mip B. feiling to come. armid I C. I dies that are we there had always been over the route reveal times that we take a new one, at any rate new one to both his I a his has We : proceeded to the road beyond b. then cultured to the Sunform tweeting thing found (to me) were the futty plants of Liver permin. The plante certainly looked fitty with their more planer of the coul- und shade, but were futher in doubt been a new of a lemon whom. Only a plant we found of this shade. Unund it the we we made a short stop on the right bank to set a little lunch, often which we crowd the bridge & then continued one way along in the left back. On this back the most intenting they are the my li lifetale non in full bloom. armid at the willess on found a min spring on the billaide & her we set a little Alle unjoying the fitty wiew before on. We then went to the Un We now returned to the road & founded along by my of the way. On the way record from of the best worm found in yest muchen on the bony but. armis I C. we had only af minutes to wait for one train x by 6 9. M. we were at that. W. We now while of the trush a short ditar & the boyet of blown. It was don't 7.15 for when we findly started bones arriving then about 8. P. M. The day one intendy study, their to 26. a shot tif to But River buch as the tily diagnost The best fit of the day we the immediate fine flate of the and by the like any the world fine flate of the and by the like the day are to get thing out of the and by the like the day of the sond by the like the day of the last of the sond by the like the day of the last of the sond by the last of the last 1154 28 To Curhin Bay. The hot weather & thunder storm probabilities Therented a laye attendance. We went our our anal route. First 1155.

toward the cottage then to the coal pier & along stone home cove. We found nothing particularly intenting 30. Feetenday at 4.20 P. M. left Hillen Station in company with 115.6. Dr. When for his home at Buen Viete Springs, We arrived there at about 7.10 P.M. The trip up was keenly enjoyed. Dall. fuguently pointing out to me the state of more or bus geological interest. The red condition are was quite marked as was also that pendin black ridge of whee. 20 a 30 feet wide. arrived at the home we had suffer, then are how a more of convertation & to bed. The next day may 30, we started out from the house about 96. M. for a trif to the Careeder. The spot is indeed very fretty and well decime further study as regarde the licher flow. Beautiful Umbiling course cover many of the rocks. We did not tany by here though but proceeded moved down the road towards Rowseinville. The flow along the wayed was closely obsumed, but no great different were noted between it & that new one city. Two flats were observed that we do not have - Between and Sauchen myon, but nearly way thing che were never been familiai. When some dritainer down the weed we took a peth beding of the hellide, which bought on to the chetic care, we then followed the can tracke & in a little while were at Pen Mar, armind at Pen Mu we winted below lifter Springs & then started back to the cottege going by way of the railroad beach. at Pen men numerous of Pentine were observed in full bloom. The trip howeverd were gute a hot me the sum which had her hidden all morning chance ant in full force, this with the hamidity made the trip with a dis greatle one. All along the way Kalini was obrused in full bloom x so too, the Gillenie. We arrived home about 1. P. m & room often had dinner. 30 afternoon. Towards from o'clock we made a chart trif around 1.157 to the lake and them along reilroad to the station. Some time, too, was apart looking at various trees on the grounds around The 31 Sunday Morning, a trip up the road to Katharine laylore home 1158 the back to the rued below and then along it for a distance of about two miles. It is on this road that one come to Ravein Rul and to me of the Dwile Rose Come found in the mountains. The trif to Ravein Rock wer two long a me for the Doctor so I had

to content myself in knowing that this ever the road beding to it.

We arrived home in time for dimm. Towards 4'o'clock we got ready

for an homeword trip arriving at atation in flety of time. What were

1164. 10. With bottomy cleve to Back Pine. We met at Holywood put the took the rute wendly taken of the treshe on far or the arche opinion & then through the woods. When we finish, reshed the ruin we went along its bank a short distant then stated homewood.

12. From Grogum Oak Junction, out Librely Rot to the little fith new the brook, the along it to Grogum Oak. The trip was a new one & i kneely enjoyed. On the way found a flew when there was a fine colony of Entholice and at another flew a right afremin of a librarian plant. Arrand at b. O. two of one members took can for home but the next of me forward to Deiky wille when we took can for home.

166. 13. In afternoon they with mip. C x my B, along the Sunfounder to the Oction from locality. The form booked beautiful & the futle fronts are just beginning to affect.

167.

1168.

On may point a efet where a colony of belanne wer found.

17. With bottomy clear along Swymin to all. We met it the
Edmonton an, bridge, then freuld nothward also right back of the
shiem. Many they's new to the member were observed. This is the
but trif of this section.

18 With section a. though the revoire to the Observatory. This being the best reduced that for the section we intuled making the most of it from your if her him on countries on this day to make this truly, to thing a little bank with we would we enjoy on the work weeking the revoire. To day we left the termine it? 3. P. M. founded down Wilter am to the end of the store would be there with the words in got obstrict, but after a left there is affaitly rose in we couffy here to fish our way as but we may. This was did to findly resided the rain of the broke. We consed the stream the way when me was also the right we to the restored of the stream the way the make on way also the filming in the two a wind to the applied work ownered with a for an horn or more veryaged orwellow. Also to however we stated to for an horn or more veryaged orwellow. Also to to however we stated however the week of the the two in which we have the training when we took can for home.

1169. 20. With mention of the bottomy vection of the heading to Round Bay. There were 9 in one party. Mr. M. Mp. B. My C. Mm. B. M. S. mp K. Mp S., Mp MeS. x my self. We must at Canada Station what 9 G. M.

to disappointment, for upon examination I found the capsular right time to gather them. We now returned to the well & often a little with we continued moved to the station; here Min B took the can, but the net of we continued moved, to the function where we trok the car for home arriving the about 7 P. Mr. 2. P.M. about 5 P.M. M.a. x ) took electric car for Boy Shore, returning about 7.30 P.M. 3. Try along the Sunpowder from Cochegoille to Werren. another warm day. We took the wate by way of Mrt. Washington arriving at Cachepaille about 9,45 G. M. We set at at mee for the un. During the previous evening there must have been rain for the folige r. Weber may here was wet a before long we were quite roaked. It were another striky day and not a good me for tramping nothing new won obraved or collected M. Webe died on July 1, wer buried to-day at 3 P. M. 6. With Mr. a. on an all-day boot trif to amapolis West Rim and South Rivin. We remained on boat so did un boteniging Mumeron plan were observed while me doubt would prove munt excellent place for plant collecting. The day on the water war an ideal one. We left at & a. hr. a returned by 7.15 P.M. house by 8 P.M. No trips during august - but between Sept 2 and 10 3 a. M. Trip to Luchi and then to the beach P. M. Trif to aching Park. 4 With Mr. allen to Point Pleasant them to Clarkin and through the Pine Barrene. a short stop at more at the deserted buildings and them again through the pines to the week to hahewood. When as the road we proceeded to the Cedar Swamp at the Burnt Bridge. Here I found some putty likens and found the place worth revisiting. Mr. a. was quite onder the weathers. On my home we were accrited as far an Pt Plust by a Mr. - who drove a team for a bottling establishment. Lit Pd. P. we took train for home. 5 Left this morning for hew Jake. Touch a but train.
This is an ideal way of going to M. J. The remay, expecially around the highlands, beautiful, The trif too up the bay is fine. We to Coney Irland. Returned to M. J. by 7.30 P. M. got suffer a them crossed fung to Juny City

179. 6 a trip with Mr. a. x chan Hall to the Paliader. The trip wer a fine one. The Palisada grand. Saw the weber method by glavistim.

at mee recognized the place as having visited on former occuring after a brifatof, I proceeded award and in due time came to Webri Pak. Having reached Hayford Rd, I stated howeval. ut Cliften Pak ) entered mother estate For some time ? heft along the main avenue. When I realed the tri shop I injuried my way, but evan after got off the truck and were obliged to ach again at the day, I was again put on right may & this time had no tralle. Reached home about 5 9. M. Collected leave of maple, buch and elan. The class was very 18. Pait trip of bottomy clase. We met at Dichywille and took route to Garyon Oak Junction. The day wer an ideal one and would have been perfect had there only been less dust. However we must of most tif was the ough the woods, we were not 4.30 ind receled our dection about 6.30 19. To Rock of Den Cuch. Touch train at Power. We were not delayed along and so reached one distriction on time. We, then procuded at me to those pitnings who the much of all mintanto to the little place. When we received the commit it were after 110'clock, but not withstanding we decided to est am lumber. after this we child the wich around we and I wepufrin. It wer after 10 clock when me byper our desent. This this is official and of the weeks. Rushing the wed below we started on on return to the station. On way pared the "hycofuli". we reached station in time & arrived at Town a little befor 6 P.M. 22 To Swan Creek. Left home about 8.45 G. M. after a short stop in S. Ballo. to be rejetered continued orward to Conti Bay. From Centri Bay started out for Swan Cruck which I reached before now found. I man made a short trip along the show of the Cuch finding in way a min opening of Todder. Then cut though the woods back to the road. On the way respired too box toutles in the act of copulating. The male again , as observed on a former occasion attempted to get away but was held pression, his gental again not being so easily re-beard from the ferralis. From the a nine species of Montafe aniflow. I now started homewood. arrived in S. Ballo I stuffed at find when I down find Ity dudition but the part one being filled up and there was no more style to be found. Just on I was on my way to the

185.

18%.

When quite close to Washington Rd, I decembed to the rail and and then proceeded to the oping. In the woods seemed a few from, and remail varieties of flewing plants. after accoming would I must again to the tracks & then proceeded along than to the alletton a them to Wilking are when I took can for home 2 Trip with bottomy class to Browlyn. We went though Crama 1192. however. We visited the Ey walnute, it, two record to have an off year, for no mute were found. We proceeded along the ruin as we guestly do. 3. after giving betwee at Univerity proceeded to Tomin when I we met by 3 member of Botang clave. We took the truly by way of Hample towards the Sunponder. We passed though the wonder of Hampton a here we found what I take to be Galan, then is but are plant and it has been then more more than a year. We their time took the route though the little raine beyond the water lingt and we found as I had haped the Banching, Here, two on a tree new the base, I found a fine Trumelle. It were juite laye and different from any I have get seem. The color was a light brown where the glowelly seem are of a very death brown some about bluth. Then to, those generally found are more a bee realled along one with of a decaying free of word, there were collected together in shep of elliptical rosette booking my much like a brantfelly fluted five of goods. It was in a fully separated and the condition out shield at all T. I it the at the last were condition not shilled at all. The tip through the gaze were most intenting but all were gled when they we were finely though The teif up along the Sunpowder wer quickly performed, hat the Trif the right the wonde to Elem Ellem was not so sainly done for as we entend the woods it was already guite dark & by the Time we were through darline had rettled over everything. We findly reached Ble Elle & the rest of our truly ever plain railing. I decided however rether then to experient on finding my way by may of Hampton to go to the pile. It made the trip somewhat layer, het we don't have in the bright montiflet were most enjoy able. We reached Power by 8.30 P.M.

4. a trip with h. x a to the woods and home. We found a road lending over tomande Hillen Red but did not been if it really ment to ct. 6. Athis to Catomville, Orange browne, and made home by way of Sulphin Sp. Rid, and William ar. It was quite lete before I were while to leave home, so by time I reched baton will it were nearly

12 o'clock. I proceeded down Helton and in field to the left of the

1193,

194.

the Cacader.

1201 18. With Mr. Him acure the country to Hell' Sping at Helli Sping we stoffed to try the water the freeded and the road to the first road beding west, then cut though a could but of woods to the my Brill Rd. This wood at first recent quite new to me but after a bit when we came to the old will, I mayinged the road I had been in the bridey before. We kept in this wood till we needed thelle Pid then welled up to artington an. We Rapounded along arbiton an till we came to Gran then cut though the words to the old spring & then have 20 To Colulie an lote; visited the old for the and 1202 we fleared to find Water het & Clave. The Creeting wer is fell fruit & I read fleity of it. for clear wat. 23 With Botany Clan to Mt. Winam. after walking around 1203 hand we proceeded to Westfort. The trip was enjoyed but would have been, more so, had there been her dust. We are very much in need of rain. 24. a trif to the raine beyond the baves. at last it has rained. During the night we had quite a down from and to-day it looks like we are to have more, and so we did. Just as we were beyon the old church it began, at first to druggle, but some in a little down from and so it kept of. Of comme there were no need of trying to go through the raise. We therefore founded only as for as the spin, then started on our return 27 To Brooklyn in seach for Springgre at the little reverse but were your found. The weather seems to have been very un-1205. famille for the alge this year. 30 With Botang clear along Congrue Falls from Educadem On bridge to Frederick Road. There has been ginte a change 1206 in the wither sime the rain for an Wed. & Then we had rain about all day. To-day the wind is very short and the temperature gite lan. It is not at all aprecelle. 31 another could day, but still fairly ideal for transping " Left Tomor about 1 P. M. for many main, arriving there is 1207 come of 4 hr. This of even counted in our stope at vening flow. Amin't at the I collected some specime of Orther-tricken also a believe for of near by. Returning one founded along want making in at Manyan them at cross-world from which to Duley Vally Pate. Made trup beach to Town is 2 1/4 hos in 2/4 hrs. then to Park Height am and Electric Park. 1208

1218. 1. To Mr. Brummel on Freduit Rid to seem spenier of

aritolochie for rectioning.

221

19. 5. along Suy more falls from Liberty Rd up to the old bridge at the mill, seemed some fine lichen at the old stone well also a few from trees on the rate. I wished very much to get some Physicial hypolenea but again field to find the tree.

8 It was my intention to day, to go to Western Rem, but as weather was not the most favorable, and also as I thought I could atilize my time better in returning home earlier, I decided to make a transf around about home. I thought I would take the route over Cold Spring Yave, but as I we not a familie with its position as I ought to have been, I passed it and only berned my mistelie when some distance out the road, When I reached the avenue beding into Notre Dame I know to a certainty that I had mind Cold Sp. Lane so decided to make my way over by some other route, therefore, when I came to the line next above, I diched to go along it and here when it would take me. It com brought me to the convent grounds, right at the place where the Bald Cyfren is growing, I entered the grounds a following the path finally came out to the avenue. This answer woon brought me to Charle St. I then went of a chart dictance to arenne, which is next alone, then followed it, It come brought me to the M. x P. R. R. and to Robard Park and finally to Falls Rd. When I reached Falls Rd I made my way towards not . Washington. I then beaut that the train I expected to get on we no longer running. I not went slowly ant along railroad, but as amid was blowing dividly in my few I found walking rether discreedle so decided

to make my way home, we proceeded along road or far as Ballone Rd

then along it to Swantom. This was quite enjoyable but nothing new

12 From Towers along Dulang Valle, Ris to told gete then along the road to the lift to Munyman. It was may intention to go to Warren, but as weather had been so wet the day before, the roads were in a most rocked condition and the progress muche along them were very slow indeed. As a result it was drake who we reached his and by the time we came to the bridge, nothing she could be done but to return. The roots takes in whote the the one by way of Mundilh and Booky and the guter poter of the route far more woody. In the first words we passed I found covered intenting Cladonier, I collected a mine suffly for the varcelum, a petty Cl. freete and one also futly decelety onew. After being the wood, no more collection were made until we reached the old frace near Manyman. Here I found a Ceturic? or Parmitic?) rether new borking. In returning on took some roots and made it as here quicker. Amind it? at 8.15 and home by short 8.40? Mr.

15. With Mr. Him to Benfield. It was noon before we reached 1222 om dutination as it was 9.40 a. In before we left Canden stalion. We therefore ate one lunch and then started on our foreging expedition. The day was a beautiful one and one trif wer enjoyed mementy, after eating our bunch we first of all inited the spring, then we went it But Oak and but of all that fully trip buch though the work. When we get but to Benfill me ment to the old mill. Here I get frutty opening of the Placedine. Sing the young fellow who run the mill I asked him how best to go of the stream to the old bridge. We for ment of along the ruce but when we get of to the day found that the little bridge hed hun broken down, and ar we could not find a temporery bridge had to return and go up along the other rich of the race This part of our trip front guite interesting for one found quite a rice lit. holly breider openion of Cledin popularie molarifornies, When me get of to the bridge we crossed the fills ite and resoled the word, then etate homeward armit at blulin after 6 P. M. in reached Canda etatin at 7.30 am home about 8.15.

1223 19 he trif to the ravine. The weether still is fully. To-day a more him of member of the botany close divided to have a little party in the words From the way member afrohe, are might have thought there would have be quite a large wound, so I was somewhat confined to find but 4 member ready to take trif, I homeve the form were well bould down with exteller and made of in with wind come the absence of others. We proceed to the afficient plist were buring well we bodied a few court plist warmed of assure orgetion, breated breaks the and after one desired language current to waying the ording, so much so, that we did not have the fire court death and had to make our way though the words in belower. This however were not so difficult for I know the region way well. We reached the case about 7 P. Mr.

1224 22 a trip again to the ravine. This time for more. When I left home it wer guite cloudy and it felt like enour ever in the air this let lov, began to fall, and come fut a stop to my collicting, However I had already manged to get a mee lot. Returns have about 1.30 7.2

1225

t flower

2. A trip to Beaver Dan Rum. Left home at 9.05 a. m for Mit Washington. I went by way of Cold Spring air and Roland Park. The morning was beentiful, although cold mut disagreetly so, for there was no wind; the ground was covered with how front which the en illuminated most beautifully I found that it took me exactly 30 minutes to reach Roland Pak. In 15 more minutes I had passed through it and was on my way along Falle Road, and in exactly 65 min. I had reached the station at Mrt. Washington, I wow had but 5 min to wait for the train which soon came along. When I reached Cocheysville I proceeded to the grany and then to the run. I again had trouble picking out the road leading to the bridge, but believe I have it now fixed - the narrow roads turning in at the summit of the hill leade to the old spring house, and the road leiding to the bridge is out faither, and right in right of the old stomwell. I reached the run about 11.30 a.M. and som after finding a min spot stopped to cat lunch, lifter demen stalled of the stream a little way, collecting on my way a from believe - a Peltyin and a Physicia which I put in chrowretie whiting - and rome tungs of hickory. Returned to their after several hour reaching it about 4 P.M.

1226.

5. To Riverside Park and to Brooklyn. A raining day, Fruit visited Riveride but start only a short time and them heatened owned akroes the river. It was very foggy on the river and I found that any thing our 200 ft. amy was invisible. While covering the bridge it was not raining but some afterwards it began and the rest of the day. My trip was to collect twips of talighters and of hickory. It was not very cold and employed as I was I found it with uging able and the time person by very quildy - two pricity in feet for I had hoped to get home early. When though collecting I booked at my watch and was emploid to find it aheady 4 P. M.; by time I reached home it was after 5.

9. A top along the Petepeer. A cloudy rether disqueeable day, wind

1227

9. It truly along the Potepier. a cloudy rether dis queable day, wind from north-cent and a little saw, notwith stending found that after him not in it for a while, it were not so dis queable after all. Realed Catan will about 1. 15 P. M. from these proceeded to Orange brone by way of Hilton lin. The found in please were wither roft and walking at such times were not the best. active at 0.9 the since was crossed and the transf was continued along the River Ped. The little atream from the hillies were decould in their writer garmete and some looked must be autiful. It was any intention to

went the fusimmon tree on the hill top. A smanble up the ballede were must pleasant exacine. I fished not my dividend with that I willed right to the tree, but was a dittle disp, and by not finding a ringle fruit, non were any to be found anywhere around - possibly others have beauted of their good quality. On the Rinin Red Some to Both getin a huge secretion-blue fingular found, it was fully 10 inches assure, speed not on the west see Then gain on the believe men the top, send and on the west sentent found; the right descent were by way of senten Pleas and guite please in spite, of the cutting down of trees. Out and on the name we were along Catamathe and the trip but to Catamathe were commented The time along Catamathe and a hely letter I was home.

1228

12. To Druid Hill Park. Proceeded out the new bouleward. Merry man's have to the bridge crossing Story Run. There to Cedar an and the park. It was a gloomy day but as there were no snow or ice willing was fairly pleasant. The trip out St. Paul St. and then along Murryman's lane was interesting and I was pleased to locate the new rite of the Hopking. The trip from the bridge into the park was uneventful.

1229

16. From Hamilton across to John Rol. Some on the ground.
Whit blowing causing much drifting. Since Tourday we have had much had weather. On Medicalay it bypen to had, then sheet so that in Thursday everythe, were decented most brailifully in chelle of sie. This continued all day Thursday and into Priday. During Briday weether moderated so much that townsde evening hittle remiend of the pretty portwork. Friday evening were ginte putty but during right weether changed and Sat, morning came with wind from north-exet - new and cloudy. Townsde 10 Q.M. it began to snow and her been doing so vert of day. When morn beyon to fell it came in imacual flater. There were but few flaters but the few were extraordia in large booking like in instance snow hells. Are weether were redirected to did not steep out doors very long but artisfied in self with trip on stetch above

1230

19. Along Cold Spring an. to M. x P. R. R. Along the letter a short dictard the returned. Snow on the ground everywhere, at frage had, so much so that one can walk on top of it. Nearly all day Sunday the there were brentifully coated with ice. When are showe the view this them was visitable paredire-like. To day nearly all the view is off. My trip was made to find puny willows. A fine there was growing along side of the stream just beyond the arewse but careful search to-day seems to show that it is no longer in the land of trees.

I collected come fine specimen of ach and leter on homewood trif some fine once of a sage orange. Notwithstanding the snow the trif were a most enjoyable one.

26 To Centie Bay and vicinity. The weather has again moderated and must of the anow has disappeared, here in fact there were 231 reachy any, only here and there on the cloper facing The worth were little imignificant heefe. It were may intention to go along the path leading to Henkin point. I arrived at path about more sentered along it living stopping frequently to admin is to examine the likem on helpaties that I met. Finding a nice running march I stopped to cet my hunch, after which I again continued my trip Out end of poth where it led across open places, I collected

Journey. On return trip I collected a wie let of Ptilideni pulcherin mum which here was found quite frequently covering little areas are duaying faller tur trunks. Reached have about 5 P. Mr.

30 Yo the Sumponder. Left the University in time to reach Hamilton at 1 P. M. hue took on to Carry ligain a decided change in the weether. During part few days there has been a great dul of wind Today too we have a great deal. The trip, thurson, from lawy to the river, were not the pleasant and was made with dispatch. Tifty minute fter being the car we armed at the Gunfounder. Here a greet surprise was in store for one the ever was every where on the northern object and as the life wer to be in that side of the river we had a mie trank over & through the snow, The trif was taken to re the Ortich Firm weelity and seems if possible a four feetile frenche. The trip down was not a hunied one, it were therefore two home leter before we reached the few breshty is were ready to start homewand. Soing homewand the life were made much more quickly I was compained that it took so little time the entire trip back took but I have and a helf. armid a barry we had to await the car but at 6 P. M. we were buck in Hamilton, The hiheren covered who were not bretifel but in an afternoon trip at this time of the year them is I enough time to do more them admine them

2. To Patterson Park to me a Grand in bloom. at P. met Mr. Flitton and Mr. Brawn, fortunately came in time to get triumed stemme of homeheatent. after evering the consecutory and getting trongs I made a short trip with K. who accompanied me towards B. x O. R.R. The most intenting part of this trip wer to been that along long's Lane, minum pear trees are to be found in flower. It were rether windy but not as much so as on Saturday, Returned home

4 5 P.m.

5 a trip with Botany clave to Clifton park to see the ever of course it was mainly a study of the confer. The day was 1234 delightfully apring-like.

6 To the Patapero. met at Rolling Rd. about 1 P. M. again day of wind but fortunately not wld. We took the route town the old pump-home. When we got into the woods we found it very plenant. aunid at min, we built a small fire and for a little wi set would enjoying it. Toward 5 o' look, howen, we started homewa

young by may of Oille. Returned home by 8 P. M., 13 To Story Run Touch the 1.03 P. M train from Frederick Rd,

arrived at Story Run we proceeded to the watering tanks. To see I engine take of water while going full afeed was most interesting and counthing new to most of the party. We next returned to to station and then proceeded along the amounty area in earth of Skunk Callage which we found in great profusion, hust we covered the field to enter the wonds. Covering the field we found Dula verme in blo Here two, we found rome clover and digging of the plants found to module on the rout. Several plants weretaken up and modules in put in firstine. after viting a short time in woods & after looking at rome fire word recently cut we made our way buch to stelin. In the words we found Catharine and Disamelle in full fruit. a few canes were taken also some tings of alder. We received the station a little before train line. When 6.03 P. M. train came me boarded it but were very much confined to been that their did not a at trulinih Rd. he it would be necessary to pay 13 & more to get to must station we divided to get off at Polifico in the await must the We now were in a grandery for we did not know it what time the an trai were due non how we could tell if it were a beel train. W. were therefore on the point of starting out for Halethope when seeing The old home off on the hillinde I duided to go up to it x try to less romething, if possible about the train. The folks know all about 2 train & I bound that the next him was due at 7.15. I leaved too that I could tell the beal train by the union giving a long which also, that if it would stop 2 short whither would follow the long me

Esthing come paper a come metaler ) returned to station. It were may 7 P.M. when we were very und empired by the wind of fine of the insuter of the home on the bellide with a lanter, to arrive in fly on train. We beared that the bedy had 11 children, armid how about 8.30 P. M. The day we an ideal sping day,

16. To Brooklyn and vicinity. Before going to B. faid a visit to Ruiside Park and noted improvements. Level that to make a good lam I should we Kentucky Blue grave, Red Top, and come Detal Cla ynal parts. Plat my, then allow to grow, do not cut, when

turning fallow plant again lightly, the new growth is puteted by the Id. When this came of laws can be mound, In this Wester is still wowen and spring the found Silve Muffer in bloom, and in the fields Capable. Chickwest is not in all the glory so two, Skark Cellege. To day raw grite a maker of while allesting some Dodden, I was impressed with the fest that it men chile on the Silve don it we attach how - cotyledon! In it with obile us firmed's with it. In the broke found Isolden Sax frey westerting beautifully but filed to fit flow. This were weather her could the enthum to become very active, I found the out in great muches While going along the sine mut a boy with a your, on the river were a men in a boot, be the bed a gon, the boy raid They were after willete (?) and as new as I could make out they one found one the chose, What did be men? 20 From Tower to Promidence, We met at T. at 1.30 P.M. It wer a windy day but as the wind was not cold it was not disqueelle We tich the courte by way of Hampton. The frist thing that intented me wer the more on those more could walk that are period just before enting the woods, are no capula went to be found I did not collect any of it. On we were going through the woods the pealing greenil arm at the bee of some tree attracted my thertin. I examind it more closely but could not decide whether it we hefetie or what? I took some of it along for futher study. nothing more of intent were immutued intil me a short dictance away from I when we head the soul of one of these portable sew wills. We proveded bounds it & there beared that the entire woods were to be cleved Here I get a few pries of och wood for retiring. It was my within to go would to the river but we won sew that the road wer entirely too muddy to rich going over them when it was dark so I decided to return. I now hoped to find my long healt by that short route to ?. but like in a former occasion mired the poth and found myself again in the words of Heapter. We returned by my of the Hampter Rel it Dely Vally Pike and them into Pomme.

2 3 9.

238

23 a raing day. a trip to Montibella and vicinity. I were comprised to find so many patcher of Polytrichum and get so very little fruit. Near the stream I found some from Barongere; it were unumally laye, I wonder of the rein had anything to do with it. I proceeded to the spring home and here I found alder in blom. In the little awareful places I reached for Skunch Cellys but failed to find any. From Spring home I went to the laye apring. Thoughout the place I found so smuch of that all and onice found new Sutheriable (U. tru girds)

116 1909. Feb 23 - Mar. 13 In the awarely ground I found a more in fruit, did not collect an of it however. Returned home by moon. 27. To hutherville. another spring-like day. It were my intention to revient Providence but as I had to get specimen of Ska Cabbage I divided to go to L. where in a little while I remaid the all the specimen I wanted. On whom tip I examined the ponds and was surprised to find already men of eggs presumed those of ralemender. Nearly Il the much observed were of the pealin stalk-like afference only are small more was observed the on fairly clear. One the opegue men futile? or are they the y more of volumender on I have jumply suffered and the a In looking men there of esteader ! tagel in blown, 2. From Catomoville to Orange Same, then along the rime to avelon. 1241 returning home by way of William an. It has been guite ever and with it much rain and cloudy weather. To-day again it is cloudy through the Before going down Hilten an I proceded to Ellite City line where seems several try of willows. I should have liked very much to get more but the true are too high. I then made my way back to Hillow and continued moved to Orange Isome when I would the river . One I proceeded along Rin R1. at Bathyatin I found come Cledonic

liftflylle in mie and them and account a little for exchange. Here to

I get some fine species of Ulum fulve about in bloom, to arthus

down the road I found a pastly Myseony este in fine condition. In

had realled that region where the Wresterie grown, where at this series

patiently me finds so many punds. On I approached this region the to

I musical that must likely an investigation night prove most interesting

I appointed very stealthing, but notwithstanding, I were head the

conge and from the noise and commution in the water I have

that the lover were riching utuat. On the surface of the part was I for

egy much in great quantity, some of which I took with me. My next as

I war now reedy to start homewand. It was my intention to go to the

that and then the can, the going one new route. I therefore tried to find out how but to get thee, and beaud, that I should proved asig

going to Sulphin Sp. Rd but when I reached Catomille av. I whall go as

to Rely and turn off at transia. There direction seem quite plain but

It had fait been tald to proved along Sulphen It. Rid, I wan in a greater

but as I found we weed within short space of time thought I were wrong

returned to Sulph. Sp. Rd. Ofter prending along it a shet distance Is

. but found us we to help direct me. I therefore proveded towed Rel

now was made at the afring, where I round more willow wands.

2 4 2.

comeone who divited me difficulty, I therefore divided on I were out for the day, to well, which I did, to the case it Willis as. 6. a tip they the country to see the resulte of on blyjed, The war cloudy day of the 2t we folled by another one about since in the 3rd with the often then we fight buy do-power frain. Touche many I which alset. On the evening advanced the storm from stranger, in a little while the grand we white. The store contint all wift and the west ing find Bello at of from the set of the world, There were abolitely no commenced in between the city and even ite whenhe. than it a standatill, trolley out going, and this two when it must so much to the people who wished to go to Weslighers and pulsefur take part in the in argumentin of the new president. The beautier of the subsubs in after of the devolution defining desiphin, we we affairthy in fing land. The store name had slated in fact could for the for flater that were still felling did not amount to very much. a well at down new rom aloud the extent of the distinction; wine down everywhere her telegraph pole and here trees. By we the zeen was ching and at night the moon, the wonde now were faing land in dead. Too day are I have already stated I intended to real how the storm had tested fulle rounded father amy, are I had divided to Jones. and for the wort toward Lock Ram I proceeded to Jones. and for the west towards Providen. I district get very fare though for some wet some began to full and are I were not properly to meet it, returned rooms than I wished towards home. The dange done in rowe please is considerable. In some please the pufle are ruly mand in great difter six fut deep funing witherselle being. On Pointen Red met a gong of men cetting a weed though a dift strong; at but 3 ft deep and men the bely a with by. Returned how by 4 P. h. 9. To Montbello in reach of Skunk Cabbye. I have been told that Stock Callege your on this place, but my rest then for her hem in vair, brought have a futty Cleding growing on a druging that The finds we affectly and a boun, is this possible or were There two plate? 13 To Brooklyn, another raing day, all snow has disappened It was my intention to go to Point Home but decided as it wer

243

244

It was my intention to go to Fourt Home but decided as it was raining to limit my trip to the swamps new Browledge. I proceeded to the little rainie. Here I seemed some Skuth Cathye It is now ather lets in the seemen for this plant right here, so it meant some reaching to get them. Observed Golden Swifige in

bloom also Red Meple From the ravine, I went along the where up the river. at are little place I noticed a slight me on the ground - close observation revealed a trutte . I think a sh but am not certain as it were covered with mend. It were and ideal day for more and hepeties. Semmed a specie of pullanie (?) from a red maple trunk. Impetien is now showing itself. During the afternoon, som after leaving the 4 menty, in feet, it stopped raining, and it we only partly cloudy, 16. A trip from Halethope to Elenantury to Change know to Calme. It was already 9.30 a. Mr. when I left home, and an home leter a I reached the terminar of the Wilking an line. I fere I had 15 minut to wait for a Halathope car. It came in due time and at 11 o'cla I was in Halithope. I now walked up the wand to Catomville. On the way I met Mr. Ring bother to the hermit who lines at the " section of Sulph. Sp. Rd and Cutanville ar. I learned from him where t place wer to be found. Armed at Catamville and I proceeded in the direction of Comme Red on the way met a enam leading a day whom I leter beauth were depty chaiff Wagner. I found him quite an agreeable the The pand in the new of Rings I beauted were called Samlerie, it an abandoned vion one pit that his filled with water. Mr. Wagner knowing the place so well directed me over a new roote to Islanding . Insteed of going by way of Smithe I therefore down this new worte, turning towards the atream up the road a little from Sulphon Sp Rd right where there was a very by tree. Mr. W. told me that hyperfedim could be found on the hillride under the price, if I entired orward over the fire bluff. He told me too, that he know where a great deal of it grow in A Co. to get there I should go out the Columbia Tihe - par Bloom to Blid Com R'd 21/2 mile out. I would come to old with ( Oakland will The Lympodia grown near his place. after leaving Mr. W. I prouded he shirted and found the trip to blunding mont interesting. Hepate a Spring Beatin more for I guite about dety. From 3. I provide to without and then well my way to O.S. and then up Hillow a When by and the stone well, I cut into the woods to my left in ada to visit the little pule where each year I find from you. That we trouble finding the place, but what wer my surprise to find that a new road was to be cut though right here and that stone had! plead in the little place proh. Of come I did not us put to per but what was my surprise to find that in after of the could The pape had definited you in wheten sports they could find. I see a few mann and then hartened award to the can terminim at Catomini Recht home a little after 6 %. M.

20. From Towen to the Sunfounder by way of Merry main then along the rimes to Warram, them to Cochrigable a home. On trip found Jamifum Vagnicum in bloom. I hoped to find more of that futty like but in this I am not anumful . Way and object in taking the trip wer to find Outholischum anomalum in good condition, in this I were more weenful. The trip along the river was against by all and wichel for a trip again like We recold Warm about 6.15 P.M. and at 7 o'clock we were in Cochymille It is a fity to see so many fine there cut down, all along the river the destruction is going on, expended here men Warran. 23. To Glenburnie. It was my intention to visit "Reedy Mach", but 247. again got an wrong truck, so contented suggest with the tring though the country. I went down as for as Wadie then turned in to the left. This time I took the route over the hill and for a time everything seemed right, but before long noticed that I were not at all familin with the builty, after crossing the atriam theiling that ? might find the needs by going of the street I tuned to my right all though this part of my trip I found it interesting. To int of see I came who a min were of Proposetion, just in his condition.
I would a min let of it. Then I found a view let of Eagle From. Pteni agniline, in most weallest condition for sectioning, after joing up stram a chart distance I came to a med and here the other proved the myle a nother wide wet merdown bodied on right hish with fruit . The flere booked must interesting and I think is would mistring, expecially in June or July. Too day I had no time for further perfecting to started but again when I came to the road I had left I continued amount along the otherward but no wede were to be found - at the bue of severel true, however, I found heatiful peteler of Pettigue. This fait of any tip we interesting too, but not broad road, and this I followed buch to main used & then into Islandine where I took train for home. 27. From Town to below Ellen to the Surpander the to the water trough and buch by way of Providence to Downson.

Nothing of particular interest was observed until one period into 248 Hampton. along this arenne the like theted thetim. I were very much pleased to find Thelischete charaptelalam Bon the White Poplen. There was only a small bit of it however, and I will await fuller developments. Ofthe we passed, the main avenue and came to the long one beding touch blu Eller, the line stone who desired much four attention. I found more of the Orthotichen accomplian and hereofter, ? and not go all the way to hungman for specimen.

Some wer found with capale open. On the rocks, too, were two

we transferred to a can which took in the Econgstown and when we took a can for Cabin John. At this transfer point we were out by mit Douglety and her friede mif Pollule a me \_ the lettic note. We were all in the can when me were joined by mif miller Our party more 10 in mucher were soon on the way to Celin John arriving their about 10.30 Q. Mr. We now covered the new budge their descended down the hillinde to the run and by an our trif of the chean kuping on the right bank. Quentre was found in bloom buile the moment Dentinia, Sanguinain & Eng the amin. We came to the spring a short diture off about 11 o'clock. It was still too early for bunch so efter quenching on think we continued onward. We soon came to a wither rough five of ground and here some ment of the hillaide to croce hat about 5 of un, hup M. my C, my . P. my 1 ( " ) went one the when and her I made a very mine finder Conocepholon in fruit. We soon while more level grand & wire joined by those who had gone once the hill, and here we est down to enjoy our land. after landing we strolled for a little while around a then founded father of the stream. Peltyin afthou Opporphe ate. When we started of street too of me party me Bong as me - started howard When we get buch you to the oping ( we founded only on for as the thicket of Kalin when I found Citie Okiniam) it was my 3 P. m. and we still had flisty of time on our hands. It was the dicides that my to the could with along it to blen Echo. While on the way down we found great menu of toad you. This is the first time that I have seem them, but as room and I raw the long people roache like We preceded as for as the below blow Blow Echor the accounted the hillied to the can. On it was still only 4 P. M. we writed the Low. then with can for etation. 40 plants were found in flower. Beinde three aludy methid, I might name cho. Changem, Eaflachie committe hefete. and yete, and a limighte, Phlas piles. 13. Franklin Rid to the bridge coming Dard Rom then though Wines (?)

and return, left how about 10 Q. Mr. I hoped to get specime of Equiron time among but in this was drieffinited, for how they were just coming out of the good. I thought had to albeit vains flower. At the welling-buy fun bredity I turned ite, and have I made a mice little field are mice plant of Celtha palabilis in bloom & a little colony of the plante; This is the first time that I have now the plant has. I want found a mice lot of laythamic in bloom and as I collected a lot of them. I have to an the rusher I calleted Physicia and a first of Decime film in faint I now continued around to the bridge & have turned in to find the I plante of the hillied. If I take the build feth it will take me only

When I reached the river I was very much amprised to find so many true cut down right on the Hluff. Why they should have been remard in a mystery. Here Diente wer found in full bloom. Partle of Ength oning. Menterne two, was found in full bloom. I proceeded not as for as Many man too, was found in full bloom. I proceeded not as for as Many man and here I collected a little Orthotischem anomalism them took the other was for my homened route, arining them short 4 P. M. 22. Sund trip of Botany Clave. This time from Shirly Lane 259. to Wordlung. For two days there her been more or line rain to-day it her been partly cloudy, the temperature marner and altigether a fair day for transping. This trif is one always injuged.

Yellow violete are found here one a lugar area than I had
at first supposed; some were found immediately upon entering the
monde. Polemin is already in bloom. The Egmentum hierach is almost through its afone being. 24 Though the ravine, I had hoped to take a trif to the Mentennie 260. ugion along the Surpounder to-day but circumstance orone which made d trif to the ravine more advantageone. We met at the Colomille termuin at 1 P. Mr. I faving left the University early enough Istopped off at hongton and found that Bryan intermedian which grow as the old stone well is just gething into condition, possibly next mouth, that is in about 2 when it will be right for collecting. I row C. we took the would rate to Oal Spring. a feeture of the trip wer The numerous politic of Viola brooker and V. fedeta. at the spring we rested a short while and them proceeded onward. I wished to get opening of Engthonim but found only a few. The try though the ravine was accomplished within 2 1/2 hre. at Change Eur we get hif Tude and two of her fruids who leter keft are company for a short dit are along the Rim Rd. On the rocky hillride between the raine x 0.3. Silem Pennyhamin was found. along the Rim Rid, it was the Yellow Violet which wer found in all ite glory. arrived at my Tilling efect I writed the flere and found two of the plants in bloom. at abelia we covered the river and forward to Sulphu Sp. R'd then to arbitrar when we take can for home. I find that I can go from Catamielle and to the care in 20 months 27. Left home about 9 a. M. for a try along the Sumpounder deciding to 261. will ar for an Hamilton where I would take on for Carney, I took the rate to Huring Run. aring then I proceeded along The Run to the all will and then along Joy Mill R's to Lemandle. This part of my hip were rether unintenting. at H. I took on for C arriving there about 11.45 a. In . arend at C. I set out at one for the rime stuffing only a short while to est lund. When I resched the rime I founded of stream. This fast of my tip was must interesting. I was comprised at the minute or sumber of Frilliam which I saw, I supposed sweed thousand.

I continued of stream as for as the water trough where I climbed the hillside and proceeded tomade Promident and finish Tourson. I arend pluty of change blowom. While going along Lake Raw. I tunic arended the hillside following pathe, neither our patients intenting.

1262 29. With botany clave he spite of the disqueble cold weather thirty members made the trip. We must at Dishy ville & proceed to large me Och Junction. Unlain perfecte was found in greatity on the hillands from the path. Institutely I comed the other a little below the west crowing place and it the came about that we former so may of these flower. Due to the mistake I took a path back over a much dries region, this was not quite so rich is plant life. Returned have a little afte 7 P. M.

Returned have a little afte of the M.

1263 1. To the ravine beyond the Caver. During the part week three her been much rein a cloudy weether. For day again there has been rain. I headly expected to have company on their trip, so were companied that 5 turned out to go on the trip. In spir of the rain which came in showers, of larger or shorter directions and more or less heavy, although more were very heavy, may bridge enjoyed the trip. All enjoyed the March M. Celthe-palanteri which must be guite headrone, although a much seek which would been a much better limit to see their. We ate our bronch at the apring, then proceeded down along the it, bails as for as the bridge. On the way down nothing

patielarly intenting was collected. We would the stream at the bridge & them proceeded of along the left back. On the way we collected owning haids of flow. Trilliam is still in bad. At the head of the stream we found Columbia. In all its glory. Here he I collected a mee let of Cledonia.

We now preceded book to the case arriving there at about 6. P. Ms.

We some freeded book to the can assiving their at about 6. P. 18

1264. 4. Along Franklin Rd. I got off the car at Window Mills Roderanded the hilleride to Frakhin Rd. On I needed capple bloom I proceeded to the afect where were for several year I have been in the helit of getting them. After remaining the bloomous I proceeded at the road. The day was an ideal one and I proveded along very live to aging ing it to the atmost. At Winiam I turned in to see The Experiation phaseme and after some difficulty found the place. Ithe setulal that braility must confully x I think hereafter, I will have not trushed finding the afort. The plate were up and a great many to good to have about in flower and four fully open. To get to the afort go of the hillibre with a small dogumed with a forbide trush come into one. I have a fath comme but will be head to obsume with a the lookest, then to the right x follow the path. The Cypinfulin place is just when the high ath makes a charf comme and a lays true atmosphere and the Dichyaille when I took can for home.

- 265. 6. With bottomy class along buynne Falls from Edwarden an bridge to Walbrook. The day was an ideal one though a little warm. One of the most intenting finds was the finding of a laye class of Ribes flowdown Wild Black amount right new the rocks along the bree of which the atream flows. It rema strange that I have more before obvined it. Here two on the rocks the Columbia is most beautiful.
  - 266. 8. a trif to the Sent Falle. We left home at 8 a. M. armind in beorgtom about 10 a. M. and are we had about 25 min, to went for can took a little walk up along the canel. a chost distance up is a ravine, here on the hilleride I found Siagnobrium alliania a new find for one. It was 11, 15 by the time we reached the falle are most of we were very hungry one did not tarry long and were avon sected and extrig one bunch. after lunching we made a trif of the falle. Viole ctuite Phlose pulme and Countin were in full bloom. Nothing partially new over observed. When we returned we went down where a related time of their time we found the Opentie We started as an homewood trif about 5.25 P. M.
- 1267. 11. Along the Bunfounder from Menymen to Wester Ren the along the run to Cochegorille. The day wer are ideal one. I left home about 7.4. Mr. powerful to Tome aiming there about 7.30. It was about 11 a. he when I reached the rive. Nothing partially moternathy were about. Reached C. about 4 P.M. took 4.35 than for L. the wellest to T. when I take can for home
- 12.68 12. To South Bethine & Benklyn. To S. B for buttercufe and to B. for Minimum punctatum elation which is now in a most flowing committee. From the aich of all the old have men about here arise so that the bede of their opings places are heartful masses of pleasing green.
  - 269 13. With bottomy clan to Frankli Rad. We mit at Bomin Bun the proceeded though the words part the groung to Frankli Rid Clame to Wines and the Capitalian locality. When instead of one 50 opening but a days were to be found. We returned home by way of Mt. 1404,
- 1270 15 To Benfild. A must desir yearly hat day, We left the terminal station at 8:30 a.M. arining at M. a. Junt at 9:03 a.M. Our first atof were at the Scatch Brown sport which was in full bloom. We then continued our trip onward to Sappington on way admining the layer both of Lafin and againe. I wan surprised at not revery more light acade but hoped to find were leter, not with steeling their war but few comfact with the now one last year, found. Again I found arbite in fruit and again in the same breakty and on the same plants. On this road two we found Poppin verticallate in flower. It was about 12 when we rewhall Bufill and turned in to one complete birting apring. We had very little deine

the perfects were for good weather. notwith steeling the one - as 20 member come, and He made our fit treet and Cabi Brand and were reedy to go along the shore when we had a heary downform of rain. Fortunately a can ovar at hand and now of we get wet. In the little park away are at heed of the bank I found a gran 1. To York Raven. Yeft home about 7.30 a. M. reveled Town about 8 o'clock freeded one would route to Prinder then at the road to the wonde. Gernel that if I would keep on along the road I would get out at the dam. But I tak the little path and found it to be the one leding to the Pyrole are which I now find in bad. This path goes right to the water trough. The patt false when some distance in the words with fall wentwelly bring you to the though the right had ful hower in the more died. On I wished to go to the oping I had to go beach clay the main path a shut distance. I staid and the sping a little while the stated homened this time, I decided to follow the path I have no often observed leading along the court of the baill. I found it a most intenting rente leading through must beautiful Kalmin now in full bloom. It had to the ofen are new rome time yo x family to the Surponde. I am preceded to bound Br. Rid and the to Town. armid home about 5.30 P. M. 5 To Mt. Washington by way of Cold Spring Lane & Roland Park. a raing day freuded by a day of rain. Left home at 8.15 a. M. When I left home it wer only miting but while going along Cold Sf. Le. just beyond the receiver it began to pour down. It did not lest long however and for a time it were only cloudy. at the receive I found two fine plants of Rammalus acris I would mot. W. at 9.50. Here I with with 10.16 the stated onwal following can trush to Pinhis. In a laye field som in wheat I fund a min let of Potentilla recta. While making the trif the com whom pregnetly but it were very disquely striky and fett are if them would be some name. At Pinkin I touch can for the city and proceeded to Mot. Wina. The trip around the lake was agreeable, I record some fine I tolem landen which is now in full bloom, also specime of Nupha pelole, Jumen aten. From the lake I went to the awarf below the B. a O. liether I hay I hefed to find Popine aphiglorish but field to find any. Sphaper won find in full fruit & I would come fine openion. While here it found down but it can stiffed and I proceded to the event slay the B. O. her too I failed to find the Payonia. Tephronia in man in bloom When I spain weeled the reileard, it wer byming to cloud of spring. The I would openin of Wheat away in flower and later openin of Cale. rue. I then fruld to the car, and stated homewad. On the way home

276

we had another heavy downfour, arrived home about 6. P. M. 8. A raing day made a trip to sandle wonde. Very few flower was found in blom. Stegenbuch alone did met even to mind the rain. Other plants in bloom were Lobelia spicite, & Lycinashin quediffer

Collected a nice lot of Cour crimita 12. To Fourt Home Elvator, Waterfiel, te. We left home, Candles. 1279. Station at 8.30 a. In arriving at Maly about 9 o'clock. We tick the usual route to F. H. On the way several boys thinking we had according (!) asked us to play comething for them. arrived at Robinson. dam we examined the place round about and found Payorin ophicale under in full bloom, a few Pitchen Plante two weartill in bloom aler Utrienlain We more retraced our ctife, stoffed at the spring to set lunch a then proceeded to Electer. On way we passed a very large abandoned strawberry petch & each of me recent come f bernie. From Clouter we went to W. and then to the head of Ita Cuch. It is wire to be there at 5 o'clock although a Saturdaye ? back racely gets up before 5.30. Boing homeward we went back to Re Crube & took on come perceyon. It wer 8.30 before we welled Balto.

In afite of so much rain the roads in many place were as early as if more had fallow. The day was a most wying ably afect one.
15. To Soldieri Delight. Lift home about 8.30 a. Me and took about one for Delight. It was more a live cloudy and an ide day for tramping. armid at D. I started out the Madeine Rid 1280.

When men the Dan Pak Rd ? met Mr. Hempfling. I had fogether the old man but he remembered me and called me by reame. I had path forgother when the ewanty rigin were livested but Mr. It directed me how to find it, also, how to get to Soldin Delight, The smart is in the 3.2 angle found by the atraction of Mindes Rd x the Dear Pale Rd. Here is a mer free of word land, I walked at the D. P. Rid to the cut of the

wie from a there twend in following a wagon path. On com an Pant I recognized the place is now found the spring a the menty area. I spent some time have and while going the orgh the west ground made. way fine find"— Lifain Youli. Unfortunately but are plant were found. I hoped to find Populin sphipluroide and Sphagum in fruit but new

were found. I studied the area more in land away from the spring and for sweed fine lichen. I was so intented in the region that I sport

much more time that I thought I would. It must have been about 3. when I finally stated owned out Due Pak Rid. I were directed to go .

this road with I cam to the next Road, then I chall turn to the and go ant this road to the next one where I should you turn to the my

but thereafter I shall always take the left road. I followed: the rection, but some found ugulf going into a few gard. The people here

knew where Bar Hill was and told me how to get there, but from their direction I could not decide even to try. I went back : to what affauth we the main wed & continued out along it. I came to when a man wer floughing a he directed me through the words to Red Run & then follow the run down to the country road this were everly done . When I reached the run I now two men weshing the week for chome and they the directed me along the run. The trip along the run we most interesting a one well worth referting many room, To-day on it was already late I had little thin to minutigate but I were very much pleased with what I row. I had little trouble funding my way to the county wad on them to Daining Will when I took cu for home. Semme wheat grain, dudder, etc. etc. 17. With the Botany den to my. Winaw. bloody a thutting about all day, whichly so after dime. We mit at 4,30 P. M. It we then would be a storm. Sometime a little rain fell, but withing to stor amount to anything. We founded out the Warlington R'd over route we given ally take when visiting the pand. I want the pand we founded to the many along the tracke of the Cuti Bay line, and have we found reveal fine opening of Coloppur plicalline. White in the swamp it light in the lighten. The light wing were at times intends vivid soon the store were whom we we were hunried owned to the park of a meety duelling. We staid here with the want of the stone we part, the proceed to the en it Westfort.

82. 19. To Round Bay. We left Camden Station at 9 a. Mr. This being the left trip, for this seesaw, the Bot. Let. of the Mrd. and of Servin were faily well represented. arwind at R. B. we proceeded though the words to the Intel grands. After depriting one perhage we made a about trip around atopping at the pand in the rear of the daming paintline and then letter at the little settlement. At the pand we get water libris and summless and combine we paid a mind to appear each and then are get Programs in full bloom and Sphagem in fruit. A gray for were observed by two of our party. We provided though the away to the break matter of the creeks. Many change are taking place are being destroyed. We returned again to R. B. and remained on the above until nearly 8 o' clubs when we started howevered, aring at Camber statished and but of P. M. and have a little lefter 10

23. To the amount at Mt. Winam for Calopogon pulcheller. I found a number of openion & was able to some a few for my

283

herbarium. There are not very many plants, at any rate the were not very many in bloom. They grow just at the divides him between real aware and high ground. The day was disquely but.

1284.

24. Another disappeably hot day. I left home early enough to pay a mint to Mr. Muspin and saw his new home. We then we beek to the Citarialle termine where we were ent by member of the botany class for its left trif for this seems. he for remember your part we on this day wint the ravine and the observating. We had some difficulty finding the observatory, but failly after passing a represent it several time it was located. We noted to that a part ature on the path right where are must true in. To day for the first time this reven I saw Venne.

We remained as the such until about 7.30 P. M. then made one a both to C. by way of Hilton an ariwing there about 9 o'clock.

1285

26. To Cochegoille and the along Western Rom. Early in the mound I thought that we would again have a must disagneeable striky de Homever when at about 8.15 a. Mr. I stated from home for het. W. I did not find the weether now very disqueble after all Other, however, must have thought it would be as, for only two of our members were on hand. We arrived at C. in due time alies 10. 45 I should cay for him left mr. W. at 10.16. We cut out a me for a try along the night back of Western Run. I taving stoffed to comple some water at the oping new the distilling, I decided trying to go acrow the hill instead of around it, must much were gained how ever by doing as. When we got to the ofing at the house we decided to cet me hucher. after dime we stated orward aboutly do The Mysengete clamed a great deal of my attention, none before have new so many of them; here we will brown cafule and her come with yellow men, then then we reveal fine wir with corel red men a one with then with mower colored over, here were with with white Capealse and other again of home. Folly 6-8 different forms were forms
Both of my companion enjoyed the trip in menely. We made me way
guite sludy it were therefore about 5:30 when we reached Merren and alie
6.40 when we get to C. just 5 minimutes often the Train had left and as hed therefore nearly an have to went for the next. In the membels a little shower came of which continued until into the right 29. To Middle Rive with h. a Q. to the show of Mit B. We left

.1286

about 3.30 P. M. and get there about 5.30 P. M. after a min suffer of coft only the we had a row on the stream. I have one can find much Vellini, an whom, te. I were interested in the cum fiel, a

were observed in great number. The more made by the freje wer intenting, it sounded at first like a graphophere. We started on our

return to city about 9 P.M.

3. Left home about 11.30 Q. In for a trif across the country to Belin Rd 287, I proceeded out Parkey and to Belan Rd. The day am quite pleaset The wind, however, stuid up much dust and so spoiled what otherwise would have here a pleasent trip. nothing of experiel interest were collected.

10. With Bail Sollin to Soldin Delight. We left home a 1288. little before 9 a. M. and took Enny Gene can for Owing Mill. We get off at the station, then took and at black within, this round led into round going off to Red Run. When we reached Red Run we took rund going of the hill this hade right into Mr. Dolfilds. We pound though his place and every a road not for off made on way towards it. We reached it right at Sellen Showedi. We much had the choice of wither going though S'x and the getting to Dun Pak Rd on taking the real that in were on and following ch July 27 it around. We chose the letter. It went down a hill to a little stream t mon, which we crossed & there made a turn about at right angle. We continued out id Thursday 129 at 10 a.m

the road a very some we found ourselver on the barrene. I here a their were mounds of broken rock thrown up on if one had been prosperting. The grand hur is could with small price of broken week, which Um. S. thought we the natural way of weethering. The north (broken frequents) were covered with hichen possibly my the Bullin. The grand are about a barren plantler, a sprin of andufyer a are of Creation & my archive being privily it my plant form. Builto the like about abluded to then we another found right on the soil. When the area herme a little less etimle a mue flate were to be found, me came whom laye patitur of Schnie panaflar and now also her & then I alimen still in flower. We fruitly came to the Der Pak Real & here we turned to on right and preceded along it a chart distance. This region would be well would emued with Cladonin various ofering. To day it was too day to collect any. After getting at to a point a little beyond the star from one turned towards the rive puetty finding a nice much new a spring. Here we weter and burched. We then followed the run, whiching finally to make

on may to the river. We followed a path for some time and are the way found would White Pinin Making on way the right to the river were not so every, at times we came to almost importable thickets. We were therefore right glad

who we came to a road. This real tech we to Liberty Road at Wardi Chapel

The chifel is quite intenting booking we examined the churchy and and on the

headstone I found a Physici probably stellain in quentity come of which

132 1909- July 10 - any 19. I put into hilling flind (Primi his & Cami Sala). We have bound that we had 8 mile to go to reach the car at Piluanille. We wan in me patiente hung so mude the tip of 8 mile in about 3 hr. The day un delightfully flewant.
14. To Bay Show. On the athelite fild, I found very many plane 1289. of Ginane Elatine, They were rather small 2 - 3 inches high. 20 To River View with Wellie and the boys, no bottomying 1290 Mr. Soller and I had awayed for a trip a week until light, but I failed to hear from him this week. 28 With the boys blickburying. We left in the afternoon, Our Trif 1291 wer for the most part in Santi woods. human plan were for where the benin were quite plantful, but all were small due to long drought. We collected about to the of beine Lit Set. I winted him Sollin a bound that he was with, to-day ? find the notice of him duth. 30. Will m Buham and Puny Unkhunging. We first went to 1292. the stream and have an collected come fine benies. We then unt to the spring how and finally to the homested (may Sanethi), here we found a hedge of Pyrus Japanie leaving many fruits; it will be worth oriented the fell. We now proceeded to Ing Mile Re, stoffed at the oping as then made one may to Lamindle & finishly Hamilton. We Then werd out Harful RI to Old Harful RI on along it to Taylor Con. We went reaching for White woods, where it was said benier were most plutiful. When men T. av. we entered the made to me left, . The grow alofed gently and down must the stream? found a africin of Sphagman in fruit. We had not get found the being district but as it was already 3 %. In and we happy we started homemand. The day were exceedingly huit. 5 To Cheepen Beach. We left the city at 1.30 P. M. and wrind the 1293 a little before 5 o'clock. We had but 2 hours at the place, to about a true to do any botancial with . It affect though as well worth revieting and afend more time there. One tree abraved had much Ramaline growing men it 10 To Tolchester. a well along the beach was interesting 1294 but I was prevented getting into the wonds by a small stream The words lowhed are if well worth studying. 13 Left to-day for a trif to Rockland Main. Left Umin Sta in 1.35 P. M. hair I arrived in h. J. at 6.30 P. M. ? at one med 1295. my way to the brand Central Station, & after checking my bayges Borton in walking around Bundway, at Midnight took train x arrived in Both next morning about 7.30 Q. Mr. I procede at me to hatt statu x after 2 her west took train for Path

I amid in Portland about noon. Wishing to see the city ? took a trolly ride to Cafe Elizabeth, I should have taken the en to Cofe Cottege but the conductor directed me how to get them by well ing dam a weed. This I did & my experien were must enjoyable The beautiful main wouds with its belian fin & spew were got a treat for me. Here too I had my fait glot of Everice. I get to lefe little without makef I fent a deliftfelow on the who welling the lay. Here I found mener afre a had I have thereto could be second a wir collection. One young down found the duraf. Justime commissional the duraf. Justimes to P. in the for my train & at the popular time and in Roubland 15. This oftenow M. M. & I took a trif to the line stone quarrie. It was his intention of going to Warren but we were a little lete gething among so we stoffed off at the quenier. Here were a frethy puis of woodland a lichen galar. Here I had my fait glope of Physicis published We went through the words a then to some welly ground; her in one place I for I by fait Cetrain Islandic on one may bound we went part the green. They were to intenting hole in the good by a serior som on 300 ft. deep.

16. I sport on the this morning arent; in oblication of genterday
This after we nede a tip to Oakland. Here I had my fit
wein of Shincoln, Well'air holledging. U. flower, Stite concote its, its. From the top of the high when a not bestift onen is obtail 17 a. M. I was as interested in toy my tip to O. that this mon's lagar visited the place & collected again another min lot of specimin 17. P.m. This afteron it boke like rein Mr. M. x ) decided to mede a tif to Waren. When so get to W. It were raining, so me decided to do on wellet; diretly from wellow and the flere a me unde at gite mell. Befor returning one called on me Yound & I fould him gite intenting. He is intention patientely in shell x should us be vie ablished 18 There was a little rain the money so did not make a triff mite the afternoon when M. M. a I went to S. Thomastion. Here we did some fine collecting from an old fence. The rain has been just the thing for the lichem & the collecting this after one git the thing. 19. a.m. again to Ochlas. The darper has been just the this, at only for beton, but also for morganton and the trip to day war made nather unpleasant though them.

130 1.

1309. 23. Porday, I started however, leaving R. at 7.45 a. M. I arrived in P. about more and in Barlow about 3.30 P. Mr. I at one borked of the Public Theory where I expected to first Mr. and but yet the just a few minimum after he had left. I though had to bak his up a without much mich of ford him lefter a much and a little wet, we are a trip into the city x I had a chave of seeing 18. at might and show rowe of the more intenting (phile) flow.

1310. 24. Tooday Mr. a, my fetherish who was also a just, x I made a trip to Salem. The day were ideal x we afect the day flowing. We

to Salem. The day were ideal & we apart the day flowing. We would S. a little part am. Fruit of all we looked up the Old With blow. after a little lunch we made a tom of the place visiting Handhow' home, the Home of Sew Baller, a revisioning place. a movement, and last the Perhody and and of Samin. We then howeved homewal, " It were too but that I had not arranged to tay longer but I had already placed to leave for h. J. I midnight

1311. 25 amid this a. M. is M. J. set at at one for Juny City when
I expected to meet Mr. alle. Mr. a. not being amound, I make a
chot tip and the commen to Mr. Mathie & when is the afternoon he
still had not foot in his appearant ) not down to the port office &
it off a special delighter. On my stome he arrived & after a
little not we wished the new peak.

1312

26. We made an early start and at 8.50 broaded a train for S. howelle Com. arriving there are how leter. We man byen an earth for Mr. 3. P. Elle and an how better found amedien at his home. He was experting are, and had made perfection that we have a trip lighther. We first made a little surrey of the place, seturning had a min little bunch & them hurrisdly left to cated an. Arriving at a little atolism we assisted a train that took are worthward into the country to a place called broughton. I have Mr. E. borked up a living man & hiring a team took we still farther into the bestiffs borner woods, there for

the fait trine I found the Flowing Reafley in fruit, The we have are juste different from those I had been seeing in Main. There is a greater warrely & looked more like those we have at home. Hete was entirely him fair a one to make in an afternoon, one should have a whole day at best. The country is certainly hilly, more so this with ore and are from home was not expect to the tests of very is over the grand at all refilly. We get at several time to lighter him work. I will use had had more thise for collecting, but had context angelf with collecting home thise for collecting, but had context angelf with collecting home there for minimules & had therefore a time how went & then arriving in h. J. of 110'thick and fieldy have how later.

1313. 27. This morning we visited M. T. to do some chiffing; later in the afternoon we made a tap to Riminde drain x breate Tout. We then heatened but again to Juny City & the back again to M. I in order to catch the boot has for Mannager when we would also T. P. M.

1314, 28. To-day we made a flying top to Below. Here we expected must finish from h. J. & make a bottered top, but were helf how late & so the thing as far as we were concerned proved a failine. We thefore strolled about for a while, went down to the beach & finishy would up the day by seeing the very pole, etc. See brit.

1315. 29. Extends but. This h. M. we started for a trip to the Pine barrens. We tuck the midd bright with. On may not found trus for like me and. We reached the barren with mich and me byon my secret for Cl. dutirete and leter. Cetem For both of shill I filly mended in getting. But for the morgainer the trip and have been fine in spite of the heet. We armied how all t 7 P. M.

1316. 30, 6. m. a tip to the buch and then to the worde. I expet to find conthis intenting on the coder, but there were multing.

1317, 30, P.M. This afternoon I mede a trip to leading Pak remaining the wet let lete to see the moon ine, the bestift moon l'd weter al the boardwell at night. We get how last 11PM.

1318, 31, This mouning stated back you to N. I where I amid about 9 a. Mr. I am writed the chiffy dietaid and after making come purchase, returned in these to take the 1,30 P. I train for Battimore, The train did well x we are ind in the is on time. The try attention from byginning to end were must interesting and highly restributions,

319.

11. Yesterday our long drought was broken and we had a mice down pour of 18 houre. To-day thurfur is an ideal day for hiter collecting. Theft home before 6 a. m in order to catch the 70'click bout for Rock Cuch, and when I arrived 2 home leter. Urined there, I freeded towards the mit Road, taking the northerment road. I was any coin to collect Physici tulacce so examined the Jump gente cloudy little have were found in fruit. My first stop was made at the good of lage oaks on the left ride of the wad. Here I collected event theyo: a Parmelie, Pyrine & a Physic. Nothing of particular infateure however, were observed until I got to the mt. Road. Here while collecting more Pyrine I driewed a bestiful Calicini on och pointly it is be greening There was a min lot of it and I collected several fin openin. On this wed I collected more Phys. tribacii. at Dannie I took the Old Will Road & when I get of the the wester I ate my land. after landing I continued owned and won afterwards much my and diving of the at any who I this it will the at a good fire. It looks like a bollene in fit bot futher investigation will alone well this There were a great let of it is all in fine condition. When I get to the prin I collected Cation ality placed and have Pertheted accord the itent; this some of which may be new. With the alister placed in Ifid a form affactly the same get more in first, and along condite. Providing much I make sweet little fit on Holly privily as are and on Maple a new Years. Armid at the old will I willed to get afraing. of the 2. carpeni but food I had little fago the collicting will let when I would bring a chiel. It was not some 4 P.M. at I didn't stet homed. aning it but By a little after 7 P. M. and have about 8.30. The day for lying to end wer short ideal. 14 To the Sumpounder. Left home about 8 G. M for Town when I armid

320 about 8.40. I started at mer for Hampton. It wer my intention to go directly through to ble Eller but without thinking I turned tound Providence. This wer not noticed until I found myself close of to the wonds and I had gone to for to go buch. One my first finds wer made on an och, a layer Let of it so ) would much for find Menill. (Authoris on ).

Then it the bose of the lege don't it I found 3 more - a Perturise
a Britare and a Physic. My trap through the words were room made
and so also the transf down the road. On the way found a pench
true filled with fine fruit. To day I continued on road into the woods

and then fit tack a foth. I folled this poth down though a remine pand a spring house & firstly come to an open hill side, a foth were

seen her bading of the hills ite to a home which I think I wargenized as

having seen on a former occasion, browing a strem here, I saw a poth bed is of through another revie, I decided to follow it I found that it took me where I cheerly had commind that it and, up to the by oping t the water trough. From eping Id rended down to the road & here I read many with openione. him the with trough, I proceeded towards Islan Ellen. On the weh at the bend in the road I found very much Paralia anulate. From Ela Ella I founded both to Harften & theme to Tousand I the con for home. On the more Stephon Simula I for da 18. It we the late before I at any this morning so that by the time I wild the Sup du when the Hafed Rd bridge spen the river of we

noon. lefter esting my lunch I recent some opening of the Physical te, from the walks mean the bridge. My next stoffing fless wer at the trigge, have I and several Cladowin from the world the expira have I now presented much along the river recoving specimin have & the It was any intention to go ar far ar Long Green branch but I found the time yething to lete so ) wet of the fit steen buch to Hafel R

and the book you to the can in home.

21. A trip to the heed of Story Cuch, the old mill at Waterfed 1322 The bout left at 7 a. Mr were resched the had of the cruck at 9.30 I prouded at men to the Old Will Rd x him spent rome time an the pine and at the old hut, at the old mill Palleted beads Yuma cupini two new specime one a Beiter in the morter. There being planty of time I willed tomade Cirtie Bay when I took

25. On all-day trip with soul made of the Boten Section to the Somponder. We met at Town at 9 a. M. We tak to some outs that I tak on the 14th. We ate an hunder at 1323 the of j have which to-day was ford ofen. We ofent me time at the works were the week trush, and I white much Cl. withthe fillie . at the Pauli a let bult, alluted - frein of the ident; afrein. We retail to

The by the Eller away the about 7 P. M. 28 and the top to bud of Stay Ench. To-day refer to the of the aby the old mile Rd. It founded at one to the of well a the you on sett with of the them, find her, how en any lettle of particle atent, a Pertuin being my and when to have I spet me then to have suring several it to fremin , I the presided to the will and a made my may to &

birme when I tak can for home. 30 With my While to the file at, Columbia a. when we 325 recent much Duck and and me Chera. The Chan recent be in a bad pleas and will so dult be destroyed. 2. With member of the Botany Section along the Patapear. We mit 326 at the William termine we founded to arbitic from whene we count to auch them along the rive to Debute & buch to Calmaille by my of the Thith ble Rid a Fredrick Rd. The day we perfect & the trip on greatly enjoyed. We stiffed at the Bentin flower hat mostly anything to do with it? We still about me a which about 7, 20 Pm 327 5 To huthwille. Reuled Tomen about 8.45 a. M. and ret out at once for Lathewille. Remarking my former expensione, collecting of seeming for the old former at the Stack former, I devided to see what I might find and one flered to find an Reolumin in practity, foribly he tigither, a oferime looking very much like Paraclic alunche branch served other some or her intenting former. I was no interested in the raile that I afent amide ally me twie the I wanted at the.

I form, I findly med on track if animing there about 11 Q. M.

I fromhed to the best i place but found the place about have

let more more when I was again on my way buch to I aming the

about I P. M. at home a little before 2. 8 a tref to Pateram Pak. met hur a M. Schwedel who he chep of the greathere. Seemed a few air route of an orbid of Referted trif of 2. and to day returned home by may of White an. Seemed a vice but of walnute on Cannon Rid. Dur drought still continue, many opings have run dry & the little atreme likewise. I was surfaind to find one Sentie flower little atreme likewise. I was surfaind to find one Sentie flower at buti Plus, but Sit. I failed to find a single one. 12. To Soldin Delight. a rather windy day presented by a day of rain. I took the route to Dolfild on the way rewing a fine lot of chestrute expecielly wer D's. From Dolfield I crossed over to the road which took me to the bare hills. If I received opening the Vermini and the Enducate. I then continued around finilly reaching the Wen Pack Rid. This I am followed to the salur, then along it to the next and, I could have proceeded amount to the elichi can but bearing that the distance was not much grute by turing of here & functing to Pleasent Hill I decided to do co. & The could a face. Reached the electric cue about 7 P.M. and home about 8.30 P. M. The day we quite wal, and the high winds brought Anny the chestants

2. To South. The day was pefut. Evend represent of Japan \$ 41. 3. With bottomy clear to Shirly Lane. The weether still fine we took the water men to Wordhong. Everybody aggist the 342 6. With Mr. allen from arbutur to avalon. the along the river to Orange lame and book to Catumalle by way of Wilter au. 343. It was cloudy & booked very much like rain but as temperature wer all right we enjoyed the trif very much. On we were going along the Rim Rd I decided to visit the persimon regime which we did. I found my good firm on tree & also author with immune fruite over 2 when in decider. Returned home by 7 P.m. 9. With M. alle to Henry Rom. We left home immediately after dime, presended to monthelle and for Them to Henry Rom The trip of the run was enjoyed very much in after of the cloudy weather. On the who I find two fire of Parmilio caputa. 13. With m. alle x the belie to believe and vicinity. We 1345. the the rute to Maly bridge. On the way I found some fine specime of Cl. bouillain. Leter P. annotate and P. roseather two rether good finds. Aming at Muly bridge we freeded along the Maly bridge we freeded with the Maly bridge we freeded in the Chiling Bither Sout region in the we recent a mine but of it. We then went to they's returned to belieben. The day were remarkably wome. 346. 16. With M. alle x M. Heries to Warten Penn. We left home about 8 G. M. armed at Siffin about 8.30 and Tousan about 9.45 hyping at the station, whited the man that we would have to west until 11 o'clock before we could take a train to Cocheguille. We!, dried to walk and I dieded that instead of going from C to Ukon we would remove this part of on taip. We arrived in Texas already the time, I shall judy alot 11 o'click. We were left the reland a not at it was for Weren, gig at Tay a Law, away the road and they the path and the bown & seem the fild. On Twa ton I food a water of hit growing on allerthe and had the westle been favorable about here remand come of them; The home all were a trip again in the new fatire Warm had little trouble finding our way across the field to Warm arining the about mom. We we pleased to fail a lege buch busher with fint. lavid at the sime we byon on tip of the stream a short distance up I found a min Physicia and her are

stoffed and ate our bunch. I we very much intented in it Physics, while event to be git over a little father of the standing of the ment of the ment and the Parish and the little of the standing of the ment of the standing. The he was a song that of fail. Parish a property that I much of the bound of the standing of the steem I record as for a fail of the warmen for it both for all a so well the warmen of the standing of the warmen of the standing of the warmen of the standing was a song it with for a fair for a fail of the warmen of the standing was and the standing of the warmen of the warmen of the warmen of the warmen of the standing was and the standing to the warmen of the standing to the standing th

is the weather, yesterday it and delight ly please to to day it decided by flower to to day it the weather and decided and the confer the confer it he afficiently. We for the yesterm a har a ford a heat of higher of chyrather was in I rested how about is P. M.

1348. 20. Wat Dr. hyber only the Graph from Haft Re to Lake.

We not at Hailte at 1 10? M. ani; at English the them from the start of the the following the three from the Silvania a then to the Dunia. Itse tilt (?) of the who on h. 40 hotely am in the like his an whend. In the Remove without to I may when, and talking but the star. We arrived how about 7 P. M.

!349. 23. A raining day. Proceeded to Brooklyn for film rute ite.
The trip was not a very pleasant one and little of intent was
observed

1350 27 The trif Wed had to be called off on the day we rainy disapurably cold and selectly. But a juster surfice we in stee when towards weining it began to some all so fast that the governed with the most morning it bothed as if we were in the head of within, but the run came out and by right most of it had do find all by the follows morning there were were in right.

To day is an ideal fill day more like an October day the are in lete somewhom. On trif had been properly to Corbaywith & along to be supported to the trips above Corbaywith and they along the surface to few took advertise of day. The trip was along the surface to bridge above Corbaywith writers Row they along it buch to bookyalls. I was plead to first a second of the surface of th

Peltyin - Pentate I believe it will prove to be. Stute guaraja we also found in greatly, also a Physicia. The trip we cayinged by all of on in spite of the chiling. 29 The but try of bottomy clar for the jum. We mit it the Edmodern and brulge and took the try withward also the left back of the falls. With the weaftering of the clarity and but of the violet 51 The day were commented cooler the it was Saturday but still gote pleaset infruitly no along the stien. 30. a trif to Buthly for fittermed, dodder purious such etc. 352 I took the route though Commelli & men pleased to find a few furth of the single alor a few reads. The with we again perfect and the trip delightful. I found flently of Celester, and plets of dodder, but the exact for personne reads were must difficult so encuesful. I know where several trem were to be found and thathe I directed to my steps. I found the true without houble but the finite were so high for the ground that it would have ment much who weren, some. Searthing the ground borner, I found plats of the sent, must of the left for last gain wife of fit. After rewring there I made my my boneward.

4. Along the Palafan visiting the personner region. I took the 353. arbitus, and I enjoyed my top oney week. I had little trouble finding buy a fite fit. I was pleased to find a I cross plant with fit at avelon. 7. a rainy day; visited montibella and runned sprain of spran come and 354, and also pade of hong bount 11 During the part few days the weather her hear unwandly cold. To-day 1355. I decided to go to the Liebe Peterset about 3 mile ment of Ell'att City. It ar covered with Pumilie & Physica as on my form this and record one or two forme. An afternow trip, at the time of the year due net give me sufficient time to do much invistigating. 14 A trip to David Will for trongs to I then devided to go to 1356 Cliften but finding myself in a Hamilton car I decaded to go to the termine and the on to the bunfonder. This would have been accomplished had the can arrived at H. at its appointed time. There were homeon some trouble with the brake and we arrived it It. just a munte too lete. as it was already 11 a. m. I did not core to want another half have knowing how little time I would then have along the street. I dealed therefore to go along Hamilton and then along Hille any hick to have. The day we retter winly, disqueally wo, and I was gled that I did not

361 4. To Browklyn. The seven cold was followed by two on three days of worms weather & most of the most disaffect, but to day it is ogain cold. Left home before 9 h. M. for Burblyn. But before gring them, decided to stop off at Riverial Pack to see who was heard man, were surprised to find Mr. Stronley still them, as I had heard that he was going to Potterson. Secured some route of Much always are have of the colorestic. From Riverial I must dividly to Burbly a them I secure some Springer, amend forgi, demand and disator, and some Protoner. From I grapher in bloom but form was not surprised to find in that state. On it was noted disappenelly windy & cold, I medicany this as short on as as

forill, retining have about 4 P. M. 8. To Catomville. It is an ideal winter day. The weather which her her quite cold the part few days is again moderating, to-day there is may little wind, and the bright aun is making way thing cheerful. It was firefound rometime ago that we must egain have an outing in the woods; a lage fire was to be built, and we must have wound oysten, toested breed and hat enffre. There were so many interested that one would smely have thought that we would be retter crowded on that must imputent day withing around the camp fire. However, notwithstanding the beautiful weither notwithstanding that great desire for an arting, but two other member availed themselve of the opportunity. It was about queter part one when I arrived at the Cetum will termine, Mifo C. and Mij O'h. were already there. It was therefore, alway late but we thought it but to await another can but when it came along and no one she joined our little band we decided to start for the ravine . Just before the can came an automile paned on going at quite a repol speed out the road, as it perced in we head a cathe loud report. I thought, it once, that comething had gone wrong with the machine, which no doubt had, for it were brought to a standstill. However, a few minutes leter we pared it, we raw ite occupante brief enjoyed making repair. We looked at them fuling trather roug for them, possibly they bulled at an with a much concern, at any rate we head one asking another", What we they callednaturizers? at my wite he undertood that we were going naturizing. We tookethe wend route to the ravine, There was very little more on the ground, or me pared one there patches, the pleaset round of crushing moun greated on save. The first interesting thing observed were a pretty patch of Citharine growing on an elevated mound. It was intenting to obine how reft the ground over on that ride freing the run, where the part turned away for it we guite frozen. I have often obraved how partiel Coth arine is to there mounta found by the overturing of tree. he it beams our othertim is called to the mond that we ree the Cethornie or is it the new condition that is foundle

to this enteresting more? We continued on our trip and in a little while

realed Owl spring, we did look at a few lisher on one way but we were

ratified in simply observing them. arrived it the apring we get to work collecting would for our five. In a remulally short time we had a mire but five. a mire flat stone was then getten and on it we. at first, it around a little arknowl and an oyeter are but and also a print of breed, but we room manged everything finishy. after the ruffer come conty and affler, and the idea come of routing an affle This we did and we were rempried how mindy we receded. While enting and tending to our culinary dutin we were surfaced to see a day coming though the ravine and room after two your pufle It is so reldom that anyone is seen on these trip the ough the rame the the inauntence is worth noting, they record to be to intented in each other to care to approach, at any rute they pound owned heeping at a refetful distance from un. We remained it our friends till dock; Verme over abrief whining gents bulliantly when are pashed weighting together and duided to start homemo On we stated up the hill aldeban & Cefella we observed, munt, bu it did not seen so deale, no doubt due to the potition of server how & there. Thed little trouble failing my may to the path and we had no timble at all getting out of the wooder he we proceede the star came out more & more billiantly & on stoffed frywithy to ated, the countillations. Although we stoffed many time it did not take me very lay to get to the can worth an home after being one fine we were refilly offereding the city. All of on were very much plead with on outing.

11. To montehelle ite. The day was bentiful, in the woods only as this coming of 1363. more was observed. The ground was frozen had and it we with some difficul that I wan able to seeme spranium of Polytrichum, homen, I manged to get some and jute fine over two. I were flewed to find a little plantation of history.

15. To analon, Oraze rum, Catomalle. On Thurday we had gain gentle a heavy 1364. enon-fall, so to-day the ground is wey when covered. I areand afreemen of twing for lesson or bude.

18 To Riminde. The more is disappening very refidly; to day it is quite classes. 1365.

If the weether continue like this another day there will be very little remain

ing on ground. Seemed come fine trujo of harished etc.

22. With Ulrich to Slanburnie We left Canden status a 1P.M. cer arrive 1366 at & helf an how later. The comme has displeased about completely, only here I there are a few poteties. The day is cloudy and at times rew and disqueable after hing at a little while it have pleasants. We founded to the old furner collecting has a their openion of brancher. Home the furner we interes going to the hand but on an way it began to mome a une decided to go on to the station. The main did not lest long, for by the time we reached the

interesting - On the old rule grew Cledonic abundance, and on the etam walle I found then fine wick forms annil at Pouleten (Woodlam) I took can for home aring there

alat 6 P.M. 26. A trip to wonde new Union Dame. I left the Unwinity about 12.30 P. Mr. The day over fine, there her been no snow on the ground for reveal dage. I took the Ellicate City car getting of at Rolling Rand . Nothing particularly instructing one about until I got med I find a Bullie!!) on feller remaiding me very much of the form abound at Managuan (v. p. 136). Father on, the old atom fine proved interesting but I did not ful in the mond to remove any opinione. I can. timed amond a finally rested the woods, where I afest several hours. I alberted a spring what was going on tunk of an och. We the stream I found quite a let of Paruelia mulente and in a rock a fine specie 1. A trif to the ravine byand the Care. The within her hum 1376

apring like the part four days, this with the raing rain of yesterly a the cloudy condition of the atmosphere to adey, made & me day for an arting in the ideal locality. I left home about 8.45 a. Mr. but due to the round about route I am obliged to the it we 10.30 when I got of the car & stated up St. The Church Lane. Bring dread warmer than wer menery for such a were day, and incommend by the middy weds, the hille, my heavy but, etc., I did out make very refid proper, so that it we about 1 P. m before I reached the steem and rested long enough to cut my buch, On the way out the road I stoffed frequetly to vome afrain from varion trees. One mice find we made just before esting buch, when I came to an old Clidine coul strap; from the afferment of the finite ite. I suffered the afring to be Cl. didyne , get have a them though the lege met are also a spin with pole flat. colored fruits, on these looked except for the color of the fits, much like Cl. didgen, I am inclined to think it with some form of it. or parily its also before materialy. Often lumbring, I proceed ourself toffing first at the origin, though the wonds as for as the Cities at the Cities to the Cities to the City of the color of the City of

ohim spot. On I enjoyed the stopping & collecting, I made may no repid proper. By the time I would this healtight ryin, it was him to return, hower, I would have begind a little loger, had not about this time a paring shower, could me to think of moving howered. I things started homeward, getting to the cur line about 5.45 P.M. and home a little after 7 1377

5. The war weether her continued this with week. To-day I sto have been pleased to have made a larger joint, but it wer men

to visit Rimi with Pak for horseclutant tryp, Ofter which I timb a try along the treche, nothing of interest we observed however. 8. I trip to Benfill. I left Canda Station at 9 Q. M. realed S. at 9,20 and the proceeded to B. where I arrived at 11.30; I proceeded at once to the oping and there ate my buch. It wer my intention to day to visit July Run so I did not remain very by in the spring brealty and diwith after eating much my way to the row, securing on the way two Cleding and a country aprilly a Buelli from the radates when in the red ride. Reaching the stream, I proceeded along the right back, but up the street. It wer a futly day and although little that sumed too be new wer observed I enjoyed the arting and that the in efits of the buin. It was my intesting to go of the shien to the Drum Pt Rd and then over the branch & return buch to B. I had little trouble filing the word but I must be gutte mixed in any district and prouble downward intend of bound, it any attender the I observed that I am in grite a new territory. On it was yething lette. I made of my mind to cross the stress and leaves my whenhouts. This I did fortunately muching two your fellow returning from Willmrith. They deviled me and my return to be, were an a new route, Reules & alut 7,20 P. M. in home about an home leter. 12. To Burklyn, Dwing Thursday coming a night over fell and

To day it is nother row. I had intended only a long the two day along the row. I had intended only a long that to day along the row, but are I get away a little lete for the Ministy I decided to alete it. I there did alet collection? I willed to when x then returned to the case aring home along 5, 45 P. M.

380 15, To Farmer Brunch and Saw Will Pond. Weether again fine. Went to day to this rying for fruits of Balthui, and Mitchelle and to obtain fine you. Found the branch again containing much of that putty also them for midentified. Juniform was observed in bloom themine alder, Dule, Shephuli Pan builded the Maple, Slach Coblege and Chrishward.

381 18. With Which to the part along the falle, I am pleased to find Chan in great quantity. We remed to Springer no figi you are observed. Durhand is florishing liberia Poton geter.

382. 19. A trif with number of the Botter Section to the Poton we

1382. 19. A trip with number of the Bottery Seating to the Pologico. We met at the Wilher an car terminar. At 1.15 we touch on to about I turned in to wint the rawin at Isla along. Here we found our fact Heptiens the legest flowed own I have reen I believe, and Spring Bearting. We found Whom are in bloom. From Glenatory we went to avalor

1910 - mar. 19 - april 9.

crocced the rime and then preceded along the rime to Orange lame.
Then by may of Hillow are me made on may to Calin able when are trock can for home. We hafed to find proje you but none one found.

1383. 22. From Stony Run to belenbernie. Left Frederich Rd St. at 9 a. Mr. with Dawren armid at S.R about 9.15. Here we were mut by Le Cete. We proceeded out the Road to the man road then out to the church. Here we began one cut serve the country touch blushows. From Shifty we began our Top along Sam Will Broach and must please the find it. The day were very warm. At Columbia record record putther-plat

morning it was gote down from Pourse to Lock Raw. During it was got alondy but it deved before now. We take the the through Redyely's then by way of Principus to it was to the words new P. all enjoyed the tree in many. We needed L.R. station in fine time, not hair to wait for true but a few minimum areas about 6.30 P. M.

1385 25. With allow to the others. Alder in full blom also Red Maple. I wan placed to, to find Sugarbania The one sho in blown. We spet a copyle of how stalling alast in the work. Spice book is almost in blown.

1386. 26. Out Wilking and to the pands for frago year. I preceded along Catar Ven. to the woods where the bonds are located. I was surprised at the building that is going on at Cala Heights. The day was must plant not just a warm or yesterday when the moneter rejected 83° the hottest would temperate for Mench is 35 year. I procled though it words to the railwood and the touch the abilties. Week quite a chet with one of the former of a minhood gang.

1387. 29 To Herring Rem. The weather continue warm and spring flower are mind out in full force. I hoped to get frogs yes but with all my curching more were found. March her been unmindly day, in feet it her been the deget much (March) recorded

1388 2. To the rawine another wound day. We met at Citamille toming and fromthe though the rawin one would note, We stopped a short time at the apring. Engtheornin wer found in great quantity. A read were heft of plate found in bloom, 45 for this time of the most is quite a showing.

1389 5. To the Genpowder. I left home about 8 a. Me possibly 8.16 armid at Power fine minutes before 9 o'clock. The day were were during morning more or her cloudy. I prouded out Daleny Velly P'he to road going along the ruin. Northing featinful intenting was observed, exceptions

Leider granna?

ing the collecting of that black Placodini on him atom, until I reached the river, at the hillride onelooking the river I found Dentani, Dunte and Engthormin in great profession. I was surprised to find Mutum aludy in bloom. At the hillande I found an interesting between on an outgouth of rock. I seemled the still home about 12.30 and have I republed ony rely with some of the fine with and have to I ate my land. I fere to, I willisted some Equition, possibly the lest of the finiting spikes after lunchming I formeded up Them so for as the bridge, I had hafed to find more of that intenting Endountem found reveal your eyo, but I could not find even a frequent. I did find a fine contine like homen which may fine intenting. When I would the bridge I decided to re-turn by my of the road. I again got a drick at the apring home. Just beyond the hill amboling the min I entered the woods him duiled to ans one to the other and when the Calthe is to be found. This true I did not this the afect like I have done on former occasion but went a little too for to the left. It how eni hed some good worth for I found Pinis wife closing stemate cother and letter a done? on a der meet, in which were two white yes. I realled the road at the bridge so had to go of a chat dit ance to the Celthe place. It was in bloom and? event come fine represent. I now made my every howevered, arming at T. about 6.30 P.M. and have before 7. club.

8. To Cetomaille for Eythorium. I went to the efet men the I lift love alut 80'clock and get to rebul alut 11,30 G. M. The day on fine.

1391.

9. With Which & Wells to Sleebing, Muly and Front Home. U. was ansime to get rome Pitchen Plate and Down. We mit it the Unimity. Had I thought of it, I should have lift in time to the the none train, but when I did think of it, it we a little lete, me ! the 12.30 cm, aring at Muly about 1 P. h. We at at it was for Front Home. We then inited the Chily Tom builty of the I who for the Helsin plus. I we capit to fid a new word cut the yes, we are dultfly a little it agents, if I would you wigned plus a sletter this is wither after, it my the I below on found and in bloom. I was compained to list a state of it is the state of th to find so such of it only in band always that some plate, supposely by plate on at at all affected by the incurred temporation has doubt all the little area in which Helinia to be found, at any arts it much so to me to days in ) come when 2 is 3 place when I found the plat. 2t were dette

that Mr. W. who is a minimite had to hong how, other included has studied the region mase. In one flow we for he much of a geltinion algar, Mr. M. thought it hat a be it is not at late. We exceed some Down & the fit Mr. W. on the read to Mr. I on the other had find though the early touch believe believe a little arbite et a comind then before 6 7. Mr. getting how by 12. It was my intention to go to Benfield to-day, but as the

1392

12. It were any intention to go to Benfield to-day, but as the weether looked impromising and the weather man had predicted ran I decided not to take the tip. I therefore arranged for a trip and. Franklin road. Left home about 8.45 a. Mr. I remaid first of all rome fear blowome, at any old place. Was pleased, two, to find some Ornithogallow mateur the first I have seen for several years. At the grown I found come Equivalent amount and lite owner father up the and, atill in fruit. Engethornin are found still in blown. I the lumb at the make. Here I found Calthe politic in about seen quetly as I found it lest year. I have two in the food were come calculate you. I went as for as the red bridge the stated the actuar. On the hillaide, at the afring, I must hip I. Smith and a layer along of girls, out botanging, they had stated from reland at 12.30 and were now or the homewall tail I armid home that 4 P. Mr.

1393.

16 To the Cam. We Fatated from Et Thomas's Church Kan at 1.301 The day was an ideal one, possibly a little windy. Daywood was out in full force and the words where we looked were white with its beautiful blossome. I do not know when I have seen mue I gured before. On me went down the avenue we obcured at time both ridge of the wed haid with the time, It was 4 P. m when we revoled the spring and here we dished to stop a short this to wet. Here two me has the barking of reveal hounds and room after a party of men, more, loge age on home came into view, they were on a for hout; there must have been 18 ~ 20 in the party. At 41.30 several of an punded father on don the stream, crowing at the rube. and returning by other ride by 5.30 We then made a trip of the road to the Columbia, atuling a an return about 6,15 P. M. When we again reached the Celthe efect smed of the member record a plant. The Calthe is now at Its but. More the 50 plants were found in bloom. We reached the can at 7.45 P.M. In about 10 minter a car came.

1394

19. To Benfield. Notwichtending the rain this morning I dead to go on this long trip. It we to are Schminityie and home it were con that the trip was made. I left home about 7.15 a. Mr. hoping to in this to go on the 8 o'club car, but the car were delayed and so had to go a the 8.30 car. When I got to Sluburio there were a

"let-up" in the rain and I manyed to go juste a distance before it again by an to sain. There were then one whom after another and before I weekled Befild I were grite wet from my know down. Out one of the ponds I hard a brown the when anying, it were the fait time I had head this covert ringer, and I wan just a cheesely with him; no worder he has been called the English "Moreting bid Just an I wished Berfild the wer a heavy downfour of rein. It we may man aid I looked for a please to cet lich. I deiled raining or before by the are wer aling. Ofter builing I founded to the Schmidgie place. Here I found a member of the fine along shon; fertile come. I exceed soul & also some juste lage vlammate our for the fiving flis. and I the Solmitage flue I would munt carfully for africain but out a rigin of a war found, and on by dought down much her bed any iffect of the plat? I war girl impaid to fil Cypiplic and well out of the ground and reveal spains of Lufin in full bloom. I made quite a conful search of the trucks of the fine and I that I have found a new spen On second of the rain they were just swoller and of a dark gen when at one time I thought that possibly they wer Paruli pleasantic but lite when I conspand the two can guite a difference Returning I took the fath and But Och - the rime we futly as it algain. It was not gite clear and I wan very it was getting so lete for I wan guit bying the light of Home, I had to start housed. On my had the little true toda fif in their love dittie. I cliffed at one of the pools along the way wide and after a list sum one in the water, I seem too their thinish men of eggs. It we meanly seem who I rusted Blading when I had to wait to 7.30 for a car. It was about 0.30 before I realed home 22 Tij with the botay clave. We took the all track for

1395 22 Pij with the boley clem. We took the all the for Dily will to Gray but condition on the work one guite wet.

The am high (color) across the fells is grite an impresent.

We make the top is all to a how and a helf.

1396. 23. To the Boufale for Meeterie. The day was a little attery

We referred gite a crowd but the two of the Id aucher affect My. C. x My O'h. a new aucher Mp Peter also can. We found the trif to the run gente a warmour, we when we arrived at the bridge can decided to go to the oping. We fit burked as the hillieds for Oute operation but it was not at all pletful the best year on the way to the oping we found Mutania in fould bloom as in the way book keep Hyunth, guite a find for it was the raw Me death

4. With Mr. Harding & a few member of the Bottomy clear to the Jellan Cyfrifedin place. We and at Bommi Brac. We took the wendrate It was rother can't and most delightful for walking. When we readed to rubbin Road, Mr. H. left an an he had an enjoyment, the next of an continued and to Cypifdin buildy. There foul; then were served fine of frame, but the was not so many as let you. We were found the Louise semperation in full bloom. Return to the real one found the clim rather to wile to com, so buft on the left but to the budge where we covered a powerded award to Mit. Hally, when we took 402.

cen for home.

6. With botany clase from Shirly Law to Woodburg. This is the trif that is always enjoyed. To day the with we ideal and this made things were more pleased. It is a please with with

4. To Benfield and based of Serum. Member of the bottomy clans united to go as also Mr. Chambell. Mr. C. did not come and but the ladie, my Sich a my Pile. We took can to M. a. Junt. then early 3.45 h. M., to see Hellips count. We took the melloute, I were again found in all its glong. at Soffi to me out an old about woman Kate Zueen, who were just with they she told and days do not lite good people. We took the road at S. and flu awing the first road on this wante or lacked out for a place to ent on land. We soon found a flee gite an intention, her wer an outerf of weh could it Poundi expecte and her x the une fine Cladin tugite (?). We setted have one on hom. It was after 12 who we received the old will when a get on fit dich. It did not the in lay to get one to the by ofing now in the along the Sum. We finded then to But Och in her I feft the belie a founded about to the Sale 'type place. I we pland to find a little why of 3 plats; which I maked. I then laked for an plate let in me one build. Coming to my only of I falin plats I maked off a good I and miffed the flats.

I the who my may bule to But Och . We we tet for mile's late 2 chile the A 8.20 P.M. 10. With Mr. Churchill along Western Rese. We met at hit. 1464 Washington at 9 a. M. Finding that train to Cachipulle would and be along until 10.30, ine divided to walk on to Ruxton another

take the train. On the way we found Myorotie at Like Ro men the month of the stream, and farther up near the station some Switch Brown. amid at C. we proceeded along the trave to Writin Run. Here we found Saling in bloom. We now began on trip along the stream starting in on the left bank, at the bridge curred and the continued award along the right bank. I found the fine spring your flowing so we deaded to set me lunch. Just as me armid we about two men ready to cut a limb from a tree I thought it strange but some same that it were to seeme a lay swarm of bus. This was something quite new in, one expension. ex we watched the precedure with much interest. Immediately under the him a large cloth mer speed; a rupe were tried to the link rome distance from the place where it were to be and for the truck, One was we holding the end of the who, which to to allow the link to fell gradually were first theorem were a land higher of, the other man was carring. Some the link were carried though sufficiently & the bit we allowed to desert. It was then that the rupe broke in the branch fell with a cruck was ing the here wayshere. It we guite intenting now, a small boy me doubt nedy for just such an occasion byen migging a bell one of the laye com belle, and an old women came at with two tis have, buting the two tystler. One of the men at once jumped it the ewarm, and fortunately fieled at the green, which he plear in a new him. I me gled that the thing terminated so well We now ate one lunch on the stated on down the stream, an of intenting carrier were observed. The trip were enjoyed by both of or. Mr. C. wand a view Magnetie triputale, which pleased him very much I wan placed to find a leg colony of the Ostril fun, and then let we found a fine colony of the double, Rammale refer. We returned to C, own the rate I would take aring the about 5 P.M. we had about 30 minutes to with for a trui.

13. With bottomy clan to Back River. I went over the would well-ting ground, but were roung to find the place cut of inter hildry 1405. lets, the intuiting plate withe cut down or a pour condition. The the all enjoyed the trip notwithstanding, Coming buch we kept also

the show for a ditare, this we guite pleasant.

14. With and, of Swin mention to belenharine. Mr. Chulie 1406. x Ma Ulnih accompanis in. It was to me the Samewin To the trif was made. We prouded though the wonder towards the had of the pad. On the way we found Lupin in profession, Levelle and and and and a white find. amid at the them we proceeded along it to the pand, a muche of intenting for

and redge were obramed. Armid at the awanty grounds where the Servering grow we made a lengthy step. Here Mr. U. manyed to get of hailf fetty well mend of. We now left the find & front tomade the Meridiangin. Mr. U. haing all he came for duided to go inward to the statuin, M. E thought too he would go x 20 hip to. The net of an went on to the maili place put in we recold the place it byen to rim so we dealed to go to a place of shelter. after the show had found it were muly 6 P. M. about to lete to go any when who is we started for the stating att Belle. about 7 ?. M. x toke home alut 7.30.

17. To Chestert Ridge. Left home about & Q. M. & provided to Town. From T. I went to Lutherville. In the wet 407. mendom where the puried genting grown ? found laye patitud Sing win chim striction, the lays fatcher give the efite a desidedly blue cent. I ate my built at the efing, the wellhed slang tracker to Pademe. I wom hand tound the left following the word. It even buylt me to a street and the receipt me besteful. My which tripetele green in many flew, I receil a bile from the back of one of the then. I finded of the stream grite a distance the whist the words. The test now were most beautiful. I mangel to heef in the words tell new Terinamin. Revely T. I for

ceded to Juh R'd then how by way of lower 18. With bottomy clear to therein Ram The der war collect were took the would route mething partially intuiting man collect obrarued, then were 12 in the facty.

21. From Rulling Rid to Union Dans then to Hollofild and back 408.

1409.

to Elliath City by my of the B. O. We met at 9.30 Q. In It burnighty. The come it time this to chine. The morning over there free must atily a driegueable. We moved along therefore very aboutly. The triper taken mainly to ree amount Drewiting, today it was allianie this in the fact time? have som it her. We reached the old Penf Home about now. A very god find war Ovoche Stathe fleri in the clear one just before realing the Shale of Deals" the spain were fine at Hollsfill we coved the river and then byon on trif homewal. When we were just beyond the town it byon to rain, just a little chance, but then were a putty com four which were remplied in the river. At Union Dan we expand the hilling and found a few Cypifedin plants of course wheely in fruit

in the woods. The weether is quite coul. hart night seem the would for lit time as it is getting &

1. With bottomy clear from Bonnie Bree to Window Highto It is very oval the coulet first of June I can remember. To day we went right part the growny. In spite of the operations this try is still with tehing. 2 With mp meshare, mit Bollman, the to a region once winted 14/16 with Mr Saller, We met about 4 P.M. at Juntin of Zum Sp. len. and the Electric Ymin. It was 4.30 by the time we rested the words. It is a smill plus but runn well with writing the words are gute deme. In it are rund abaden him kilm, now gown one with from. Pyrole elliptice is now in blom and Kalmin is cing with blum. I willed I had more time to explore but we all dieds to make a trif to place again later in the mull. 4. To Dyke, Va. The bottomy vection of the Med. and. Summe duid-1417 ed upon the recommendation of Mis Mille to take a til to this place We left Balte on the 8.30 a. M. trolly arining in Washington at 9.30 but by the time we reached the Mt. Verm trolly it were two minutes part 10. Hed we why known that the care left on the hour we could sainly have been there in time, as it was me had to wint an hour for the next one. At 11 we left for our declination evining there it noon. Type no doubt got its name from the lang dife-like projection (an old road had me were told it cam) extending some distance out into the legon, quite original with agustic plante, but at high tide said to be submiged. The aport in quite futureque and we were family infund infund might from the start. The woodland extending of from the reiland tracks were very futty and one thought we would find a place under the trees where we night lunch. We chilled the fillich but rome found that it was entirely too deep under the There to do this. We thenfor retried on steps and row found an ideal place on the dike at me of the club houses. Cifter lumbring we proceeded out the dike some distance. With the exception of a spine of Climatic (Cocholence?) nothing new on observed. We now retrained an otep and after getting rome weter at the apring, houseled along the truth. We continued this this as for as Believet. On this trip a specie of Vinetas in war found. at. B. ring the Potomer in fell view before we we derended to the shoe a here we set for an how or more when result of the member thought they would like to go to hit. Verson. We therefore got beck to the station and while helf of the party hould to that V. the rest of in decided to ree Willington this wer the next station beyond. arrived there, we did not think it

interesting and wandered why it was come devel important mough! be named on our ticket. Here we mit a young women, who told a that we would be pleased to look around at the most station are We thenfor predd to it, It, I me attracted on more went a the wad to the im. Here we not a way pleasant young woman who will in to make muches at home and late went part the way in as direting as how to go to Wellington. (Mm Peilling) The well me a intending, amind at the wood buding to the station we stuffed a sh white it were that an old homested attracted my attention if We prouded to it & I sow som that it we doubt wer built is brich for England x such it from to be for me let be be the it we Washington's fuit home, letter give to his som in law. The wind here is most breatiful & we cut a the old now about fact is mening forties & enjoyed it. Ofthe a lit though we wished to get a water & ring a fath of bland it (We had her directed when to so but we thought this were the path ment.) It bought we into a most bentful little ravine & we wished very much that a had had more time to stay & explore it. In me afect your a good bet of Rube phoenicoleine mayin, and to her been introduce on the place by low. W. himself. We will to take the 60 chall can back to Washington we dended we had to start, on the way " can to a chang the & here again we were tempted to remain. We fiely got to the station x purity the can came and can for home and at & o'clock was howard bond. 7 Duided to-day to take that long proposed trip along the Sumpour

1418.

I Decided to day to take that long proposed to along the Bompoon Heafth home about 8 a. M. on a little after and presented to Cany on Heafard Road. Now it has allonge been my contour to go out the road don't to the river, but their time I divided to go to Peny Hall on Belief and then to the river, revening the try grownly taken. I would then be so to afred man time own the region which on other occasions received the lend I thought present out the road to the tif of the hill and then the road heading divitly into Peny Hall. I were some quite pleased that I had decided to go this way. For some time there has been much rain and this has been quite the thing for the lishen. I some found that could have sport the while day right on this word, but I decided to go the north right for to amply. I report an assemble time collecting that it is almost right for the army. I a day our some a line close all just right for to amply. I report an assemble time collected to go of, right back. The trip up the river was all that could be decided to go of, right back. The trip up the river was all that could be decided to go of, right back. The trip up the river was all that could be decided to go of, right back. The trip up the river was all that could be decided to go of, right back. The trip up the river was all that could be decided to go of.

the trip of the streem. When I receled the bridge I decided to go dom to the sping, this I did no the way I found another let of the Octail form a fine lat of it growing right at the edge of one of the late, my doubt plated there. after getting my dish, I hertered amount tomad Cany and home.

8 To Bunklyn with bottomy clear We took the route always taken. It was form day. The trip even to be one enjoyed must ofall. Engage amican were in full blown.

11. To Maly, Fourt Hom, Elector, Waterful and vicinity. We left Canda Station on the 9 a. M. can. On account of the rain during the morning and the general propert of a raing day only 3 ladin were ready to take the tremp (mip Certainght, mip O'hail & mip Smith). I handly wefreted anyone. It did look very much like rain but we decided to rich it. and at Marly we started out for Faut Home. This is the fuit time that we have rean thearigion so wit - to-day we found plue that were quite wet. When we came to the little branch, I hadd as if we might have to turn back, but after a little enjuming un all get refely across. This was an ideal day for the licheum and we stoffed fromthy to collect come intenting from. We hoped to day to get some atransmin again from that lage field new Chaten. after we left Fourt Home I was the bule of for that mice spring, where we stopped on former occurring, but to day for come rema a other we mind it, we had therefore to cut and hunch were on the both out for the strawbery bede, but with the exception force bed we found nothing, the large beds of last you were flowful up. annied at E. hip S. divided to start for home, the next of an decided to go on wand. We must had really the best part of one tif we come came to an abandoned strambing patch & here we gethod rue of the fine benie, leter we came to another patch & here to we get some. At let we reached Waterful and here we called from. It was now getting late in the afternoon & we had to be on the lash out was to get to the landing in time. It were tre had that we had not more trunk but it could not be helped many intentify they had to be possed by. We got to the landing by 50'clock, 10 minutes leter the boat care and by 7,10 we were

hack in Baltimare. The trip was a most enjoyable one. 15 to Me Waren. Our wife of raing weather continue This morning it was cloudy, but the peoplete result to be favorable for a chen day, in fact the sun come out at times. This contained until the very have for the meeting, when we had guite a heavy chance after the shown was over which letted fully helf an hom, we

162 1910 - June 15 - July 6 started on our trip. There were no more rain and all of un enjoy the trip very much. We went fint to the pond, then to the outh httle reach a few of Engine of Calopayon. From the every we pureded towards Westfat, taking the route though the words. We realled the electar him by about 5 P. M. and home before 6. 18. To Round Bay. We left Ballin at 9.30 a. M. anud at by 10.30. The new how rawing weather still continue, as a conseque but 8 member of the academy twoh advantage of the trip. One we rat about a short time then ate our hunden. after which we proceeded to the express round when the Poyonia were in a thin glong. after alluting some of these, the party divided some returning to the hotel, the aut of on presented along the highest be spenin of Woodwale Vinginia were found, Sphym, 2 spein, in fruit and a great many Ormula nyelin affected by some fungue. Turce during the day we found ofering of Micontylin. Second bilum to one collected. We returned to the latel by 5 P.) after a net of 2 home we stated for the statum and by & o'clock . were back home. 22. With Botany clan along Guymin Falle from Edmondon a bridge to Franklin Road. It was a warm striky day, and there in 1423. not much enthusian diplayed. We found quite a number of ple in bloom our pitteit find being Paper rounifum (?) a beautiful che poppy with gente lage maron colour flower. Mulbinin an now rife 25. To the words out brum Sping an. We met at the alugh 1424. Piherille Junition at 9.30 Q. Mr. This we to be a small trip so we h pluty of time to liter and we did. The part week her her just war one, or Thurday the thermouth ruched 950, then he have no race On the road we stopped frequently study in the lichen. We form the fuld white with dainin and figuretly among them were blake Sucon. We traulled so slowly that it was now before we were the wonde. We at mee bound up a spot when we might stop lunch. after lunching I expland the stream, and then byon our real for the bile, it however were not so very to find, in feet, we de not find it in after of the most could reach. In the words we found the Champfile with untillate is mentale in blow als " rotundfolie; we found to, I reinte although not in bloom and a P. allnewthe also at in bloom. We came upon what I ruppine music time he a fire dem, at any rete the remining of many chichem in come one to mornine such to be the case. A by of chichem was at

lying on the ground and a box title were devoring it. This is the first time I have seen them eeting meet, from my our observation I would have thought them strictly orget evin, although I had hard that they would cet meet. This was a good day for the My group cele and gute a much of afine wer obesid, the are going on the hour of the Pyale wer juite intenting. We remained in the words until 5 P. M. whe we stated honored again at the clow rate 29. Last-hip of botany class. We met at Swyrm Och Justin We proceeded to the stream the entered the woods heeping on the left bank of stream. The day was warm but in the woods it were quite plenant. We followed the stream until we came to the high hill here we crowd the street & then finding a min path followed it. It to for a little while that distance heft were the rtream but then deflected to the right. It hought we to a new avera which had down to Group on Och Pak. amid at the pale we get a dried of the good water and the for plants of let birain of his in bloom, this were to me juste carly for this plant. at. D. we tok can for home.

6. With reveal members of the academy of Scrim to armspoling and then to the woods between it and Bay Ridge. I remember the beautiful woods I went though on a former occasion when Bay Ridge was going full blat. I remember that that this was partly along the Bay alone. It was to take this trip that we started out. Inguing revealed the fact that one of the bridge was down and that the only way now wer by the pike & railroad. It was nother women in after of the breeze so we did not make much had not when much had not to the such way, at now we arrived at the railured track. Here is a putty from of woodland so we decided to find a spet for lunching. after lunching. I med a short trip though the words, Luchem une out over abundant, Pettyin cause conved some efite, and une the only confirme them observed. My but find, however, was two faling fronds of anglemin chemen. When I returned to the faller we started for Bay Ridge, I com can however that it was out of the question to reach the place. We therefore whites a rfat not for away & staffed to rect. In the words a represent of Microtylin was found. It is too had that one must be pertured to by" jigger" in this ready region. They haveour into the chin & them set up insitetion. On had as they are at the beginning, this is nothing to what they are at night for a day or two often wands, sentiling alone seems to be the only remedy.

125

1426

164 1910 - July 6 - august 6. We staid in the woods until about 3 P. M. when we stutied but to the boat. Tecome when we way when in worder We arrived at the lending about 4.30, just about the time the bout arrived. We were both home again before 8 o'clock.

13. To Bay Shore. Prime of Sunday School. The day were spent more in taking it very then in bottom Nothing of particle intent was observed. 16 along the Sumpouder from Belin Road to Heefed ! Left home abuthy after 7 4. In took Smuch an can to Hufan the car to Hamilton where I amind at & a. Mr. muched Com fifteen minute later. I found that by 20 minutes part 8. When withing a mile and a helf of the bridge I was overtaken by a there by 9.20. I found the grown haif could with det For just a diction I was able to take adventige of the and find patitum of Strike amplione. I would with several branch hope 11 h. h. and here I at my lunch. I there to on the one I are by the true I had and L. I. failed looking at the webe and were on my on up then you . I had out you very for the I hand the and what fit of the had a very bey down for of sein. I we forting the in heigh we much for at hard, making a cap with a double what I am putated my windy. The sain of not best my by, but in that what this it transformed as a little men about difficill may be forming it an about imparable one. I we some wheat from my how down a to the little with the little of the li of, still I manged it me place to find a futty Partition you are about truck . Jet before the rain I found a futty Poulis on an ailast, trut and an intent; and for on but you's banking. To a coul home I had to contin it the tell herby which it is and we cately release who I the let get to the wed & we alle to get a after drah. The tip of to the can are writted and I am landy 8 P. M. 20. With Hall along Western Run. We met at Mr. Washing 1429 at 9 a. M. but having nearly 2 home to want for a train we started on to words Lithwill, where we took cars for Corhaginthe arriving there 5 min after 11 o'clock. We prouded to arhland then started at one for the spring. Here we ate on linch. after drine we began on trip down stream. We.

stopped figurity to enjoy the scining. nothing particularly extensing were collected until we reached Wolften run, where I found a pretty Buellia growing on greaty. Nothing were were collected intil me were nen the Sampander, here, I found Opegraphe vulgete and an interesting brothing. I was surpried to find a little party enjoying them an a wich weekaying the chiem. Not for from the ruch I found a Parmanie. We staffed for a while on the Parmeli cepente mela. We left the stream about 5,30 P. M. and by 6.10 we were buch to Cochegoille. Here I beened of the ching up on the hellade new the station. We took the hair that left b. at 6.35 aning at Luthwill about 6.45 We the stated on to Tourson. I even very rought see the wheleast cutting down of trailer in the futty worth between 2 and Town. We arried at Town a little lefon & o'clock. 23. a short trip towards Montebello for blackberrin, Physicis in fairly common in the meeder and men the stream some Minuter in to be found. I were plumed to find Killiam possibly Camedan in the net plan at the old rece truck 27 To Lock Raven with Charles Kouther. We mit at Townon at 8.45 a. Mr. proceded though Ridgleys. I we pleased to find Physical pulmentate on the laye true new the entrance. It was rather warm and Charlie who is not me to walking lyged behind very much We went through the woods to Promden and the along the wed to the words bording the bak. We stoffed but a mount it the oping have but continued award to the fine ofing at the water. trongl. Here we stiffed to lunch and report ourselver, after lumbing we prouded down to the trught and the along the both to-worder below Eller. It was now girts disappealle and collecting were out of the question. One we approuded below Eller we have the ctime was of on us. We take shelter under one of their lay sheds and after the store parced over one preceded our want to Town and home. Blubbenin in questity were ohn and frequetly. 6. To Super Luf Montain For some time There had a dime to visit again this interesting elevation. Left home to-day for Walnut on the 7 a. M. their aring then about 7.50. There bould the 8.20 train for Frederick gething off at Dickers. The train own was crowded & munitated the etherhong of the ugui able to make this of at each status there were another delay, so that I were an home lette getting to d.

130

in fact these water are well worth visiting again. It was

615 when I started for the train. On the way back wellet a short dutere with a colored now. We some come to the efet where in the morning I had observed a deed when. In the morning I gam it only a parsing glame thinking it a coffee head but now my companion, even at a distance reagained it as a rettle I ench it wer. It had two conflite rettle and the colored were raid it were 4 yer old. The nettle bing 2 yer all lefue it gets its first rettle. I went on and soon after come to a spot where another colored was were stooping down when I would him I rem a dead make and he had just cut of its for pour . He should them to me and told me that they were to be fland around his belg's who it would make it toth early. I now reached the status hong made the trif is 1'/2 hr. I found I had just 35 minute to wind for the train. a man standing men by runing me of and of a convenetion. He had at one him taylot school, but had for some time been farming. He told me again of the "tally", also of other pushing flower to home. He told me of the red ranketone region closely, he recent to think that "it would be but observed along the Potoners. It was 9 0'clock before the lite of the last of the an how and 25 minds lete. It was 11. 15 before we left and 12.30 before on get buch to Bells, and how and half leter the I had expected. It we after one before I get home, ginte time but will fluid with my trif. 20. To the ravine beyond the Cam. Heft home before 7

20. To the navine beyond the Came. Ileft home before 7 a.M. arrived at the lane beding to St. Thomas at about 8.30 I was surprised when I came to the church to see at our comme of the church property a stone on which was cut "but Corne" If St. Thomas' I have pound the place so often yet to day I can this for the first time. One I was must any im to get to the remaine, I paid very little attention to road aide plants but keft moving at a fair rate, and I was surprised that I was able to get to the coordinary road as quickly. In just on how I had need the trip. Nothing particularly interesting was observed until I had getten beyond

433.

169 1910 - aug. 20 - Sept. 8. of This afterno M. a x ) took a well around as for as Builte, Mr. Reilly's I record everal mer specime. I tramped along rather levering: so reached the Cetiani Ocheman place about 11.30. Here late my lunch. The bushes here were inferted with the woody applie and on the ground under the trees were reveal lage brumble been buily collecting the weets wested by the perte and which was collecting there after feller them to the good. They (the brulle-bed seemed rether stuffed whether from the effects of the bong dem. from the greedy deine of collecting it. after lunding I continued on down the run. On the who I found again that white where loshing liken, I remed two ofering, it remish me comewhat. I become calcan - the chemical weether howen would indited that it is romething different. Just beyond the Orhenian upon I can reveal fine of Cladonic confitien, white we ing them a Levidinid oferin on found with it . I kept a chap look at for hiphon and me work me feller true afforded of men, they were it in fruit house, so I decided not to collect til later. I now reached the Kalini region, Here I hoped to excer Parli pulate but rome how a other mined it collecting a with of Shite gureyon and an ineffer one find lesawe subface a. It was 3.45 when I get they the saine and were on the w and how by 5:30 P. M. 23. With Chele Kouth to the sping and Though the woods. of 1434, getting the water we hid the bottle new an old feller tree. It to first co wer home. Blubblin were for I have there also a few hubble and blue - berie. 25. Started to-day at 12.05 P.M. for managem, animing them at 4.45. 26. To-day Mellie, alle " I went to arbay Cash. It rained menty all day. 27. This morning we went down to the beach. The Managean whit 1435 wer cloud and I walked right ocean into Pt. Planet. Coming hat I found the buch per in bloom also the roll much Clade 28 Again to the head, to-day Ma a went, In the morning 1436 me stulled along the buck to the wild, which now were age ofen, aludy yesterdy me one outting an opening the orghe the rand In the afternoon we attalled of by way of Briell. I toked out f hihr but withing unwell wer obered 29. To-day hellie allen & I went to H. Pharent & Boy Head 1437 The hetin is in full bloom & some spots are purple all bloom let remel please allings were obcured.

30. To-day Mr. allen . I went to Pt. Plus t, W. Pt. P. 438 and along the believed med as for as the sweet at de burnt bridge, We node in a wigon to P. P. then welked, It we Dufeling howklebury day, I do not think I have we before even so many. Our fit stop were in the works along the Yhard and. Here ? willested some min ofening Pande subgreeifele. It were here that Mr. a. sliffed away from me. after withing for him quite awaite I started on for the On the well then good greatitie of Ceting in fine . So would it is found her that I am surficed that I dis out find it when the one before, Mr. a. allited High Swan & huchblimin and in the come of the few home that we were out collected at best 10 gts of them: after walsing around in the swarf on the ight we would the bridge & with the pleasance in the left Here two me found a fine collicting ground. We stayed out with about 5 P. M ite stated hound aring in Pt. P. alut 5.55 ated many a few minute ofthe 6. 31. Tonday Malin, aller, I took a trif a fer a Please Bay 1. Ruin all day 2. This morning west to the beach. This after one with Mr. G 439 I was suffered that so little was collected 3, With m. While to the beach where we found quantity of 1446 reamed cart up daing the night the ti Sp. Lehr. P.M. to acking Pale 4. With Mr. a. to mille bridge then to the sweet beyond the but bridges. The day was just right for tracking and we 1441 had very few marginities to contend with. Tonday were You Sweet husble buy day, besides there we found also Bray right & Blade rugar habbleware. I found some good afrain of Cl. ministriumin at Cholic Highthe I found & some Evenin which I was pleased to get. Coming buch we stiffed again at the but hide, willing new hover were welleted 5, This morning Mr. U. x ?. west to the heach, returning a staffs 442 to obere the must on the com P. M. I went to lety to see the bely pande, letter Mr. Q. 6. To N. J. x up the Holem to West Pont. 7. h.y. to long Island & huch you to Maningon 443 8 This morning out to the buch, morgather we fince sem for the first time one of the drille of the life-ening evens. a comme is

27. Whong throught hat me and. I left how rether lete prouble 90'clash, resolut the felle about 10. The much done to the long daught are very due with dust which meased to a great extent we would otherwise have been a perfect day. I were in me particles having no took things grate any, proceeded very shally as for as the me 1 few 1 atoffet to cot my land, restrict the one as how enjoying the first grit. Only at more did I have the distant refets of Heating and for a time the booking of a red against, but whether at me or what I fieled to leave. At about 1 o'clock I retained my other collection on the way back come also lover, come also of a mapped and the helbut-shaped once of Polygone heatabless. Due to the dought the little poul at the fact of the rucke were about drived out and for the first time I would also the prod cide of the Skench Callege was observed. Reached the case a little of the Skench Callege was observed. Reached the case a little of the Skench Callege was observed. Reached the case a little of the Skench Callege was observed. Reached the case a little of the Skench Callege was observed. Reached the case a little of the Skench Callege was observed. Reached the case a little of the skench to the whole at 7 Reached the case a little of the skench called the rest of the year. I find that it takes exactly 40 outer to make the trip to the whole 50 minute gives 'a ample time

The trip down the rime a up the creek was most enjoyable. Is

was a cloudy day rather warm but just right on the boat. I are

at the heed of the cruck at 9.20. My trip we tomach Edweton b

way of the Old Will R'd x Waterford. I was on the look-out for Evening Primerone & were pleased to find a small suffly not for from the wharf. I felt withen depused in spirit so did not enjoy the trif as much as generally. I stopped at the prime to eat bunch. looked around for Evenine but did not fuil any this time, did find a wie of emine of Pamelia fly woden also one of Cetrania alemita placoroda, Istoffel also at the old hut where I got 5 mine rife pealer. My must stop war at the old mill when I get a little fine of the Bulling after leaving the old mill I get into romewhat better spirit. The White Pines are now beginning to shed their comes, a few how already fellow, those honging on the true has their realise widely expanded and are drowfing affarethy ready to fell with the best motion of the bandes, he the field to at W. I found some Evening Premier and the year a little late there were a view let as the right left ride of the path. All along the father chair grapes were to be found, their reme rether lete for them. One I was having any owned to Elevetien, a can care along just before I was able to reach the station, the notion were however stuffed for me & I bould the care. I were greate flowed that I was able to get the care & then seene a 30 minute wait. We however, did not get far, before we had a hot box (?) at any rate when we reached Shahmin we found that the care were not of commission & we had to await the west the can we not of commission & we had to await the west can. Realed Canden status about 1.53 P. Mr. and home als 2.35. although clody in the morning, it chand finally about noon 21. To Santte for leave. I was pleased to find magnetic him in swenty grounds on the way to the afring. I can with get quite a number of different kinds of lieue in this area. Maple, Oak, Ruh Elm, Tulif. Hickory, Magnetes Persimone, Locat, Hong Lant, Paulini Chit & Control P. S. Chutunt batalfe. Pine. Spine & parily a few allen. 24. G. M. It we rether rulty, and the condition unfeverable for jung an outing. I pureded towards Brichgard Law. Thought to find rome good plan for Evening Primine; but with the exception I my old locality no new one were found, I went along the lane as for as the park, then I proceed towards the stream nothing new or particularly intenting were observed P. M. helli, alle " I took a trif to the heed of Ruch Cuch. The condition were just right to uging a trip on the water, Backain is my har in bloom, also the ree rich Goldward. and though the winde, here & there autumn thate were showing.

1449.

450

in both fields and on both eider of the tracker failed to rever me that degen or two of plants. The other plants to of the particular habitet enffect in a corresponding dyer, I was pleased to find a little Chen again in the other new the budge. There were just very much but were the little wer a pleaset right, showing that the plant had not been externmented and that it is still holding ite own. The cutting down of the tren her notor cered, all the layert trule her been cut out and saved up into lumber. I were surpried to bear that the words belonged to Mr. Ridgely. I we will the imposion that his extete we all on the ent ride of the Daley Vally The. Return home to-day about 5:30 Pm. 15. To Mit. Winam for Bay Worm. They are gente platife have 456 and in a short time I collected all that we needed. after evening all meded I proceeded as quilly as possible to foot of Bushing to report the tight had of Ruch Cuch, We left at 2.30 P. M. and were at had of cruck about 4.30 and book how by 6.30 P. M. The day we bestiful and we wyingst the truly very much. Allen wyingst it again playing captain. The leave are chaving then autumned when, but they are not get as interes a this will be a week a two leter. 18. along the Gunponder from Harful Rd to Lock Raver 1457. Left how alut 9 t. M. I found that were welking slowly I could make the tif from the cen to the river in an home. The day was quite patty rather warm for this time of the year. Much no expirally new or intenting discovery. Reached York Ram at short 3.30 P. M. as had platy of the intention of the title 3.45 there this to the 3.45 truing of buch. I was sufficient to find so much hickory. Second sho 1458 22. To Hamfton. There were grite a heary done from of am at might and during the partie fort of the away. It was just a sand in to a the sum in to be fly the way to be fly the for the often on the last the age to be sum to must at Pome at 1.30 P. M. Comide is how hatiful the often to dat to be descripted that we one offen. We say the the form the things. We at they he He pten. I wild to it spring of impled on I have fute. I a the I and but not a engle offerty and the . It were to have been an a famille you for there.

We took the oute towards Providence. On the after downed the wind your stays and have a we want there as for chetter they and if the had only been more of the a good confine and the chartest and we started took again to Param

1460 25. To Clifton etc. The morning were heartiful and the trip though the words delightful, General to-day that Mr. Pallin is no buyer at the peaks but in in busine for his aff. Mr. Low who were at Caroll is now in his place. I listed up Mr. L, and myself regrainted and afterwards listed up version sframe in fruit. From that the oping is no buyer in offsetime.

Must finite him to a about complete faction.

1461. 29. To Lock Raven with n. x a. heft the University in time to ruch Town station at 1,45 P. M. Mis Sauch, My Smith. Map 6'he acompanied us. armiet it the station we had 12 minute a more to an for the train. The short distance to 2. R. was own count and aware after me were welling about the road acide the lake. The water is

extremely low I don't remember aring it laws. It was allowed to flow right into the turnel. The dam found a fine mean of crowing the river and we saw it was being made use of for that purps. Lets in the oftenam when we met Do Johnson & a results of

but enjoyed what little distance we did cover.

Returned to the status about 5 P. M. and muched home about an home lets.

1462. I To Dried Hill Pack. Stopped at the consenting leund her that Mr. Wale is now at Mr. Bate Jowe at Mr Verm Plan and Mr. Sidell is now in chape. I wan pleased to are a young red bing mangure, also a red of this tree. Went to the rea low find On way collected some fine hinder frinte at the pavilien at the hind of the mull. At the fact executed some fine Springer

1463 5 To Halethope. Beginning with the 2th has been aviation and
The 2nd was a cloudy day but the meeting was quite a success in
the of the rewner of the day. Toward waining the weether charges
for the of worse, it began to rain, and any room after to summer
The alut and anow began to play have, before morning the tents
(hangare) were down distinging several and demaying a anumber;
the airship. Communication with Warlington & the routh were
off. It was an animal storm for this limit of the year. The store
continued all day Thursday. To continue the meet one art of the gare

It had to be portfound with things could egain be gotten into chipe. To day the field in again in better chipe & it is hefed that by Monday all will be in redning. The field being of me are decided to go in a rea the anily at alone range that havin automitte me being omerhaded a gotter it ship We had a good wring of it. In our party were Mif Sad a Mif Town lime brile tow students from the immity Men Warren & Carthon. We reached the field what 2.30 P. M. remains the privally to 4 P. h. We the retreated one attiff a proceeded to Catamalle when we arrive about 6,30 P. M.

164. 8. Rough & Windy. Left home about moon for Helethape. It were a heartiful runnhing day and being electra day many took advantage of
the holiday & proceeded to Helethape. It was however too windy for
the flyen and it was lete in the afternoon before any attempted to
go up. Force in all, attempted to fly, the exhibition was with
drefforting. Second to day opening of tolly true, come a close.

165 10. With Mr. Sweeny to Halethape. We reached the car termin

10. With Mr. Suremy to Halethope, We reched the car time.

The about 5.30. Here in the open field we found Hox sey with

his bi-plane. Why he we have we were not able to beam but

he was just getting ready to attempt a flight. After a little

wint he was ready & we were given a nice exhibition how the

muchine in started. I was surficient that it could been the

ground in as abut a runn—probably here them 100 feet; We

are started much toward the field, time often new were seen

in the air but the afact was hought to an abuft close by

the ender approach of a storm. We histened on both to thece

arriving home before 6 P. Mr. The sum out were must be entitled

1466 12. To blenhim with My S. My P. & Mr. C., Mr. W. for rown were the filed to affect. The afternoon were blusting too minch so for a trif, notwith standing we had a must enjoyable one. We went to Mary-bidge and from there to the bitterment reagain. The bitter must were in fine condition and we record a min lot of t. Revolut home about I P. Mr.

1467 15. With allin for various fruits, were hope, have affle, hong him ite, we remaid a min lat of them and allen enjoyed the trip memeraly. The day were perfect neither two cold me too weem. the air enif.

.468 19. With Mife O'M, Mif South & Mife T. to the revine. We must at the Cotomorble terminar, there took the route part Va, The day were furfit. The true are bentife this year, they recome to be holding their leaves layer, the faite do in their confact menu they affaintly have all of them. We took the route

In the spring rememous shorts spring of which in some instance realled the hight of 12 ft. So heary was the wight of the come of heave that the top of the tell steller are in many instance quite best, There were a member of exam plus of this facilities - the stem instead of being round were more in less flattened and fluted are if comfort of We needed the Cong car on me return about 5.50 P. Mr. me rem the 5.45 can in feet, but were just for every any 30 min wait & we really Hamilton at 6.30. I wan have by 7,15. 6. more than 8 inche of enow on the ground. I had hoped to make 1473 a trip to Huring Run for Springer but the heavy own fell had consed all little pools. I therefore limited my trip to trip trans around Charlint hill accurring rome good afrecimen of Protocoren The anomfell for 24 his wer 9 1/2 inches one of the heavest in year 10. Snow still energature, in afite of it I decided to take the 1474 tif to Back Rin huch. accompanie by Goding Brown. We got off at Walter then proceeded down the B. R. h. Rid on for on the church then took the was beeling to Turky Pt, Suis Cuk, etc. It felt a bale ram when we started down the road but by the time we get to the Tuly Pt Rad we are feeling guite confut able. The ground being grown were refined to take up one time felly. Sevel their with fire minther the wind we have fill several the wind. We returned our same route. 13 The even her now been or the ground a full week, with weether condition on they now are, it is blely it will remain for grite a while. This morning I proceeded to Clifton hoping to get some everyween, but field to get any became of the straight rule wind by the surperintendent. I thunfur we obliged to go at Wille Rul and wind the deserted place seen on my tap let you in that direction.

On the way out account hembook and ned cade and at the all estate ofme a white fine. On the way home record alde & 17. The enour still covere the ground. To-day we decided to mit the holly region was Contra Bay. The day wer very pleasant. he 1476 on paty we mip o'h, mip Sand x Bum a Canthen. We realled the helly place about 3 P. M. It were not very pleasant at first playing into the dup mow but after a bit, on feet because werened up & me did nut mud. at first we thought we would be doomed to disappoint

475

ment but we come came to a tree with fine buries. plue I went to the path buding to Hawkin' and here?"

yet some bude of hickory. We man started homewood. On way back I got bude of talif. tree. We readed the can a little after 5 and I were how by 6.30 P.M.

I visited the old spring, the made a circuit to the are

track, and back by way of Clut Hill. 28. With allen to the spring. The day is so warm and pleasant I decided to take a little walk, just to be out in the air for an hour or ro. I now is still covering the ground but it is were and in to try on his new book. We went to the spring and then returned. On the way back I was respected to hear the fife of froze. This is I believe a early as it is possible to her them. I think the culist that I have been them.

30 Yesterday, it was very warm and best night it rained, there we thurse, very little enow left this morning, only here a there are little patition. On the second which bright This morning it was a lie cloudy, but towards now it cloud, so about 2 P.M. I deaded to take a little transf are for an Henring rem and hack. The mores look partially bright, their pretty grew color done much towards on them, and I some found that a tip along the new would be. little risky. I there deaded to go up the hilling when I read the old well-hum crossing. I often thought of going of the path here, but never have done so, so to-day I thought it a good aportion to in outgete. This I did and beaud that it eventually recold Hille med. The well then were over well known ground.

31. To-day, I decided to visit the ravine. The day in bright. 1480 a little colder then yesterday. I left home about I P.M. it went therefore often 2 o'clock before I welld the leter alle term in and started on my trif. Sum in still in the invoke on the norther hilliader. I proceeded as for an Oal Canf. collecting on young beau of before & forthe of the Chiefen for It was my fite 4, we started on return trif. On way been get real fix opinion of Greide allon combinens. Real 181 3. another worm spell of weather with rain. The even I suffer is all gome, at any ste I can now to day, on my trip to Rain the inhum I record some home chestant truips.

482. 7 To bray Rock. No arrangements had been made to have anyone to accompany me, nor could any of the students go. I took a can to Catomorille and then walked over to the E. C. him which took me to that termine. It has been rather were and the roads are in a way madely condition. Nothing particularly intenting were observed wanted I come to the storm. I have I found quite an intenting borking afrecion on the rock. I had forether my chief as had to context myself with a small of ming might, and have I found some good afrecion of Arthothelini. I was witnessed too in the trees guit put the blockwiths, has one fair afrecion of Physicis following, they were had to remove though, so I made have attempt at doing so. The trees at I. R. are just as intenting as of old, but I remaid only a few afrecions, manife Remain line. The return try was made a little quicker as it was made all down hill. Returns how about 7 P. Mr.

1483 10. To Herring Run. The day in ideal, a perfect sping day. I left home about 10 a. m. When I feft the ground were frage atthough the air wer mild, before larg home it was rather roth, it was well that must of my trif were through the wonde. I went the went route, to day, I examined the roof on the old afring home and found a member of intenting afreein of Cladwin, I did not take any though, as I would must they have braken them, they were quite fragen. It was now by the time I reached the run. I found a mice suring place and here I ate my limal. After bunching, I make my way along of the street I went of part the old Day Mill as for as the growing the found to

Heller Roy and book home.

1484

14. To the rain. To-day, quite a unwher of the menhor of the bot, notice had decided to visit the raine and have a little porty. But, as the morning was as disaperable and as there had have remained days of closely a raining weather, no one came, however, 2 of the students Brown a Francisco, accompanied me. The day was a sidely are freely between, in fact the afternoon was juste flewant, for the sum came out and the temperature was delighted. I warmed a member of true grate coupley and as a companie collected several intentions of frame. We provided give slowly and get as for as the spring. It was then 4.30 T. Mr. we was decided to return to their care, reading it about 5.30 P. Mr.

It was on the laye on he that we find quantitie of a fully Entrafor - Pyrender like like. Here two on the ground were butfel Cleder. When we well to able Real we wet at as from the high, also harfy in the waste. In the little many efect was the webe we find Skuh Celly in blom When we would the bridge on can to the end of on tip, we the hot Holly can. Our of the futty Partie confers on the mand for the what down, The day we get right for this understely. 7. To barrette. Yesterday there were again a heavy sum fell two-day the ground in consend, but one had it is bright, the air

is were and it is must pleasant to be out. I collected

specimen of alder, thome, hily, etc.

11. Snow in still on the ground, for on Thursday we had again a slight more fall. To day it is were a pleasent and the roads are about in peculle. The trip were to D. I. St. I. C. I. The ments of The 1492 Broklyn for Skut Cellege. From mention of the bottery class and Mr. Brown accompanied me. We were rom galow. The day we so delytte that all cayings 493

14. Repeter til taken Saturday. It in gjute warm and the even her short melted, only here & there are little their paletie. armid in Bucklyn, I made my first step near the where to Commellie when I collected roome Probaciem. of an old maple truck. It stend close to the ditch over which is a cubut. To day the well bowhed of a rether bright green, & I decided to examin it a little some cloudy. all our the menter (cement a menter) over growing a futer gue like (contre) non in fint. I collected send fraguete I more proceeded distly to the Symplocuper ryin and has ? white the opinion I would. after collecting the ? Calleted a lengthin. The like, after which I stated

18. A trip to the Patipus. We met at Rolling Road. To-day the weether in fine, no mow on the ground, the week, however, are in a most slowly state. Mip Kur a Mip Peter & Mr B were the one that accompanied me. We took the weed water lamide the Purp. house at Union Dam. We were very glad when we revold

494

7. another near day, but out gite as disquelle as it was Saturday. They to day also Chiqueti Rome to Han Ite and the form the old young to the fort bridge I stail on the night back & here I find second flow right with Sprayer from the bridge of legal log Mill I was on the left back and then filed & on the right back, I would come 1499 fine Par. comfine at the old will. The ryan count beyond the old will was not rich botanically and till I were flered to find some hogel, a fittlette bilalle and armum buil true with Opegraphe, true Health an I proceeded housed on rycla water 11. along the boufonder from Hafad Road to Such Raum We mit at Hamilton it IP. Mr., due to the delay of con 500 I were on little lite so we had to take the 1150 P. M. can which bought me to Cay at 1.50 P. M. We set out at me for the min well; it by 3 o'dele The day was ideal, ale t to wen for the cerem.

It was an ideal day for collecting below but we had two little time to do much of it as we wished to week & R. in their for 5. 13 their. This are did reached Town it 5.30 and have by 6 P. Mr.

14. To Enthwalle x vivily. Took can to Town, then welled to X. 501 On may one booked out for fugi yes and found some in one of the and produce to the part. avail at I . I went of along the trucke trans Pinami but turns into the words just begut the old home. I wan found that I wan in quite an intenting beality. Several gente large a my deep pate were absented but having been abandand for ginte a while, trees were grown up inide of them and I ould form no iden en to their origin. On the edge of me of them avuil Cladowin were collected. At another place a revouly are of amiderable extent wer observed. I wan come to a wood fith which I dealed to fellow, and did for a chat dictance, turning inte one ging of it right angles to it. This tip though the wonder was most interesting and worth referting, Cladin aintatelle un dread in award place; findly weeled a fill on the road hading to Timming we had fittle even flowing I thought decided to start on return his. The way nearly to own & hail guite feet. I did not mind this very much, but before I realed Town, it began to rain, and I were afraid I would to the time of the start of the series o get quite wet. but I managed to week een still findy day and comfat able. Hed a chance to aday to end the result of the by fre at the school. always much of the deline has been cheed any

3. Fait trip of Batany clan to Clifton Park. We met at 1508 the waiting room. It was about 4.30 before we were all exempled. Experial attention ever given the wayseem, partially the comifore. Very few plate were found in flower 5 or 6 possibly all told: - Viola cumblete, Stellanie medie, Por amore, Popular alle, Our ruhum. The trip was enjoyed very much. 8. We met at the William an can termine where we take can 1509 to Orbition, from whence we started our trip. he faty were this mount, My Smith, Mit Tomblew, Mit O'hill, hip Saul, my Cole, a Mr Burn. We forcuded out Sulphu. If. Rid to Come Rid than to the path leading to the rame at Blue arting. For some reason or other I do not seem to be able to find that original path which m. Wale a ? decended on our first wint to this place. To-day I found myself on the hill overlawhing the day new avalow. We had a grand viim. We then decould the hillride & entered the ravine. On the hillinds grow the befation all sheder of pinh, people, and white. We proceeded to the hillside when the bloodwant was found in profusion and have, biside the bloodwart we found, Dutani, Celaytoni, Duise, Ey thramin a Hepatici, It wer while here that we had a little chower, just the lightest kind of one I was afind it were the bysiming of plenty of rain for it had been the their all day, but there were no more of it. We now started on our way of the ravine. All went willy wish's me came to the neuron grize, here Mip Soul experiend much dif-friently in getting own. after this all were more a be plain sail. ing. We founded of the stream to the soul than made or way to Ceturalle on and Ceturalle aring the of 7 P. Va.

11 To the review for aild flower. The recon is no very buch.

med that very little is to be found. Eytherin is that only 1510 to be find her & then in blown. The place it the purp. home julded only to bloom. I pureled down the them collected some Direction and rome Endough. amind of Owl String I att my bush. When at the sping I found my find fine let of Engthemini. After lumbing, punding amend to Carp Ra. Then I collisted Blooder & lapeties. I then prouded and to the ofer fill and both to Colomille when I took can for home 13. all day hip for Botany clear. We mut at Toman, Lui come at 10 a. M. It was 10.30 before we started taking the would note to Hauften. There was 8 in the party her hupin my Duglet, my Bule, my Whit, mis Lete, mis more, mis Barn and self. Nothing of especial intent was obrund until we stoffed before the entrance to Weapton, how on the pupling I

1512

found an intenting bether - parilly a Placodine. Very few flower were bing observed. We proceeded on the usual rute to Providence. When we reached the little aware we staffed to lunch, here we found a vive patch of Engthrousing. It was one o'a before we again statul, On way down to the oping (15 am) I found an intenting title of an Justan cuine, but did at take any of it on then were too little. It was 3 P. M. when we resolved the water trough and 5 when my to the state. Only " flate were found in bloom a very poor chaving for this time of the year 15, To Bare Hille. although the day wer fair only Mig Ken x 10 of the tracker as for as the road, on the way we found Blood and Sox of up in wantity. We then proceeded out the road to the "Hille" armid at the hill, we stopped fait of all to reach for arberton, but weeded retter pooly in fuling any. We then stoff at the care on offint side of brown. This was gente enteresting. We now preceded along path and who we recold the world are child the hillide and for a little while keft within along it. Intenting who we obreved with putty behim. Bullis gram Claderic cintabella. Contining owned we came to me futile hills & here on an expect with I found Enderform conflication. We now continued annual still herfring on rune road & room came to putly estate, here we found Vila odon (!) at any mate a sweet wented wealt in quantity Continuing on one road we finally avoid to the Phromith back of the electric road which took of beach to hot. Working

1513. 18 To the ravine. heft have before 9 the Me so when attending before 10 h. M. proceeded down Helter a. On the hills overbolings over larve I found Dutain a Claytoni in fine greatly so recorded a mine but for the class. I then att my bush after which founds to the ravine. I have I seemed Equipment in greatly. I some went in up to the ravine. I have found Springer and show that is the turned was a small box containing on implecting and others. When I would shouly up the ravine. Buy the said to come I record as

a finale bryged. I at once baked for her out & found it with the cliff, in it wire 2 eggs. I heft on of the name and at the dayson four found Baybarni affylle 3 plants quite a mine find.

dayun par foul Barbenie aflylle 3 flate ginte a mie find. Cathing and I rom after made my read find 4 bretiful pufle double Heptien, On way rund openin of Linke alborum brens

and Cilleplace ametican. I haft on right back on for a bound Con . He I am suffer to find a little what containing an engine What furtire was being performed I could not of the who a believe which with me very week of the Standble where, it was not in fit, I would the them soon after passing Oul Camp. At the old for prod I would egge of solander some well developed. Rending the old people home I make my my head to satisfie 20 To Mr. Bontin gode ith Wome Clif of Roland Pack. The goden is gite intenting containing juite a number of wild 21. To Willaste (Dibyalle) with Botten, Claw We take the water touch West Fout Park, The muly wer Eythronum day, this fetty flow him found everywhere. The recom in till for tackward. The temperature remain cold, and there in much rain. This seek it round all day Wed, & all The. 22. Rai all day founded to Rolling Rd Let weether the disquelle cold x raw, so decided to relim. 25. To the Sunpowder. Started from home about 9 Q. M. regulad Form about 9.30 proceeded at once out the Dulary Vally Peter to the rise. I proceeded over usual route stopping here & there for bother, on the road to the still home I seemed a number of fine Planding de. It was a little ofte moon when I realled the hillale welmbing the win. Her, I ate my lunch the freeded to look for bilen. I evened more of that intenting live stone lichen beider rovered the form. I am fleved to ful a who would with Condrage on I have been security for it juste a while. after allely like I while flow, but there were I a few wor found; by their two, on at over hundet, me very fine afrein with finisth of & pate & sten x a 4- lold any was found. I went also min or for a the still have when I collected own i junction where the the to the form to wish I man stated on the steen tip. I provided to the post healing up the hillieth. It was begin to a very itent, althe age is beating on all I can to a laye nother for over detted him then with along to be proposed the proposed of his Physica When un for 1. I take our the are, and want to the on to hed, Isla Eller in the site. I kept ming combet to the right, but did so me the nameny, & i've whend a efit

1911 - april 25 - may 12 188 fruit of that were, When I sent the for four led I can in the and I some flood great x is a little-title we withing down the title steem when the mand Mugdet grown Then were in for wediting or I collected a few lefter the ? dated hound realed Town about duch when "to be lete." 28. Nith Botany Clam along Burymin Falle from Edmone On hodge 1516 to Walburk. It was 5 o'click before in were wady to start. Blowhout a Soxifey were the two flats that were foul out project hand fing what will - the the date the of all the note burty. We would the budy at to while the challed the hill with the Walt - h. . 27. To the Ravin byad the Cave. We set it St Thomas that Inet 1 P. M. It was 1.30 when we stated got the road, Our fit to the it should what detra its writing for 1114. My Shipe were then & he intuled the done of the church We now started onwel in count. It were after 3 when we reached the Celthe upon and medy 4 when an came to the Aring We now ate a little bunch, then several for net down stress Volte. Return a word the stress of the a little sty but in to-day & the day lest year in the officere of the words; although but year we want 2 with carlin, the dynamics but you it was in fell blue, to do me wild it find a wingle flower. Let you are 50 fle to we found in flow, to day not so flower found in flow, to day of 35. We recorded the dark a little before 8 and the second in the second in flower to day. a little later. It in 10 lefour I would have. The weather on undertaken, mis many most of mis Pit repterte my the my or is mis 12 2. along tranklin Road as far as Winami Bute a 1520 change in the temperature once yesterday when it was very werm. To-day the temperature is delightful. Ey the own I proceeded with himsely it was in about 2 P. Mr. before ? reached Winam. I dealed to go it for 2 renow, fait to Experification places was an evering on, Some bound that it was the early for the paper, the back of which are just begin slippe in profusio, there are a great every more flate

than there were lest year. On my beach collected specime of Van, Silen, and a few them plate for tomamin beam. On way back to an saw 3 your girls sented a little my for the old gets have all chitching it.

Relieved have about 4.30 P. Mr. 5. With Botany Clave for Shily Zen to Wouldery. Te day wer an ideal one, and the class for war well represented The words looked beentiful and every body wer well pleased. 6. With Carull miller and his 8th grade along the Rie Rd 5 22 We took then to Rely then comed windered and presented along road. The day was pleasent, a little warm, but not excernily so. It was now when we reached Orage brone and me turned in at Object (foundy Bathgeter) and staffed at him aping to est on hucher. Mr. Cuit is a most plumant & agreeable timed our trip up the min. Stoffes at the Election Colden and raw the maching. When we muched Election, we proceed along railed trache fiely willing Elliatt City about 5 o'club. We were stiffed an home or so at the Howard Home. The tak can fundine. aring the about 7.30. 9. To Maly and vicinity. Left home about 9. 15 a. M. newled Candle station at 10 as get to maly about 10.30. Proceeded at once towards Front Home. On my lashed out for beilen, but 523 Tout Home after eating ment on to the dan a The to-the Helmin locality which I received with it my difficulty. This nem to here been a good year for the Helining judging from the member found in bloom after vering spream ? retriend may step , get a spream of Sancierie men in bud and them cut own the country to the old mill and the old huter, Here? from I'm werne in quantity and second a vice let of them. after the net a to believe where? the can for 12. With Bothery den for Bonnie Bree day brankli Rd The day one disappeally every to one for pleame, which stading 14 mention came. It is not very very getting fort the grang more, we muched home, When we realled h. R. me head the distant and of them der so hatered a sylling ment well with me recelled the falls when I higher to me cationed on trip to my Wally can. It we after 8 when we reached home.

23 10 Montebello. The weather continues rulting and disqueelly but. Wished very much to go down on the Severe, but did not think it wise. I was pleased to find, Levether and and made Vaccining Salvie. and agales vices. Secured to-day several Sedger, brenn & Rucher. 26 With Botany class along Herring Run. The weather 530

in prefect, the temperature delightful, only the dust on the road is intolerable. The attendance wer fine, He room paned beyond the region of dust and the trip became ideal and every body wer fluid. The close resembleme of the leave of the Porision Oak and the Oak hand Me often were observed, at their the recombleme is remarkably close. I should the member that when how early they can be expanded when me remarked that in the case of the Maple we have official leaves, and is the P - Old and the Maple we have official leaves, and is the Pour Och they are attuncte.

Hafal Ried paving is moving along more rapidly and the budge at the rum is assuming shefe. 27. To Slubumin We met at Canda station at 1 P. M.,

53/

The following were in party that mont, this their, my Sand, my Borher, min Lillie, mit Smin. a delightful breeze her hum blowing all day, so the temperature, even here, is delightfully how here propert. We realed & about 1.30 P. M. and not not at one for the pand for to-day we were in guit of the Senseine We entered the woods as soon as we could to get off the duty road but for a line we had to contail with the bluk on the but me & chend tree monthele no one mumuel. We after a time reached the few region, here it was fine, so we not down on the back of the streem and rested for quite a whil We then preceded to the Somewin regim. There to day were in

full bloom and everylody come had wet feet trying to get them We we prouded to the pond. On the way we collected Kelme

while we in blown. Ofthe reading the withet of the point we did to go one to the old formers, which we did

On the way are found some of the petheit Kaline agnitification of the petheit Kaline agnitification of the perhaps were the form to the cruck. Here it

x peach bestite while did not infrom the recenny, nor the

ficher men which built were the apring. The letter homeron, after alid died not seem to be such an exerce after all. We staid him

grite a while but about on down decided to get back to believe in

This we did necking the elation a little after 8 ichel we had now a wait of about 30 minutes when we boarded the can & in fulled homened reaching the elation about 9 P. M. Bet 9.35 I reached here. To-day found a duck egg as had of the creek

1532

30 Decoration Day. To the rawine. We mit at the Cataville termine at 1.30 P. M. The day was disagreedly culting. We
I resold the termine hop Mont. Map be a high sin were always there
We took the rate vie Valiate to the afring. There we stoffed a sha
time. Sessing the offing we followed the observe to the mice.
Immediately after being the offing, it began to rain, just the
abilitest abover. When we resolved the bugged's west, I wan pleas
to see the old bird with 2 young over. When we resolved the
river, it looked as if we were going to have a storm, numeltaless
we divided to cover the river or take the trip of to Delastic or fri
and very well it were that we did for we had no rain during the
author tip. When we resolved the electric plant, I thought we migh
even the place, but the don was booked. Associate the place, but the don was booked. Associated to Caloniville by way of Thirtle Islam road. When we
on Foreduit road we seen that it must have rained consider
by a the don't was well laid. Reading between we took as
for home.

1533

2. With Botany clem to Browhlyn. On Wed. we had a heavy down from of rain, the roads are the fire eyain in fair condition. To the temperature is quite pleasent, and are enoughting in quite fish the trip from an ideal are. We took the word wester best the long priher but. This was form day Northing amount or extraor may one found.

1534

3. To breat Falls. There are 16 in party, had the day her class them would have been more. On early shown a cloudy weather presented the folks from coming. We left the station (Pah and) at 8 clock around at breat to all at 10,30 a.m. after lowling at the falls are for a shorty with x then the dam. To-day the weavery for flow. Returning a set down the chance a shot died as for the dam of the states. I'm Boar bilicani politics, Rining and collected a few butters: Min Boar brother of our of the region. Out 5 P. M. we down to return the Surprise of the region. Out 5 P. M. we down to return the Surprise of the large of the weeks to Wall for the large. We left the like at 8 reals; H St. a set the alled on p. Balls. what is well by 9.35. On on the last

we rain but when we recold the city it had stupped. The trif for byging to end wer a coreur, notivithatanding the alter ..., which after all were not as hed as it might her been. 6. To Tiffany run. There has been a marked change in temperature. To-day it is cloudy, with occasional chowers 535-I was pleased to find near the gravel fit come fine of seminal the aprending Doybane - aposymum androsaemifolini, Here too were Ly innerhie quadrifolic. Reaching the stream, I found many fine of invente of 2. minumentarie, I crossed the stream now a resolute the woods in the other ards. Proceeding along the edge of the words I came to the menting are. Here I was much surprised to find Poponie Highwiden There were not a great many plats, Lit that were due to the enall are. Here two wer another flat which I fill to very je; it being still in bad I could not take of friend to determine it. I proceeded on for on the little branch, then entered the world a waked my very book to the oping, their home. 9 With Botany class to Mt Winam. We took the wend route to the pond, then around it a across the track to Laheland. We mited the orchid region, but after The place is being drawing & that possibly accounted for their absence. From Gabeland we got book into Mr. Winin x the power though the woode with Westfut. The vinne into the city were very putty. I was much surfined to find that am fol R's were being powed. 10. To Swan Centr. The weather is again extremely hot. We 1537. met at I P. M. x tule the rote by way of the hamted home. my Soul. My b'hil, Mip Sind, Mig Ken, Mip Cantrol & Mip Money, were in the party. although there were a little breye, it was the little to lempe the atmosphie condition. We were glad when we entired The woods but then we had to contend with morganton. When we reached the high bliff we found the words afine. However, we found a pretty place x the rested for a little while next we proveded along the shore down to the Cich, while is now petty well grown over with redge & water billie. We made a short trans along one side of the lake, then returned & proceeded to Hawkin Pt. when we under to get some water While here we learns that the engine might Exped the Some for we & we would then get a bout buy home It was then 6.30 P. M. & it bucked as of we would come be in the wilt of a storm; it was I with delight that we hailed the

1542 24. Met at Grogom Och Junetin at 1 P. M. The following men in the party. Mif Bucher, Mip Burner, he brother, Mip William My Money May Lots, Mip Smith, Nip Ulinde. We proceeded out the

are we to the falle. The trip and was very pleasant in fite of the arm. armied at the falls Mr. B. who is very much intends in Bulgy, marged to seeme a view countries lisher for ff the galler. After this we would are way along up the of the freids of disquestly defining weather that sendly preade the affect of a think at a west was a few as it was me intention of going, but decided to stop a short distance by the med a next, after hick are event beel to the main weed a meet, after hick are event beel to the main weed a meet, after hick are event beel to the main weed a meet on may along beek to the car, reading it about I P. Mr.

15-43

1. To Soldieri Delight with Mr. Burner. It was proposed that we meet about I P.M. but ar our letter man failed to come before noon I did not get notice in time, it were !: 2 P.M. before I arrived at Owning Mille. Ict are made ingning for Mr. B but wither the blackwill me the grown had seen him. not knowing them whether he had come I decided to start and & trust to luck. I proceeded men the usual rante to Red Rum, I had from expectation of meeting Mr. B. exlething the for any thing she that after passing several person my the read that ? inguired of one, if he possibly had met a young fellow, hether, i with a hamme in his hand. I was ! very much comprised it agreedly intented when he said "yer" and that he had not him only a chool dictance (al. + "/4 in h.) offy. I at one your land my gait is when I muched the woods where he had after paris the cords, I not a ched any ? injured if he had met a letter me, in he had come from Defilet & it yet to my friend at the bridge I impried give mithe he are his brother had seen any one of my discription, I felt mon that I won fruitly - the way track, decided however to go by my of D's hop; to head his off. Some reached the word, but no B. wen in nim ? note deaded to bottomize & gone of the du of reings him. When I welled the respection one ? collected com of the Verrousi x hu un most agreely experied to hem this rome on walting it see his coming towards one. It had come lette, it was his intention of meeting me between 1/2 pat 12 x 1, but it were that 1.20 before he arrived, thething that I had gove he of weited for the mest can & I mit being on it, be decided to start out for himself. We were both pleved that we had finally at where

I willited me of the Verrucia. While willing are som 2 who by in the steer, I decided to enjoir when the chance I being would a beared that it was of that very atreem, here to, as could find the bar hills. We leased to from them that a good ofing wer just come the shear, which were what gled were, for it was guite now although not exceeding 20, a mice breeze fregetly terfing the strapper. Henry bles e could find the down welver, I fromed that we first study this one & the let go of the dies. I am decide of gething some Cl. bushing so we much touch the winder one of the lite grows right we the edge of the solution are the punded brink the made area. We presided brink this one or lefer by I for a girte a let of it. Here two against the Endocumpen has a former or a getter which I think is one. If former a getter both the which I think is one. to the street with the intention of going of it. When we will the other me for I that it we already 6.30. We ken it wo be 1.30 before we realed O. Mr. and as alet I before weld g how. We i ducked to start howard, confined hongwilly to to collect a Portraine poully P. Colflon leiflan. We som can to the chang then & have an stapped to enjoy some of them, an a result it was after 8 when me get to Onjo with x what were word just mid a con maning a 20 minte wait. The time con perhed home & some and afredig homened it wer 10.20 day I realed home. & To Early Highter and the Swam. Since let Saturday the early half of the U.S. has been anothering under a hot wave of mumuel rety. although the highest temperature recorded for Balto, was only 28" other place did not fore so well, for temperature over 100 were gent frequent. The wort part was it unumed duration, day after day for without relief. Lest might, however, the hot were wer be her, there quite a method change in temperature; so I decided to amail anguly. the drop in temperature by tehing this trip to the Server It was 10.00 when I muchel E. H. the with we closely and it him mit I at me cit not for the west to Brifild and found it with it the alightest trable. On the way for I among blackbenin. The with we delettel, a little cline, but it is wind, es, When pand himlach I mit the old man a hal greate a talk the

I he has cold his place ( The one on the Sens) to hand Obrelt:

It wer after 12 when I reached Best Oak when I ate my low

1544.

I then by any collecting seemed come fire afreine of Permited deffice, any colfoder, Properticulum when the ite. I winted the booking afring and then attents howevered. I found me the temperature quite high, at any rate on account of the humidity, the weather was much disqueelle and must the arm by an to show making it was worse. On the way back I prihed blackburn and remed about 2 gts. It we bo'clock when I reached the atation dard by 7.15 I wer have. My collisting that wer get a siecen. 15. With Mr. Burne along the Bunfounder. We met at Hamilton at 1.30 P. M. We reached the Bufunder about 10 minutes of 3. The day we pleasent and the trip along the river were enjoyed very much. We attempted to get some Buelli concentrice but failed, it were unformalle to get a speanin of perfect. Secund revail rock licher Colophan & Rhyampa petroum. At me place we observed what may from to be a fault, the who are affect almost perfendicularly It wer fine clinking among the worke. We reached Lock Rain about 6.30 P. M. and had more than an hour want, the hair came along short 7.35 and 15 minter leter we were in Towner where we truth can for home. 19. a try with Mr. Heins to Cheepele Beach. We realed the hack at 2 P.M. We then took the route along the rileval. We went as for as the trethe coming the stream, reing the work to our left evenily the revent we decided to try it rether there entiring along the reilroad & crossing the stream. The words for some time proved unatilities are far as arbiting behan was concerned, although they were otherwise quite pretty. a path we observed, following it we found, that it had to a form have, we, however, keft to the edge of the swamp We can came to a partly shot, here grew fine spenning of appening asynctifolium, quite a find, none had feetile fromthe in doubt due to the interes shade when they were growing. Here to I found several spening of Braphic. It was now 4.30 P.h. a we thought it wise to get buch to the beach. We intended going cloudy & thight we would need all the time Leving the form have we welked tound it & here was the read heding to the brech. We found we had but a school distance by way of the road and by 5 o'clock me were men the boudwell. We therefore spent are how or so looking short. The view from the hille in superh, we enjoyed the well too to the roll and of the board well. It were a little put rix when we started for the boat, ruemed a place, and enjoyed the

546

the path him, bowen, maker a detour x I didn't feel in the human to make my way through the taught of shrubbery to find out what it was all about. I shall, however, in the new future I man decided to start on the return hip. I crowing on a red maple I found a reddick looking lister, which from to be a Typetheline whether wine however, I feel comentet doubtful. It wer 4 P. m when I again reached the road. I found that it took me just one have to reach thathauth, going along very along: I were therefore after 7 when I again got heat home, well-pleased with my outing. The putty falls observed in no doubt very intenting when more water flow our it. On a decaying water beach, a Calicini-like fragme (). war found. 28. To the Bare Hille of Soldier Delight. Left home a little before 10 a. M. reached Owing Mille at 11.45. Let out at once for Red Run where I stopped to cet lunch. after lunching started up the run. I took the lower road expusely to lear more about it. Just highed when it worse the run the first time are old rail form on tech with of the road, I found both mue a line covered with biham and I believe it will be worth while visiting them an some raining day. On the left ride, I found an abstonic. Much line were apart booking at the fewere and the trees, it was therefore 2 P.M. when I rested Soldine Delight and were ready to go up the streem. I beared that the mayor bining at the spring given by the name of Cooks, and the family biving at the bridge is married Reader. I provided grite aboutly up the branch, stopped several times to examine the roile and when on the way. It was: about 4 P.M. when I arached the Bare Hills way intenting here bordered by putly would and well worth visiting again. Just an I received the work a pretty path was observed, it led though the words & parellel with the run. The first tree observed had growing on it a fretty species of By I followed the path, I was in hope that it would hed to the a eping but I found that it crossed the run Their led though the word agen. I can found that it led to a wood road. I now thought it would be best to start on the return trip. When I get but and not think when west. Third my but to well my can time, firstly decided to go over the path again, did the a fully got back age. to the true when I got the spine, but did not faind the heigh. I wan stated at this part agen, gite ryptimatically remembered going to another tree for a opening & looked everywhere

In this tre x had finally to decide that the brings were look. I more stated out for the Bare Helle, when here right before we was the tree x there at it here was my hinge, no need saying how the flered I fe was to find it again. I stated not for the Hille and bee above to the woods grew Cl. Carliniane, here to more of that From and Dermetocopin hepatherine, how too wer another Dunctocafor. It was now 5 o'clock & ? thought it but to alet, I cet out at once, stoffed only at the oping we look and the took the should note to the stelling, it book me just 12 how to get to the station. a wait of 5 minute and a car came along it were then for 25 in of 7 when I left brown melle, in an I-3. With hellie a alle of the Cheepele to Port Definit.

1552

The trip was prefert, no bottoming home 1553

5. Heavy down from of rain between the evening of the 3rd after HI? and to day this morning 7 a. Mr. It was no doubt due to the rain this morning that Mr. Burner failed to meet me at Owing Mills I left home about 8.15 a. M. arrived at O.M. at about 10 o'club. not finding Mr. B. deaded to take tip alme. Proceed on would norte to the bridge coming Red Rom. On way record a Germon growing on the expus north of a ned maple growing on wordinde. It seems to be new, last first thought it a Rivadine, but untigation indicate Greener. Reached Red Rom short 11:15 as dealed to aid hund. Ofter linding took the water through Dolfielder recurry on the way come mie afermin of Pyxim condicta & Stite fulmon one. War compained at the lack of indication of heavy rain, beauth that the rain was not very heavy here. Reaching Soldier D light followed a path to Dan Park RA. On way went come fine of seeing of Lind interior. armid at D. P. RA I turned to my right freeded on few or the stone well then turned in following the road. I found myself on turitary exactly aimile to what I had been paring a just are intend Taline are found quite fluitifully and still in bloom. Her to, in fluity of Durmstocape hefathering? evan come to a little rum, more. likely the died of med had of one. I deviled to follow it a I wan gite fluid to find that it took one to the old apring when Mr Sil and I ate me lunder on that last trip. I now seem a petty path folling the book & I dealed to follow it. It were well worth fol looking & from the more a more intenting. The rhot wear the afing particularly 20. Here I found reveal from specime on the outerffing out time like rule. I followed the path rome distance but finally hed to return The trip but was gent as interesting. Returned to O.M. over the love made Here I found Leptander Veryinin growing finily. another intenting find war

Ruch b. M. abut 6.30 P. M. and home 2 hre. leter T. Left this morning on the 9 o'clock train for Middletown Del. 554 to spind a few days there with Mr. Churchill. To get to Middleton it is murray to change can at Wilmington. I arrived in Wilmington between 10.30 x 10.45 a. M. at any note at an hour so a to charge can et au for Middleton, but I decided to stop over in Wilmington until late in the day, armid at W. I decided to see the town. so checked my cuit - case and proceeded out the other with of the station. It did not take me through any particularly intentify upon so I made a few inguisin a room found the shoffing district, learned also how to reach the boulevard - Delaware la. - My hip took me part the fitty Count-house and part a number of intuiting buildings I proceeded out Delever an ar far ar Van Burne St., here I ram a right directing to Brandy wine Park so turned suggesty in that direction Bungine Pak his along Brandyine min a most bestiget aleen. I had offatimity of eving but a little of it but we must fleved with what? I did eve. I stayed in the park until noon, ate my lund, then proceeding but to the sloffing district, then down to Christian river where much shiffy in carried on, the along the rive a short distant. after I while I have trid In went back to the alatin when I took 2,30 hair for middleton aring there are how lete. I had little trouble furling the middleton hotel. Reaching it, I found Mr. C. out. I therefore put my beggage and and stated out to see the Town. The street are bentifully build with silver maples - beautiful lage trees. I willed out the two interesting streets & finally got back to the hotel, have I had me an how to weight before the E. got back. He returned a little before 7 bringing with him several frie of seein of helmbo luter. I haved leter that he had to go overload for them, We met at the suffer table. Often suffer, I went of into his rove . I we fet the plante into pers.

555

8. This morning were afect in going over the plate This afternoon, right after dinne we went to Silver Take a pietly will poul just alut a mile south of the town. I we vay much flevil with the afferme of the form, nearly all being founded with Orage Orange hudge. I we roung to ree so little woods, puttially all the ground is under cultivation, and the woods are rectricted to stuft banks along the pande and creeks, and are Therefore rethin thin. The words are Silver take we very thin and therefore dry. I were not it All confined at the parents of like life. a futly spinion of Pyxim roudiste and a few from a maple standing new the edge of the lake were all I got. Two interesting flowering plate were ex-

down teneller. We wish hotel in time for enffer. after. suffer on put away opening 9. Last wering, it was decided that we would been immediately 1556 after bushfut with how. Cochra for a trif to his fam. Bet this morning we received a mercage that he was suffering from hunteryon, en therefore made arrangement to go to Drangin buch to see the helmh hm. l. him a team and me freuded to Shell come mill. Due to an

of the way no doubt him you twice or for or necessary i it was in non before we realed the will. We ste our hunch, the Mr. Boyler & Mr. Heiting got a bout across the dam for we a we started down the street We when full particular how to get to the lotus place but on directions were poor and an a configure we went for beyond the turning place before Mr. Co could get his being. We no doubt found the sfort without much trable. I certainly got am berryes, we handrom flood growing. The flower & leave stand frequety more than 2 ft. at of the water, etalle 6 ft long being flower or bear were

guite the rule. We would a number of specimen the stated on the return hip. We did not forget to again stop at the sping at the piace your house. We had were all we wanted so stated on the return trip reaching the latel just at 7.15 and we had to hung to get

ruffer. One mie fint of the day wer Cartalia odorete va gigantia

after offer in bothed of a few flate 10. To day was efect meinly in the both, but after suffer on Two a with a for on the restood them to Shillown. Mip Est. S. had been to the botal during the afternoon & had taken a photo-

graph of one of the lotus flower.

11. This morning we spent at the hotel, but this afternoon, immediately after durin me steeted for agentine Beach. Mr. C. get a fine convery ance, two rests, Min C. x Mif S. accompanied us. We down through O derce and her I riemed two believe - one from an old fine ail & the other from a meple. The day was very hot and ar felt very for the for home the trip was quite a long one possely 9 a 10 miles; on the way would Letanie mayne and Echinochle Walter in the ralt weeks. We what the river about 4 P. just in the to see the steeme start back to Philadelph We remaid in the beach to medy run down the stated in the return tips home for marking the channel intented as very much. Just as it

gun duch Venn show out and a little later Jufiter. Venne, however soon

show and My S, were pleased to bear the name or that it were in the ye of the Scopin. We reached how about 9 P.M. 12, although the cloude in the west booked so theathering, then we we a heavy down from sent wind stom at Own lety. To-day (this ming) we decided to visit the baj words at Tormend. We took 8, 15 h. M. train realed T. about 10 minutes lete. We soon bound when to find the woods, and here we found our best collecting grounds. Tithe way when in widene and I seemed juite a weater. On the good tor gen rome fraji. One lage routle-ble one was getten. The time point as guilly that before we realized it, it was woom. We deemed it ine to stat howard. One vie find war Bushner americana found guit on one decided to twee. We am mand slowly but to the hotel neeling it about 330 P.M. I am only by 4,30 to det for theting the bound this amind have it 7.45 P. M. 1560 blackbury. Mr. B. thought it porionous so would not cet any of the debring fruit, even after I told him that were four blackline are poison he felt afaid to try. The plant is quite alone on the path budy to the storme home. It find to be Rube limite an Emperment 15-61 19. To Lock Rame. We met at Tormon about 1,20 P. M. It wer one of three ideal profeet autumn days that we rometime have in lete runner, ?, i suggested that we go by way of the Joffee Rd retter than though the woods to Pronder. The worlde were limed with various spin of Durnodium. Quite a lot of fine lete black berrie were found here a there. When we neared the place I generally entired to derent to the lake, I diedes to by, to go one that old original route, so this time I entered at the first entreme. It did not leke one one the original rate, but by hips to the fall, a well promound fout path, after the board path beam obliticted, I found my my right to the spring. In Burne we gute fleved with the trif though the word, it fact grate pleased with the whole jaint. We atopped at the oping them came back to the path a december to the like. I did this purposely hoping to find something near on the hillride, but, did mut. Ruchy the rund we proceeded lowed the dam. at the inster trough ? stoffed to get ofeine from the rocks, Rhijocafur concertion was in profrien, also R. peterum, in fact, evend 4 different spein. but find them all specture. We prouded slowly towage the station resold it just a little life train time 7.40. We leaved to-day that the him dam is to be built men the coal shed,

1562

27 heft Belto. this morning for Combular, arriving them a little after. Prince was at the station & conducted me to Mr. Jongs \* 6 Med. an where I for a room & boad duing my stay. after deforiting my beggage ? & I take ? first to Kineride Park then of to the Narrow, where we child the he side x had a fetty view over the town. Here we found wonderful as stone crays one of which her hear called Lovein Leaf. Near the top. perform her been built. Lichen were found on the way but not be perfored to second them I contented ruguelf with only a few ofernion of Umbilicanie purtulate. Among the crape I found Diente as mine growing most luxurially & in full bleven. I was pleased to find this partly & after decemding the mountain we went to the Narrow Park where we remarried a little while. We then took can for home.

after outfor I tried to find Mr. Ed. Havin Sr. but he was out when I called . I having returned by 8 P. M. I decided to writ Price at his stone. On the way we

had gente a down pour of rain

1563

Duid 4/10/21 1914-8/27 1918-9/2 1919-11/9

28 This a. M. took a little walk around town, found the Pat Office, com Willi Cuch at the convert then returned x looked up Mr. Harri found, at home. . Mr. It. i quite a pleaset were pointly 55 ye of eye. He entire me mut agreetly and we arranged to take a try in the afternoon. This afternoon about 2 P. M. called on Mr. I famine and we took a tip into W. Va. We award the Potomas on the W.M. R.R bridge them took a path beding along the Potomice. Mr. H. is quite intented in the Golden ruch a found are recently new to crime which has been march S. Herrici in his how It was to show me this new goldened that we took the tip. O and way we found come very fine opening of S. refetie S. Canadare, S. agramme S. ayete. S. ulmifolia ite. after paining the new W. M. tound, we child the auntai ride & room came to what is known there are the Devil'sh a sterile indine of weathand shale leading abouttly down to the river. Here in found growing on the chale the new S. Herrinin, and have two I found my fuit important find Cetraria Irlandia. We som dessended the monition ride, evoued the river a started homeword along the carel.

1564

after ruffer inited Perie et his stare.
29 The stars were so bright lost night as I want not to the stare, "i I we gite compared to find that during the night we had rain. This won howen, it was only cloudy when I started out to the human along to old national Rud. Let before I reached the Standed Oil Cir work me had a shower, and com after another. I proceeded, however, or for as the atom well just beyond, & here I record a better from the coment between the atom, one too over growing on the atome, but not having chiel, I could not receive it. It was only cloudy again when I returned dumin. In the afternoon it rained & trainfing was out of the goution oristed Mr. H. about 4 o'clock it stopped raining, & me took a little

walk as far as the reilroud bridge. It soon rained though again, x antrand to do so all night. 30. Rain all night, but it stepped about 8 h. M. x I was in hope it would now elen, so thated at to the kenne pak with the intention of finding some bottomied field. amid at the pale? Breddich um but way thing was as wet that ? couldn't . I willed out the trule to go to the run out that ? couldn't . I willed out the trule but a what distance when I decided to return x Tay my but along Wille Cuch, for bee there were nothing I was not very for from the park when it byon to came & it kept this up continuing I freuded to the wall and secund The opin ? wated to, yeter Willi Buch, but it looked so uncompositing I dieded to return to the city 30 P. M. at 2 P. M. called on Mr. Harrie. He thought it 566 would room clear for their was a slight let up, we i, get. ourselver rudy, took can to the newow, got off at the budge aming Will' luch and presided of the tracks heeping on the left back of the stream, Due to the rain the stream wer quetty mollen, in fact it was just a tourt. We friended of the street as for as the Devile Backlone an original men of jutting rock. a short distance beyond Jungs Rem. On this with I cremed took Colleman, We want started homewood. When men the sping we stoffed to solvine some fine specwine of Soliday & stule. In spite of the name we enjoyed
the trip very much, along track found Explicite destate

31. Rain all night. This worming there is still no violetation of
cleaning, but as it had stoffed raining, I went to P.O. then to
Harrina It were 10 Q.M. when we steeted for a walk up along
the Potoner which to day is quite high. We afterned want
down to the dam & nothind that there were a rice of short 567 Jest nine Monday. There was no new but it was occurredly mity. We returned by wow as climbed a chour of Shimin. The view from the top were grand. Reaching the top we found a feth budy along the ridge. When men the remainst we hard a pendin ruraling and name a hand fly simplify towards a bush one we then fly the formed a bush that he had ceptured a brief. Hering a plentin the we considered that he had ceptured a brief. We found the commit gente day in a spite of the rain. From a time public patientally intenting one of the rain. From a time public patientally intenting and have me should not and have me found but and but and all and in the dead in the second come to a sure density would hat and have me found but and but a but and but a but and but a but and but a but and b -68 me denely would part and here we found betain Ilandia,

I found letimic colinie, be learner, Parulia physicher and other attenting things. The try through the woods & up the mountain were must intenting. Cetrame Ochume were for I foguetly, no an ideal are, prefect in all particles. The why drawlish me that the day wor not large. It was our intention of winting St. John Ruch 2930 ft high and this we did, whip amount about morn. The min has seen the bestipl and your bound humpting We dialed to set as bucher right in the summit. I me with corry I could find nothing sufficiently intenting on the storm to take slay. On way of we pered a Witchlight in bloom, we found too but offle in fait, the wellest lite of offler I have eun, as small ? It fint mitch tre fu a lisetregue. Regarding Categor. I shoult whether I even have seen no many in full fruit Spening of Streptofor were me broad frequently in full fact. at one afort to, we found one for species of benton guingue folia. after buding, we descended to the road & it was now on intenting of writing a smarp. We gain pound the old road taken by been Budduk on his mornelle compagn to fight the holine On itenting should agala-like in afferme wer wir frequently observed, it was mengieria pelora. The weed leading to the away wer quite a beautiful when we went to true in ad in a little while were in the count. There we fond. arter accomination, arter redule, Waldetenin frequenche Ovali autualle, Dalibade repen, Trivelle condificie, etc., de The Trip they the every would have been me itenting could? have transfed right in the nowing, I did not care to have my chow wahed. It was after 3 P. M. who we left the every x started now on the return try to A? Mr. P. - became ginte intented in the behow & were sure to cecon apleniens. We ! took what we could find of the one teneting from a by the time we would to be had between 15 and 20. Reling we the the road though the words to the Balto and then returned by it to the cutie. Real Fr about 6 P. M. x Combolad an han leter. Toh wiff with Mr. lt.

3. Stated for home this morning at 7 o'clock, at first their proceeded along quite rapidly a it bothed as if we will get to Baltime on their The killinder along the enter for gite a distance was bright with benther there is grand offere. Our fit delay, however, were at Henrich, where we stopped they 20 minutes. Then again at Brail no it were I P. M. before we resolved Workington and I P. M. before we fulled with Canden et ation. It was nearly 8 before I resolved home.

1573 9.

9. a trip with Burner to Electron a vicinity. We took 19th can reached E. about 1.40. We at at at our for the niche. as in newless the make we led a shower which but for any and a proper to the letter for any make very make a Properior. It was getter the Reality the and a method was any foliage to could with me was able to keep day for the later resident the med with me was able to keep day for the later resident the med being which was a the later resident the med being to Waterfal. This is men to be me at the med the med to the med that it power the ght regulated to a hind and med that the high them. Reserving we to blad mill rid and med note the Rock lush. It is on I that the bout along gover of this creek a coldan hour hard of the 5 o'clock. We would Better at 7. P. Mr.

16. With Burner, My Mr. Share My O'huir, a My Money through the revise We we

1574.

With Burner, My Mc Share My O'Mile, a My Money through the revine We made technically at 1:30 P. M. then the de und route to the open field to from this point we provided to Row Comp and then through the revine. I was away to rece the dectraction going on throughout this once most quit a beautiful region. In the potent clay Comp Row, men are bring getting out route, but the unit destruction is going on around Comp Comp right in the wing heart of the region we celested as the most in cernille, here is a portable suggine & wood clother are bring as down trees and coming them up into bealer. We presented with closely, when we then the test to the wings; bridge, when we there were the rain. We then went along the Rim Rid. into Eleletic December by way of the Thirthe Islan Rel beach its Touchent Rid x Cature where we took can for home.

19. Frist trip out on Touchey. Decided to report trip of Sept.

1575

19. First trif at an Tounday. Deviled to refer this of Extended to see a woods just left reading Wateful. Touch 10 a. con. arrived at Cluter at 10.25 Presented at weets the whole when I recent of Principal at when a flowing the Dataid at when att more than of landing present to Wateful, when I found of living Principal to the Wateful, when I found of living Principal to the Old Mill Rid. Principal to make I wateful; coming to a legent of freed to go into the got duff; coming to a legent of freed to I thought it would be stored I make my way to Story live. I find that it is to be at head of creek along by 4130. P. M. To-day but left at 50' clock schaff.

76

23 All day they through ravin of Western Run with following member . May Said, My Smit, My Mile, My Moster, My Lette . My Mounty.

We not it Mit Workington and took 10.41 train ariving at Carbymille about 11.15. We then formed along tracks to Western Run. The day were prefect an ideal one for the trip before on. On it was no lete when we stated we were not able to present for before now. We then four about there putty when men the entires of the gogs for our camping ground. We found our patiellar difficity getting through the ravie . We made our second other at Welfter from and her I would reveal afree my from the rock. We were a little later getting to Warren them I had haped and as a consequence I were now at able to mit the Expertine Dillimin rocks. I took the next able to mit the Expertine Dillimin rocks. I took the next able to make it to a guite desh. We arraid it C. I some when of him time. We took the 7. 25 train for home.

24 With hellie and allen in send for Ounthern though Banthe to monthelle & Then home. The afternoon was beautiful In afite of my reach I found but few references. It was 4 P. M. before are started and about 6.30 who we get back. 26. A trif to Monthelle, I tuning Run & viewity. I left home

26. A trif to Montheld, I terring Run & minity. I left how along to the Month to find Death muted the sping how at a ling how I hought to find Death but more were found. From the oping, which brought me to the read at the atoms of Monthelds. I man which the open field and came whom a five potch of Beating and a to the cent of the made hereby roundest close to the open field and came whom a five potch of Beating and a few species of Deathers were justed meet to the old grang from the grang I went to the pute. When a the new bridge is propering family. I have I wend the melling Return of Bornain Ret. I then the fire fine here of the molling Returns how by may of thefold read.

30. An ideal autumned day. We must at Mt Washington at I PM.

30. An ideal autume day. We mit at Mt Washington at 19th. The following were in party. - Map Sauch, Mip O'Neil Mip Enter, Mip Bowhen. Map Miller, Mip Lot x Mip Morrof. The tripper to Phraville left at 1.20 and thin took in to Brew Sp. On for which point we provided to The old hilm; but to-day again, or on a former account. I failed to find them although we did find the please where the stone head here queried The words we entered is an ideal chartent woods here the read etande a very laye chartent tree, looking up into the tree I mothered that many of the home were upon, I at once looked on the ground that many of the home were upon, I at once looked on the ground were supposed to find the ground fairly well reathered with them

mill her been wited a quickly thinning out the woods at the point. It was about 3. P. Mr. when I decided to start howevered returning our the same inte I had taken in the morning. and how slot 5 P. M. II. With Botany Claw from Dishayille to Guyon Dole Junction have before here I had so large a clase. There were 785 entirely to many to headle properly and I decided to make two The trip is an ideal one and much of witnest was observed. the most starting possibly being the fite of Enougen amicuse. We needed the can about 6.15 P. M. and it was an home letter before I resold have 14 We met it Candle Station and took 1,25 P. M. Train to Relay Then was gente a mucher for a Setudy transf my South, hip he shew my o'hill my Lete, my Hofbin, My Caturift my Burn (a) May Sacal, My hund, My Buchen. May Brown. We took the Rinkoal. The day were just a vice one not pufut, for it wer occurrely closely, but ile temperature were just right. Our fit step we at the bester Wille & here we found grite a me let of the Timing's bestow, were than we have seen for reveal year. Every body in couple and the number of plants collected wer not great. a short distance of the was father, we saw though let a withen collection was bing well along we went a man at her I am please to first at but 50 mily growing plants. We stoffed not I Chiti when we get a dink frate. We then and the bridge and frauded of I filler an, There we were goined by 2 mm belie who has been stranded. The last started out from Ellit City & had intended going to Relay by had had now the of the distance. When the wild O.S. they the for they would take train but to E.C. by mind it by a maying They we therefore very glad that we can along and were pleased to you on the tip to lateralle, where we take an factories. and have lot 8 P. M. 16 With Sut, a. of Botany clave to Mr. Winam Member met prompt by and we were able to start at 4,30. We took the regular with to the food. We prouded to the affer and of food and there crowd the them by men of the little bridge, then welled though the wonder back to Columbia an. The wale intented we very much.

17 a cloud day. Deinest to go to the Maly belenhim ryin for

Celastra readen. Inh electric car for South Batto, when I hoped

to find some Water net. I rown reached the place but the change

587

that have taken place in orgetation have crowded out the Springing Water not, ite. Some of the pende to have been filled. I now. can for Brown lyn. Here an automobile takes are to Cedar Hill, has. I would have had as half have waite I decided to go on, I them manyed first of all to seems some Protecorem, and later who I went though the words me the 3 fints of chiefents. The was now is in fine condition and it is girte a flower to walk me. It was in the words while yething abentute that I ate my Stepper a little while to elet with he Stellings. Reached the Buch dat 1. P. M. I now stoffed a mount for material at a of dup water. Then west on to the Celester place. This time the um very little to be found, it even a if the ecole is gudrant hilling out the plant. Started own on return trip, whing a con boy the ment my to be, he told me he was going that we would show me, When we reached the road we went in the dire of maly & entered at first fam, just behind the home we time shop at right angle & founded touch the hot hade on the fige then down the hill, crossed the little bush, then of the hill & along the edge of the woode. The fith led to a layer one the the wonder, I was surficied late to find it the one that her in the reason of Chaly I time place. The whole trip was more intenting. Resolut S. just in time for can.
18. Repeters trip of money with Sext. B. of Bolany class

1589 18. Reported trif of Monday with Sext. B. of Bolany class The trif frame just as intenting as an Monday. We want able to been true at 4.30 P. M. and resolute are again at about 6. P. I The coloning of the leave, expecially of the Poin Och attents much attention.

15 90 22 With Willie allen as for an Met Washington. We hoped to go out Gran Sp. an. to the chestrant region but heavy about of rain for wented

1591 23. With Boten clave to Hering Rum. Harful Rik is in gente town of state due to the regreding; the rain of gesterday did must improve another an a consequence we was landed in gente a much for war obliged to go of the read the over the grave in order to go to the rum. This accomplished way thing west finely. To day I does to cross the rum at the foot bridge & then go down along the right of the try found ginte a success.

1592 24 Divided to take the trif towards Islan Ellen to day It was not not long before? come accountered to it is the day from to be ideal. I took the runte through Hempster. The run wer shining brilliantly is as it is warmed up, it was quite a pleasure to be out in the open curring the for

fields, To-day I went as for as the old biles x there I turned in the direction of the Pile for the homewood wate. The spot award the pilm me most intenting & ? efect some time examining the weeks & collecting a few likem. Father award to I collected several fine of comment from a tree touch. On howard tail ser and a ride both it Town. Realed home about 5 P. Mr. 25 Refuted Monday top the the the other divining of the bothery close. To day the ground is dryen. The tay we enjoyed equally 593 se well by the rection. 28 To Rocky Point. We left Holiday & Belle. Ste about 594 12.30 P. Mr aning of B & Rim hack Red what 1,20, P.M. We started it was for R.P. Much them, however were specific on the wad, wo much, in fact, that I hadly expected that we would 4 P. M. The every here on gread & we enjoyed it for at her an ituating between Record Weller, just in town to see cu per x hede 15 mint wit, Realed home about 9.30. P.M. In them, helli a allen wer in the pak. Late I alwaret to the 595 pah, after a took stall around we stated for home. Seemed rome briden fruits. 30, A til aley Gaymin Fall. We met at the new Edwarden the 596 bridge. It was my intertion to go down along the race but the country from more present one december at this point, we i' would the budge & proceeded down along the office back. The first part of me till we fetty but we soon came to grain & here it am It my flowed. after paring then it is again juite frethy het the them bearing juite dach or we saw very little of the beather of the flowe. We wit down on far as Fredich Ris a then took 31 Try to day one to thering Run. & along Tiffang Run for fruits The day one ideal on ladion Summer day, Dayin found the closed sentim place. That heft on the trip were a short 597 one confaiting, that I would get have entire, but I room our that the collecting and detail me much layer than I hes anticipated. Send come fin Cathe fich I Today the Wed, within met at the Edwarden and bridge. 5.98 they were to take some This as the Mon, with my but I decide to go of them, the then down We: stated tours Walland were, a I think it was a min charge.

4 To the raine. It wer to be a feat day, and consequence ten me. 1599 farty containing comething good to cet. It wer 1.30 % in when we are all redy to start. We took the write part V's. armid Out Sping, a fine were built & in a little while coffee & church hat beed, but oyelin, behed poteton ate me pepared. We reme is and on for will about 5.30 P. M. the states to me 5. To Chestant Will with aller for spremin of Cratacym as Roce Hips The day was must pleasant.

7. To Druid Hill Pak to the rea line found. It was my intered 1601 found that they had been cleaned, I was it gente pleased that i afite of the cleaning I still found a small but of cham. after ear rome Chan. My trif to the raying we to gt some Evening Prome but the recent front on 3rd x 42 had settled this career. ? hat the can men Swinder glan under for home.

11. To day in 11.11.11. We mut it come of Balto & light St. 1602 and then tent Centin Bay can for the new bridge. It was als 1.30 when we reached our destriction on started on our way to Sun Cuch. It was nother worm, two warm for heavy clother (? have jo tim days ago much the change), and had we not had a min heavy it moderate would have been too man for the trip. We took the route by my of the hamited house, On may me paned some Balga scandens in fruit. We reached the panel about 4.15 P. Mr. ? fee plenty of Hibrin is fruit. We formed but to many pool of Robin after a about stop we stated a networting. The annext one the

eruch was much admid. Reached the car about 6.30 P. M :

were a him come reedy for a tif to Vranidence. We took the

home lefue 8 P. h.

14 To Broklyn & Riverile. a cloudy glooning day. I took my an nowte into the little raine and to the path along the river. Se on way some hickory trings, and down in the much some ofhays. The hilling front of Monday night followed by me lest might her about completed the to all flower. Often arining my line I visited the Colartin region & record a few pole. It is after two before I was redy to got Rivinite when I were how how theyo. It was about 5 P. M. before I would have 18. There were much rain last night & this morning, this possible was the reven of the shin attendance. My Suith i hip money als

1604.

noute by way of Hampden, It were very bluetary when we started out york Rd and we had the benefit of the wind in our few until we intered the woods. From that time on we had very likely of it a wan later on one return there was practically no wind It was 4 P. M. when we resolved Priviline and we started in return trip Just at the bed of the und we regar a road leading to the lift which I thought we might investigate. It some but to a brundle need which affectly wet towards Like Rave, Just at The place where we extend we can a fith though the words as This record to go in our direction we dieded to flow it, lt led to a fitty little rain. We array the book & the proceeded in the dieting of the setting sun. We had get a runder of fines to one but we firstly come to the med belig part the him kilm have two were a stone combon; how to at the kilm was a Paulonine in fruit. We comes the read child a few name from a finity reached the Privilene Read, while come bought are back into Town. Realed how about 6,30 P.M. 19 With Mr. Romborgh to Santle, We took the would write and returned by way of the spring. It was after 4 P. M. when we left the home, so did not get very for. 21 Visited Clifton Pak, remed spearing of comes them went to muttelle. It we rethe raw & diagneeable. Seemel quite a south, o'hel Smith a king of the histology class and night mishen

South, o'hel Smith a known to France Break. We mit in Burlily at 1 PM. I had been tild by the openter of the automobile that he left ryplety on the how but it we 10 min port the how and he still had not come, I'. telephoned out to the office and bound that they IPM. Tig had been letter off, but that he would be down at once. It we had port on when he officered and we were needy to start. It took just about 10 minter to much the cometery. I then much inging about getting home a leaves that they would call for me at frame Brench at 5.15 P. M. and would take we back into Bully for \$150. he this remed whiftely are made arrangement for him to come for m. We reached h. B. about 2.95 P. Mr. We along the stream down to the old framer. Here we found the tich so low that we would him huch, the return to the rund though the words. It was 5:10 when we were appointing the bridge across the hand, and here we found the enterable turning & getting ready to take on back. It was 5.15 when

605

606

We not to Bello. m 5.25 hair. 5. Oct Willen Road x along the run to Hamilton. The day 1612 in ideal & the top along the run most oning alle. Seemed as 9. To the Supole. We at at Harlow at 1 P. M. annie . the fit we by the coti done top. To day we frenche

It was a to test; then for the ditare it is with the ping. We climbed to the lift of the rocks are her a

hed a must beautiful view of the run. On the rocks were beautiful make & hefetin and behave, must of them extremely had to get of to We welled of the aturn to the end them aturn to Cany 12. With aller to barrette for more. I had hoped to go to Warren but the weather conditions were rether imparable, 20 deemed it wire not to undertake the trip. The weather, however, turned out fine. Returned home at more. 16. a raing day. I had proposed a trif to Catomwille, but as it 615 had been raining all morning & broked as if it would continue all day I made us effort to reach the Catomielle termine. Intered I proceeded to Examilton & the mulhed home, taking the alla, Spice and Kelmie. Realed home at 5, P. M. 17. With Mr Romlongh to Take Swiffer, Chala Stan, and 616 along the atum (Stony Pan?) a short distance, returning by way of Cold Spring Law. The day was grite pleasent, roade, homen retter muldy. 19. To Benfield. Left home about 8:30 Q.M. realed 617. Cambon Station in time to leave on the 9.30 Q. In car for Slembonic arriving their at \$.50 a. M. It was an ideal fall morning, just cool enough to make welling pleasant. I found that it took about 15 minute to well to the first core read, and about an home to the rund amount and many 2 home to get to Benfield. Too day I de cided to walk along the right back of Ben Cuch to the oping. Collected on the way reveal believe. It was I P. M when I reach at the apring and ate bunch. after lunching I amed the creek ment to But Och and the up the path. I now began my and for helly. My fint effects we met inth more or her failur, there week to be little hely is find and opinion found fruited were not havily finited. It was i with much surprise & pleasure that I finally came when a tree simply a men of binen. This was a dying the which remed to have made one find effect to out-do itself. Here in a short time I managed to seeme all the holly I wante It was 5 minutes of 4 when I was ready to start homeward. I wan every to find the old spring along the med side not for from Ben Cuch dried up. Here on the billiete I found some finity fruited Cladai pysidate reglecta. It was needy 6 P. M. when I reached blenbuine and I had a west of about 5 min before the car came, realed Bandon station 20 minter later and home by 7 P. M. 23. a trif was planned to Warren for member of Reading Sechi 1618 of botteny. hip b'haile was the only member that decided to venture. Rain

all day yesterday, cloudy and threathering this morning, no de heft the then away. However, or it was just an ideal conditor for bulow white the bulow when when the go. We reached True about 11 Q. M. We then took the lane leading to Jule Ray On way I alleted some of go the led fence. Reaching you Red we kept on the direction we were going them timed to the left and proceeded on for on the end of the stone wall then timed to the right and heft along the stone wall then timed to the right. and heft along the stone wall, period the barn, could the the run, and then followed the path, under the affle trees and along the edge of the words and seems the fields with Warren. The old stone wall from atenting, whom it, I found a change I below. We realled wow about nown. We the familed to i by offer nucle and here we ate one lumb, after which we sicreted the belliste until nearly 3 P. M. 24 me 2.45 P.M. ha we started of stree to the bundock region. We collected all the hemlah we wanted and Chinthen from by 3.30 P. M. and we ready to start for the station. We walked back netter along, mouthline found as hed an abundance of line. Walking at an adding nett, on can early get to Texas in an hom, he we had plety of time we it were too dark to see anything well when me get there. We neched the atation about 5.12 P. In beach a 16 min. wait for the train. Ruched have about 7 P. M.

16 19 28 With Mr. Komlogh to Washington. We left at 8:30 a. Mr. reached W. at 10 h. Mr. We went at once to the Smithcomin and come the National Herbarnin. We mut Mr. Maxon, we were not very foroughly impured with what we raw, most of the cause are not believe and then is a lack of case displayed. From the Santhamin we went to the burning hope when there to a lunch room. After during we went to the burning hope when he was a function of the Saltinat Man Society Met Mr. Chambelling, Mr. Keyen, Dr. Evan, Mr. Low, Prof. Franks, Prof. Dr. Isrout, D. Michael, and record other.

Often meeting we went to the library, them home, evining then at 90. The day were the most bloody we have hed this seasons wind bloody a

1620 30 With Dr. Bijelow to Umin Statin them a walk home by may of the St Pal St., 28th St, and Old Jule Rend. The day we nothing gloony and all prompets of summer were at head.

and return. The ground were very wet. a few dandline were found in bloom.

622 2. To Broklyn and vicinity. I visited the spring and the run.

There I found Springer growing fairly well. I now covered the

stream a tak the fath to the river. I then visited the Skink.

Cabbege region and found quite a number in bloom. Here two, I

collected leave of Tipuline as a few routs for sectioning. I now

collected atom of history. It was rether a disquerable afternoon.

it felt as if we might have now before morning. Returned home

by 6.30 P. M.

623

624.

6. There has been a decided charge in the temperature. This morning the themsente howard must be zero much. We had a little assorm. Turiday wining, so the ground has a their has a thin coming of it. It is now warming up again. A trent had been propried to Luthwith, but on seet of the ald, we one came. I have much not to it will my had been found and should not to it if you when they give I found that they had been cut to the ground. Fortunately I found a plant on the other cide of the treches. I now received for flust of Hefatica tiloba, but the moon were deep rough to come them, I'm related a few Kelmin and Populain have a later I found come doner. I'm returning to Tomme I took the part toward it part the school of to the new realward, then I followed it part the school of to the new realward, then I followed it back it?

of ailanthe, Rhun, ite. for phyllotary, Proceeded to the run then

into Gamette ete Returned home by , P. M.

16 25 13. The weather continue cold and more more her fellow since Touchey. This morning the thermounter reach 0° F. the coldest since 13 yr. I reached b. Junt. about 2 P. M. recent some willow trips the proceeded out or for an Rolling Rd. there to F. R. and back to the case. Returns home by 4 P. M.

buch to the care. Returns home by 4 P. M.

1626. 16. Then her her very little change in the weether, On Sunday
the themaneter went 20 below O F. To-day I went to Winder

1 tille then along the falle. I did not stay not any longer than
were absolutely necessary. Plenty of more very where, wind bloomy
and them mute below 100 F.

1627. 20 To-day it is comembet warmen. Noth Ming South, Mig Smith and ming mesher to the Skunke Callege region near Burchlyn. The weather

6. To savethe with allen for Maple tunge. Snow and ice every her 633 as it was rether cold I decided not to go out until in the after noon, but it were one of these sunchiney writer days that one delights to have and I wished I had started earlier. We wished the spring and here I record my tunge. Returning I about several man annaying I was told that they were enverying preparting to the opening of Wyan ohe are, although they were then on Dunberton are. However, I hadly think this time. We returned home about 4 P.M. 634 10. We met at Hamilton. I was determed a little so until of taking the 1 P. M. can for Canny we had to go on the 1.30 can. It was one of the coldest days of the season. The following were on the trif mig Sand. My Smith Mip Money a Mrs Burn. To-day I decided to go to Perry Hell. I was any in to get some opinion from the order name. Below Ri. On the day we no cold must we moved along gite bribly We were futited against the wind must of the way, but men Belin Pix when the ofening you we had no wind break at all. Then was trupe little authorism difflaged & must of the follow wangled to tune back. We realed Comy again before sum down & was home almt 6.30 13 To Burkly The day is an ideal one or I was soing I had 1635 diedy to get home early. I writed the runin & record melecul for distan, etc. 17. To Cente Bay, aute delightful day, beautiful on wheel but mut so much so under first. We mut it Belts a Light She and link 1636 can for thatin By, Wa found the made juste mindely & was glad when we we all to live them for the made. We took the waite part the hants home then to the bloff overling the river We built a little for a remaind the quite a while wijnying the ice reem in the min. On the homens top we took the path along the bluffe of to the find them along a pett back to the path leading pat the hamited home x into the road. Here we were mut by a young men dinning a cost one of the government costs is he we arrive to take in to the can. My South a Mit Mind out the net of an decided to well, the wad now being in a much frime condition. We realed the car left 7 P. M. K weekome by 8. 6 37 20. To huthwill, I tak can to Toma then welled over to X. I under to now Springer. Buile the Springer I found rome fine Batychorfene in the run just above the mile part. I entered the wonder, found flexy of armor on moth rider of hills. To-day decided to follow one of the atum down touch I. It was quite a treat, the words I amplus of Mr Kellys. When I weeks the road I friends

23 a trip along Soupeton Rum and Bull Rom. We met at termine of William an car line. Imp Sant. hip Said, hip hund. hop 6' hall & hig Brothward. We touch the can to Suepl. Sp. Ril and the founded on in previous Set. to Rolling Rid When we entered the words and followed the chiam. We had not proceeded very for when we wild a duded change in the weether and before by we were treated to a little had flung. hip O'heile collected from a found a pitty faled openin. We nech Bull Rum after a bit a the it began to rain This contains the rest of the afternoon on by the time we realed Colomath we were nother dauf. Revoled have by 7.30 P.M. 649 26. Towen, Lutheville etc. Served to day salamender yes at the pande. The day were quite worm. On way home collected afrecining of a Buellie (?) on feblus men the layer pand.

30. We met at come of light & Balto. St at 12,30 and there took can for Brooklyn. We then proceeded to the little ravine when I got afrecine of May-affle shipome. On way we found 650 Red Mafle, Silve Mafle, Stillain media and Drobe verme in bloom. From the review we from dely the road overlishing the river stoffing frequently the to admin the beauty of its winding course. When men the main wand we cut though the low words and later follows the read. We found alder in In Cally full bloom. After proceeding come distance along the road we cut up into the arbitum hills and here we ate our hund. A read for flower proved of no avail. We now follows the path while row brought on to the road beding to the cemetry. On way we found Shephert Pure in fell bloom. We proveded touch Like and stoffed at his greenhouse. We now stated on our homened trip by way of the main wad. Reading Buthy hip Saule, mit many my hop andrew boarded the can. Mit Bume " her ruter withed very much to crow the bridge so me did this and they took come office mide of min. I founded to 12380 1651 31 a try with me Rombough a me Wood to Hering Ren. We tuch the route by way of Yanth' woude, Lehre Montebeller etc. The day was ideal and we enjuged the trif very much. Reach Huming Per we prouded to liferful Rd & then to Cliften Pak. when they tack can for home. I tack the General and can for Old York Rd and there home. 2 a thing along transli Rand. The day culting and diagnorable 1652 much an effect to get speanin of Engthrowing just coming of het failed to seeme any. While looking for them found Sping Beauty and Repatrice in fall bloom. I proceeded out the and to the grany when I received experience of Equinition just coming of. Deciled

by way of the old from home allow wer in fine afout, how he suggest the flower. The day were ideal, a little windy at their but mut die aprecely ro. Reaching the stream we record rome relumber eyes and the followed the banks at the oping I record flow of Ength min We then went ofen to Camp Rom and here more flower were collected We folled the street up to the fun field the amed it. I have? record of min of Toly-tue buch for the helling flind. It we were 5 P. M., so we bestund on to the can & home. 13 To the rain beyond the Care. We had just getter into the can 1657 when it began to rain. It pointly would have been wien to retire but I was anxion to see the Celthe and no ter was hip Sout & hip 6'hull as we continued on one trip. We reached the Church Law et 1.40 Ph It was raining, but not as had as it had been and own it could The grand, however, was very wet and my feet wer som quite suched. The Cettle we just coming it blom. We went a for on the oping covered the atrea & west of the hillande. It was about 5 R h when we stated homewood. On the homewood hip it egain stated to rain, stiffed your and you rained one or time. Rund home 9 P. Mr 15. First hip of Botany clear, We met at Dishuy will and touch the tif to buyon Oak Junction. The afternoon was very pleased. It was the day for Eythemin.; thousands of flower were in 16. Trif from Catamarille by way of Hilton an to Orange laure. then leter along min to Elshite a back to Caturille by my of Thitle Slew road. It was the alfring rain during the morning of at time it driggled so I had to take an unshalle. It was very melting or greater dringwealle Second of since of En themine, Equinter Durtain ate for class work. Put with hilling fluid young ctem of Tulif the a of Clover 20 With my Banker, My mung, my Ken, mis South, hip Smith and my Burn to Maly to the Iteline sweet I below just in blown. We found much arbitus still in mice chape. met me Pampley. he is in nother bid chape, can hadly with is 82 yr old. We get off at Muly took with the off Purphy & Robins. Returned though much a by my of tech to believe. 21 With aller to brushin Rd, Collectes By Thomas & Equipment That guite a mucher of people I know. Habet hyper, Ming Gerdenhied. my Smith, my mediger. Returns to Dichyaille & There took can for home. 23 To Gunfonder. a blittery day, Rida to Toman The friends out Dulang Vally Pike to Menni! Lene the the old Still home. From Meeterine in bloom, was much surprised to find it

1659

1660

Engthrowine is on the best bys. Destain still in blom and so to Direction. On my home decided to mint the Calthe place so child the hillness, had very little trouble prihis out the way. The view from tast of hill is supperh. found my very to the other rains seems the ridge with at a list of balls. From a change true in full blow. Second a had of magnetic triptala for the killing, flind also Slaphack Pana, Stem of Direction, and standard one of Prin also a few parts of Sanguiriai.

Had gone some situe when I am hills by a paring out of auto more at a title is borrowed.

1663

Their afternoon took allen to Diby will. We then presented one und route to Brown of Junction. At the apring I must an Id man who here been a with willege one 5 open. He live in the home on lift with of read just to coming the bridge. I think he called humself "Parish". I beauted from him the may old "opinand" friend in dead. We found plety of Black, Violes Spring Berlier, it. it. Just before reaching the rocke, in fact, just on we were covering the stream we must a man with a day, whom, I later heared were Mr. Friesium. Mr. B. in comment intented in nature, like. Mr. Weber, whome, by the way, he have very well & called Under Weber. We wolked book toward & D. J. Lyther aller was much intented in

" hu Byd'

1664 30. To the Sumpowder. a glovery day, at time theathing rain, but delightfully pleasent for transfing, nor deat, temperature just right. I went down the rive to the Mutume locality and we able to recome all the meetinal medal. after collecting all the Mountaine I wonted, I went down to the Ostenh few bealty, The form are we up but not an yet fully developed. Carlofbyllum was found in abundance, and Tilling just in blover. Started in howevered trif about

1665

4. To Islan Ellen a bock Rawn. We met at Power at 10 G. M. turk the route to She Ellen. We ate an lunch at the old line hilm.

It was a little women at times but as a whole the day are ideal. The following, went on Trif: - Mip South, Mip Smith Mip Brown. Mip Senden Mip Whe Mip O'Mell, Map. Buther Mip tate, Map Miller, Mip Kun, The most intenting thing obe and we the flowering of the Spore. The futty red measureprosages to come were heartful. 95 different flower were recorded. We found preparate were having muche for the building of the seem down, before long, this region which here become quite a breaty sport will be quite an agree of the State home were offer and we took a performable. It, two, has to a charge for the wave. I trye tanks of Chloride line have been in atell and the once breatful rooms bother now like a minimum good Calore

We reached the statum in time for the 7.12 toair, which took on book to Town. Resold have about 8 o'clock. 1666 6. With Botany class along Henring Rom. We met at Welen Vak and took would note up the stream a small to the can the two though mutches Pak. We had just made out our tail when we had a little show. That a number of flower were 7. With allow from Bomer Bure, along Fraklin Read It we a strong day and the tip rether trisme. We record what flower we needed and havind homeward. Just after curring the bridge it began to rain. 1668 1. a try along the Patepeer, We met at Rolling Rd & 10.15 a m. hop Said hip Smith hip he Shene, hip Burner hop sain hop Brithweste were in the party We took the route by way of the purphone, realing it about were, Often harling we stated of the wire to Hollefull. It wer wither withy and the hip of wer withen time some, it spirts of the may heartful sights of flower and from and from Disentiwere winesed in size. We were pleased who we had fin ally could the Shake of Death and had maked the sping on the hillwhe. I winted the triplemin arguntifolism colony & found it still in tool. I would ofening of young of the Christman form for the filing fluid, also a for authoritied & authoritied hands of Manhatia. We covered the nine of thellefuls and the states mud in unt of eval for Ell'et City. The tip um ever much flewanter a fair huge much wolking much flewarter. Ofter a while we wish the turnel and her we found the Cypifedime. 36 are counted in one place, and I suffer at best 75 early be found on the helich, We send tuch 3 afrain I want can of the wit for realing. It was about 7 who we boarded the can and about 8.30 when I got home 12. With Mr Rombough to Chritmet Hill and meinty. When been 1669 raining. We leaved that the form renter of the south cutin portion of the banett estate her moved and that a new family are now in porcenune rented for a more nominal figure (846.-)? The people more the go by the name of Small at the young fellow we met wer Horace wickward "Hood". We had guite a lengthy chet will Hood and head of the many troubless they were subjected to, so many that it headly seems worth liming them at any price. We took the part just begind the termin count, cannot the field. then walked of to I I would intention was Pen Ling ar. and back home. Nothing particularly intenting man obuned

This morning it bushed much like rain but it cleared before much now it is quite bleeting. Notwithstanding the clear was well up rented. We took the weed route and anything, as always, was dear We found one 60 plate in bloom. When we readed the case award of an member being near home left we, the rest of on took the tripp and of the bangs of Wyman Pah. The trip is grite an intentig one and not so a lang.

1671 14. To Burklyn This morning it was quite pleasant hat before a it been rather sulty and must it is cloudy and thurstheming.

I took the route through Crommelle and along the river. I was please to find rome My orote verne in bloom. Two makes were obs

1673 20 With Botony clan along Buymin Fralle from Education an iridge to Walbrook. The day was pleasant, a little warm perhaps. Over 60 plants were found in flower. a Cecupie moth was found by one of the ledin. On our way through the pake we form come whom a required we had but mut of the hair of its tail; it was very time and come to head. We runk Walbuch about 6.30 and it but nearly as how to get h

1674

21. With allow day Herring Rom. The day in very much like yesterday, then women. We took the would route by way of the stream, spirit lake the armined at the run we went of the right back to the hy may of Mill, we then presented to Wille Rd and returns home by way of arbinistic and

1675 25. To. Elveto, Waterfood, Mayothy Bridge, Jawbinlle Heel of Rock Creek.
We mit at Camden station in time to take 8.30 G. In can for Elveton
Mp Smith, Mif Buche & Mif O'heill were already at the station when I as

a few minutes later Mif Such a Meg Mc Share arrived. We got our tishete and bouled the cer at 9 o'clock we were at Elvator. The morning war most pleasent wither too het un at all cool, it was include to he but but there wer a delightful breeze which tempered things de oronte. Two little boys were bothing in the stream but ofm our appoint hurned under come. I got pathy off the track just begand the street but me were room put aight again by a young colored women, he have gaden was growing Trachestic & we were again informed that it was called "Kies me at the goden gate" fut beyond the bridge were rome fine Christing Framiting. We neshed the new state was without muchich, except that 3 of the party who had bright behind came mean bearing on at a fork in the road. They were room brought back to de fold and thenefter dieded it was botter to stey over the baden. When we reached the State was we were not for from the old will. We now afect a little time booking at the will proof, at the Il will and at the form boundity. We then award the shien and proceeded. down on the night back, must of the There following the path just mile of the labed wire fence. Wit severel flow I stoffed to but for the box hubblebury but I failed to beste it, as must of the ground had been but over I am afraid it, her been hunt over. We followed the path much of the win fine intil we realed the home how we you what our my x wer distil to follow the path bushing down the book hill a though the fame, we followed the path & room it link in though The work & we were some on the men road a of the bridge. We now went to the sping num the sport when the old will stood & here we the one house. It was now now. after limiting and when it was close to our o'clock we started owned for The can't meeting growth at May they chied We were directed to turn it it the top of the hell at find I did it can to go the way, but when directed again by with colored mans directed to try the new route; we! and in ou if we were going to the home & direct to the Mountain Ri but after covering about 150 ft we twent to the right and som reached another path (that is a wayor forth) we followed this will we were a little distance beyond the house home when we came to a foot poth beding to the right and beding though the words. It was in this woods that we found sweet fine lyp, wenter, after a bit we came to a home in the midet of 4 by them and then a layer and or retter more used road. We then turned to the lift and the

Robini in thou but it was it a me advanced stay the one found it let you a ben bestife. Often witing a little while at the country on little while at the country of the cuch. It we would the week alm 4, 15 P. Mr. but it was very to stat howard. The trip how was 6 before it were very to stat howard. The trip how were y flevered we would "fai 5" fast of much mediate to mind of 8 o'clock. We bound that the but we will! I would be a state of the but we will the state of the but we will the state of the but we will the state of the but we shill the wind that the but we shill the wind the but with the state of the but with the state of the wind in flow. I will be set to the best of the track of the tript of the tracks or on form occurring and the that to the

1676.

to the right of the truske as on form occurring and then that to the We were quite surprised to find around office protecting the B & O profit we were what to take the affer route & out as on form occurring he can to the piece. It all it not been for the surgister the trip world have must oblightful, but them blad-thirty creater much the transporte are undertaking. After being the words we found it reversely cross a train, but this was accomplished without muching.

1677

28. To Mit. Washington. The awaring was any pleasent with fine wind blowing from the west. I took the route by way of Guelfon Cold Cfing Law a Falle Rd. From My W. I presided to Base Itille and then by way of the come would to the Potenica Clutic dain and from them to the Juntim when I took can for home. It took exactly 30 min to real the brancher front and just about 15 air layer to real Joh Rd. and are home to 5 minutes to get home. Among plante found in bloom were Drye On Vincetorici. Prestain. Occulture Is illure. This old day, China and the June marker to find that the row of home were the bridge just beford the Junction had been true down, they were to make any offer the Come Country Bomlevad. On this rate will be the Children Oly good which will set tout from the bridge to the Junclin.

1678.

30. With Wellie a allen to the recover at Builford. after collection many dancer we went as for as Charle St an, then along the avenue I the entrance of builford then though billford to the York Rid entrance It was quite a pleasant walk.

16 79

2. With Mr Rowland and following ledies. Mif Buchen Mif Sauch, Mif Ba & he witer, Mif McShem, a Mif O'Mill from Texas to Warren then by a of the Bunfounder a Western Rese to Cachengwill. The ladies took can a hot Warhington, Mr. R. at Calout Sta. and I at Luther wille; I therefore had a him of two miles from Tomon before at arting on train. The morning were very close I thought that a thousander storm would be the art come. The walk to L. we not therefore one of the pleasantest. I found that it tuck about 20 summer

to ride from arlington and to Toucon. and about 45 minute to walkfor Town to Guthwille. The face round ting to like were 15 \$, to lookywill it would from been 18 f. , the round trif from hot. W. was 30 f and had it ben to C it would have been 36 f. The face one way from C to ! in 5 \$, it would is reen winest when starting out from 2. to get round tup to C. when one contemplate going a we did, We amind at 1. a little after 11 h. Mr. We set not at over one the route to Warm. Honey brout was in full bloom a reach for publick flow front unwereful, all the flower apparently were staminate the boys of the hundreds of been I could be bed in the true top. The trip a for a the fild war not so had, but from the on to Waren it wer my but. It was after IP. M. who we seemled the bridge. We then relieted in aft wit for from the sping and ate on busher. Mr. R. ann fruit we all by tething on that the black at were good to cet, upon willy as when figure is to five it ate reveal. We proceeded along of the rine. I was empired to find Magnetic tripetale all in blin The tip we enjoyed by engue in after of the heat, We slopped at 3 deffect flow, with life me of the had chick, and uf the stream when bothing back I roma conve, the first? have new on the part of the min. When we were finally well at of the words we can that we would must they have a stone. We had been a little alon so couldn't get to C'in time for the 6.30 P. he time so we had to take the the et 7.30. Just a is we needy to start the store broke over us, and must of a were waled try in to get into the can, When I weeked I it we ettle mining hat met my had so? stated for T. On my it did name a bitche hat lefer long it staffed &? manged to get how without getting very wet. We found 111 plate in flower. Spine a Kalmin in fell flower. 3 With Bottomy clase to Brothy we ment over the wand route. author hit day & mue or live influent. Over 60 plants paining frehen home, proceeded to the sping and then around to main road, It formed gente interesting 4 With alle to hit Winave, another alone thing day with chowen. We took Colubi an can to termin the west mer would route to the ice pand. We ate our bunch in the work wit of the ford, Which we were esting we had a chown. We then shilly to the take of the Cuti Bay with and I visited the award when almost a thing of the part no ordinde were founds. Ly simachie in full bloom. We took

680

to route paring the would country and weeled can on top of hill. a number of intenting grown were getter

8 With mip Bucher & Mip Green to Look Raven. We met at Town a

9.30 a. m. The morning was delightful; the hot afell of the early fait of the week were broken Thurley and orthod the followed by fine wol weather, the themate at 9 o'clock rejected but 58°. 7 % juted guite a number to the advantage of the fine day. We so out at one for Hampton then though the words to Print dense We really the stream about now so ate our buch. humbitely

after bunching I evented for Equitor - but were communiful locating it. We now took the week water to the fork of the

path, This time I thought we might try the right fach; it follows the street or I hoped might bead durthy into the onlige; but it would rether about at an ofen field. It was not at all have

We run punched out the road to the affle outed, then die our step touch the ravine. The try though the raine was me

intenting & enjoyed my much. Ofter watering the look we follow the road way down to the station. We we surprised to for

the lehe about emply, We lead that this was due to the bu

of the non dam, popular for which are am going on. It is clamed that the content call for its complition in 3 or wall

days. Own low plants were found in flower

9. With allen to the stream & or for on the oping. The aftern 1683 drus of. Swamp agale is non in full bloom

10. With bottomy clase from Bonnie But to Frankle Red and theme to Walhah. The afternow was breatiful and the try ten 1684 out well and me will attended. 80 plants were find in flow The best find of the day wer the filing of remaind plants of a

laye Sem 11 With aller to Herring Rum. It is getting warmen. We took 1685 the usual route. I was confused to see Mouletello about emp its surface was 15 ft lower than wouldy. It reams to me the building of the dam just at this time that in atating it just at this time grite fool- hung. The water at Loh Rom in so mun

that they do not rent it to the remise. Took - well one it

1686 15. Uf the Sarrafur river, It were a cloud, minting & raining of The boat left the what at 9 a. M., made its first stop at Bis tow, It was the criticalin of members of the bottery class to get at Betleten and await the return of the boat. This would g of the weather we decided to stay on the boat x go up the rune, which really were the best part of the hip. We get up to being about x did - little buteninging. In the about time that we were there we have the but the about time that we were there we found 53 plants in flower. We return to city about 8.10 P. M.

:87

25. A trip was planned to Soldier Delight with Overhelm.
Rain during the moving a day fronts the carrying not of the program. Intend of going on the Davings Malle, I get out of a Partie. When I get not the care it was not reming; I presented entend to the first row (Old Partie R's 1) the court would along it have by aware when I care to the old framelie words what were generally go though on one of one bottomy trip. On way I private a wife of heart of the strip was given intently themptont the stretch which is more a love wordy. When I would then families would be disclosed to follow the path we growth the own one trust though the nature I would be not the path we growth that the west goes would find in more a little of a working that the west goes wold for in moment able obstable but I managed may mind to get though without as working and in He follow; the root, they Buch a should need they would read they would be to the follows they are the long with the rate of the forking of the root, retter they going the work rate at the forking of the root, retter they going the work when I had they he had gotte an intenting rule ruth longer than I had they he had been provided. Mand of the way in part the sum I had they he had a part they would be to the part they are the longer than I had they he had a part they informable.

1688

26. To Cherefulu Bend with Mif Smith, site x win My Band Mif Melle Me ant My Benden Mif he Show, Mif 6'heill We and on bout which left him at 10.30 a. hr. We reached the head about 2.15 P. Mr. It was my intertor to go along the beach but the title were high and we found it return difficult to come durable me therefore contented owneder with a trif or for an the fact boy block of the bluff, are me had to go through gent a large blocking path this was not a very pleasant condent along. We present for a about doit our then found around and make our way back to boost. Over 60 plants over found in bloom.

1912 - June 26 - July - aug. 24 234 The trip on the water was delightful both going down and by daylight. On way but we had much enjoyment studying the lights of the lighthoner. We were some distance on the home statch where we noticed the affinct of a storm. The clude were very thattening and may pure became frightened. We he raw ram. We learned that the bell buys make curve in I channel. The view of the zen but at night was intenting, repid commentum were being carried on between the both by a of eigenful. Two of the bouts were men fut Cerroll and two more were at Caten hollow. Whether the bouts could see with other A that distance I am not certain. The of proch to the city wer also much enjoyed. On account of the demokratic convention must of the high buildings are the net. We realled city about 10.20 P. M., 29. With allow to the oping. The white topped cater we not blooming. Allow gut a min bougast of white topped cater and charles. 1689 5 With all to Roland Pack company new territory en 1690 of John road. We watched the steam shoul, room the spin near the house when so many people go for water We went though the words to Chesters till the the of Old Joh wend to Subular arome the right our to the steam shoul, Returning une come out at 39th shut. 6. With hellie & alle of Stony Cuch. The day in hot on the water it is girte pleasent. The bot beaut the water afternoon at 2.30, so realer the best of the circh about 1691 50. M. we were home et 7.15 P. M. 10. To Bay Shore with Sunday School. It was a warm still 1692 day . - thunder storm weather . We left home at 8.30 Q. M. and er at Boy Shue about 10. We found a place new the chare and h the bruge was delightful, most of our time ever afent right have on show. Towards 3 P. Mr. it looked like a storm were coming. heard the thundow but with standing there was no rain for an I or more when there was a little rain. Towards 6 P. M. V and I touch a little walk along the show and I wer plus to find a num Lyrimahie. L. onlyine. It were to become established there. It was needy & when we took for home arming then about 9,30. 13. With hellie & allen to Woodlaw and Georgen Och. The trip were quite a vive only but nothing partialarly a tenting was observed.

20 To Cherapula Beach with hellie & the boys Will & 694 Buthe the west along The trif was enjoyed and when we got to the brush we took a little walk, him was found in full bloom. 25 With hellie & allen to Little Chaftanh Rimer We 695 stopfed first at Lowis What on Tilghman Island, then we went to the Little Chaptent & here we stoffed at Wilton What then at Ross's & let at Speddown. On return we stoffed again at lowing Why. It were that people can go for It was 10 P. Mr. when we arrived the What. 27 To Lorrain with helling allen The trip was get an intenting one, but nothing of particular walne was will as flered 28 With Rombogh a Reve to Bare Hille. With expland 596 697 a few of the caver, come extend into the ground quite a dictame Telinem was found, but nothing new in bichen. We met at Int. W. about 9 a. M. returned home by 1.30 P. M. 1. With allen to suilford. We watched the trench digning 698 machine for some time, this medine was digging a trench 5 feet deep 18 mile wide at the rate of 14 inches a minute The place his being out of and levelled and reven laid We speak rome time watching come musty laid concerte This counts were certainly not much row a few weeks possibly day old and it we already like which with. One of the wer I am engineer I stated that concrete gets a little haden who years for 30 years. The work going on it most intended this is the 2nd or 3nd trink we have been there. 17 To amepolie & West River with Wellie x the boys. Buthe x Will accompanied us. The day was cloudy and it lowhed like then would be rain. There wer a strong breeze from the east and the bay some beame quite rough, reficielly so at the entern of the river. The boat rocked very much as we entered the Seven and even more on we entered West River: It was 5 P. M. before we left annefole the trip down the Balto having better 3 hours. It was quite dark and Balto having between 3 home. It was quite dash when we reached our but bunding "Chelle Pt" and I concluded that we would not be attle able to get back to the city at 10.15 the time advertised, It was after 8, when we got back to anufile and 11, 15 before we received home. 24. The first rul trif this runner, Left home about 7.30 q. hr, in 700. time to catch train at Town for Baldwin, arrived at B. about 9 a.m. The trip wer made to learn something about the

Som a red for cease the tracks wenter woods between the tracks

country along the Little Sunforder. Baldwin is about a mil from the falle. I started along the backe, found the woods near fulle most interesting and well worth visiting. To-day I was refull with might observation. The bridge across the Little Bun. on to Land brown. Here two, there is another by trend. after whing station I proceeded along that gind a short historie forther than intended the words on my right. I descended the hillinde the brook and then followed it. This was no eaky unduteting I was surpried to find so much aritalochie Serpertain grown here, the fruits had already defined and in their flow were star. shefel - six-rujel, appearmen. On the with I found much S. querizam There were some with lichen that I would have to to take with me, but I had forgotten to bring along my chieb. ay much trouble, I reached the road. I followed this road down to bridge where it forher, one branch following The river the other as it and going on to long suce. The country round about was so put I dended to investigate. I ate my lunch at the bridge, after while founded down the road following the stress. This was very into ing and I found reveal place when betom of intent were to be had I only my chiele. I exceeded in getting off one species, Bre or Rivalue, I don't know which after investigating the road a co dutame I returned to the bridge covered it a preceded down or the right bank. Their once very intenting but it were not taken one in the duration I wished to go , no had to ratify myself a a short trip. I returned and proceeded six the stream. The recovery along I follow the strem a short distance then turn to left. It we my desire to go along the back so I desculed to the el I had not gone for when I found myself in an about in here ble thicket, I decided, however to proceed, hoping that I would so find some path, Not lay after I did find a path, but it led to the afring. This was most walcome, as it was first water I h touted wire having home. Leaving the afring I started again along the bank, for a time there was an affect path, following it, a brought were to a ment interesting world grape autor. I have no green but of the rife one I fished in less then "Iz how good "he fuch backet ful There I wraffed up in memps," a them started to wade through the undulud. A shot of grafu, I was now so havily lader that further progra through underbuch was out of the question. I: made a

way up the belluide and fortunately came to an old wood road. Before founding father, I decided fait to investigate where the wed led. I'., but my graper on the side & proceeded furt in one direction, then in the other. I cam beaued that this old would road led up to the main road, I then returned I went in the other deveten a found that it led to a one time zero will, The read to the point wer fairly good but bey and it your lost thely in thehet & underbuil. I!, mude up my mind to take to the road where I cutainly would not be handicapped. The try now was of bee interest but aprecible and I room reached the crose was which took me buck to Baldwin. I erried at the station much ahead of home but in due time the train came & I was bought back to Toma. While asserting the train own intent in a down her foreigner. He affaitly had going to Undie serbie in the day & their got his load, he bounded the train & were on his way buch to his home Believe, when he were fet off at Balding are he had his return tichet in his posthet, I am in clied to this the best have fait it when the conductor wanted it. Be that is it way, here he were it B. I wanteted him for some time. Out first he rested alongwide The railing truck, he then set of an if he had unde of his wind what to do. Presently he came part the station, carrying in one had a large bottle, fremally filling with brough, and one his shoulder as reach, he pained the station then suddenly stated but their time going to the reac of the station. Just beyond the station were a few care on a side if he and the truck or went to the rear of the can and proceed.

I down along rich of them to a point officte one he had

reached a few minute principly when he again turn and

again come of along the new of the station and this he

did revuel terms. Finish he stands in the new of the stor tion, off with perflexed, he will a few tefe in one divition turn, rection to one divition, then another, then turn complete by around a gove down the wand to a tree, when he thrown havily down, no doubt to sleep. 27. With Nellie a allen , Charlie Knother to Herring Run, alle wer ange

27. With Mellie a allen, Charlie Knother to Herring Run, allen were and some to go ewineming, so we decided to take him to Herring Run and on Charlie was out for the day we took him along. It was much 2 P. Mr. when we lift home. We took the wend route. On the way through Sarutte found many blue berries and some hushleburing I was pleased to get some white price seeds, already must

of the conce are open and many reeds have already follow out, we reached the reew in due time a aller had a good time in the water. after a short ret, we started on return trif arriving. aboutly after 6 o'clock.

1702

shortly after 6 o'clock. 28. a trif to Bay Ridge and armodel on the Bay Left how about 7 a. M. in time to leave Light St. What on steamer Com Between at 8 a. M. It was 11 a. Me when we readed amapore are afficiented amountable, the maneuving of the codete the Naud breading attracted attention, particularly 20, the behavior of the anoplane. When we fuit raw it, it we in the air, but prently decended on the water, when it were equally at home, flying from the water or on the wa surface of the with war something mervelow. Orinis. amendon, I set out at once for Bay Prily. I leaved the foot bridge that allowed people to make a chart to the rest had diseffered about 15 year ago and he never less rebuilt. The only very notor to get the wee you crown the head of the creek. I bearned that in a by after crossing the Entfat bridge, I head to tome to the right at the first crossing, at the west crossing, I had to the lime to the left and then fruit cally remained on the row I away that it was the same wrate I had take the frame you party to the remained of we had hoped to me Be Did to the grant when several of we had hoped to me By Rife. It was noon when I reached the sulvoid I kept on, at the foling of the word I inquired which John I had to take for Bay Ridge and leaved that it as the left hand one as I surrived. There was nothing now to do but ringly follow the fath, The path a the trub twie more and then you along the bay she to armidel on the Bay, at the lest crossing a pack fork to Bay Ridge, but it is no overgone that I did not it infortant and so posed it. It was 10' lash when I's the begane Dreamland going down the bay. Often kun h I proceeded ownered along the shore. I soon some to the may remove whom I mit was crabbing, he rund a very reportable for living at alexandrie. I wow went along the path which wo trought me into servered on the Bay. Harry a fuller for will be found, right on a high whatf overlinking the Bo

In efite of the fitty location arounded on the Bay is a big film brought about with the downfall of Bay Pilye. I find the second have been flowingly I continued about the path which were the entire length of the place until I see to the which were the which it about it about the time to relie . On the stewn trif I heft to the main and a fith entirely and when I would the natural tracker deaded to go down to Bay Pige. I went down only as fan so the founds then started on tip tack to Suncholic. I thought I would like to go along the tracker, but they though that I could have gotten through a (a ching in said to be along the transler not for from the view good). I left to the main road. Level of a sping just after two log years trees on by side of the read. Realed Constin a little before 5 P. Mr. had come time to went for the to the what 6 when we left for Buts. It the what of what 9:

31. a hip to the cine. On I had come business with Dr. Base, it was about that it was menty, P. Marke I bould can at the University for the ravine. Amid at Catomille I took the result water perking Valiable. I found a flew to lunch then continued on though the some. The charge would can't copy we not to my likely. The plant seemed at and alaba, the dended cut with its distry contests to me abounding here, I got the first the beauty once abounding here, I got the form 40' belse then cannot the win it was doubt the fact that the sate was flowing under it was doubt of fact that the steep definite of cite. It is infining lower much been tree defitted in the short time, in some flower 8 to 10 fet def. What about the receive we want that the city is hilley to both Rome? It was not juste 6 o'clock when I reached the can tormin. a chost with and a can come aby, have I fee 7 P. M. The weether there part few days we been must yearle. He everige are gente cool.

4. A trip from Roger Fage to Whiloshi and then home Lef. home about 9.15 a. M. . Hand U. just recovering from an attach of boul trouble. Spent rome time on his place looking of the st and there. Left the place about 11.30, forceded along avenue to the mi of his plear and which finally hought me to Willem Rd of month of Hamilton an. The trip was putty nice but afforded not of particle intent. armis home at 1.30 P. M.

5. Timornim Pair. Nellin allen ~ ). went to T. to take new can to the Fair Grounds. We evailed until nearly 2 P. M. when an mobile brush came along. Suring that the possibility of getting on ele cur was poor are got on the truck which were tack went to is ground. The trip was anything but pleased on account of the of ruing the race come first of all and we stoffed a little while long enough to rece two race. We then went down to the boothe, the falin, the farming influente, etc., ite, then we visited the so where the various things were on exhibition - the cornegie bounded. chichen, him stock, etc. It was now part 4 o'clock and we dre it about twin to start homewood We left the railway side of it ground and went at once to the new electric can termine, bu again then were a layer crowd, we ! forceded to Latherwill and of the collye. Her two we was not by Mr Krigher. It we be when the train came along. Annied at Mr. W. we again had a council to centered with but finally reached home a little after be with aller to Guelford. We winited the various plan of in but what interested me must were the new way of futting tog seems pipe, the small 8-10 in terms cattle pipes. They are me

fut tythe and ruled with tar - the tar being und the a way are had in solding tyther won water fife. The forement that the ten is more double that them anything also trie 7. With hellie a allen to Owing Mille, We left home about 3 1707.

P. M. had about 15 minute to west for the 4 o'click can. We got.
Round about 5.15 P. M. just in the midst of an appending storm We cit out at once for the administration building and were in it but a min ater when the storm bysen. The wort of the storm were some over and then we no longer any rain when at 6.15 P.M. we get into the case

1708

12 To Luthemille and hack Raven. The day was ideal. The first has of the week wer very warm, nighte unmelly our but gesterday then wer charge and to-day we have a pefect day. It is the day relicted to Eprenth Lugue for an excursion to Cambridge and it wer my interest

to go along. I arrived at the what 5 minute before the back was to lear, getting off the car I were surfued to are a large count at the whif. At fuit I thought they were only awaiting their turn to get about, but soon bened that the bout was filled at fint den mer talk to I another bout would soon be in red non to take the net of the people, but it found to be only talk. There were the quicking then how but to spend the day Fruilly it was decided between hip Marine William, hif ame Bax to and anyulf that we would go to Guthevalle and later to Look Ram Two other believe were also to go but one of their decided to go to Washington united. It was 10.30 when we needed Towner and left T. .45 miled at 10.40 the can to lutherly wer exhabit to live. We took the can a unjuged the trip in the new one we the new route and it I we possed though the town and then along the hich to the words were Timorium. Here we ate our dawn. after drime we writed the apring , as electric can come along about that time we headed to go bush with it rether them await ite return which would be an how total. We realled Toron at 1 P. Mr. pand though court home ground and rested under the true. Leter we went to station in time to take 3, 43 than for York Rowen. armid at L.R. we went at once to the wite the new dam. The place now is really an eye some. whether the sanitary condition are good or not in difficult to very, they certainly do not look good. On unfortunate put of the whole affin is the building of the new dam show the fruit one. We spent some time booking at the grang below the daw. This spot which had become grown over with every and decreted with waysen is now town up and the trees cet grante been gotten above the new dam and this pet of the look below the dam, not moved! We writed one of the a spring here family water for the men. 6 water boys are implyed to furnih the own water, It was about 7 P. Mr. when we started back to the station them to await the train but to Town. In du time it came along out by 8 we were buch in Town and before 8.30 I was home. 17. To Sarutte & we for a monthelle & vicinity. The day is ideal Became ginte interested in several spiden and watched them for com time. When an inset become entargled in their web they quickly

run to it and in a few moments wind it up in net work of meh

which they afin while turning the west. The insent is then completely

Primare. Second a let of them, wetched men on weeking engine for a can back on the trucker, then welled along trucker into South Bette. It was cloudy and it backed like we would have rein

1912 22 P.M. With Mr. Rowley & Wood, to Gulfars, Chila St be the and Homewood. The trip we enjoyed, expendly to post in Homewood to the botamical garden. when one growing many ex Reliand home about 6.30 P. M.

17/3 24 A day of rain. (More rain fell this day than for any day in a your according to Weether Boncom. 5'2 inches in 24 home). During a morning it found so I decided to wait until the afternoon, but rained mit as had, so decided to go, frefaced with boots and unshelle. Visited the lote south of Caroll Pah for Ounther beining. Returned home again as rown in pariable

1714 28. To Egle Hill and the Magnethy. Left home about 6.15 9. Mr., a time to get the 70'clock boat for Ruch Cruck. Rewhet had go cruck by 9.15. The trip on the water were braing. I ret out a one for Lake Show. On way rewal rome hicken off of rand stone or roadcide Reuhel hake Show about 11 6. Mr. I now were on the look out for the road leading to Eagle Hill. Seeing a word that offer was right I mathed along it out to find it led to a primite home. Hearing a voice, I called out, but as me one came to door, I without up to it, and was comprised to been that the I head was a woman at devotion. Whether there were a litt

atter near the door ) amount eary, but she was stending there with fun book, praying (?) all the time and not withoutending my interruption. When she was through she kind the book a norman bu of time then came to the dow. at first I thought she was Italian and a Cethlie, but when she said she did on work on Saturday I thought at once whe was I them. and such letter I lund che was The war most pleasant and some hierted me right. chowing me when to come the field to get to the other road.
Reaching it I had me further trouble. It parced to negro charter and the a raw mill and then entered a most interuting wad. I was on Eight Will before more I decided to go in to the run and before by realed of a country. There by my hips me was the pathy Myothy, I now stated on return bay, Rushing laghe there I found a place to lunch after limiting started onward. On may down luned that the word point by and the shorty land buch to ZaheShow, so dried to go that way, the word lish me lush to hat Read some distance this side of the willy. On my met a brune, of whom I ingrand the way, are he was going but home our route I would take me while tyther for rome diture. He did not think much of the forming condition in lame andel, in fact, I some row that he was grite a personist, mathing it all wer night, ( the him just when the west made its first lover in a faily nice looking home). I soon soon that I had plenty of time to week the head of the creek so de attend to take it slowly. The day had turned out must perfect between the tends of the week must have an how alred of time, The canney has is now it full blest the but findly came and by 7. P. M. un but to what. 29. Rim this morning. Swamed as much yetherday wing on my home the run in cathing bothed to red and the wind come for month out. One I failed to get aprime yelonday on oblight to go this morning as aparted tip of Ept. 24.
Stated right after humbfest, returned before morn. 1. To huthwille. It was my intention to ride to I. but I rewhat Towon just a few minutes after the can hed beft. I therefore welled along the electric road. Realing Enthuntle I was on may may through to the station when I must a man, a stranger who ingquid the may to the electric on later I learned that he was E. C. Lotherington of 25 Charles St. Westfield men. He inquied about the size of Towson and Garane. I Carned that he was

15 To Tome Ble Eller, another perfect day Seemed put of Tulif him, Sycamore, etc., etc.

by 8 P. M.

245 723 19. To the Came, We met at It Thomas Church Lane, a futty day but a little two warm. Hollowing in party hip Saul. hip hund my Smith, Mit Doyluty, my Port: We found gente a mie bt of clutheth 20 To the spring and later to Chatent Hell a benefit day, Seemed fruits of Rose, Hong Locust, Bu bish, Biden ite. 22 To Katherille by way of Town and though the woods. 724 725 Secured some Springgra, Bushmute ate The day was very warm, and humid. The trif i was not a very pleasent one. Proceeded as for as termine of electric can at Trimonnum. Returns how by my elutin can. 26. To Sentime, them to Marly bridge. In faity were Mint Port, 726 hip Saul Ming Masham Mip Burn, hip o'hill. We hoped to lum Counter station at 12.30 P.M. but lund that the reliable were changed. and we had to want until I P. M. We reclad Is about 1,25 P.M. We took the old route down the track and then through the wonder I was very much surprise to find that the new state road now went through the words and along much of the old path. We wish the road at the home of the negow that had the eight. From him, I inquired the new route to Marly bridge a board that the road went duity to the bridge I also inquise the way to Obrechte. Notwithstanding the direction we got on the wrong track and a number of Polish children deaded to show in the right way. The new raid, followed the old feth, most of the way and deflected from it only a short distance from the bridge, We preceded to old bridge and then to the spring on the hell rich. where we are some lauch. Burin the year have been very abundomt, those on the Mex outsell to in the swamp went the old hut on the cut side of the bridge over must beautiful and we hoped to take them along but that the old colored women and the used them in husbing weather. Perturning we took the del read as we intended going to the Climbing Bitterwood place This we did to found the fruits in profusion. It were 5.30 when we started on home started, deciding to go by alet " of ditame when hip O'heill discount the obst

love of her earlel which contained her tribut, money and func. nothing we left hat to return over wate a book of the the most of the follow were pretty tried it we decided

that my 0' mill & I alone would return a sent go on to station. We have the testale just could a fortunately had an wed young all the way, & a stopping plan get about the way the let atile were found We est more steeted for dalion, went it jet it is min. I have of their time and were guite compried to fee the next of our faity still amenting the treen, they had just musical the certain train x had an how to wait for the next. We reade home about 9 P. M. Cender about at 8.10 The day were collected by name, him at 711 S Blower St. own in South sent Ballianne who were getting much roome. He had guite a large broket full. The had started from home at 3 G. M. had walked from home. Lum from him how he tested him numbersons, he could then remain smoothed, if from home they time these. He ceemed to be guite an enthries for grafes, wild chemic allow them, it. The older bornin was much with comin, the walk change it cordied, it, it, it . He is a market it by trade.

The day is which.

1728 27. To Franklin Rd from Window Rd to Dicheyville around Winhard. Took can at Dichey will a promoted to Brokey where recent Springer, Enonymous etc. Returning at the at Remaile The day was ideal. Enonymous fruited in greatest profine.

P'd a visit to the Saigher true which two, are mindy fruited, to

1729 2 From Cany to Lock Rawn. We met at Hamilton at 1 P.

following in party: - Mip Sank, Mip M. Sham, Mip O'huie, Nep Smith
Mp Tumblean, Mip Morrow, Mip Cannon, Mip Daylety. The day were not
raw, the cum preparetty holder by clouder, a try find homelin day.
Due to the weether, we mound a little fection over the route and
an a result realist 2. R. in time to go home a 5 o'cloud train
On way out blacked Rd we stoffed rewell times to getter
Perrimmen which are quite plutifil. a stoff wer much in
onched for from x affler and one for bynum of Robinia
Whe we reched the Genfounder we collected some welves
then stated as joint of the rivin. Realist home before 6 P.?

1730 5. To Dishyalle, Franklin RI, Woodlawn, ite buch to Dishyalle armid at D. I promed town home. The morning are ideal - a bent, election day, armid at Colonie Poak Cetate I examined the chair for Water met but found nome. At one afort were a fallow by, have I ate me hunch, I then proudd town Woodlaw - I motered have any much out of perferoduile over the stuple on the church, it bake as if it is hirly fall. The trip was with smoothed

1731 9. To Swam Creck, We met at ear of Light & Balto. St. at 12.3
The following were in party: - My Ken, Mil Smith, My Manuel. Mil Sauch.

6' heele, Muf Caren, Muf Came, Muf Backer, Muf Whiten, Muf Breithwaite, Muf Brume

in Mu Nufue. armid at Coule Bay we took and route to Sura Coul

It was a windy day, but or wind were behind as, we made good time

Simul on may. Bithwaret, Pods of Trumpet Doing, Pods of Dybane,

Itofu, Sweet Bac frush, ate. Cefter vinning the min. Mu Neufri.

Muf Whitey - Muf Backer started on return trip. The rest of postly

now made a trip armid the behing we went some distance the

recens a futty fath we decided to follow it. One way found many

germinating account. The path brought as buch to read which we

then followed back to care. Vern & Jufit were observed in

western shay (Conjunction occurred on 7th).

12. Visited the pande near Carroll Park, then proveded along

17 32 12. Visited the pande new Corroll Park, then proveded along railway truthe to Pumphage then to Browblyn and home.

The day was ideal, rather warm. Second a view lot of Come of the Catalha along the Shatlane breaks - the pade of come of the hero were momently long & twicted, Armied at Commelle I entered the woods rether than heeping along the road. Friend at one place gente a member of genericating acome containing 2 and remail containing 3 embryon. I also visited the Printy him the thirt time found the fruit (rede) on the

1733 16. We met at Town at 1.30 P. Mr. Toolowing were in party;

Mr. Mepin, Mip Bucher, Mp Comm. Mip Munof Mip Ken. Miser Boarme

x with Mup Lecter Mip Breithweite. We took the cur for Luthweith

there prouded to back of railors and The words were inimum.

The day were delightful just right for trending. Peturing we

walked all the way buch to Town.

19. To day divided to look of Walter, which for some recome on other I had getter the idea was a Reject less. I willed class to book of the bester of the societing serverage differed place of Gomes. I i, made my way at Old Joh Rod a Reddy lang amind at the termina of the little arrange, I observed just below the school, home and a fath buding mathemad. I forthoused the jeth across the field, finially coming to an east a cust arrange when home were being built. I have I must am old means, when told me how to get to Rejecte less. I can to follow the cement parent entered until I resulted its bernain them you downthy math, when I would come to Wood-burne less. I have I would fine a place someonded by a stonwall I want the to be must have meet to the right, as I beared letter on my homeway trif - had I gome to the end of the stonewall by turning to the right. I would have

another intenting thing was that the place with the stone well (St Many) were the place I were looking for, I however field to recynize it, an could I think of the name of ite owner. It was is for the reason that I finally found myself on York Rd and on the way to Rejute lin. My inquisin regarding how for out Rejute lin. were, were variously answered must firm did not know, finally I was told that when I revoked the When I get on it, I at first thought that after all this must. the avenue I was looking for, but as I went ouward I deader that this were not likely. at any rate I keft on, I found is intenting. at one place I came to a run & here I turned in to the work & ate my lunch. after lunching I heft on and rom came to Register and, how for rome reason a other the name Water's came to me and at the first cottege. muse enjoying and here I leved how to find the place by time in at the next areme just a stone theor from the how This arem from a tenting & I noted severel flow worth ! recognized the lake at once. I proceeded diretty owned now croced Woodbrum and continent amund to a some of home which I believe overlanded arbigton an I have decided to try booking of the seways flow ro tomes westward to the must arome, when I met a fellow putting of a new fence. This areum led down to arlight an right at the chiem. In visited the Sewaye Desposed Plan then make my way howen 23. With hip Link, mit Burn, my Letter, hop Soul, my 6 hil a hip. In to Walter. We mit it Woodburne am at IP. M. The afternoon we ideal and we hartens award to Et May. armid he were visited the ground expendly around the home x found, and fad expendly attention to the energeen. An hick jumper new the home in fine, We, then must to the lake & have we met Mr. Burn who took in to the greature. We found Mr. Bur must intimating - among the intenting things he told were the grow (germenting?) of little form on the fall at at top of greenhow The spin are served by cornecte of air to the palm & has they primate. I we also intented in the grape win wide

1738 30 To the Percinemon Place. We met at the termine of dis Wilking are car line at I. By. and there took are for arhae. The following were in the party: - Muf Moret. Map Sink, Map Bis Mr Todd, Mr. Wigger from Unimity, Muf Lette, Map Since, & Map Bushen. Armid at arham we took the annotante to the river on the way drawned Sympodial & Monopolial moder of growth. We were surpred of the new home built at Ringe We clouded the hellaile just beyond and and Sentin Place and all one displited with the party main away the cedar. It ed for cedar affler but failed to find a single one. After an search I found my percusion him bedon as usually with you fruit, lifter a clust report we began on descent. It was getting dark a the descent though without a mental. The task then along the Rim Rix of the Cetamille one soon underline and we realist the case demand a little before To'clale. The day are which.

1739 3 To Ben Run. Day perfect. Although it her being grite a la while rive I had been our this route, I had no trouble friend the place. It was mut intending and yet mut are much nor as I thought it formerly over, but what the difference were or or cand it I could not learn. At any rate it is worth one again, I proceeded along the Rem for some distance. One or two opening of Zumm marrouper the Many cup Och were found.

1740 7 To Richy Point, We mit at Balto. " Holiday Sto. in time to take 12.30 car. The following were in the party Mig Enter Mip Burm, My Smith, Mip Munch. Mip Burhan, My Sminon a My Grein. We reached the road at 1:30. The day was cloudy, a little raw, but not drignelly ro. We reach the point about 3.30 x remains the with about 4.30. Holly in finit one our but find, one featured afremin with amouth learn on affer branches a sping over on bowe food very intenting x reuned wasser the stonic teld about the holly in Eigland. The red ced in full finit too was intenting. We got but to the car line by 6.

1741 8 With Mr. Ronlagh, Hall x Cowell to the Bunforder. We went not Dalay Vally Pihe to the rim, the along rim to Lock Rown.

23. With Mif Late, Mip Busher, Mr. Doubak a Reinde to Warren. Us mut at Pomme at 9.30 a. Mr. took cluther can to Primarie. It a breatful crief morning, not at all cold, We rested ? And 45 minute before the tree was due, we indicated at the distribution and but little me then '2 minute, the well, We must be would of the train and about out over the would reste Warren. Overlish a Reinste as intented in bankry so we were treated to drientation on calist, queryte stempt (?) it. I will pleased to have of the stempet. We under Warren about more Selectly - flow just below the dawn on the own hard the formalish of the boulash region and the recent of four for drienty. We returned one same rate maching Tops at 5.10 P. Mr. The top bone was quickly made the time can 5.28. We get ff it Timine and then to be to Town I was how it 6.15 P. Mr. The top i', for Tayer how cannot you make within 50 minutes.

1748

Leavy the rower fall of Christian are and which still lugin with an most of our mention failed to offer. The tip make by his most and myself. We took to wind note to the purple have and then to the rime. The mode at beforts were give modely but at must place guite penalle. Neither were there so very much more in the woods, I was surprised how some bad diappeard. Returning we went by way of Rut and Make

1749.

but diappend. Returning we went by way of Rut and Make 31 With allen for pine comes. We went as for as Gamethe then of towards the Spinghouse. The man her displand entirely due to the being rain of yesterday

1. a beautiful day, ching like no true of anon anywhere. Thermometer our 500 car ride to Towner. 2. To Paturon Park. Paid a visit to the consumatory but 750 3. Ruite a day of monds. Sunshme, Shower, Wind. Just life own, about 1, a.M. we had quite a chance while the sum was shining, a beatiful rainborn made its offenme in the northwest 4 atrif to the viently of Middle Pine the weether again 751 is weld. I went to the terminal of the car line. Could the rin and proceeded out the road, when begond the railed track I turned in to the right and followed some of the paths towards the shore. Here grew much Mitchelle, some infinity fine Secured around fine pine of Sarrifor met. 7 To French wad. Raning day Weether warms. Seemed 152 Hepatica lesons. 11 A trip out Liberty Heighter road to Governing falle the 1753 We mit at 1 ? m. , the following were in party . Mip Buch curved that my Ken, not teste a my Brithwite. Unother warm day. - Sympodial but, but it is dul weether for the below, the would way the befolie. We enjoyed the troup ony much. Seemed a few hoften have but no algaer. 754 14 To Brooklyn. Skuth Celly flowing. Vinted the raine, Weether to-day a little more remable, but warming of. Returning welled own the bridge and visited the lete in routh Balts. 18 To the raine. Met at Catamille at 1. P. M. Expected to-day to have a feat or 4 weeks ago. All morning it larked like rain 1755 on a consequence My Burner & Mip Breath write once only two that came, but myself. Wellie x alle. We wanted until 1.30 then proceeded out words to the oping. We rom hel on fue burning & in a little while tented bed. alle agriged outing very much. There was me rain & weither 1756 19. With Mr. Rombough though Santti to Willen Rid, them to Regarder an The day we ideal, and from the number of people seen out, one would think it were do day in spring. On way out we met one of the some of the milhone Inlife who him on Hille R'd at Rigide an Remembering Mip Herron, I asked but ofe, if he have her, and learned that he did. The know her by the name of aunt "Jin", he had never been my close to her, became he was afred of her. We prouded out Register an water we came in right of Mip Vermi whach. Sing a fath hading part it, we take it. We saw make coming out

of a hole in the order of the home. On we pared the window, I head women and them a kind of noise, or of comeable were trying. get mit to are who was paring. We! stiffed a short distance o. the don & rue worth hip H. perfed and. I said Homeday you do, but when I can closer, she recognized one. Just then her sister Mr. Dutton (!) come one and about at the some time her mine (hom ), there were attood when all around, and high seemed glad that to eve us. I rown haved in the come of our commetani, that the writ of how. 23, had been a enemo. one to her, and before I left she asked me award time to come. in the oping with the ledin. The wine were anxim that her aunt e on the painting of the tigue she was doing for her. at fact she a oh now" but later after some coaxing she brought it out, a type is the act of afringing or anching of some frey. Mr R x I both the langht it well done. It was not get finished but, on I have as what we done looked fine. Her afferme were a slight information upon that priented town how 23, then, still remained however, that untidum, which is doubt is now about part of her It was again about row down and again we had the fiety view of the sun sulving behind the been. In R though that would make a good only for her to paint, but the raid, she only earl for regged preture. We took the wite toward Woodham and then the with acres to andungton an. at the come of artister an & Old York Rid, Mr. R. by me a I fraceded homewood. 21. across the country to Dried Will Park. I froud out 39th St.

1757

21. Across the country to Vried Will Pooch. I forced out 32th St.

to Grunny, the day many to Many on the best to 39th St.

I then heft wan, it wifls into the Park. Then though the park to
the Sea Times parter. I would the part for Chee but the
Chance of finding & any was very chim. Paid a omit to the commentary the
elates howard.

1758 25 From Browhyn to Pumphage then to leder Itill a bush to Bush We mut at Balto a Light Str. The following in in the party: - Mip So Must Smith, Mip Morrof. Mip Burne. It was 1.30 when we reached Browhyn. The day delightly word, and change and challen they alm but another much forthe forther. Torreson der home, having amplicable in for I change to the try had it must been no muddy would have been ideal, to a to wer, it was a tester trying and tried in it consideredly. Stand a cinima in all the glory, and the prob are filling in the Springers.

1759

28 To Browhlyn for Symplocarpun and Spirgyne The day was me pleasant nothing unumally intenting was observed. Second whijomen reverel form. Ormunde, Woodwardin and Ownles for hitelogical work.

I a blustery day. Wind way keen Temperature !, coldent for the server 760 We not at Vyle day store, following were in party Mif mung Mip Camme, Mip Burne a Mip Soul. The try out What was quite trying and we were gled when we reached the woods. We turn in at the run. To day we deaded to visit Brighten new but Hufe. no we followed the little me of stream, the trip to the real war must intenting. Skunk College was found quite plentifully Brighter, then along the railed about a mile, when we took a fath beding to the road to Villa have. This wed found quite intenting. We parred an old centery (coloned?) and get beach to the can about 6 P.M. Meple found in blown. 2. With Mr. Rombayh a Dr. Know to Lake Mortibelli 761 The day is ideal, quite a contract to yecloday. We went inside of the Bate Home - the chlorin ating tent is now established been. The water from hoch Raven pour though the Sate Home into Yake Moultelle, from whom it can go to Lake Cliften, on it can go directly from the bete Home to Value Cliften It was 6 P. Mr. when we started homewood, though the words Verme above bulliatly and the shedow of the true were must forward. Reiched home 7 P. My. 4. To River Side Park and vicinity. athin coating of somme on 1762 grand. Vited the grew home, record species of Palm and Ould rotte. Externi fution going on in pack, enlarging the pleggench. 8. Within an terming, truly to the beach ramie. Following 763 were in the party: - hip/Eur, hip O'hull, Mip Cannon, Mip Smith Dr. Known. We took the usual route by may of the Helithop can and them Sulphu Sprig Rid. We intered the same as a former occasion at Cilimite an. Couple couch were much for evidence of early ofing flower but with the exception of finding the Hazel in full bloom nothing much the bule of afing beatly and hepatica were found. We again accorded Bull Run, and had been difficulty than I anticipated as ice were very much in endince. Reached Celemille about 6 P. M. and home by 7. all plend inthe the big. 1764 11. a raing day bround fuzer. To Franklin road for opening of aspidum a aymile. I wan found that there were fewer ofenine lian I had expected to find, however, I managed to seeme round ofermine The temperature were mut at all cold now the trip were really plunat. 15. We mit to-day at I familton. The day were ideal and the follow ing availed themselves of the opportunity: hip hand hip 1 cm, hip Bainer.

mip Bucher, my Breithaut. My Comm. De Kume We proceeded to Cand the stated out the weed to the min. We reached the bridge there come of the bridge. date fitten of the bridge date fitten of the bridge date fitten of the option along the chiam. We were in no positivities of the week the Octain for bestilling when we dealed the Octain for bestilling when we dealed the Octain for bestilling when we dealed to the octain for bestilling when we don't be dealed the octain for bestilling when we have been out by 8, I wan home.

1766 18 To Montebellor, blifford and vicinity. The day war ideal Visited the conservatory but found nothing new Second exercing of Orlandam. Let Montebello, the new filtration plant is accounting the

1767 22 a trip our planned to Lock Raven. We went to meet at Townson. During the morning the over reveal being about, in feet one at no it was raining with perfects of more during the afternoon, at 12.3. however it broked only clondy our I decided to go. Of comme there are no one also at the meeting place when I arraid. I therefore about to try the trip along Chale &t am. I proceeded out Joffe R4 the trund routh and into Chale &t am. The try was grate as intenting. I was not out only long when the sum began to ahire and the after turned out to be a most beautiful one, being of come the men and damper, which made therein a letter disqueeth.

1768. 25 a rather rounday. Trif to hourt Point nothing expensibly interesting :

was observed.

1769 28 a trif to the spring for water. Suft home about 7 a. Mr. the arm about pulping above the distant helle. On ideal spring morning, atmosphere extracted with vafor, in the boulands it was good minty, but in the by uplands the air was clear. The bride singuing love rough cultural what was otherwise been a meet good minister morning. Swould retter suggest any attention and collected reveal for britleyiel work.

1770 I a trif to York Raven. We met at Pourson at IP. Mr. Following a with party, Mrifs Busher, Miforto x Mr. Burner, Dr. Korn We took the row through / Hample In going own the route I decided to take the left had when were Providence and before buf we were in the midst of things, into less more ploud., but we hapt moving orward and before buy resolut the red road Nor further min hap removed and we somewell the rest of the hip in good him Secured speciment of roots of the price, Marten hair from and stem of Lycopodene We reach hash Rave too lete to see the real extent of work and we allyid to lete the upper read. Amind at Station about 7 P. Mr. their at;

home about 8 o'clock. It was cloudy all'day although in the afternoon the furting of the arm could be made at.

1771 4. Wileon's hangeration. Day ideal on to temperature, cloudy. Visite Tourn, Luthwille Timorium a visinity. Secured expression of willow, pohe

772

1774

8 a trip along the Pateprew. We must at the William an can terminine at I P. M. In the paty were Mip Burker, Mip Barmer, Mal Buthwister, Mp Cannow, May Sand, D. Krow, We took the arter can to Sulfhow Sp. Red then took mote the another, would followed, My Barker gut award fitter at avalue. We consent the rune at a and the presented of atenum, along the Hourd C. aide. Found come frie aper union of Botogetime which I recent for rectioning. Received the rune again at any known than by any of Hotter an presented to Catarolle. During the morning of were gente cold but it moderated considerably during the afternoon.

15 Receive note to-day of Mr. allerin death, Rain all-day, nor tip.

18 To the ravine, a beentiful spring day. Reached Colonwills a little before moon, took the wend route towards the old pump home, ate my lunch near the old spring, which were seems to her run dry. Near by a few Heptiein were found in flower. after lunching I crossed the stream and stuffed at the old pool, here as her alongs been the case, fuz gys and calemander eye were in abundance. After evening a suffly I presented closely down streams herfrig on the right side. A short diction from the food, I came to a meety formed one and here were some fine fry eye. I proceeded clony down stream, crossing just before reaching Out Epring. Here I were comfined to find two lays shellow in the course of constitute wire aufficient to find two lays shellow in the course of constitute toir. It booked between the work of loops. True around about hed hum cut and disfigured. After cleaning out the afring, I proceeded to-wards the Bluff at Colf Run. Close by go I found Eytherining

in bloom. I, now douted of Camp Run, ashet record to be another shelter attracted my attention, and one enough here on the hilling was quite an intenting little hut, quite hidden from must eyes. I much

always happen when I start tomal it as to-day, I seem to fort how near to the raine puper it is , as get above it, as a con-

required, I found inspell some distance of the street before I mutical that I must have passed it. I i'm, retraced my steps

I come reached it, and here again a surprise was in stare for on the beech on which Mr. Welm is 1901 had cut Run Camp 01. were now out "Land Camp 13." What would Mr. Welm have rid had he been print? I man found slowly up stream again towards the ofen field. Dies showed swollen bade, privilly had I secrebed flower might have been found. Thefaling and Sping Brahm was of but me Bladrent, Twice I found Favoluse Canademia on follow drawing buch wood (cam'd beach). Strays I never two notice of the fatty frague before. It is of a brownich red cot of a reft betting considered and one saw at once that it belongs to the Pypaniam, but the opening one guite large and about friends but started to grammate. I fulled up greate as sum lies of the readlings, but it find one with tip-net only his all lad about found more adoutition write as is the centom of the fleat of I covered the open field, and he I came up a long brown suche, I should say it were "12" 47 lay. Here two I came up some fine Copen field, and he I at our remaind from of shopping. It gram willow hongs total and several work (3-4) burth the surface. From the field I took the water toward Montan law and weeked the cur shed 5 have about 6 on little often.

Putty willow one mount blooming not for from the care toward in Putty willow and mounts of the course of the contention of the course of the contention of the course of the contention of the course of the cou

Butty willow are were blooming not for from the car termine and new the old futh to the purp home, gente a lot of small willow were found.

20. With allow to Herring Run, We left home right of the obmine I was romethet intended in our old cat shick followed we. She or sweet orwards her followed we one or two agraces, but to day she were got a distance family more than a mile. When we get to the words or looking the stream, she seemed undecided but finilly started on of we. When we reached the stream I thought she sweety would turn to but after walking down then of along the bank a short distance, she willed a flew when the stream was revorm a leeped across. She is followed on to the spring, then across country though the woods to Montheller. Here for some serious or other she dieded to yo so fail We were looking at the works in progress a watching a men pump when we noticed that she had left us. We continued on to the

runs, returning an hour or two later. Returning home, we found

1776 22 To Swan Geek. We met at Co. of Batta & Light Str. The following were in party: - Mip Burner, Mip Backer, Mip Camon mip Kerr Mip O'Neill. We took can to Centic Bay, then took we

1775

route to the creek. The old haunted shown will soon be a thing of the part, vandele are fact carrying it away. We looked across the win at the beach then proceeded directed to Swam Each. To day we decided to work our way of stream farther and guite pleaded we were with the hif. The following pleate were found in flower ! - Dandelon, Chichward, Shephed's Very, Kennew, Drobe, Salie, Popular, arbetin, Red Maple, alder, Va annas, Spice, Lugale We started howevery about 5 P. M. such ser before 7 and how that 8,13 P. M. 25. To Govern. , Quite a blustery day, I proceeded in the duction of the old oping the consed the fields to alington are. at this point one ares a road going north. I had never explosed this particle part so decided to lean when it but. Here I found much amelanchin in bud and I cecured come for the clave. I some leaved that this and we really me of the melete of the med to Welter. In a cleant time I was on Woodborn am. I now continued onward in the ren of Walter to the words mean Mit Herroin hut. On the way found Benzon in full bloom. Just before reaching the words I ale my hunch. In the words arbitrar was in all its glory. Here I served none route of Justine. My fait Bluet was found any the seather young ledder.

29. To the Patafrer at Union Dam. The following were in the party and B. I the Patafrer at Minim Dam. The following were in the party and B. I and B. I want mit the party and B. I are the B. I are the Miller than the party and B. I are the B. I are the Miller than the party and B. I are the B. I are the Miller than the B. I are the B. I are the Miller than the B. I are t mit Buchen, Imp Sand. Mit Kenn, Dr. Korn, Imp Brum & with mit Lection mit Smith. We met at Rolling Road. We took the would write to Umin Dan. The beauty of the place was superliand a memor but fretuen were taken by the Busher. The old rain of the pant home, the dam what to day with the incurred flow of with looked exceptionall fine, were all laken. We proveded of the rown to the Apotein, Back-Sheplude Mefetta, Rasque the Sone figes Construin Const. Denwest branch (Cedar Branch). 10-day, I decided to explore it. and very pleased we were with our expensive. It are some distance we we are on intenting both which it time was are one ride them on the other. Wifter as trip of some distance we came to a wine fine and here we saw as home safe on the hellich. Evering a gate I decided that we get out that way rether that they to work our way father of the navnie. I see though that that way would privily here been the better way or the stream her the origin new the Rolling Ris. We ! . paid though the bour youl and out The gete into the wayou path. There we not an old Summer, whom we questioned regarding the way. The old man proved quite intenting. It was of come, quite a respire to him to see such a party of women, and no doubt this was the first time any well around ever pound so close to his home but he row grend who they night me, We now started onward to

the Johnny Cake Rd. We had not gone very for home when we can the gente a cattlement. Here in a good wer a pump and as me of the paty on thinty, a bear line was made for the purp. 2 inter-menter had aloredy had a drink her Boy Barn noticed revenue earth worm cought in the bay over the roughle of the purp. We least that the rettlement was called Jeen town (Jumeline We not now asked the way to the wad as being that the along ande of the church ( apregager?) had to the John, Cake 18 with of a confle of bone we was both to the car line. I. To blenburnie. a blanting day. Sand blom in clouds. Vinig 1779 the find and received opening of Sarracinia. On the way met Helmer, who was buy fixing of rome hot beds. Mr. 14. will not to Empe this year. Due to the clouds of drit, I did not mehr meh aar externe trip 5. To the ravine. We met at Catomville termina at 1.056 1780 Often waiting for another can we started on our trip, the follows in the farty: \_ My Buchen, hip Lute, hop mithe, hop Sand, Mip O'huill ! Know. We were rether compared that hip Bone we mut present, b she is clarge a time dried to wait no longer. We took the route to the pump hour, then along the streem. We soon reached the che built by the boys (?) men Oul Spring. as surmined they were built boys and to-day we out the of them in their home. Pitum were when of them and the chilten. I rom the boys we beened that this ledin had been the but a short time framing and on it were see mid it we hop Bane & he with. The rome proved concert. for just alone Coup Run we met then with ship he Boffin. We me proceeded to Row Coup, took a priture of it and of the sheller in bethick the clonery made one may though the ramin. We then munt a the trush to White a and back to Ceturally. Thaty plants were for in Hom. any the own one we heather and, acorum, Obolavie, Egnether, Signibrum, Congdelie, Vete cumbite, V. fidete, V. heuter, Lyn Verneli, Amelendie, Corci, Sarrefor, Zijie, Stelline Julie, Amenne, 8. From arbutus to Catemaille. arrived at arbutus proceeded along It 1781. Sulphu Sp. Rd the wend route to analon. on way war accompanied a mulaine - a mechinit when we on his way to his sister on Bun Re The natur occupie the who have of Town Smith. at and I can the rime. I was pleased to find the Cypus Spage in bloom and Diete we found in blom. Often lunching I preceded along the Rim an way collecting. amy new flate found in blom and the fall and triffice, Rammonla abortion, Denterin bearinte, Vivla aroun

V. realismale, aginlyin Canademi, Seemed a mice lot of Ey thro

and Dentance. Stoffed a few moments to speech with Mr Chart then received the ruin preceding to Catomerille by way of Hiller an. 12. Rain all day. The trip to below Ellen porthand.
Returns have about 4 P. M. and decided to go to the spring, found 1782 shear to unde to cross. 14 First trip of Botany clave. Dishuguille. Seemed some fine stuile france of Equivature near the apring. On account of the moviture the frank advanced than the finds 783 elumber. 15 Out Franklin road ar far ar the red bridge seemed aferming of Juder him blown. among others. I toped to find Celthe palatin but failed to brute it. It probably her disappend. 19. To Maly a Fourt Home. We reached M. about 1,30 P.M. 784 the afterme ideal. The following were in party: - mp O'huill, nip he Show Muf Sout, Mit Whiting, my Bucher, My Burn, Muf Cannon, Dr. Kun, & Harrin. We took the wend route to Forest Home, stopped at the Lygodin flew than unt on to the dam. I have examined the Pitcher Plants stepped to admine the besty of the swamp for a while, Then proceeded to the Helmin place. To-day we remlied a point about the short when they give, but it did not toke me lay to find them. We found then and in all profine, and I believe more plateful than for second years. We not stated on the return tip We hoped to get but to Islandonie, but when we recold the path beeding in that dividing we saw that it were already medy y o' clock, we ! during to return to many and then the the train. We beaut that old Mr. Portly although why 83 in coffing from "reftering of the brain", he we longer very his children. 20. With Mr. Rombayh to the revine. We left home about 2 P. M. pump home. We proceeded though the raine as for an Camp Rom then returned to car by one of Canp Ren, the open field, and the anema. We returned have by 7 P. Mr. 21 With Botany clear from Dichyrith to Buyen Oak Juntin. Forty plants were found in flower. I men rether comprised at the number for ex short a trip. 787 23 To the Sunpouder. a warm stilly day. Had I mut made up 788 my mind to visit the Still home, I would rouly have changed my plan, my bul felt very un confort able, so much nor that I believe if then had been any words close at hand I would not have that to my original plan. I former, I cut down in after eating my hunch, I rearranged to my stocking it as felt commercial heller, decided to

1913 - april 22 - May 17. 262 make the effort. Received the bumpanch about 1.10 P. M. and the Still home I have later. after witing helfan hour, started on res tif. Collected come fine afremien of Meeterie. Returned have with much be discomfet them going. Secund come fine afremien. Burdock rout. Revolut home about 630 P.M. 26 To the Cover and march Mongold. We met at St. Thomas 1789 Lane . - the following were in the party : - hup Braithante, Dr Know h my Mishan, Mit Burn, My Soul & Mif Buche. The route like were gunely take and 56 plants were found in bloom. a single specime of Scotch Brown wer found in placem. Dozward was found just comme into bloom, in a few days it will be at its best. March man is about part its frime. Lily of the Valley is just coming into We realed the spring about 4, 30 P. Mr. States howeved about ruch cure about 8, home at 9.30. 28 With Botany class from Bonnie Ben to Winden Heighte 1790 The route we take or on former occasion, but what was must inter-wer the number of flower observed - 84. The afternoon was ideal and we lated along must of the time. The trip around the quantition was very interesting; to day on reaching the foot path, I decided to it a learn when it lead. It led to a laye field (one so don't fronting on Edmentions an. Here we observed a path leading in the a time of Franklin Rad. It was about 6.30 P.M. who we resold the 29. Refeated yesterdays trif and record spening for clase work. Rain all morning and retter cold., but tomate waring it claud. & it been 1791 romundet plenanter. 3 We mit at Hamilton for d'a trif to the Genfunder. Follow 1792 were in the party. Mif Port, Mif M. Sham, My Such, Mip Barner, Mif B. huf Bruthwit & W. Run. The day was very hot 910 (Weether Bonces states marment my 3 recorded doing 40 yrs) We recorded the rime in day then proceeded to the apring where we rested over an hour. The try then continued of stream to Lock Raven where we took the has for 1 own 7. 14 P.M. 102 plants found in flower. 5 With botany class from Shirty Lane to Wondling. The day was a and a representative crowd attended. More than 60 plants ever found in. We left our starting point about 4.35 and realed our destriction also 6.15 P.M., home before 7 o'click 6. To Towen the towned Pennidene by way of Joppe Rad. The own very warm, When men the Printer Rs Benting the words the Efrom estate. Found, or I expected spening of lypripedium acan leter found also some Pozinia verticallete; found agains the spot whe gume Voronia hedusafahi and Hupan meternalis.

10 a trip to the gellow Experience place We met at the termina of the Elliatt City car line at I P. M. We then proceeded 795 out the function was. The following were in the party: hip Sarch, hup Commer, Mup brien, Mup McShane, Mup Burner, Mup Burher. Dr. Know, and Mip Port. We wished Hollofild about 3 P. M. The day wor ided for tramping, a cting here from the west made it with implemently cold than otherwise. at Hollofild I obraved that the old hotel", when our "Warbington sleft" her been raged to the ground. After lumbing we proceeded along the trusher towards Ellethe City. We steffed at the Capingham place and found then gain as left year, they were however put their frame. Phlose were found just bying to flower. We recold E. C. about 7.45, had just bying to flow. We recold E. C. about 7.45 had 15 min who to write for a cur, and again at the Junction and 15 or 20 min at west and then revoled have about 9.45 P. Mr. 12. The trip to Burklyn with Botany clave, or it is always, 796 war much enjoyed. Forday we did not visit the form in the low land, but after going the length in one dividing of the paid retracted our steps a proceeded towards the bout clash a back to the case. Climbing Bitter Sent were found in flower, but bed Euonymor wer still only in bud, 13 To Franklin Road, Took Ellist City Con to Bonnie Bree, the 797 walled our to to runhin Rod, learned that the fence can be avoided by huping on the upper real which will go right down to the road. I visited Winan's and was pleased to find Cypinfeden futurement still holding its orom. Second fine spening of Begge Suhe Rent, Polygole Sunge, and beamed that the keel in formed on rich offint the wedge.

17. A raing day, in fact rin all day. A trif has been arranged to Rock buch. This bout trif is always intenting, as in after of 798 I armid, Mif Lute, Mip Miller, Mip 6'hille, Mip Mc Shane. hup Burner, Mit Smith, and De Know, a few minutes lete hop Such also affect. The bout left promptly at 7 G. hr. The trip down were intenting, in spite of the rain, which came down continuously. We reached the Head of the Cuel about 9.30 G. Mr. Here Mit Smith decided to return but the rest of an started bready out; we took the route towned Jacobands & The colored camp-meeting grounds. The member athant umbeller supplied themselve with oil obth (title old) and on party room printed a rather intenting appearance. We revoled the can't meeting ground about 11 o'clock, x after examing the Kolin which were in fair condition, stuffed at one of the booth

and ate our bunch. We then made one way to theyoldy be the route the ivan there old me, we take with time the right hand forh. We did not remain very long at the bridge then who this time taking the direct route to the head of the creek. On a though the work found many Caprifulian acarde, at one place we a colony of more than 50 blooming plants, In after of the rein, our above welking, we make the trif very rapidly, the whole trif I the compyrumbe but to the road tiling about 2 hours, We had? considerable time on our harde so spend on how or more building a fire. It took so minter to walk for the hit. Ret to the but landing. It wer 5,20 before the boat arrived, although it

ramid about continuously all day, eoughods had a good time 18. With Mr. Rombouch on to Suitford them to Homeword when we visited the botamil garden, and I were plund to get of men of Belledom, him ; the day was quite pleasant, all a little marm.

19. With Boton clam to Harring Run, the afternoon went and the class was well represented.

20. To Lathenille and Timonimin. Day rather diegueble weether culting. Rether drieffonted in number of flower obt 1801 Found nothing ispenilly new.

24. To Warhington and But Fall. All-day gesterday and at might there were down from of rain and this morning it be very much as if we might have a refitting of the same kind weether. However, to person deaded to make the trip. When my Saul, Mip Barm, My Daylety and Mr. Barry, wow after hi Smith came and then the time hip Bottlings and findly Mip Buchen We left the atitin papely at 8 a. M. and at 10,35 we were the falls. One to the heary rain there were quite a volume of a rushing over the rocke, after adming the seem for a little who we found a suitable place and ate on lumber. It was 12 o'd or shortly after when we began on trif down the streem, among intenting faits were a fitty lynimorou plant recently a lupic and Plate triplite. We stiffed reveal town to admin The f goige. The weether was ideal and me orac regulted being come We prombed to a fait a short distance by the curinty well stream, a if it at one time war a mill-rece. Obraving? it was then 3.30 P. M. we started on return try reading the result at 4,15. We found a fully rotat and rected. reloc until 5.40 when we started on return trif to Wash

realled time al atetin about 6.30. We took 7.05 can for h

Reach Beltimae et 8,35, Every body wer pleased with This From hymning to and weighting went amonthly. 25. With allow to Sailford, We went as for on the version 1803 collected danier etc, day ideal 26. With Botany clue to Mit. Winam Westfat and vicinity 804 armie wer found in flower, the hip wer hearly enjoyed 27 a trif from Bonnie Bue to trankle Road to Woodlan 1805 the car to Frankli Road without paining the growing and by way of the form. I found that the path to the right finish, but with out the road and had been the road, and mo but in the one beding part the growy, however this may be it but part the home at the interestin of Frankli Rit. Reuchig Frankli Rit I decided to go touch Fraklition. Scutillain aunte in now in fel blom and no tre Vibram accentation, V. dentata in great beginning ate lund in words just beyond the home, The try to the old church were rather unevertful, was surprised that to find that the old chied had been built out. I must freeled to Wordlam the to George Oak and along the falle to Dilywill when I took can for home. 30 Decreting Day. We met at come of Joh R's and Wood-1806 brane a. The day we with striby but following decided to go on truf - Mig Lit, Mr. Romboyl, Mif Mr. Share, Mif Busher, Mif Walter's step to see the Busher and the forested to Mif Herror's. On way we had a shower, but we get under a true and waited will it were part, armid at hip the we founded to Right an and examined some of the woods will of the road. We we flowed to fit may Cypipedim thoughout the words we stated the words the words we stated on return trip, by way of hip Herry, but to arington an. The day was grite flowest after the shown.

I To Round Bay - the following were in the party: - Mr. Rombayh, hip 1807 Me Shaw, Mit Mount, My Burner, Mr. Burner, Mit Soin, Mit Link. We left Cambo Station on the 9 G. M. car. ; arrived at R. B. we fromeled at once to the hotel grande and here we ate our land, . after landing we took the would with to the mysty. My sim left on of the find. We exent the flim aly the hypthy, returned to R. B. shet 5 when we the lunch again, Tomach b o'clock we prouded tomade Homet, found him home, lefter short muit be took on in his boot but to R. B grounds. We then founded to staling, but 8.15 cm for home, but due to delay reached statum at 10.

To lake at mt. Winim with allen. mit the painter James 1808

Brace Box 15 1 Habitante P.O: 7 To Soldien Delight following in party: De Kum Mit me Sha 1809 My Sauch, hip Luch, he Bucher, hip Barne, Mit Somith, hip brien where overlich in beyond the Red Rom Mit heater and Mit Miller - The trip lines our more pleased then I had artisfated. We ate bouch under a lay och tre and white there we had a little closer. It was about 1.30 when we readed the spring and here we stoffed to rest. after a short net we expland the rance for grinte a deit are returning at 5 P. M. We then limited and started on the homewood trip It is strange that I had some difficulty finding the road but meeting a little Jew by abreham Parker we were put a right path, but it rund on intily num one to me, so that when we recold the road, it exemed quite new to a Fortunately two Junts girls excented on part of the way the the words or I soon were able to been my wherehouts. It was just at this true that we had gite a heary showed but it did not best very long and we creefed without seen drawling. We can realled the Rad Run bridge & here Dr forget the came which im put in his claye, and leter when he returned for it, it had been prihad up by a calmed on We realised Owings with at 8 P. Mr. and by 10 I was home.

8. a short trif with Mr. Rombeys to Swildford and a

1810 bolameil janden.

10. a try to Yount Point. Much try to Pier 8 Lent Po when I ram the Einmach & Rhin big boden. 1811 Seemed spring of Year, Wild Court, etc.

14. A trip from Town to below Ellen them to York Raven. We met at 2 comme Towar following were in the party: - Mr. Rombough, Dr. Kunn, Migh Muf Saul , Mife Gottling , Mif Carmon , Mif O'hill , Mif Barker , Mifer Burner , My Lockman mip Which . Mip brice . The morning was worm a hid fair to be but . It um 9.30 before all more accombiled in me were ready to start. We proceeded out a Dulang Vally Pihe to Hampden, them to Isla Eller although a warm day a min bruge from the north temperal the air. On one way though Ridy we steffed frywithy to fish ripe strawline, again on stopped at the dainy and again beyond it to admire, the putty bull. It was mon when we reached the line hilm & here we ate bunch . after dime we procedes to Islam Eller and them along Viteranis run to the sunfameler. What a let of dutin tum we saw here for already they are cutting down the trees that we otherwise be in undeted. The try though the cut down brush were not a pleasant. but finally all received the word after a short step we started towards her Ram, atopped to see the high fill ar for the

new Duleng Valley Pihe bridge and again leter at the dam. Much progress berieve and are doubt it will be finished on time. We ruched the thethin in time to take the 7,14 P. M. train 18 With aller experiently in the taking of perture, just 813 a shut walk wer taken down to the stream or though the 21. From Ruch Cuch to Story Cuch. Boat have more at 6 a. M. Saturdays, although during the week it been it 8. 814 Following were in the party - hip Buche, Miger Mx A. Burner and Mif Which. It was cloudy during the morning and the lemper ature just right. We took The usual route to Jacobnille and The Comp meeting Grand. Here we ate some lunch although not 10 o'click

We then started owners for the mythy. It is well to take the presenting of always taking right had path & turning to the right on this route, We reached the Moyethy at more or how we all downing It were greate an interesting right to watch the run-fich in their weter. after demin we started on to the head of the streamfile of and due to the building of the bouleval & the new dam. We now stated along the Old Mill Read for Stay Couch Landy It was 4 P. M. who we weeked amiging For some time the distant mumbbing of them der had been head, but we paid very little attention to it but now the aboy byon to both the othering & on were had to the total the the the time. hoping that these would be no demont sture until after we were refe on the bad. We were just withing a quester of a mile of the lading when the wind stuck up, Fortinately then we nothing

non reached the what, but no boat we it right. I have it me the guttern from bout a pathy it is noted when him on the bluff one white the cuch, We found him must open able the instead we up to his home, but we declaid hoping

it would not be necessary, home it som were necessary a we glodly another him him initation to next under him porch & between It it muide. The store that have an one guite a come

one but it was putially one when the bout armed. It came of to what about 5,30, pulify a little liter, and a t

were a menter of our fineds. My Smith (at Peal) Mit kieler, Wif While My They and Mellie & Aller The hip of the min war must pleasent all we all enjoyed the violing. On any down ear wrencher working at the off went of the gasht that each ball the warring the before must of the gasht that each ball the warry life, 3 me cut caving themselve by chinging to the most mark

Returned home on Sept. 8. 11 With allen to Montebello x Herring Run. We stoffed 844 to ree how the work on the new filtering plant was progressing 16 To Burchlyn recurring recurring of leave.
20. With allen to Herring Rome by way of arbungton an a While
Rid. returned home by way of Herford Rid and Garrella.
23 To bolimbia are writing late along the rankwad harbin
for thy due, Promise the 1845 1846 8/847 27. mit et Townon at 9.30 a. M.; following were in the party. 1848 mit he Share, mit Lectur, mit mether, mit Burner, & my Bucher. We took write by way of Hauflin, and Providence to Luk Raun. hu the sping home buyend Poundan Pd we found the new road in proper of courter clini. The new dam is not nearly as for built on the accent in the paper ("Som") would had one to below Instead of it being hilt by Thankying it in probable that It will be a you from own before it will be conflicted. We returned home by way of Mar Pa. R. to Town. Revolut home by 8 P. M. 30 With Binha to Glandoni We met at Burklyn I 1849 9.30 A. Mr. There met young Dirled now an M. D. . Barmen is nor large running the day store for Dr. French. We welled from Buckly to blehe, returning in same manner. Day were ideal to we enjoyed the trul way much. On automobile runn from Buckly to belieben from 10 f. Secured Polehe plant 4 a truly up Rock Cech. Boot left 2.30 P. M. reached 1850 heed of week about 5.15 P. M. Following were in party me hapin Imp Saul. Mip Mc Shave. Miper Carmon, Mit Miller, Mit Lete, Mip Buche. Info Burn, hip monof helli x allen. We did not get of the boot Return home about 7.15 P.M. 5 To the But Fall of the Potome with Wellie, Buther, Mr Rondongh & Mif Burine We left on the 9 a- M. train reaching the falls at 11,30 a. Mr. after dume we went down the chine 1851 ate for a the cume in the rim. The try we exceptionally futty We get hat in time to get 5.10 car so got back how by 8:30 Fruit of Pteter & Eurymen were much in evidence

7 To Columbia arme for Chan, Premion ite.

11 We met at term im of the Wilhim an car line. Following
were in party - De Know, Muß Miller, Miß Smith Miß Burler, Miß
Burne & Miß Camer. We took on to arbitas & them took his 1852 1853 We visited the Bertien weality & found them quite plentiful. There at bention Place were quite alundant who.

1854 14. To Owings Melle. Took the route through Dolfield On way found chesture in abundance. The large tree just before entering Dolfields was leder with runte. The day was ideal, temperature just right for tromping and at the wind the wing before hel been blowing, the morning was a fine one for melting as a consequence I bright how between 3 x 4 str of chesture. Hermed that the road of the brown you to the car line. Returned home at 8 P. M.

1855 18. To Letherville. We met at Tomon at 1.30 P. M.
W. Kur, My Sarch, Mip Much, & Map Bucher were The
on after of the cloudy weather. We walked for Town
to Lether Ile. Gention were found but none expecitly for

for Town and home. How lefe 7 P. Mr.

1856 21. This morning visited Woodhume an with expectation getting come Springer but failed to find any. Went: to So Belline and then are not only some Springer but also come Water out. The letter are find out abundantly in the pand court of the left struct.

1857 25 To Electronice and the Clinding Better court breathy. It had been raining all morning, even at more it was raining were! much curpoined that two weekers hip Seals & Mit Beau decided to go, for it had a lifted raining & it bound as if it might clien and my glass are were that we went, for although it was a little warm thing it was no nain out the thing it was not aim at the thing it was not a little whomer. We resulted by about 1,30. visited the point first gall where I record a fitted flat and we then wet away all when I went to Chinding Bitter Search fleer This are a very witnessing trip, quite new a well wouth to thing. We retired over some remains

1858 26 With helle allen to the aprey a the along the

1859 28. a trif from Mt Union along the cire pand them by any of Sulfler Post to article a to Wilhin an Pate of the trif were for the limp attent was attent to help for so long a well. Slift at the old Chiling From afet. but found on them of from the new Weshigh Rd oute eight severe the place when the

1860 I To Swan luch. We met at Balter Light Ste. The following is in party: - De Kum. My Sand My Smith, my Durghuty my Praise My Burner, my Miller, my Commer. We left on the 12,30 can reaching front by about 1.15 P. M. It was little windy but on it came from the rear, we did not mind it. On way found & place where a perment copy had just been dry up. The flents with the mute were steeled of in small tall circular file. This is the first time? here seen this. We paid our would wisit to the took & how a fine were built & we get ground for an how or longue. The whole were then inited & we started on return truly a Reached home about 8 P. M. 4. Election day. Went to Herring Run, as day were futly took 1861 allen along. Seemed some bay worm, some fode and some buduch fruits. Stoffed to are what progress were being made at monte-8. along the Sunpowder to York Raven. We met at Hamilton at (P.M. ar the day was rether foggy only 3 members decided to take the trip: - mip Sarch, nip Burner & mip Busher. We reached the ruis is an home time and had just stepped - what time to gether buf muld when Imp miller was observed on the other side, che had followed on the most car. The trip along the rime was other wine unewentful. Readed Lich Rome in time to letter 5.26 P.M. train : 11. Quite a charge in temperature, I found it convenient to-day to fut on 1863 my sweeter. Went first to the afring; on return second buch tings. In afternoon winted Riverile for househetent things.

15 The flow for meeting to-day were Swyme Oak Jun Jim. all 1864 morning it was much ber cloudy, but just a little after moon it began to driggle, Mr Wester and one of the students had arrayed to go. The wither booked very dubine I wished I had my ambulle but dried that we rick it. Reading the junction we found mp Sach, mot Barn, my Bacher & mip Will with 2 feed : - mp armeter, & mit . We started in our intended tramp: The rain continued there was no bit up. We went only a short ditame along the falle, in feet jut at of right of the word and have we built a five; standing around the five, engaging the wantle throw out by its burning ander, hiteming to hip arenting, who find Possilly an how or more wer spent this way, when we decided to return to the can going beach by the same route. We really the car before 5 P.M. and I we home before 6. 18 Through Swilford with allen returning by way of bold Spring Lane. The day wer one of those ideal over we have in fall. Seemed some 1865

fine roce-hips new the reservoir. We then went over to Char St an. & watched the laying of asphalt. which was just intered ing. Returning by may of Cold Sp. Lane we passed the Orage Orange grove, how I found a double of seemed too, as fine openium of Catalpa fruits.

1866

fine specimen of Catalpa fruits.

22 a trif to Union Dam. We must at Rolling Rid. The beat weather her continued all with, one day futtin that the the two-day it is partially grand and quite a number have later advantage of the day. On the car with me were Mife Busher has for uniting me were Mife Sand, Mife Smith Mife Busher a his said. Mife is not Claudles, We wanted with the 11/5 car came & with it made when D. Kum or total was. We stiffed a few mind at the old from I have which is now being demolified. Relationer when the the route towards Rid. Passing Maspin's a although a few minutes and for minutes the route towards on may have. Armed how et 8:30.

1868

29 To the rowne for our feet. The following were in the pain mif melle, mif Bunker, mif Bunker, mif Bunker, mif Bunker, mif Bunker, mif Bunker, mif blend must be seen but no rein. We reveled the review & Book afring about 2.30 P. M. We at once started the fine and in a little while had a fine one. Poletie were wrifted up in paper & put into the het asker; the orgation on fulled up on a plate & warmed bread were treated, coffee made an afflur montal. We remained around the fine until 60'clock them started browned. There were more more started to guide as and we easy matter the first the weed to take we head though the woods. It was home about 8.

1869.

2. To Brushlyen, for bitter event, she. Seemed also come fine of dodder, by copodining breideline to Topulain describes. Heard the forge as in early oping.

6. We met at termina of the Wilhem an can line for a trif to the parision of the Wilhem and can line for a trif to the parision of the following were in the party: - Mij Burner mip meter, Mij Bucher, Mif Chandler, Mip South, Mif McShau, De Kin

1870

Me took the 1:15 can for arbite, got off at Salphun Sf. Rd & precede to and where we covered the river. We then went along the River until we rewhed the path leading up to the Persimon place. The ven on the hill top as would me grand, expinely so were the gayson and Just at sun- unt we steated on the devoument trail. Knowing our old the were amfully trying I drieded to try another route. We! preceded along the ridge a chost distance parsing at least 2 other review when we seeme to a

fine path leeding downward towards the right, but even before coming to this fine path we raw a trail also leeding downward but it only bed down into the ravue we! started right of the hullide again & their line came to the fact mentioned free path. It led down to a review & at the shear continued whend we then saw a lay home, here two we parcel a spring. When men the home we raw the broad path beding down to the road. As room as we saw the road we know our hadet work wer over & so it wer for we had been over the old route so often we felt no fewer on to the result. We reached the can at Catomirille termine at 6.50 P.M. by 8 violet we were home. 9. Out Hille Rd for everyeone Second also specimin of trongs hickory, etc 13. We again mut at termine of Wilking an cer line This limit 1872 we tish the 1.45 can for Sufflow Sp. Rd. The following were in the party. My Sarch, my mc Share, my Burm. my chardle. We leaved later that Bif Bacher, be fether Or Kum came on car immediately after we life they failed to find un. We went out Suffer Sp. Red to Catemarille an then trund into the Buch Rame, The day we ideal and the tif we eggied. We took the route or usual 14. With me Rouley we to Builful and to Homewood. One 1873 Town x then the can to Tissasmin from whene I walked to Texas and own to Warren. at Warren record afrennen of hembel hefetie ham, mitchelle and later affle & Chang tings. 20 We met at come of Balte & Holiday Ste. at 12.30 x there took 1875 can to Back Rim Mich Rd arriving them about 1,20 P.M. We Then much am way down the long read to Rocky Bt. here we record a min lot of holly. Our expension have use quite intenting - we hed get frishabed breaking off all the holly we would, when one of the some of the some came down & telf as we would will be allowed to carry away any body; this, however, he charged letter x raid we could take what we had but not to break If any mue. Two grames in the blind were very much put out by man afferious as we heft the ducher form coming, Howeve wentling turned out all night we got one holly & get back again to the care by 70.M. Home about 8,20. The day were grite fine, but a little cloudy. The following were in the party: hip hishan, hip Vart, hip , hip Cannor, hip Kerr, hup Burn, hup O'heill, Mup Sarch.

274 1914 - Jan 6 - Keb. 10. 6 To Franklin Road. Day delightful - no enow as yet, 1876 Second hepatier beam and Partidge burn - a nice let at furt ravin Secured also nome fine fingi on a fallen beach trimbs. 10 a hip from Woodburn av. & Joh Road to Rejecter an them how 1877 by way of Hillen Road. The following were in party. - My McShave, Mip Buche. Mip Come, Mip Camon. Mip Burne. Mig mith & Mip Chandle We took the water part Walter then through worde to hip Herron failed to find her at home. We then went on a shut trif from the old hat but an one return whe still wer away. We then the proceeded by way of Regula are cut around an old bounted where were 100's of little pige ( We leaved that godge from Reland Pak in fed them) and cut into Hillen Rd. Renting mortibelle, we stoffed to look at the feltering bede. Here hop mille + my chardles was plainedly der affrend much to an dipleasure or we had to return to the reene but they were wowhen to be seen. From Hitlen R'd are went to Hen Rad x then to the tripper. Returned home by 6.30 P. M. 13. a most blanting a disaperalle day. Went to Broklyn, but 1878. chiem did not offord any Springer 17. To Elliatt City. On Wed. the themometer west down to 60 1879 but rive the it her gradually arien. To-day it is bluttery but Patersent rune. Only two members came Map Cammer hip!
The try this time were made of the atream, and was guite an enjoyable one. We returned home by 7.30. 18. With helix allow though Smilfal a out Charle St. au. on for a note Dame & then to Jul Roul & home. 20. To Herring Run by way of Sarrette and Montebello. The do was ideal although cloudy, temperature just right, Proceeded alin Herring Run on for on the crossing, them what one on left back. Returned 1881 by way of the left bank Stoffed shot him at the church on the hil Returned home by may of Monthells a Garuth. 24 a trip won planned to the Gunpowder, meeting place Hamilton but on account of rain no one came, after waiting for account on proceeded on trif alone from Hamilton out Hamilton an; Hellow Rd i Califor ar a home The day wer gente worm x had it not been raining (minting in fact) x the ground so are fully southed, at would been fine for an outing; are it was languaged it very much On my way though white for head a medowlach. 25. With allen to Chestrut hill, them around the ben of it to the stream and back home 27 Had decided to go to Benfield, but on account of for the co brought me down town to late to catch the train, I wished to to

so decided to go out to Ellicott City, then out the Clarkwill Road to the Petersent which I followed up to hudwich Road. The day turned out to be a fine one, rether too warm for the time of year. The country unfuturately lacker the woods and may trif of the stream, although a mice one, did not come up to exfeetation. Parts of the tip were really fine but then were too many ofen place. I find revail fine webut them, possibly the trip in Oct, would be more intenting. I abell try too, to go one the ground in May. Returned to Elliott City by may of to reducide Read. 31. Heavy down four of rain. no trip.

1. With allen to Browhlyn them out first road where I got some fine of skunk Cally and some Spirogge. The day was beautiful. 3. another pretty day. Decided to go out Belin Road. Took the 1886 triffer at Grench an and was to Clifton Park then welked over to Belen Road when I took can to termine. I find that can atil ctofe at old termine at trulleton. I now freeded out the road Hom to Taylor an then continued along Taylor an to Willer Rid. I find very little woods on the trip, what little you find is ruther this x at this time of your minteresting. Reaching Hillen Road proceeded towards home.
If a blisting day-wind 27 mile as hom. It remed to us that it me that it was blowing harden. We met at con of Light & Balto. Ite and touch can to Browhlyn. We then went along the first wood, stopped to examine the Skut Calley. When we realed Pumphy we could the. rwad & took the road along the river to Wader when we turned in the diretion of Landows then to Me Union where we took can for home 8 To the oping for water. 1888. 10 To Benfield. Left home about 8 a. M. took 9 o'clock can for Islenburnin when I arrived at 9.20. Set not at once for Benfield arealing it at 11.30 I then wet to the afring and then ate my lunch. next writed But Och poller Paruli diffe to It was get interesting has - the woods and time pared quildy. I wer is comewhat curpried when weeling the owed to find that it was already after 2 o'clock, almost too lite to wint & war. Phonem drieds to go notwithstanding. On may new the old spring collected some fine Clodonic figuridates on.

1 Hed little difficulty finding my way to the old will, covered the high and the took path leading to the right. This time I followed the falls to the old rolled right of way, then heft along it until I resulted the ravine when I took path leading along edge of words is then up to the roll in the total of the total of the total of the roll is the total of the total o right at the church. It was 3.40 when I get on the road and at 5.10

ate me and of the Cabi Br. budge her been burned to the ground. We were surprise at the fine building exected on the hill overland, the lay. We took the would note pared the hearted home and to the bluff and own looking the river, we then decided to start on the bonement trif going by way of the woods. This fraud quite intenting and own support by all. We think the trif worth referency in the spring.

15 With Mr. Romlongh though Boutto to the filtration plant, there to Herring Rum, Hanford Road and bush though Benette I he day one of thre remetally were days that come or frequetty in early ofing The thermoute realing the revention, no need of over evale. Under foot much expeciely Gormon in this forty drawed land. Snowed water extend-

17. St Patricki day. To the ponde out Columbia avenue for Spragge 1899 etc. . From ponde went at Columbia avenue to the Landowe wand theme to B. x O. tracks and to couth Baltimare.

21. We met to-day at Rolling Road, It was my intention to go to Union Dam but there is known on the ground again, and I thought I would not see much of thisher. Ofthe considering a while I duided that in go to Sleberter. We! proceeded to truederick road There to Thatle "slew avad to Meberta. Here we crowd the rive, and went along the River was. We stoffed to ree the Electric plant, and collected here & three elem traige. armed at Orange beam we exceeded the hillande to pay a visit to the careader. When ar resched the the level statch we stopped a short time, built a fire and ste bunch. We then and into the cascade rawin and descended it. The flere was very putty to day. It was slout 5. 20 when we reached the crowinging bridge x steeted up Hilton assume to car. The following were in party. Map Charlen, 2 Mifal Sarvery Puf Miller, Met Comman, W. Kam.

2 \$ . With Mr. Him to the ravine. We took the norte to the Pump home then to Owlaping, then to Bamp Run and return by way of the ofen field. I made the tof to find fry you. Seemed come & calamander , at the old pool. Hefetice tribbe wer found in bloom. But a get. no Ey thouming

28. Our immedly hat outty day. We met at William On termine. Follo 1902 to-day were to the buck ravine. We wet the weed route. On my out Se Spring road found following in bloom: - Congler americana, Statleric med. Drake women alen. mobium, Parexaum officiale. On may though ravine in founds, Claytonic virginian, Hafatie tille Alum rayne, Chrysophenic american Symplocope potidos, Ulma film, Saymiani canadam When we needed the rem. we get a suffly of good drinking with. at This point Dr. K. get on the wrong track a we were some distance and before we want him, ? 1. returned to the new but be were not to be found. Letter as we were ready to come the field to reach the avenue I am him but field to g On my to higherty arem we steffed for fryings. While her bre over un, he had that his way when he reached Catamath arem, turning lower Relay inter of to Catin with, & only later beaut of his mostelie We ruled am at 6.30 P. M., x home by 7.30.

31 To the ponde beyond Towson for for gy eggs. The day we delighter 1903.

4. a try to Luch Reven. We mut at Powson. The following were 1904 the party. - Mip Ken, mip Bucher, mip Smith, mip miels, mit Comme, mit Chardles. Burner Da Know. We took wat though Rigglys them by way of Promoduce, and the water trust, Found. Sax freze, Ulum amiem & Vince in blum Seemed a number of fine between near water trough. It was quite a fil day. We saw the new road built of on the hilliste Returned home on 7.19 P. Mr train

5. With m. Rombigh though Builfus, and lite to Paturone 1905

6. First trif of Botany class. We writed blifton Park and whe the energeem. The day was raw, in fact dis equable. 7. To Franklin Road for befetie been and Springipes. The day 1906

1907 was guite a fretty one

10. Sund Friday. With allow to oping and them to the filtration fle collected some Efigurantes - get my fit open yesterday. The day is 1908

II. From Rolling road to Union Dan them toward head of Cedar Ro The day were potty & following were in party: - Mip Ken, Mip muth his l my Mr. Shane, Or. Know, Mip brien, Mip Waylet, Mip Burm, The We went

as usually to the old Pump home. at the rime we stiffed to lovel. The following plate were found in flow : - Week own, Stillais medic, Taxam Eythumin amin'comme, Denteric betrophylle, Capelle Bunpartoni. Benjoin austivilie, Sanguinanie, Claytonie, Vefetice, Ulmu ameni-cane, Pou briefolie, Carex pennylvanie, Saxifaza virginienie; Houstonie Carrela, Salve. acer rubine antimarie, animonelle 13 Earter Monday With Chalie & fullowing My Smith & ariter, Mp More, 910 My Bane x Ming Moreof to the review. Day and ideal. We met at 20. M. both with by way of purp home down to Camp Run the returned by way of open field Trollowing new plants were found : - Rammaulu forciarlain, Potentile Canadami, Obolova Virginica, Lymbe competini, Drie polentini, Viole cuelte. anema qui jufli. Try you were found in finde at head of Camp Rum. 911 14 To Glenburni for fitcher plante, found Equinition in flower. no men flat obrand. 18. a trif to the ravine beyond the Came. We took the 12.30 P. Mr. 1912 in party Mif Comme. Mif Smith, Mip Mc Shane, Dr. Kum, Mif Burner, and Mif Chardle. The day we retter wowe, to worm for the season, We list the would rate arriving at the sping about 3.45 P. M. Often lumbing we proceeded down stream a chut ditamer. On way found Bux barmin of bylla in quantity, Generbyum in fruit and evenal likem. Callha polistic war found in bloom, it had just begun to flower & wer in all its early freshwer. Pelli of flylle was found in min shape. We stuted on the return trif about 5:45 P.M. resoled can line at 7:45 and after a short wait started boneward, reached have about 9.30. 19. With Mr. Rombough to the spring. The day is not quite as warm as 1913 1914 21. I hoped to-day to go to Benfild. an automobile we rehiduled to levi Browlyn at 8.45 a.m. so left home about 7.20 reached Light & Ball. streets in time to take 8 o'clock can and was in Browling by 8.30 a. m. after some invertigating learned that the attempt had proven a feeline & that the automobile no layer made the buf, but that the one luning Bunklyn at 9 for Bluburnie and Lake Shore was still in commission. I' decided to take it as for an Elemberrie, but when at 9.15 then wer abile no sign of it, I decided to get back to the city x go to botomville x The review. Reached Colombile by 10.30 and got off at Wilton a. Proceeded down Hilton her to Oraye Gene, at 6 3. Confermed of Equition, & her found also, Lithorformen Lawrence. Confermed Wild Bright, I room came to large patcher of Ey Throwing x advanget them found a pech

with two flowers. It was quite striky in the ravine. Returned to car
by may of Comp Run a the open field.

1915 25. a cloudy and more a ten raining day. The trip this afternoon were to Fourt Home & the Helonian award. We must at Candle alitain the following in the party: - Mif O'haell Mif Smith Mif Brum My Charlle & Philip. In after of the weather we divided to write the award Country all right until on one way to the award when it began to ran and continued with only a few interretain all after m. We resided the Helania award & found the flast just coming with bloom, it, to in unusually backward. We did not tany as it has been one crutour to atested in return trip, exemed a few Pitcher flast been and then been one that we want to the Lygodinia which was unusually frestly. The following new flas were found in flower, Helanian, Candlember, Enthantic, Ordered, Charles, Carolinia, Remay Autorelle. Orantimi,

1916 26. With Mr. Romborgh out Old Jule road, Reddy areme and aware the fields to Hiller road. We then west-through but and returned home. The day were an ideal one

1917 27 With botany claw from Wilhold to Buyon Och Juntini Linte a number took advantage of the day and the trip. Polemonia were found in bloom

28. To Burfield: Geft Canden station on 9 o'clock can for She 1918 Burnie arriving there at 9.20, cet out at once for Benfild. Reached Benfield at 11.10 and the fine woods where grown monotropic at 11,30. after lunding I began my search for Monor in be some time without result, although awell time I amelled the In of the flat must districtly, I finally decided that the m time I smalled the oder that I would try to leave from whome it is I row come to a sfet when I smalled the ode must didnistly, ? gan my reach and fortunately within a few minutes found the plant. I muchet the place when I found it is lyon my reach for other pl and row found another flew. It runed to me that I shall have for growing which was a the other nich of the path. as soon as I enter this part of the woods I found the plant in quality. The plan I entered were particularly wich in the plant. I observed that it was I the hed of the wash out when rache had been placed. all though words words the plant was found. I deaded to make my in brush Elveton . I am the route quite intenting. at one place

1919 2 To the Surponder. We met at Hamilton at 1 P. M. The following were in the party. Mip Daughety, Mulp Chandle, D. Kum

my Bucher, nip Suith, mit McShame, The day was ideal. Our trip was mainly to find Mutamie. So as reaching the river we went down the stream. We went down or far or the orticle from birty Mutume at its but a in just profusion. 75 plants were found in flower. amy the new our - Vile cenie. Codemic Vale franche-Julie. V. cubimule, Carlflyllin, Dunte anicema, to the 3. With Mr. Him to the spring, the morning delightful 920 4 With botany class along Herring Rum. It wer a little 921 sultry but we enjoyed trip very much, 55 flower were found 5th rawing day, during morning it pound down, but towards revou 1922 it ceased raining & it larled as if it might clear. It did not bower until leten in the evening. Went out to Franklin Rid and around of main of trees in flower.

9. To Roche of Deer Creck. Following were in party: \_ Mr. Him
welling allen, Dr. Kum. Mif Smith & arite, Mif Bucher, Mr. Burner, Mif
Mo. Shawe, Mr. Coulom. from Tomm and My Chadler & Phily from Month 1923 an station. The fore from Muth an in 175 round top, from Town 1.40 - with 10 in paty \$1,40 from north an. x \$1.12 from Tourson. We left Town about 7.58 a. M. realed Ruhe at about 9.30. We set not at once for the summit reaching it about 11 o'clock. Here we ate our lunch. On way of received come vice openium of Untilleanie purtulate & U. Pennylvanie. after dinner we decended slowly turned the revine to the north, I fee we found a good spring, che under the road side. We then followed the weed but when we came to the forh we first comed the erech and went down or for on the railway bridge. Here two is a fine afring. The train foch left at 4,08 P. M. 924 11 With bottomy class to but Wine & Vertfat. We took The route wently taken around the paul, railroad tracke ste. Our 50 plants were found 925 12 Out Franklin road as for ar the bidge the into Winin to the Cypipalin place. after much searching I found 9 plants, not a single one, however, in bloom. Whether some one had been there and hed taken the flower and whether there might had been me flower wer not offent. The day we quite pleasent, possibly a little warmer then mud be, but we whole pleaset. Returning I proceeded lamed the Edisatt City car line 16 To the Sunt hall of the Potomae and them along the town path to Cabin John Bridge. We left home on the 8 G. Mr. an ar-726 ring in Washington about 9. 30 as m. The following were in our party The Buche, Mit Burn Mit Charles, Philip, Mit Me Shaw, My Whiting, my Smith, my Mon. At 10.30 we left seaze town and of 12.20 we

were at Suit Falle, Dr John & his fainly and a few studente with him. He called my attention to the lie of the Nearhour grow at the fall, he think the leave more deeply cut, he think to that the Opintie is different two in manner of growth. after water the falls we relieted a sport when we ate and bunch. By 12:30 we were on our way of to the dawn. Right beyond the dawn forms a new 14 duplinglim - 14 Canadana with beautiful maple. I'm leave. It had alway bloomed. We now found some on to funy us aune to the other side. The ryula frais in 25% but we were former never at 15 & cech. The tip wer fine the faming thing the The we found a small path which led to the tow path. We ment beautiful well was now before us, on one ande the coul, on the other the words. a short walk is we would come to a small fort fath les into the woods and off to the river. We were soon to the look and here to war a bridge beding to the island. a change of 5 \$ wer made to chow the bridge. I thought it but not to cross as we had a statet of 7 miles before we to reach the cur, Une of them pothe la down to the gaze. This we followed a were much flemed with the many frutty flower. Here wer a putty fatel of Pheedin Purching and I perform wer about away where, Chry surpoyer were common two. We found 140 different plents in bloomer. Twice we entered the word but mut of one plante were found right on the way a days pretime were taken in the route. Visiodendum is now in full bloom, I were mufunish at the quality of mater in each flower, yet not a honey We record the 4th books of the wood sine about 7 which and this turn me mile to go to the car by may of the conduit road. When we arrived at Calin John Brige it was dark or the case were ready to prout. In fact they had to went for was. We recorded Washington in time take 8:30 can for home.

1927.

1928

27. 18. With botten, class from come of Pak Heighth & Shirly an to thempo We went over the wend route; nothing expecially new was decimed but we were empired at much of opening found (our 100). The day on class 19. To Union Dam in search of Yellow Cypin fedim - more than 30 on found. The gray quarth over the trival has been cut down and many of men are now in fell and, whether this will have a bad effect mein to be seen. After evening result of feming on the hellids. I therefore heft up as the rays, I thought the spring was not for and publicy on meet afour. Found no approx, however, but what were some in up as outerful seems formation found at Soldini Delight is at Base the the to great the same below - here was Bernestic confirm help atim and

but mut coming to the spring, I deaded to get down to the restruct Oct fait, I then the I bread mured the spring, but when I reached the 16 min. port I found the path beding to it. I man arcended take laitling again a some found the spring which is still as sold Returned to railros x room reached Ellicott City when I took can for home. 23 To Western Rum. The following were in party Dr. Barrler (J. H. U.) 929 my MeShaw, Mip O'hall, Mip Burner & Mip May Bell Burner, and my Smith. We went up to arbland, crowd Western Run & the went along to left back or far on the awinging bridge, while we cannot x than proceed down the right bank. It was right at the bridge that on a time par , expecting that their efforts would fromt the flying away of a masur of been . Sure enough after their a lit the gram alight it, and even after hea whole evelong. We drawle water at the oping a them entered the review. We stoffed for lunch at the rock on the hillaide. after lunching we made our way slowly owned-Our must stop wer at Bolf-tief rem, here on the rocke we found some Mote amicam. Second to a few hichem. after a short next we again started on the trip period the Ostrick form, a putty colony of Shony Orchin, ate ale. I was somewhat compaid to find Mynulia tripetale in bloom, I thought it came somewhat leter. We sown we stated the end of the walk though the raine. For at Warren we stated toch to Cocheguith, again to their one would write When we reached the main road Banks left on to hong for an earlie train. We however continued abouter and took the next train at the station we met Mr. C. T. Joyce a school teacher who human comething of the local flow. We found 112 plante in flower. 24. With Mr. Rombough to Smilford & the Botamical garden of J. H. U. at Homewood. 930 25. With Botany clave from Brune Brue by way of Frenklin Road to Window I fille. We found both Samale Minilandia x 8. Considering also the time Sunt Cirily-a 1931 1932

1933

26 To Brushlyen. Took route by my of the club home.
30 We met at Wilking an termina of an line and there took
can for arbita. The following were in party: - allow a Philip, Mip Barba.
My Smith, Mip Mc Shane, Mip Money. My Chedle D. Know, Mip Burne Mip Man,
x Mip. Rombough. It was a rether were eticky day x we thought then
might be thinder atom. It was 1.15 when we attend from Wilkingha
torrunian. When we were needy to enter the breach rannin it backed so
much the a thought atom. Use Mip Me Shane x Mip Smith deaded to re-

I heft along show gente a while and finally made my way to the car . On road wide found some fine Service burin.
10. To botamial gorden at Homewood. Let trip of Botamy afun often. I commented on the unmatured afference of many of the plants, some had changed so that I failed to verying them and some one fast getting in the same condition. Coming the plante in this condition were Drie verne which have in forming a laye met lever must very lay but may broad. Helowine bullete, Other Virginian, make, and small other that I can't just more reall. We remaid a cough of boune, but decided to big one trip to an end a little quicker on acit of the afficiely cloim. 13. To the raine beyond the Come, We had decided to start on The eight o'clock Q. In car. We armid at St Themis Church Road about 9,10 a. M. In one paty we my Chardle, my More, my Suth, My Burn, Philf & lete my Buch a Mig Soul. We took the wend route. Comille varie wer in bloom, We ruched the oping at now & have we ate me lauch. We then mide me may alonely though the raine, getting out as the road about \$5.30 D. Mr. We get water at the fruit home and them are freeded to Stevenen reading atation just at 6 o'clock train time, My Smith boards it, but other winding to do likewise failed to get abound. Mit chardle a Phily remained to amint meet train at 7. 25 P.M.; the nest of are proceeded owned to Pitreville at and then at 7.10 tak can for home. 948 14 With Mr. Roulogh & Nelling allen through montelelle and over to Lamaille. On the way mut Mr. Warmer. We took the areme beding though monthell x own to Helle Red. Then to the by Will total and down towards Harring Pan & finely on to Plea arem 20 To Tolehuter. The following were in the party: Max Multin 942 in Robert, Mr. Burn, My M. Sham, Mij Saul Mij Burn Mij Bacher, my South, hellie & allie after lunding several of on the a little trant - one party contained following. In their hip Sand, hip Buchen, mit Smith, mit Burner by husban and mit Daughety who came down in another boat. We went at the mai road to the first attenting me back overdon't noth to the road bading to Coff Middleton shake then along the shore. On way found lashoper in great profusion (brought in with wheat), Imain Elatine, Rummer verticallation, Scatellarie tellaris tegrifolis a vely When a weeled the choe we went along it at time, and at time along the embankment. We estimate home on 7 P. M. bout.

The text home wer also fine. We left the beach at 6. 45 and receled the obef about 10, 10. 7. To Soldien Delight. It rained last night & this morning when I ambe it was cloudy I wint thought devided to take advantage of the condition, I visit this treaters locality. I got to Owing Mills about 10.10 a. M. and started out over the usual rante. On way will me of the Reiter bout we were to mean his home to take adventige of the ride. I took the love road after crowing Red Run. after I could the first tribiting, ruing a long around of true beding the right. I decided to go in that direction. I found that It took me to old by rought brailty on Red Run, the bristly when I found men working for change on my very fact trip. I we gled that I at lest reformed the afort. Lichen, too, of intent of were found. I now decided to work over to the other beality visited on must occasion. I heft along the run quite a while, with I came to a fair night brank from the left. I followed this one then will To see if the war to part to be part to be a receive a medical thing we have the world be a summer of address one sefecially water able become it was applied to path more a soon resolut a cross-forth which remided me very much of the one I was booking for the should bring me to Dear Path Rid & I room saw that I was in just a new locality. I want feel appin a receive a wee picking berrow not for off I went to him a bound that if I contind being me to I would get right back to the ground I had been over. I would that if I followed the road I would get right back to the ground I had been over. I would that if I followed the road at right and to go right on the jet to the well path. The I did x room get back to feinly farture. The trip home did not take being bay. Peters home by 8 P.M. buy by. Peters home by 8 P.M. On my colletes come Bratone contigue at the bloff overlashing the rock. The day wer very hat 947. 18. With Wellie and aller up the bay and Sugarhame rive to Port Deposit. It has been very disquely warms the part few days and we were a little effect to rich the trip, but we found it cooler on the boat then we expected. I find that we get to Betterton at 40. In and It is possible to have a stay of 31/2 hre, the boat returning at 7.30 P.M. We reached home at 10.30.

1948

22. With Wellie & allen on the amepolis, Went River, to, trip. We reached amefolis of ten minutes of 11 and I got off for a trip South River. I proceeded towards West Start & them out that alies to Carp Paule. It was a hot study day and the life entury o the one; the roads on account of the lack of rain where were in a smort daily condition. The trip, i was not under partially please condition, however the idea of going over a new route kept of any spirite and the trend did not recen is had after all. I reached Ed. water on South Rim about 10'clock and leaved that the Emm Sile makes a tip the way Monday. I walked a short distance along the river and entered the woods, but due to the but weather, I found his deine to examine the tren, in feet, there reemed to be very little. with youth. On way back collected some Physicis stellain gome. Whethe brute . On secount of the repering of the road, new routed had been arranged for which to get to Runafolin. I went own on of them & found it much more expected as it went most of way though woods. On way though Aunafolia stepped to see Iselbert, who has now a fine drug bruine

25. With De Run of Roch a. and then to Fresh Port & Engle.

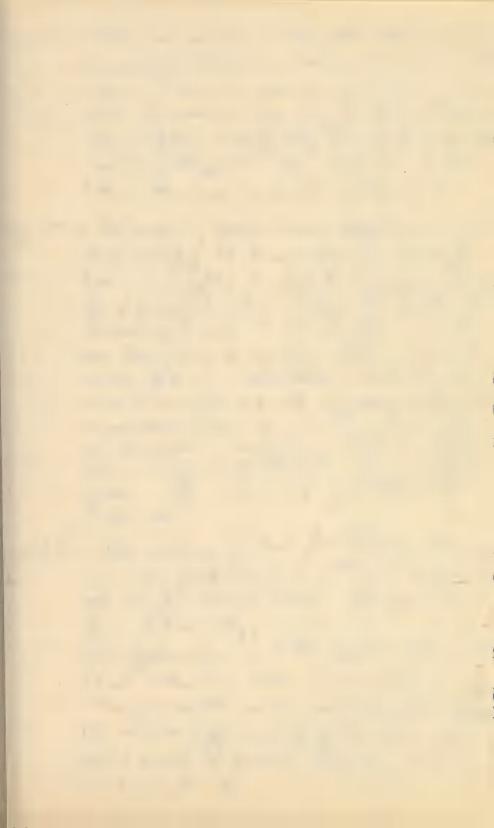

The best left as would as Sat, at 6 a. Mr. & we get to the hear the Cuch about 8, 10 a. M. By 10 o'clock we want at Trul Pay The Prouter discount on last trif (cu June 6) prove to me only Pepewat. Drone is now in bloom & no the Rhesia. Dell. could not recent the lingtation of getting into the water. He does not that it a good riving pool house, or there is to some roft and out for the shoe. We ate lunch here, them founded towards Eagle Hill, but before doing as, gethered row of the fine blackbarin that were most plettill right men it fond. The road our torouch Eigh Will wer quite interesting an we spet some time piking our way over. On the first triel found ourselfer overlooking long luck on the intete of Mr. Rement, here two we a path budge to "The Pali". We were they to go back to fit for but again got to the bed of a Couch (Bond?) but going both again a pared own Eigh Hill without any trouble. The will have in minute though worth a will worth taking. To-day it win to hat to anything except pulape to cet blechborin & drink water. We get ou the till all night & come to the road I had been on. first fath beday to left & followed it. It bought us done to the run a peatiful both for with a text bank we follow the bank x them along the open fild until we struck efort, the day it to nothe fill & derore it to a cleaning here and is

found a pall bedring to the right to this brought we to a road We then turned to the left & came right out Lebestine. This high both which came et 5. 13 x left about 5. 30 V. Mr. The tight though the words around & every from Eight Sell will refer another out top when wohn. 30. With hellie & allen to Mt. Vernon on the Potomer. We left home about 7.15 a. In in time to take 8 a. M. trein for Werhington. The morning wer ideal, in fact, all this week, it her been delightful, evenings especially evol. arrand in Wahngton we proceeded by way of the what can to the fine of the Chale Moscelester which left at 10 a.m. The tay down the Potomac was very fine, many flew of interest line the banks of the river. It we 11.15 when we reveled Met. Vernon. We had hadly rewhed the mansion when we had a heary down four ofrain, accompained and had thinks & lightning. The rim buft in indown and we cam little of the goods It lested about 3/4 hr. We got dow to the what in time for the boat on the return trif which was IP. M. x reached Warlington at 2.15. The top back was quite a cool one. armid at Warhington we went out to the Zalyiel Sada, It was really 70'clock when we returned to Washington and newly of when we get but to Ballimine.

1. a trip with D. Know from Carry to the Sumpounder, then along the Sumpounder to the Raven. The day were fair for this Time of the year gain. On must of our trip wer in the shade, we manyed very miely. Empowder, we crossed the observe & went down to the sping home. Here we get water & I recent a bledomic from the roof. We then get back to the hilye, crowd and much one way along the right bank of the stream Li the dintin of End Raven. at revel flow, Tatiffey for bother. at non we had land. Endyere is now in bloom. after lumbing we continued on tig Realing the reilroad bridge we to-day went under it rether the We man west will out to Yosh Rea. Her we boked at the new dem, while is not conflict; I rein weter atally 12 ft higher than the Il a one. We decented down to the opining of the turnel which will lead the water to the old turnel. Yearing the dam, we proceeded of as for as the water trough. On may received remail below, one from the cement between the line atoms bloke of a bridge. At weter trough as wearly the fell rich to the new road which took in back into Towners. It was about 7,45 O.M. when we got to Tower. a car soon brought me into the city and home.

23 Crystal Spring. 24 a. m. Crystal Spring jungle. 1962 1963 . P. M. Oahland & Washington Spring 1964 26. Purelton 1965 27. Cumberland, Old national Pilie Mr. Wenrich & Mr. Edwards 1966 28. The narrown. Mr. Lakin. 1967 29. Cetrarie Irlandica hillide 1968 30. Frontbuy x the revent. Mr. Sparke 1969 2. With Mr. Hime to Chenfish Beach & Cambridge on Steem 1970 Dreamland. Cambridge in a pitty little town with peved whete and futty home. We had but an home and a half no new only a little of the place. On boet met a Mr. Wetter. 3. With Mr. S. C. Edwards x two Schreimen to The revine 971 for oferniem of funge. 972 5. Took 9.30 k. in train for Baldion, then visited the fox grafe region. This time took road taken unally on return this and after coming the little run (for-grape who), I turned with the words following the run to the faller, a mine path back down about the entire way & in an interesting trip. On way found to spots for grape. The trip along the falls was quite min for a Parmini. Wen spring found a nine lot of graper. Termed that the worde belong to a Mr. Francis. 1973 12. To Oxford with Christian Endean. D. Know wer to go along but failed to come. But Mr. Neepin about. The trip is a fine one. It took in about 5 hr. to get the a returning about on lay armid at Osfed, or freded out The main street with we realled the railway tracker, the along the backer to a fully wood, has I got oferine of Perturine builder Parmelia deffuse, General pollide, We found ofering Sentian ocholence, Dithihli spiete, to it. The boot left Oxford at 5 P.M. and son for enough of the beg so that we could not the fire works which were find off bying at 8.30. It was 10 P.M. when we reached the city. 13. With Wellie a allen by way of the Spring home, arlington an end 974. bridge have to buthin. The day was an ideal one and the trip a very pleasant. It took we about an how to make the trip 15. To Towson, hutherille a Timonium for specimen. While at I bohol 1975 for rigin of the Fringed Gentin; only a few specimen were seen. The electric line running between Towrow & Timonim has raised the four from 5 \$ to 10 \$. 16. With Whebrock to the ponde at Columbia as. to reach for Chance 1976 The fond I would relat seems brow in a bed shape, no there was found. We i went to the ice found, here some was found. We then walked once to Westfort & there took can for home.

arrived about 4 P. M at Mit. Leh Park ling. 17. having been all morning searce & a. he on the way. We were met by Mr. x Mr. Eshard after supper visited mip Daugherty, and she and hop Mayent Roche took us to the lake. Here we remained until dute. This morning hellie allen, My Sarch x') ay. 18. took a trappy to monte Viete. We left home room after breakfast, provided with lunch. We proceeded out & about to Ochland and thence right into Ochland. On way met Mr. Murill ye 85 celling offler, and leter another old man, who told we how to get to mate Vite. The bip out war ourt whenting or much of the way was through woods where great many fine refreening of historia. The own from monte Vinta was refrestly fine. On return trip we etfled at any. 19. - This morning visited Lich Lynns, The vinn here are good too, but nothing to compar with the one from Monte Verta. The region to in poor, botamically Their afternoon, went to Cycleb Spring, after which allow were taken to the lake, to upon a both. I on the other hand roubled though the wooded region worth of the lake, where ) found much that was intenting: Calicina Cumtum eta to-

To-day went alone to Boiling Spring and ling. 20. Eagle Ruh. I left Water Looke Park on the 10.26 R. In train, arrived at Deer Park and was on the avail to the afring at 11. I reached Buly Sping before nown atemy lunch and remaind around for an hour The woods around the spring are great compact mail of megictic bembake after the lunch, I started for Eigh Rock, the climbe was in territing, and the walk refind the exertine. It took me about and I wer rome on top of it. The view the grantest I have seen, being alove ale the true tope, a complete circle of but ful undulating mountain extende before on. On wehr found U. Mulleyes Rinding oreine right from the very by of Egle Rich. Started on return his don't 3, 20 P. M. etoffes open at the spring, then took county road by way of the your back to but. Lake airwing there a little after 6. P.M. This morning walked over to the pak aug. 21. returning just before the rain lente a heavy downfor at noon and for an how or two. about 3 P.M.

we took a well to Orgetel Spring and any. 22, - 10 day is a hanne day. Wellie allen, & mayout Ruche & Mr March stuted about 9 a. m. In Swallow Falle The trip is through very interesting country about 11,30 we were at the fielly, situated in a grove of humber shadodendem & birtise. a number of speum were collected & then we ate hunch. Cefter lunch we visited touth Muddy Crech talk which were even more interesting. about 3. 15 P. M. eve study on return trip arriving back at hit. helve before suffer. lay. 23 - This morning went over to haith Home to ele hu march. We afent come time looking at the top opephie cheets of W. Van. a putty view of monte Viole can be had from the porch. This afternoon we went to crystal apring and Ruche, Min. Thomas, Mr. Much, Welle & aller were

in the harty.

This morning went you to the jungles any 24. I have bound an eng way of getting there. Only a few more represent were added to my lit. Ther ofleren at 2 P. n. we not at the breenly hell and stated from their though the woods to Oahland. On the my paned the green homen at Weberi. Ruching Ochland, ? stoffed to see Mrs Harned the drugget, who is interesting in well flower of the accountains While at O. we had a little chower after I we wer, we around the street & Raw Washington Spring. The trip homewood we by way of the pike. Rain fruitially all day. I hoped to ay. 25 go to Turnelter, but train were late & then the rain, and no Mr. Much, no gove of the educ. This morning took accommodation train to any 26-Court the paid way to l'unetter, saving they 30 f on round trip.

Tunnelton in a futy little mining town arrived then I tried to learn the whereboute of a family by the name of Buhlew, only to learn that there were fully a helf dozen by that manne, at length status on the way to Three took, but could not make while this The seeing along weed in great. Returned in time for the return train. The reany to Tumelter in of the grandet. Stated this aroning of an 10.26 train for any 27 Cumbulant, arriving there about 12.40 P.M. War met by Mr Herrin & after having may tichet stamped we started for his home after dume M. Harris, Mr. Edward & Mr. Wenrich & I took a transfort the Old Matin I Pike as for a a spring. My a few between our found. We returned in time for supper. This morning Mr. Herin & I vented ang. 28. Mr. Perdem at the office of the rehal boad. Rain almost all morning

which continued all day.

In afternoon went out the Newson and

met Mr Lakin at the Briddele distilling who is interested in the flishy This morning we went down town to see Mr Perdew. returned by nown on the car met Mr \_\_\_\_ intunted in Indian relier This P.M. we climbed the hill on which we found Cetrina Islandie ; time we cought shelter from rudden showen after suffer we went down town met Mr. Perdem, also Sperke & Wenrich and arranged for trip to morrow But up in time to take 7 a. M car for Frontly, We were met by Spasher no one else showed up. The morning were ideal & remained no . We reached any. 30 Frothy about 8 & at once cet out for a swamp about 3 or 4 miles away in allyhang Co. We ate lunch in a putty would not before reaching the awaref. Collecting was good & the day a grand ancien. We retired home or the 6 P. M car reading C. about 7 o'clock Stated homewood on 12. 45 P. In train

lanta Place, not a flower war found. We went along the River road or for an Orange leave, then crossed the budge & proceeded to the ravine. The key wer very worm, two warm, in fact for and unjugable hip. We reached bester ville about 6.40 and home life 8. 11 With Mr. Him fut to spring & the leter out Columbia 88 an to get Evening Primover. The weather in Till wousself waken. Our drought continue. 13 To Blenburnie & vicinity. Took can to Brooklyn, then welled 989 out the road, ate lunch in woods offinte Pumplings. When beyond Stelling we met by me I felmer, who invited that I riche with him. I sound him highly eleted over the German having the autwork, In his heat there is no doubt but that the German will eventually be victorione. I went to the every & the secured several spin. men of Sarucania, Cotton-hade, etc. On my to the station came to a chestrat true, under which I found now expendly from chestrate, small but west. Realed home about 6 P. M. 17 Took hip of Oct 3. with botanical rection. We met at Owing Mile 990 at 1.12 P. M. The following were in fairly hip South. Mip Daughet, hip monow, D. Know, Map Moon, Phill, hip Ohill, Mip Burner a lete Mig Mishon Chestrate were found in great quantity and we set got a nice let of them. The day were ideal, the heavy rain of the day yesterday having settled all dut. all were pleased into the trip. 20. To Suitford & then along Cold Spring Line to My & Pa. R.R. 991 tracks. There along tracks to Woodbook The try was an enjoyable one. armid at W. I returned on the homewalthing by my of Checker St. The weather is ideal

24. We met to-day at come of Eight & Ballimore Str. There link
Cuti Bay can. The following were in party. - Mis Mc Shan, Philp,
Mit Bourn. Mij. More. My Smith. We took the usual route to Swan Cut 1992 While out we had several little chower which dampened ground a little a presented one trend though the bush. The weither is still ideal transferred to Palteren & Mr. in in charge. The day in name but I was anxione to get come Springer an few the wood. Were to the 293 drought no opingyou was found. Seemed fine opening of areligion pade Clother etc. etc. 31. We must to-day at Canda Station for a trut to Glenburnine. The follow. 1294 ing we in party. Mit Sach, Mit Smith, Dr. Kum, Mit Burne, Mit Mum, Ming Me Show, hip sine. The day wer a propert one, We took the weed rent to maky bridge, and after a about along at the afring & in the worth started for the Bitter event breelity. On way found rome good offler

294 1914- Octs1-nov. - Dec. 12. Bitter mut use in greatest profusion. Returned to belenhim by crossing county. I To the oping for water with Mr Him. On return we met 1995 3. To Broklyn for troje ite. One pitty weether still 1996 continue and es in the drought.

I along the Isunpounder from Harful Ril to York Reme.

We must at Hainton. The following were in party: \_ Mip his.

Must know, Mip Bucher, Mip Burner, Mit Sonie, Dr. Know alle.

The day ideal; but don't frightful. Ohr. reaching river we were somethed put out to rue dat a new groung war ofend.

Just a short distance from the wood. Much dustructure of him to the the the state of him. 1997 will be the result; fortunately it is to last my with ofine We reiched buch Rome in time to take the 5.17 have been 10 To Clifton & Patterson Pahr. nothing expecialle were observed.

14 a trif to Turkey Point. The following ever in party: - my Mc Shaw, My Smith, Mif Burm, Mip More, Dr. Know My Sarel, Mip Me cotta. My Daughuty. The drought abill continues, and the roads a concret with dust, but in the woods it in fine. We all myong the tip. I downhed for Chew but could not find any. 17. To the spring, then to S. Baltimer - Ruinide te. The day in cold. Our drought were broken by a heary down four Sunday. Jutuday morning it was still worm but it grew colder during the day ito-day, it is get cold. 21. The cold weether still continue, but on it is not excurrely cold, just ideal for transping. We met to-day at Buyum Oc 2001 Junction - the following in the party: - Mit Smith, Mit McShow, Mis matteette, My muer, Mit Burn, Dr Know. We took the would no out the pile to the falls. The road is being grated a new bridge are being built. arraid at the fall, we covered the other x we of along the night back. We reached a point just buyond the may bridge. Returning we made our way at once to the Pike 24. Out Edmindron and to termine of car line them to Buymin's The weather in still cold. I hoped to find come Hydre but the from were all wated with ice. I proceeded slong the stream to the grang & then tech can but to tom 28 This is the 3rd ideal fall day. We met at the term of the Wilhim an. can line at 12,30, then took can to Sulphin Spring Read. We went wer the wend route to Howard Co. by way of avalor. The following were in the fat: - hif Daughin my Sand, Mit Smith, Mit More, Mit Bornen, My Metacotte.

We ascended the hillaide at bention Place, observed for the first of the hill to the "Berman" Persimmen tree. It had quite a muche of good funte on it. We get off as many as we could and divided then amount ownerous. The descent this him Having resched the River R'd we present to Dray have comed of Hilten an. 29. With Wellie though builford to Homewood and the 004 Blanical Buden. The afternoon was quite pleased.

1. To Montebello. Seeming afreming of trings, tendule them ite.

The filtration please in repidly nearing completion.

5. On this was proposed to Union Dam, meeting at Rolling.

Rd intervalent of the Ellicate City can line. Arriving there form 005 2006 member were on had: My South, Mip Barner, Mip More & My Metarte. It had already begun to rain and were more coming down rether lively. so much so, that his South a Mil Barn dided to return. Mil Morney & Mily Metentle, however, drieded to stay, although nither hel unbulle. after being reinforced with a liming of paper wolder their courts we were reedy to steet not. a walk out the Rolling Rid with a brick northeest wind druty in our face, row commend me that we could here a much letter outing. ? . dieded that we turn around & pay a visit to the ravine. We returned on steps, and in a short time By this true it had alffed raining, was did it sain anyone while me were out. We crosed the rem men the old daw, then followed the street, posed the Highlan, steppes at Oal Spring, around the shelter. Here we lended. We then founded to the ridge, stiffed at Buyande Rich and admind the heatful Petepeer. We man started homenal. We played at mee down into the rance, record the steem at Physith Rich and Then made in may of Conf Rem We can received the open field and before by one at the car termine. We were not a little mue then four hour printly 41/2 how. 8. To the ponds" out" Columbia an. for Hydra. Seemed 1007. rome fine duckwood, etc. 12. 10 the ravine to celebrate our annual feast in the woods. 1008. This has been a week of cloudy and rainy weather and everything is wet. To-day the own has been chining, notwith standing only the following devoted to celebrate The occurring - Mip Barner Mip Mr. Shen, Mif Smith, Mif Mum, Dr. Kum, I hought allen along We took the usual route to the spring, reaching it about 2 P. In.

The color were clow aroundating and for a time it looked rethe doubtful that there would be wough in time to have a frest. In the course of an bown or ten though, it was comprising, how is bed grown and then were enough when for all perform. We remained around the fire with after 6, then made on way bee to the care. The evening was ginter clear & we had a chance to we Cefelle as one guiding stars.

2009.

15. A very decided change in temperature. On Sunday there is fait of all a fine dright, then move, hail and finity rain. When it amount, it amount with all its might, and sow the ground in covered, but when it rained it rained with egual frag and arm wanted the sown away. Monday morning, it had staffed raining to it am attle cloudy, during the day it predully cloud and as it cleared it grew colder. For day it is very cold clear a cold the themmether gring are low as 90. The wind is sharp and it is far fleventer to walk on the bright sum shim in plant works them not in the fam, I went over to Brushye and afact.

2010

19. atrif to Warren. It was prefored to ment at Town at 1 P. h are the Timmin can left at 1.40 I made no aprecial effort to get the before that the with the result that I get their fine minute often the time. Counting me were Nip O'hall hip Materatte x Nip Bu waite, are the can had already left x it meat a whole how was for the mest are we dieded to well. alredy before now, it byse to rain, must time a driggle, followed by intervals when then were a rain. When we started out, it we driggling, but the came an interof putuity no rin. Sometime it raid a little haden but taking is all in all, we did not mind it and in come of line, been then have as were on the banks of the Sunfonder & under the hearbes We gathers what we wanted, then started on return trip. It h always to rain more decidally and by the Time we were in read to Cochequille it was raining had with a wind blowing it duitly against us. We did not mind house, & by 6.30 we were at C. ven much wahed, but mut at all very of our experience, at the atetion met Mr. Joyce, who raid he would have been pleased to have go with us. Oit 0,50 the hair came, we rade as far as Timonin x took electric on to Tousan, reached home before 8. 23. With young Burke to Benfield. We met at Camber Slehr

22. With young Burke to Benfild. We met at Camber Slike a left for Blenkurine on the 8a. Me can arising then about 8.2. We rest out at once for Benfild. It was cold enough to be plan When we stated out it looked as if we would have a runnliney but it remained more or low cloudy. We reached B. abut 10.

and at once freeded to the boiling afring. It was then about 11 o'clock and we deaded to est our land. After burding me recovered the creek and began collecting holly. We took the courte bound. Best Och and then proceeded on toward the Schwinitgie woods. I had little trouble finding the plant. I are more that it is not premial but beautiful? The stath that has bloomed are now dead, I see too, that fulleful after all the finite are beside with the trinit of seeds. Seems more revealed the gray about for ment of any other to the old last asping growth, growth some distance afect. In me case however are close as a foot. There affairly was now commented between the old furth plant and the new ones just officing it recent between the old my celium. From the Schwim type brailty one returned to Best Och, colliters one bolly the statutes on return trif Reached S. in this to take the 5.30 P.M. can

012

28 We mit at Towson in time to take 9.55 a. m car for Timorium. The following were in party Mif More, Mip Mr. Share, and my metecotte. The morning wer one of these please, heavy over that comes at the end of a cold such and that generally purche a day of rain. Six inche and more fice on the ponde and the river show the windy of the cold duing the part week. Man were brug cutting and harling away the ice. armis at Timonim we proceeded along the restored trucker to Texas the same country one weed route to Warran when we armis git about now. The rim with its sketur much a factly toffy to est lunch. after bucking we continued on way of street or for an Western Run. Occurrily we were obliged to walk some one flue as het to crewl they a turnel- the opening though the rocks. At the clift with at Wester Rom we sen a fiety example of the formation of staleithter & stalogister of in Returning we covered the distance much quicker arrived at the bridge we deaded to well buch to Tomme, Everything went alleget until we reached the ever road here we shall havegone to the right but we helt on straight, as a recent we welled two or their mile file The route wer a fitty are however & we had no ryrete, realled I om at 6 P.M.

with considerable difficulty. We were quite close to the dam
the it was part of the proper to muit it, we directly to the
tendrine. Due to water finding it way not the medicing the
dynamics were not of commission. It was intentify, booking not
the worder a recong the water dealing over the dam.
Term now what a difficult undertaking were before are. When a
recold Mobilet might Buile - hip how none of to the state to be

2026

27. To-day made my first attempt to get into the woode. It were need to get some boy women. I have not an get been able to move my authorizing. I cannot go down stape one fut often the other, and I have be very careful how I step out on my hunt first. In the wood, I many fairly well, but it is different on the street. However, I decided to getting the boywood. Took the Westfut can be for an BxORR to the mather along tracks toward Carell winters where specimes are plentiful. I managed to get afrainin all right, although it was found that exercise wor give enough for the day.

4. First trip with the country. Kart Saturday, I managed to well for the day.

2027

9. First trip wite the country. Last Saturday, I manged to well for the first time automothy naturally. To-day, I thought I would to the woods and I must say I feel quite flowed with the result I took the walk though Cromwells woods, seemed afreemen of hickory and tolif the bods. Steffer to see the remailed in operation my exercise did not men to be too much.

2028

13. Still ful the effects of my last examine a kind of twid feet all the time. To day visited Washington - Mr. Lowelled is altifying a latel Stratford. Received Washington about 2.15 and the hotel alient 2.45. Sport about over home or home and half with Mr. L. then duid to call on Mr. Which forms his home without my trouble but he was out. After a short chit with Mr. U. wiede my way beek to the cere and home.

16. a trif to day to the review The tried feeling in my andle, strong to very disaffected Sandy to day it full good, so decides to take up fuzze you in the ravnice Found Schamander you can be total also mullim have and befalic below. The politing received going over the rocker did not do my ashle much good and, run felt the effect - the outing, nevertheless were an enjoy able one Secund also openion of villow. Found fint dandlin in flow

20. First he with the class again We mut it come of Ballimone 030 Dr. Kum, My Burner, My More, My Swith, Met Mashowe My Mettenth We look can be Bruhlyn. Walked though the Conwell intete, obfers to the old homested and looked for your brugho endlings. Then that the poth along the river. When we reached the little raume we went of to reach for Spingge and record a small amount, Skuch Cilly and alder one in fell bloom, so also the red x silver wasfler. We made our way then to the raw mill, and here we stoffed to see the Raw in feeting. We then west down to the Springer breelity and then made our way of though the words buch their . Dule us Chichael are also in blom. At The we went though the green homen Lehr mon har only were under ylan, 24 ms flate. We next made on way to the road, them slonly down into Perochlyse where we look cer for home. Towards and of this my with byen to feel very twind 23. A trif to-day fait to the oping - the fait arine hunting my while, 031 Leter went to town out the to the ponds for fage yes. In spite of the milder revor, regetation does not seen any more In spite of the milder recom, register downt seen any more advant. Trage yes, two, are not any more plentiful 27. We met to day at the termine of the Westfort car for a high along the river, to ree the progress made on the new bridge. We then cut acres the country to Landown and then home by any of Willem arenne. We found bittle evidence of flower. Chickens and Hazel only being found. Many ports were person, but we forge yes were obtained. The cool change in the weather her had a bad effect upon my foot, it fiels very senition. I had intuled return ing to William are by way of the avenue hading to let Grin haple but without the one of immediately cut of it as the right one; of come we did not get to the bands. 032 conse we did not get to the bonds. 30. a trip to-day for froze eggs. Visited the ponde out Wilkim arem near the hospital (St. agum). I found the place I formely bisited with 0 33 Mr. Weber all built up and the forde rather the worse, There were fewer pouch ter. how had fug yes. after going over the old collecting place and being on the homewood route, I met an old man who told me how to get to the blue dam. There is really no trouble funding it at all. Cut right though the woods & a road is room new which bede of to the brish yard, keep on the road, go through the bridged and about directly went of the yard in the dam. Follow the south bouch of the pand and an intenting road is seen. Keep on and to the unt of the blue dam is another pond. If ? remember correctly them must be a third pond, but I did not see it. On che

way home took the road north of the brick yard this take you right

We ate lunch at the spring; then we sent down as for on land by and founded of the hell to the road along the court. We west down or far a the Observating, Mr. H. enjoyed the view very much, then we much less water going over the dear to -day them on Situaday. We now returned our steps descended the hill and Celletes Enthumin in justly for clear work.

17. Trif to the Catthe politic rying beyond the Course The following war in the party. My South, Mip South, My Mc Showe, my Bula. My More, hy moteratte, D. Kum, hip mile Burn x 3 other The route wer the same in on forme occioins. Celthe wer in the early feeling. As usual at this time of the year their was nothing much in flower - a little Belita, a few Blodwits, a little Spie, and an occumel Kefetii. Ansome war in bloom We were lete returning: It was 9.45 before I would have The day on got flowed -20. along Deed Run - a striky warm day. I was any come to recome some of Dutarie but failed to find my, Eythronim still in blown Secured some fine page eye at the pande new the old Walking from rock a thunderstone came of about 4 P.M. but did not amount to much. 24. To Glubi, Muly & Front Home We met at Candle Station I 12 M. following were in faty - My Sach, Dr. Kum, mit Barn, mit here, mit metatte, and Muf more. author that, trying day, We reached m. about 12.30, and founding at me to the 11 then to the Afelowing bealty Returning in mend to beleating & the top can for home 27. Along the Patefrew from Elehenter to Orange Sum young by may of Thathe Sleven Rel and returning by may of thether an Spring Beenter were out in full fore, yellow violety to were in indeme. At Orang law, I stiffed to expen my symposty to Mr. Cruit on the duth of his wife. The day was delightful. I family a little sulty but mut excurring av.

We must at Hemilton at 1 P. M. - the following were in the party - My South, Mip McShaw, Mip Mour, My Backer, Mif Barun, Dr. Kum. De Banke, hop materitte, a jetney now rew from Hamilton to Carry, and as it was there about of the car, we took it in preference to the car. We remarked the tornism at 1.10 and from the states out on our hand reaching the Sampounds in an how and a half. We then proceeded down them on the right hack. Our trip wer made to see Meetermin and we had as grand that of it. It was at its heat and in the greatest profusion. Other flats be one in blown - one 90 The day we ideal, and all enjoyed the trip. Returning we stopped to

040

10 Fait trip of Botany clan. We met at Shirly Lane and took the und route to I Hamplin. The day was ideal and the trip was a 4047 enium, 17 Summe top of Bottomy class. We met of Hilledele and Et the 048 route to West Fruit Pak. The day was ideal 80 some plante were found in flower 18 a trif to Smeet Fall of Potomae. We get do Mr B a most station at 8 a. m. . The following were in party: Mr Sach Mp 049 metecation, me I fine, mit Burn prip more, hip South, my Ball, the Kun., and Mp Daugherty. We neithed Seazetown at 9.45 G. h. and here we were joined by New Burner, at 10.45 me were at the ely 050 falle. after looking at felle we sat down to one bunch. 122/15 It were extremely suttery and we all felt this heat. I thought of them der storm. By now we were one way up to boot plece to come to the other ends, arriving at the old afet, when we crossed let year , we found both but no one at hand . Jeeing a feth leeding of the hilliste I dealed to go of it and we'd I could find anyme. I found the poth a fine one leading rome distance but no house. Returning I following the path of stream and room come to the cottege & her found some one redy to take we can at 12 /2 \$ (helf fac) africe. I had to relune to the follow but we were soon up and in a shat him were seen on the other side. We some the effects of the ice on the here many of which were cut about across. We more started on our life down the cauch. Armid at the cim, My Smith, Dr Kum, "Mr. Him wellhed out aum the swinging bridge to rei the fall from the Md. ride. The rest of an continued over trip, stopps howen at the best look to gether flower & await them. In The meantime it began to thunder and there were all indicature of a thunder shower but it pained on & we decided to go commende, we some come to the path hading to the gay. We followed it & staffer quite and nothing to come anxiety. We returned to the came and stated on down them but hed not proceeded very for when we had juite a severe down pour. We put around in some mempoper and had we had only one first khower, we would not have found so hadly, but hadly wer the first shown over, we had another, and then another, so that all of an were room roched to the shin, Just often the first down pour a young feller and you women came clong along, both rocked. I beaut letter that they were making their way to the car line, when termine were in the rem

of the im. Had one only known this, we might have changed our

still as futly as an former days when the bridge spound the curre of the run. after leaching we went down to where the hacker formuly were then decided to start on the return hip. At albeiter we would the run. This is the first time for gent a white since I have taken the trip. It bede for the affine Budling rock alway from a distance I rem that romething had haffered that the rock and commind what had taken flow. The arpline Bradly in no mue, the portion fresh containing the little covere in which the few man at home her ben blested away. We took the runte along the new and at Hollsfilly received the stream. To-day I decided to show the sping of on the hill. We reach Elliats Cody almost 5, 45 P. h 31. Trif from Bonnie Bue to Window Will. The afternoon were ideal. We took the route leading to the right this time. It run that they intend starting of the yeary again; most of the weter

her been pumped out and a foreman (?) is again on the scene. after lewing the grang, we followed the would runte.

I a trip from Toman acrows country to Parties on the Harfus Road Road The day ideal. I preceded along the arms on south side of the court home this took right into arome beding across raile and bush. I wished that I had my mak, but not having it had to inguis my way, I wan told it was the right way to Bainwith. The road made a francia bend, right at Endowed. Here I migued your and have that the mad would take me to Carmy. Here, two ? found Lealer Luni's flow of 25 ann. I kept on, but it was link a with lefue I muded a flew where I could been the name of around I was an I won very much surfacied to leave that I were on Taylor la. after a which I came to thele Rd. I then maynings the boulty on one I had here to once before I keft on along Paylor arem, fielly wall before Ry at Parhaille It was not it all the route I wanted to take.

5 a trip to Western Run. We met at Town Court How at 10 a. M. in this for jetney trif to Cocheginth. The following member one on Trine hip Mc Show, Mup Swith, hip materite, my how, hap Bern, mp Bucher, Or Know. We reached lockequille by 10,15 and at once retart for Western Ru. Weeks Wester Par, we took the usual wester, clothing in by going along the left hand, anning the twee at the bridge at the old furner and the keeping along the test night back. We reached the hij with about now and her win ate our limet, taking newly a full how for the purpose, We met with one would difficultie going down the them; expeciely had were the last hillie to-day, to fine her hund away so much of the unbulant and with it the enfforts used in climbing the belluide, However, we

1:056

in affairthy no good way to go father. We returned to the coping and after esting the remainder of our level started on the housewood tif. This time we presided through Delfielde.

14 To John Hofhin Botamiel Bade - lest trip with Botany clan
It was a very close but dis aprechle afternoon, there not an injoyable as it might otherwise have been. A new feeture is the labelling of the trees - the bole although rather laye are infinitely god & intenting - they not only give totamical & English name, but by mean of map alon the distribution in U.S. 15. To Charpele Beach with the Wordy Cin Legre. The boat leave fut of Brushing et 10.30 am jute to Cheefeel Buch alow 2 P. M. . The Him went along. The hif was very enjoyable. anni at the Buch me insited the give a letter took the elither can to hoth Buch. It is a very short ride, possilly a mile or with me helf We visited the woods but found nothing expecially intenting. Returning we walked the distance There was some ring just about 5 P. Mr. hut we did not get wit. Bout left for return his at 6.45 P. Mr. home about 10. 19. To the Come and the raining of Math Brand. - this is lest tip of member until in September. Only My Smith, Mip Mateentle Mr. Bushe and Map Burner went along. We took the can that paned Stewart's 4843 reached Owing Mith - That is St. Thomas Church Your dark 90. Mr. and the Church reached Owing Mith - That is St. Thomas Church Your dark 90. Mr. and the Church 062 et 9.30 a. he (Hen we met Buther) We bothed it come of the old grame learned from Mr Shefu that the church is nearly 20 yrs, 170 rome yrs. We tal the und rate It hand of the sping, a Saw-will will room make an eyes row of the entire flace. after hunding we founded though the rain. The weather during the morning was fairly exceeded but aring moon, it has been rethen unbenealle. at the dam, we had a both show We stopped a chart time at the dam, but noting the rain I thought it wise to more one, It was well that we did so for on getting out in the forch of Mr. Che. Bell to start and a letter un. I ruffere it ramid more than an hour. after getting a drink at the spring we sleeted on towards Phenville, where we wind at 6 BM. We were made a hip down to Mr. Soller, met her Mr. Pur who come down & helpe her in his garden. Mr. I've told we that he had lived more than 40 yer in the West how all about the Jellowston, bran Cam, Joseph The the Was their girth a while at Mr. Soller reached Ochemille again shout 7.45 amid home about 9.30.

to annier. The evening is ideal for the walk

310 1915 - June 22 - 23, 22. To the oping. I examined the Lynnichie colony, It is in no fine a condition are lest year, there are fewer plants, it do not book flourching, and then are very few plants showing unant much of leave in the whol. Lest year (v. 6/7/14) then were effective the leave in the whol. 2064 with leave in 10'2, 11'2 × 12'a, this year I ree only once of some win 26. With allow to Herring Rom. We test the route by way of the fit plant which is not repolly needing completion. Two other boye accompany we test Reaching the run they found a view flace or when in swimm 2065 They had a min time On July 1 took a trip with Nellin, Mp Swith, Map Down x My 2. to the Colfornia Exportion. I get Columbia and to BxO trucker where I third to get some Evening Prince of the Outsthere about. I manged to reme come efectively Brucing Bet 136 21. a trif to Catomaille to ree Dr. Simon and then to Cewall There her been a very flerent change in the weather, it is much امر ۱۹۱۱ مام ۱۹۱۱ corler and the cultimen her disoffered. 25. hait hip with the botterical certain. We met at the Ellica 137 City car termine. The following were in the party-Dr. Kun, My hosher. mip mone, mip Burn, mip & hale, mip Small, mip metante. We tooke the result out Jonettown Rd to Hollsfield and then along the truche but to Ellicott City. The weather condition were fine. nothing uping intending attracted on attention, 28. a trip to S. Balto. and there to Coaroll switch. The new 138 I manyed to get a min let of Outle new the W. M. R. R. bulle at Caroll switch I found more specime. Returned home by way of Columbia avenue 2. a trif along the Patefue. We met at the William an termina 2139 in time to take the 12.45 can for Habithap. The following were in the party: Mit Sach, Mit South, Nip McShen, Mit Burun, Mit Materiate. We took the would route by way of Sulfhu St. vad, and Orange Summe and I filter av. It was cloudy and due to the rain the River and wer get mendaly. We stiffed at sentin Hille - found only 4 flants of Similian crimite, and also at Sentin Place - have not a eight flant were found. There excees to be a lack of fell flowere this year, which standing that week one high.

To a trif to Carriel Suited for Ormellan. Seemed to opening 1140 of himain and Saforain. I was pleased to find an applibue in bloreon. This is not an uncommon occurrence at this line of the year when there is much rain. of. We met at Hamilton; the following were in the party:-1141 D. Kram, hip South, Mit Smidt, My Bucher, Mit Barne, My More, My Mc Show, mip materita. We tenke the usual trip to Comy and then out Harford Roy to the rive. When we really The rive we proceed of atream to helve Reland. When to The rain the woods were very wit. a few chartments were collected. We reached Lesla Rover in time to take the train at 5:07 P.M. reading Tourse about 5, 20 are home before 6 o'clock. The day we deal, Second row Spingya at the food in Hafred Read.

We then went along the truth towards Sandin Rays & then. followed the mode to me bolond, which we the followed to mady bridge. We visited the oping on the hill orde and then tent the med to the bitter and breakly We found it fairly flestiful, but not nearly so much si are best year. Often getting a suffly & retry some bunch we started on trif but to Islandarine. We took path area country and had very bittle trouble finding on very. We get buch to Islandaria in time to take the 5.30 che reading Carden status by 6 P. M. The day was ideal & all enjoyed 1. To Cliffords for Catalfo pode. I took Westport on a went to termine of line there continued on though park, cut across the few cut where new highway in being built, findly reached was just below the Dufant place. I then proceeded up to the Dufant reached and covered over to the S. Y. R. R. Proceeded then towards the Broklyn bidge. The Cetalfe true are just beyond Clifford and just when the new S. L. appreches the old tracks It did not take no very long to get the pode I then started an return trip, b. The try to day won to Swan Creek. We met at come of Pight & Balto. Str The following were in party & ready to start on first can Mr. Mohn, Dr. Know, My South & My Matacta 150 We had headly started on our trif when we were joined by Mip More & Mif Burner when came a second can which were just two winter behind, the first . We took the nevel route to Swen buch, The old lodge is now no more, every bit of it has been taken away lite of mater & ocher alone title when the old place stood. Returning we walked though The woods reuhed a point about at had of the cuch. all this line we were in the words while at this time of the year are it heards breatiful. Everyfully record delighted with the trip. We got buch to the road we lived in and recold the com about 6,20, by 7,30 I was home 2151 9. To the lots in S. Baltime for spening of Etramonium, Hanthim and hoppe. Sund without much topuble. 2152 13. To the Beach ravine, We met at the Wilkin ar can termime in time to take the 12.45 P. M. car. The day was an ideal one and that prilly accounted for the lage number of transfer. The folling were ready to start at 12.45 : - My Me Shame, Mip Sauch, Wir Kame Me Made hup Helmich, hip mete with, hip hille, hip O'heill. We stated on, humany that the other fully could wenter us, which they did at the entrance of the

ravie, Here came hip Barner, My Smith, hip home, hip bain, hip Clark & hip Day

1915 - Nov. 13 - Dec. 30 316 We took the werel route though the review a up touch Columnille where we would about 5.30 P. M. an intenting observation was me upon the Spiebal. The braide more being furt are only specify if at all covered with bule, most of them in feet have not any bule afor them, The hander covered with buds have no fruit when them. It would even !. That the branks have fruit every other y 16. To Reveride. To day it is comment blustey, other 2153. quite a fine day; Hed to get some Tungs of according 20. A trif to Soldien Delyht. It has been colder and to-day, that is all morning it has been very blusty. The Trip 2154 wer only poorly patronized - my Send, mig metentle & hig Ben alone attenting it. We weld Owing Mile about 1, 40 P. M. 2 we the still wordy, but by the Time we get to Solde Dolpte, is held modified so much that we found it way pleasent. To day? I didn't going from the region back of Dolpheld severe country to Red Re. It found must intentify. I kept going too much to the right apparent. for one finally realize the med it was just at the chuter flow. We realist Owings mer about 6 P.M. a were home before 8. 23. To Lourt Point. The day is rether rem 2/55 27. To the perciname tree men Harine. We met at 12.45 2156 at the Wilkin av. can termine. The following were in our for mif Smith Mif Mateste, mit Sur, Mif Burner, We took the would rinte. The day was an ideal one. We found the tree filled with fruit & each of an got a mice outfly. On the way for Orange las The trip was otherwise uneventful 30, To Brooklyn. The day is rether rew & disequeble. The colony of wood-cutter & lunder men seem to be doing nothing. I reach 2/57. for Partridge burnin but with little auceur 4. We met at the Rolling road for a top to Union Dam mip South, Mip Barmer My McShane, It was a titlle bleting when we steeted out but it some moderated. We took our
when to the thing we can those puts
first formation - first flowers - all as I have so flow withink on
Dittery. We built a fine on the beach of the rune and enjoyed in
for just a while. The trif of the atrees toward Jeruseles was as
it is always are enjoyedle one. We get book to Rolling RI by 6.15 P. M. I was home before 7.30 2/59 7. To Brooklyn, Seemed hickory atems and trelif her bude B day was quite a pleasant one.

11. We me at Catomirelle termine. The following were in the paty muf Such, mif mesham, my moderate, nelle cleur, mif Smith 2160 mif Burner and Mip O'heal. The trip was to Out Spring on the newwe where we were going to calebrate our annual front. all come prefaced to have a good time. We took the assul works by many of Valuations armed at the sping the fire one built and in due time, fortitan were boled, Dansague heted, ogster warmed, coffee x core prepared, and breed touted. We all enjoyed our feet, and removed would our fine will dech. The trip back to the car though the moon-bit woods were she a treat. The weether to day but been ideal. 2161 14. The ground in covered with enow and a stiff bruge in blowing. To-day, I decided to go towards Hemlton for anyears notwithelaby the weether it was just flewent transpiry. 18. Heavy nam lest night and all morning fronts and the trapper meeting me at Canden atakin for the trip to 216 4 Benfild. I builded! to forthere the trip will I undery, meterd, took short trul to the opy. The weether were alien et now, at all afternow it was get fluit exiting the wind wer bluttery 19. With m Himer to Hamilton to see Mr Van Renth. The afternoon wer ideal overhead, a little roft underfort however. We took the route by way of the spring home, arlington an, Hellen Rd and Heinte an. Mr. Van Reath is a painter, and it were to must hem and see his fine friture, that the trip we taken. This home is a rather imputation - boling little building, and are in surpried to Juny of San Drigo that I met Mr. Van Renth. We remained with Mr. Van Renth for an how or longer and were guite pleased with one visit, We returned home by way of arter an. Scrider Love, arlungton an ste.
21. To Benfield. Left Canda Station at 99. Mr. for Blanchurine arriving 2164 the about 9.25, and proceeded at once turnede Benfield arriving the about 11.30 a. M. The ground is frozen and thick ice is on the ponder. after lunding I mited the oping and then proceeded to Bent Och where I bofed to get come Holly. Atthough plantiful I found title with beriew. After evening come of ocholeshie, I started on return this, going by way of the old mill 38. With allow, Mr Home & Robert out broublin Rd. The day were an ideal one, delightful weeherd and only a little roft under fut. at the fait lottle rame I stoffed for hefetice leaves with this little deton was route was not Franklin Rd to the old sanitarium and then along the main way to Dichyolle where in tot the can hack for hom.

temperature have come chanding and much despece, so that the the me of spirithy. Too day it is africally more with the too the wife the time of time of the time of time of the time of the The weds we wift and must flow muddy. With their dewlater one had to be goite atherentic to modelile a life. On a coaregue mue of the old members were in hand it our meeting place. Endow me of the students of the Training School, come, and clerided to underlater his until trip. Notwithstanding the drawlache, the trip was a course. We tak the would rock to I was had, but a coloring I heft close to the creek and then heft large in the words. I menaged to get none Polytichen also some Ceth arine. On may home we bud guit a dompore which dampend we considerably. Really an line - little after 6 P. M. Balle + Light Ste by 7 P. M. and home elat leff on bour later. 25 again to Brooklyn, for algo & Symplocuper. The wester in again warm, in fact when it changed to colder weather on Sanday, there was very little of a change. 29. We not at Hamilton. The following were alredy there when alle and I arred hop Born, high mishon, or Buchan. It is still morn, only to day due to the lak of another, it is with row, We took the Cong cu et IP. M. and aring the about 15 mile letter rete with for the Bruponte. On my found Skale Calley in blom at the lettle much and in the ff. side of the read record some Springer We reached the rime in due Time, crossed it and then continued along the read to the old ofing home now almost conflictly deleft dated. We many continued one way along the river. The old mail failing is almost conflictly demanted. I wanted to go down as for as the fut revine but not having her over the route wently were a little mixed of as to how for I had to go. That an idea at we not for the soul, to-day it record much farther der a consequence we did not get down to it. We ment down a short chitener begand the current or him on built a fine. We restry have a little while possibly a couple of home and they continued on down the stream. We went ame detere down, but on the remine I were looking for and next appear, I felt afind that I had articly found it, and as it was getting lete, deaded to start back. We get back to the road by 5.30 P. M. .. From to day some fine spin-

to the cer by 0.40 gint 5 min. of the car time, at I we were in Hamilton

21/2

to a eft about cloud of tree, how to stone had been crushed.
We get in Al a road leading up to I Felter an, paring on our way
a menty built hangelow, gut a fine structure. It was just
about 6 P. M. when we get back to the car.

179. 26. We met on the north side of the bridge bryind ht Holly im. at IP. M. Buide Aller and myself only Mip Burn & Mip South.

We presided to Franklin RI and then continued at the and, though Franklin finity reaching Woodleam. It was quite a windy day, almost as much so as last Saturday. We built a fine at the rocks. and have in the pury allem bright out some She Mitable. The trip were enjoyed in afthe of the wind, good as we ressed Woodleam we saw a large runniler

180. 29. To the spring with Mr Huin. The day in only fairly pleased although leter in the day it was much more so that

endy in the day 4. We mit to-day at Rolling Rid. The following member were 2181 on time ! - De Kum, Mit Miteute, mip Burn, Me Sulm. It was my intention to go to Union Dam but it were no blusting that I divided Burn asked about the Pary Willow so we went back to the road and got a few referming. We Then come lich again & freell dum the Rolling Rd. When we realed Fredrich Rd, I thought it was not bluming as badly after all, at any rate that we were potented enough The blem Red and the along it to Webute and The Rin Rad. This while trip was all right we were furtitud against the wind all the way. Realing the Rain Road we continued our tip towards Drage lawe. We Welth they have started of a felderfor industry. at Black we found that chaque had been much, Two stantime we built alove the dease and a bridge but to them. Just what they are I could not make out me did I understand the se plantin guin by the man in charge whom we late som. on our descent to the wohe. amid at Orage leve we went of the hillente to the Carcador which to-day liveled expendly beautiful with

bour on muc. Returning we crossed the run at Orange beine and then proceed of Whiten land to the come and late to S. Ball. It was not very evely no the words were ginte reft. During the morning it limbed much like rain. The renew is great back-coard, with the exception of the Symphonefur forties, and Elithin much, I have found nothing

to put wat. We built a fire of a the hillie there afect an

11. We mit to day at the termine of the Woodlaw co. The following were in the party- mp Stewart, levelow, mit Mateute 2183 my South, my Mc Share, mip how, my Burne, Dr. Kurre my Stewet, in newway to bear about jutneys. Finally all was fixed & we shall on me til out Wester hill Road. We used retter along to it was about 3 P. Mr. when we reveled Ben Rom when we trust ish to the order, bee two May Stand had to leave on to go on to their Pile in order to catch jetning both to city. We are soon in an ideal cally regime, expecully one for between & morror. Everybody wyinged the plans it was a heartful day, the temperature just right, and the abundance of interesting things made this a borner day, Cladain we will refer auted by the abundan of Cl. exporter, furte, and rangefining and the finding of bel. confer. We built a fire when some dutains down the rem and how the lunch and rested. We recold Dy and about aum down. The trip lock to Woodlaw was also much sugged the shy with the builful mom a constitledow efforded further enjoyment. We get beele to W. clost 8 %. Mr and have just lefter 9. 14. along B x O. R. R. to West Balto. then to Columbia an them to 2184 William and by way of weed to St. Mayo had. Home. It was guite warm yeters but to-day it is comewhat cools. Tooked for the fonds at new the achol but mind them. Had goute a flerant hip entiring woods to left on my way up the avenue. I shall have entered the one to my of but I miguelyed the locality. Ge it were the triff am all right, only failed to find the pointer a content to lest Saturday. We must at Burger Och Juntini, went out Thety Pike to the Falls the along the Falls to the Holland. The triff am flowest but must be to the the sound be to the the sound bedoing to Robband. The triff am flowest but must egul to me let much, du mainly to implement weather. Hed we must been accompanies by a little day which followed in from about the way start we should here give on to Polissillo, in it was we due to y look to me starting point, while me weeked about 6.30.

21. A trif to Brighty a vicinity for Springyer. From Dad also Capulle in full bloom. The first this year. 2186 25. We must too day at come of Light & Balto. Sh at 12.30 and there tul can to Curli Bay. Following were in party: - My mature 2187 my mon, my mc Sham, my Sent, mip Burn, & Kun & Gulan. We took an route to Swan Creek, The day is one of these unsearnally warm ones a

frequent in the opining on which transfing is more or her implement rather

the pleased. We trult a fire right on the bluff overlooking the river of wh

wady to have it all that was meering was to them it down the

enlandment. To-day we managed to go to the very head of the excel.

about is still nother backward, no sign on get of bloom. Several auturbing bihen une found - Cl. didyne murigue, Cl. digitate, Cl. arititelle Bacongen roum in must excellent chips 28. Or trip to the stream for alder ete. There her been much rain and the etrem in envolvem. Alder one now in bloom 1188 and the willow are breaming conspicuous.

1. Ou ideal day. We met at Camber Station for a trip to 189 Benfeld. The following were in the party: - Mip Soul, Mip Burn, my Buchen, V. Kum, hip Mete with, my meShaw and Brelow. We deft Comba Ctalin on the 12 M. hain arming at Elembin at 12 22. By the true we were very to sleet it was 12.30. a sleen wind blen for the south sail, notinthelading we really B. at 3 P. m P. will B. for We then winter Birling Sp., Best Och, the ite We ate bunch of the efrag. By the time we get back to B. it was after 5. I the winter to see Mr. addien Pumpling who has a motor tack and made everyont 1 85 = with him to take on back to Glenden for \$150. He was to ment on to and hold at the church at 6.30 this game in their to mit the It will and with of alig the rece. At the old will we found on first fige' you and in the under clar by our first atheline. We of twitten about 6,35 and in 5, at 7, 45. Me bud! to me at for him & got and to muder station at 9 P. Mr. 4. To Tower and the parke for froze yes and willow. 190 Both were in abundance and I remed quite a suffly, 8 The trip to-day did not take place on account of the moon x shal. It certainly lowhed futly this morning - The tree covered with mour the ground too wer covered, it was so slurly that a trung though it wer foulthurly. Lett day During the day it rained and in the city much of the anow disaffect but in the country it was replied by sluth. I During the night it anomed again & this morning the trees again to the run we chang, 2191 pareing the old pump house. Try eggs in quality in the old pool.
Helpatien, Sayinain, in profine. I help along the streem to Oal
Spring, here I was surfacions to ere a putty had flathing on the ground
men an old true rathed near the ground. I hadly hower what could be the
matter, but even sew that the bird (flicker) had been caught by one by in a stul trap. I sum librated the bird and after grunding its third It managed to fly into a true. I preceded down shear or for a Bang Rum and them made my way back to C. Engtherium was found in blom. 15. Another ideal oping day. We met at termine of Elliate tily car line The following were in the paty below Da Know, My Charlese, My Elizabeth 192 Merrill, My hore, my Sail, my Barn, Mit MoSham, Mit Matante, Wa

324

days. We left how at 3.30 P.M. It booked like rain but we dead to rich it. The filtration flant reem to be in working order a fine roadway comments Heller & Harfed Role pung the buildings. We got some dictain of the stream. On return tip we got as for a spor when we had a bury shower so were guite don't by the time we

22. We mit this morning at Brokelyn at 9.15 o'clock. We expected to take auto. Trif to Benfield. On auto am not them bir buy deg & that he could not come. I the tried to fined rome one close by that without muce, me had i to give up the But tirt are jo to romewhere the . We deaded to go to Swan Cuch . We realist our destination at men. after dince we stateted around . Cuche Wilniam over very abundant. The following were in party. Mr. K. De I Com. Bulan, My Mctently My Barry My Sach, & My Me Share The day one only fairly fine, but we enjoyed the outing, in efet of die fort met of the morning

2196. 15. To the ravine, a raing day. Seemed spenin as quilly as

29. To the ravine beyond the Cave. We met at St. Thoma Chul Li following were in party: Suchon My Sarch, My Certainght, Map Weer, mif Man, Mip Burne, My Metente, My Me Share, My 6'hiel. It were bright 2197 sunhing day, at time rether suttry. We took usual route and aloffed. St Thomas when we found Me Shefer, hung straightening up come of the tout sti He showed we the grave when the first white child born in Balto. were bur We staid a little while in the church yard and then moved on towards the ravine, which we realled in due him. We were very cony to ree the destruction of the beautiful woods at the head of the ranne, fortunately now at a end for most week they intend to stoop. Plants are still bushward in the ing only 44 were found in flower. We got back to the cur line alone

8 P. M. reaching home dat 9,30 9. M. 2. From Termin of Wilkin av. cer line by way of electric line to Sulflu Sp. Rd to and to Orange beam by my of Rin Rd and them by my of Rin Rd and them by may of Hillow a. book to Cetum will. The day was grite a fluid me cloudy at time and threatening rais. I hoped to get some Direct but we the lete for flower. Spring flower every where. 6. We met to-day at Hamilton at I P. M. following mention were fromt D. Kum. hipsorel, My Mr. Shawe, Map More, hip Materita, Bulon 2199 my Bun and alle. . We took can to Carry & the would runte to the Mutuin builty which eye were found in the greatest frofine. The day were an ided one, partly a little warm then mening hat allegather got flower . Our lit of flower is winering woodsfelly . 60 men found to day may be a four mue, pulif to just turis the number of flots found leit week. Our reason is got behind time, but will some colds of. 9. Franklin Road. I decided to-day to visit the Jellow Cypupedian builty out Franklin Rid. Took Winden Hille can and get off at the violent The day wer an ideal are and the distance to this intenting haunt were quickly covered. To day I took the bown path and without the best difficulty went duistly to the sport, I was very much plened to find an in accord mum-ber of plants, here, lest year, but me plant was found, to-day then were at best two dyn, ar well at this time Papar we in bloom, Cardenie, and agalue, Sunge Sucherent is just about stating. after albeting were metered Incided, Istated or return trip, stuffed at the food and collected some hitelle and then hentered on to the can & home. 13. To Roch Cuch and the Hed of the Menthy. We met it the 1201 fort of Brodung, sollowing member were present: - a Kim, Paulon, notal my 6' hull, my Barn, my moderate, my moshane. about the boot were the juin x freshme South college girls. who we going to Frais View on their armuel college fete. The day we downly and twie a the wy down it daight. We realled the bid of the inech about 9 o'clock and at one net at one the mud rate to Jewleville. Just before weeling Jewlindle it remit again in a full way and award divided to get some ail clith for capie, futually met miled for even after it about and the day wer almost perfect. We realled the Maythy alast moon and then the bunch. Cypufedium une found mut flutfully. At one sport on the Old Will Rid an allin aprime was found. We maked the afect and will look for it again ment you. Tent catufillem are one fluitful this year and we stuffed reveal time to fee the tree of these feets. When men the borling we came when the party buyelon of Men Bernal & have me stepped a little while to chet with Mrs B. and ree have home. Reaching the Cold broll we natured that a wheel (weichest) had been fact in portion and were runking with refidly. a fund is fet with earlier, but we wild not been for what purpose

We needed the had of the creek by 5:30 P.M. at 6 we left realing than Vin about 6:45 and here we led to wint as boar for the colly give the war about 9 before we realist the city. The top we copyed by all 2202 16. A rainey day. When I left home it were only mixting but he got to may distinction it were raining. At first it rained only or carried by but by mone it had settled down to a continue rain, the difference hairy that it rained at times had the at othe times. I won to ree the Jellow Cophisphine at the Dan, so stated at four Ello City. I formuld if along the truth alleting are I went some has a second to the City. The Cophisphia is daing well - tonday more than 50 f were counted. From him Dan I formulate to Hellofuls count the and the made my way by way of Dyman Ris to Woodlam when I can for brown. Woodlam he had girt a five, 5 or 6 form to have destroyed.

2203 19. Fruit tip with Botany Class. We mit at Rymel Hights.

2203 19. Fourt trip with Botany Clave. We met at Roynel Hughto.

With 26 members, we left our starting flace about 4.45 P.M. We to
the would note tound Frankle Rd, and them along Frankli Rd to
Window Helle. It was about 7 when we get them. The afternoon is

20 4 20 To Event Fall. We not at the Me Back aletin - Mp Si Mp McShen, Mip Metaste, Mip Bum, Mr Mr Matt. We took the 80 car, reached Washington at 930 Q. Mr. Seazytown at 10 Q. Mr. and hast then founded up to the dam when we crossed the ruine. It was about 1 P. Mr. when we started on our trip along the Town poth down to Celin John Bridge. It was 8, 15 hy the Town had to wint matt 9, 05 for the next one. The day was a performe, and I take guit a mention of fiction. 125 flats were flower, and I take guit a member of fiction. 125 flats were flower.

2205 21. With Hellin, allen, Elini, Buther - Manie though Greefer, Chal St.

2206 23. a rain day Visited S. Bell. and then one Bro track forms to mit Women and inity then home by my of Warhoffer RJ. I hope to find hunt Poch but not a tree own to be found.

2207 26 Boten, Clem met to-day at comme of Shady & Park Hughts &.
We list the word rate own the country to Jouri Fill and Hay
The afternoon were a pifet one.

2208 27. We met to day at Lie Come - Tower The following were in the party i - Mip Sarel; Mip modhere, My with, D. Kom Mip male map may been, Or Known, Map More and Mip methodotte, We went in Wularry Velly Pohe and though Righy's then we sale Eller, to the

Gunfonde, This being one first tool since the new dam her been completed we found the til must atenting. We stoffed a chatter of the old kilm. The Columbia was in all the glog. When to we found a count and later med the two compan - two logs 15 a logs of ye . We ate lunch in the woods just beyond below the alle. The trif from now on we weath intenting. Petering Rem in grite a board aturn covering completely when once were the 3-aided bridge, and the roadway, For a true we had some difficulty welling our the ruly tillier, afinely so to day in the hight sureline with the atmosphere lade with moretime. We stoffed sweets time to rest and to enjoy the new scenes. We got around after a bit to the high bridge and the new road. Here it was very beartiful and all along the new road wer new and beautiful right after another wer unfolded. Just begind the Promotion Rd, we came to a fine ofining; it refleces the other fine one buried under the roadway. I had my camere along and around award fection, one of the bif bridge, me of the new dam, and we of the old dam, Unfalimetry the are of the new bridge were spoiled by my forgetting to two to a new number of the file. We reached Like Ran we for sheet of time that we deeded to walk on to Town. while we realled about 7 P. Mr. 30 Decoration Day, Took bottomy clave to blenburnie to see the

2209,

Socrecini which now is in bloom. We not at Conductation in time to go on the 10th. can. The following took in the trip. - being Brained. Wife and evened the where name I have not remembered. It was one of these atting dispersable days, that we growelly have for the date. We readed blushown about 1,20 and set out at one for the sound. There was much the Petche Ments were in fell bloom. This was girt a treat for all. We not moved alongly down steem to the food. We not of our tip it legan to draygh x one at one made on way to Wagnin are will live to our a treat, for they were cutting out state for fruit bulist. The log is treated just as in case of cutting for vener and a knowle cut just as in case of cutting for vener and a knowle cut just as in case of cutting for vener and a knowle an adotherial nother with during of aleter former being that an adotherial nother with during of alete former being that an adotherial nother with during of aleter former the log as it revolves cutting the during aluft into the lay the vener thereofor brush of outs the slate. We steamed here girt a while, as long as the along that the slate. We steamed here girt a while, as long as the along that the channel freshold thin. It was so you we get be the Cles Firmer but the above freshold thin. It was 5.50 when we get beat to Electronic, to be me one in Common stated. Cell supposed the onthing

I went along it to Old Henford Rid them to Hamilton, then by way of

Hamilton an. Halle Rd, arlington ar. the home. On way along Crowdl Br RI found a low shoul in blow, which fred to be Bush Honeymakle - Dierville Louices. 13. A trip across country from Reddy an thoughto and when I took the wand paining along sich of Walter. I followed this award on the Taylor are the along it to Walher and along Walher her I "Juh Pol and book home. It is amfining how for but one gove though the words to reach Taylor a. It is my a short start to Weller and When? went this avenue, I had to mo idea what read it were, but later land that it won Welher be, I had me iden of finding such a bud a summer mythy have. On my objective point has Jul Rig. I hatter about between for for when on reaching a bud is the mad. I ram a hoth bedry in the direction I derived I followed it It howen bold als a rhat distance in, so I had to get buch on the areme. I rome bound that it we Welle he is bed to Jul Rd, I've followed it down into Jul Rd and then went along that thoughfur book home.

16. I that this for Bottong Clan, however in it remis so We met at Comple status in the the son after buring Belter the sum byen to show a it towned out to be a fine day, I had intended going to Benfile, but der and later to try the best to Make and the west to Front Homes Then we ste drived On way had to built a builty to cure one abreve. From Front I found them me went to Elwater y and another hidge had to be built. Wafilet flue is now away by Just Obult out Worshi we got some fine stimbule. The try for Election to Without and them to hid of Story but we are min that I we recht performent by 5? after a which will be to the total of the sound of west the boat came. May catteyer are now going of it had of crub. I'm ambachi flow is still the fruit and he still come down in afre & ctay a until Seft. The best best bet the had of auch at 6 P. M. x week home at 8 P. M. 24 lix on rome ex consioniti - Hombayin employein & there much though greate ling. 12 With Willing allow, Morning & Chin to Lot Ram. We life have shatty after 8. a. m for Toron x the took 8.54 G. M. train for Yeth Rown, We got to L. R. about 8 min port 9

22/6

Mr. Barren

2217

It was a firstly armshing morning - posselly a little too was
expended as in the same. We proceeded along the road, at f
frequestly to admir the ecency. I took the camer and recoma ramber of fine fiction. Our first at one a the hist tathe reme We realised the sping about 110' book, no decided to set bundle
After lumbing we continued on one trif to the life brigge. Here
bore & helic remember which main a ? eventiment on a about distant
father when we returned about a fort a needed for an love. We room
started as return trif. We get book to take Ram about 4 P. Mr. so
what Allie's a Chi rest of Main a ? went down to the sping of home
Bridge and returned in time to take 5:13 train book to Tomme.

2 2 1 8. 24 We mat to day at Hamilton for a top to the Sumpounder. In after

14 the mice day only landow and Dr. Weber were there to mid me. Dr. Web

15 in the Myrician on the Kare Webell. It a Mid Sum though attention in the other of the second of

2218. 24 We not to-day at Hamilton for a text to the Sumpounder. In after of the mid day only lawlow and Dr. When were there to med me. Dr. When it the flyrician on the Kane Wilhelm II a hard Seen Hogy stemm is trul at Man Jul. but who asked to come to Balto. in when to altered the Hiffle This was any fait meeting. Dr. Wales is 55 yer old, get a heavy man, remains me much of the departed Charle Wales pr. We meet at 8:30 2 hr. I can to lawny and then started to Isuspale. We crossed the bridge, reserved and medican way of along the atreem to take Rom. We at hard paid before reaching the reilward high. Amid of Y. R. is went of to the Prome Town Rs & much me my track Towns. Of Runder we would to the Prometer to the Prometer of the Reply. Is in any time I start to the Prometer of the Reply. It is any time that I start to are his garden. Wa got to Towns also 6:30 R and I was have about 7.

2219 27. To Cherefred Buch. - Nelli, alle, Chi, Beth & Me this aumforme. Perfected Dr. Water, but hereit bethe that he was from from the formal by an a friend winting him. The trop were a friend one in ofit of the hat welling To-day we troud in to Shawer By the get some excusionish and of come were much letter reaching the Break what we reached at 2.45 P. M. We had 4 him at the Break that both to ver five, but just a we turned into Shawing Pt. It began to rive & raised guile had until we reached at 11 P.M.

2220. I. With Dr. Wibe along Western Rem & the Bumponder from Cate wille to Manyman there to Tower. We met at Tower at 8.40 G. in time to take but to Corbinable where we arrived about 9 a. Mr or a after. We set out at once for Brew Don Rim and as used took the left book crossing at little bridge. We then made an way slowly down a stoffing frequently to rest and to enjoy the brailful account, I took several friture of the rew. It was about 3 P. Mr when we reached to and as the day was grite fine we decided to go on towards Marrym which we did, at Marrymain I took a fixture of the high bridge acro

the bum powder. Here too I in admitted got on the road leading to the till gate and did not notice it until me were some distance away This is, of course, the sure direct way, but I was more any come to go the legen way & see the old still house, However we continued on one way stiffed for water at the spring have and finally received Towen about & P. M. Reeflerin were found in great profusion The day we girte fine, alunt ideal, espirally so for this time of the year. of With Dr. Wele through the revine. We met at Calmille termine at 1,30 P. M. We took the route by way of Valente and the old pump home. Our first stop wer at Oul Eping where we refused our relin with some of the cool water. It was a werm discountly striky day, no we trailled at slow steger. Raplinia were abundant, expecully young bruggerde to day but the meet was deceted. When we reached the Riland tracks we went up to Orang Some and crowded the river. We then stopped at Christic for water flate leaves that In C. no larger laid there but Mr. Stincheonels.) We forwarded up the rame to the caseader then returned to the Pair Rd. We now continued along the Revi R's. Stoffes et the old Block dem. ( wo are making it py We roused recrossed the river at Elehate and poneing though Thath returned by our of the the Selen Red to Tradel Red It we about 7 P. he when we resulted the birum, topie 8:30 ) wer home 8 With all to Herring Rum. The weather continue but & striky. Today It is four worse the gurbody. We not by my of the furting filterline flat at the huntiles and the lettle pott orwholing it a old growing. This path person the spring on the hillwide guit before reaching the ling environing pool. Allow ment in bothing just below the second pool, after an help how from in the water, he get not of the wester a we continued one trip on up to the old my hill. I have me left the men & the top home by way of he the 2 has Rd, autifula the ste. realing have about 5.30 P.M. 2223.15. With aller to Fort Maltery. On way we saw where the Westrobland the muchant sub-morine can docked the huba Deather land was lying aide of her. We reached the fet at 4 P.M. allen went in bething for an hour. I the members, I took a well - 97 around the grounds. after allow come out of the water we and after resting while started for home. The whole week her been disquestly worm & atisting. To day her been we exception to the run of days this week, We got home by 8 D.M.

Woodburn Cer. Then to Kemp. Bushin house is mor taking chape One interesting thing observed were the purticities that dued lines las a number of leave were lying on the ground, each war on the top of a little elevation of good, shift exactly the the attem of the leaf, which stood fully 1/2 in above the other surface. This about that at best that amount of roll had been unded away, leaving the parts forthe by the leave.

5. With allow to Fort Me Hung. Was get down about 3.30 P.M. 232 allowent in bothing for an bour then we took a both around. Saw the Wentyman, but were too lete to get about. Left the Fit et 7.15 P. M. 8 Up the Scriefe river to Georgeton with Willie allen, Buth 233 and Elin. The day wer a diqually but strily one, ending with - storm while et Buch huch, about the best were Dr. luty, Mr. S. and this dayther Dorothy - Dr. S. her for the let 8 ye was much flend with the Josemite which he has visited twice and Redlands. 12. With all to Suyun Och, We refuted the trip of July 29. While at large Och the ment appelle feeler in the best trip. We we please to find the mother anothing are or our return from the last tif. We staid to see the fire when which were fine 21. To day Welli, aller, and I left for a 2-week stay in the mountain 235. we took 3.25 P.M. train from Helle station arrived at Buen Virtu Shang stetien about 6 o'clock. and at Movier cottage value we were going to stery about 15 min, taken in time for suffer. . After suffer we take me fait well down to the Summit and back. For details of other trip sees dring. To the Careda, Pen Mer, etc. 2236 A. M. To Monterey & Chermian. one, plenty of room about and her many convenien. About the same hime that I get about, Me miner came from the office show. We arm had in of a four from when we were really to rail about bride there aludy mentioned were Cookie - Koshi son Chele, Ed. Reuch (his methow) and Mr. Schemme (wenter oferton on Rhim). Before starting we went when to see the cettal is a swamp new Hebdene clase - they were, however in from shape. It was about 6 o'clock for before we get away - the idea was to get out of the river and when belief million Island for the night, he then we little wind, Kosh stated his gentine engine we now went fort enough. It were a brentful night - the moon showing - the weather condition weafterially grand. While telling me slipped out beyond the island into the bay.
We can hand of it bonness & got beach again and room found a good flow to cart auchon. We now got something to cert and after an bom a no turned in to bed. 10. Did not sleep much lest night due to the stegum no doubt. We get of early this morning about 530 Biclock. Some after saw the sun rich. after a little bullfast we got ashore and while reveal were buy benling reine I got to work culling some cattale and some Spatine, after two rether for heals of the seine, all get hung at the cet take and we aron had plenty of them. We not get about the bout your and by 1030 were under ried. The wind com fine for ruling and we were room not into the bay. The trip down the beg were not so feet, mouthable we were out of the boy & entiring the river by 1200 PM. and in author 2 his, were up at Frang Ba. Here we ruled a little while puhed, cetted the but get above about 6 - and home about 7. 12. With Rev. Mr. Otic to the range I mit him at Canden Station about 9.15 a.M. me reached Cetomille about 100' beh and at once proand I own the wend route into the ranne. We followed the new road until we reached the first stream beyond the new bridge (?) just when the main stream just official Staffords field. The intenting fact were the fooding of some Schweinstyria on one way along the right bank. To refind the aport I marked 2 trees one on earlier aids of the sport is higher to begad it and Mrs. O. built a small mound of rock, We followed the theam down to

2272

273

the month or whe it emplies into hail brank, we then crossed this brank & made one way clay the field, extred the woods, ite, ite until we came to Oul Spring, but we stuffed to brush, after bound me continued one way though the revine. Nothing me of experied intent to me was observed. We reached the reilrest tooks in due time, We then possed to Graye lemme and made one way buch to the case by way of thit time law. Mul I buch to

Canda etatine in time for the 5 P.M. train . I what home about 5.30.

1916 - Sept. 13. - 1.2.7. 13 a chort trif to sovan and return 16. With allow server contry to Dried Will Pak. We went in 39 & Stied then assure to Homewood, though I forward to the winding of which we followed right it the park. We crossed though the park to the zoo and then after an how or more afect here contained than the park to Rute time Pike them to Morin are them to the cent how! 2276 We arranged to meet at an of Pen Luy an + Ole Jul Rot by 9 a.m. 2 and the day forest while. We went along at an any rate of from. 15-18 mile as how. On way down Will had a blow out and a half on no wer apent in patting in place the men time. On it was we get down to Perigi before moon. We had drive what 130 P.M. Toward 3 we. went down to the pin & we use to be a trip on the motor bre It was 5 when we were all buck again at the home, after a little lund me got mady for the return tick. Returning Kind and a blue -1 45 min commend reflering a new tire. Northwithstendig to delay and several attum me were all but home again about 9 P. My. 22 Nellie & I walked out as for an Bennant au. vie Redy. and the woods. Mr. Bushin home is propering. We returned one 2277 23 huit trip with teacher. We met at fout of Broadway at 7 2278 in time to take the Semen for Stony Could. The day were slightly class and delightful on the best mit at all cool. We realed that

Cuch at 9 15 a. M. and at one net out for anyon. Ormed at army's a dualist to the the Ole Mile Ris. I at fact had almost dualist to go on to Jewhille, but finilly decided in four of the Old Mill Rd. Right At come in Demmie. Just on one were possing When D. appeared. In come the ex presion of her fore we know comething wer up, she had no doubt recognized the party or the came that had pared on May 13 when Dr Know won along, It reem a 'I be hat have conething to probe her and she have layetter it. When ale own that Dr. K. vaint with we she gave in her version of the affair with unbellihaute. However, she true them to much healf equable told in where the reshood we to come in the electer line, and of a path we ought to take right of the head of her field. We take it a find it quite intuiting. We followed it down to whe and I can will won. On the way found much Polycele later. We me lunch near the old sean dust fale. We then tale fath to the right and came out than the Old Will Rd. We then tale nearly route back Elector. When not for from the station it round, a paining chown while did not lest by. after the above we continued on to beleastin when we tak are for bonne. The following were on hip - Mit Sand

Imp me Shave, My Burn, are hip meticotte. To-day un chingrepin day we found them in greatest quantity, We get book home by 6.30. 24 With Horace in auto to hoch Raven, Pauline, Sertude and allem also were along. We went out to Tower them to Providence and vie new road to Sich Ram. We crossed own the high bridge and freely of to the end of the newly meederiged road. Here in get a nie lit of bolden rod, Returning we went right along the stream to Commell Brily road and returned six that went to Townson. The day were an ideal one for an outing. 26. With all to Sanette for leave. It has the warmen 280 30. We mit today at Tourson Court home in time to take but to Coolings willer The following were in the party - Mif Sarch, Mif McShaw, Mif home, 1228/ and hip moterate. We left Toman et 8.40 and got to Corlegeville about 9 o'clock. We took the weed route to Writin Rum and ilan along the atream. To day it is your cool just fine for transping. We ate dumin at the rock overling the stream. On it was little cool we did not tany, a com efter esting started on we trip down stream, We mored retter refilly, to-day I take as low a result in I could and then winded one ntwo climbs. We get down to Warran about 2.30 P.M. and a felt etil alle to walk on we took The route on to Many main and then on to Tousan. Night overturk in when still come distant from Town. We reched T. at 8 o'click. 1. To the spring at the with Mr. Him at Columbia an for Evering Primare rectioning in time for dumin 2282 2 To Howard :- J. H. W. 3 To Colubi an for Evering Premier. The fard is about white 2283 2284 2285 7. We met at William an termine, when we took on for Sofflen Sp. Road at arbutur. The following members took in the trip: \_ hip he Show mif o'heill, mp Barum, hip materates my Sarch, mp Lenter, hip levin my Smith, On Kum. We took the would route to avalow where we wring the rime into House County. We stoffed to exemin The Bentism and for the hilliste feetly well covered - for more so The sine revealings after whiting a few gutter, in wich our way want. We stopped at benting plice but as better were to be found. There we mut huf adam and result other ladin also on a training. Our ment stop um at the spring were the Caread. We were stoned the wing a little part 6. The day how been with warran. The work have taken on their brantiful autum trinte - the diffey bide fair to be a

grand one.

338 1916 - Oct 8 - nov. 12. 8. To the lots at the Columbia an termina. Mr. Him a confamily me. Having made a curry last Tunday, I know jui where to go and in a little while had a view suffly. We would not to the Westport can what the west had a will have 10. To huthwille for Bentin Here, homen, they were not abulant, we few mided, were found. Seemed a few grans and action. The day ... a ideal me, a return toffed et Time. 14. To the surporter. We not at Themilton felling winder to 2288 in the party, - mip Such, my materita, my but, my But Dr. Kun, m. Sulm, hof boise, my much. my onelle, my mester. We for to larry and the out the read to the river. We crown the river a then on to the community ofining home where we left the and and me one way down along the left bank of the cheam. a few papare we found on this part of our trup. We went down to the first rim and de followed it up troub its rouse. Rushing a form we much an way a the field and findly receled Harford Rd. We then started on the bonner trif. Rudd the con termin at 7.15 P. h. Hault at 7.30 and low chi 15 With Mellie alle at Elin from Catamathe termine to Dage Som 2289 at return. I made the top in ade to get one Sapanie. On way to me to Dr. Kenne his 2 lags, The day the getteday we ideal.

17 To S. Belt at the clay the well that to hot Warm of the tenter of the time of time of time of the time of time o 2290 to middle Run. The following were in the party, Mit More, My Bu mit moteutte, mit mishen, my Sim, my Bucher, and leter De Know wh came a must can. To-day we divided to go along the right of Sain has The well to, in fitty, rether long though, nothing exceptionely with ing was showed however. The view, experielly those men the water was fine. The weather towards the end of the week became very unrecon stily, disquely so, getula, hower it changed & to day, it is eyem 23 With helli & allen out Franklin Rd. We left home about 2.30 reached Wurten I fills about 3,15. We took the word route down the Falls a dhen along Dead Rom. We went out as for an the Witelle find. After recurring a lot of the plant on started on return trip. The day our she 24. Reputed by of the 17th 2293 28. We met to day of the corner of light & Baltin Str. 12 2294 follow i were - the fet : - mit wein , my How, Map Smith my Burner, Mil Sarah. My me Share, My Meteratte, Dr. Known My Doughuty. We took listi Bay cer and then well conte to Jimen Cech , To-day; after our wend visit to the bluff we went on to Hansahi. The how in beatfully citized booking right out over the river. One of the Mr.

However come out and chard on around the place. There are men 3 on Q in the
extete with a waterfast of over 3 on ft. We passed though Herealis and
then on to the road which hought in back again to the care.

The day is again grand.

31. To Hiller Rd. ite. I took the route to Bushe's and then on to Waller
Just beyond Woodlam as is a road leading east this took me though

31. To Hiller Rd. etc. I took the route to Busher and then on to Weller Just beyond Woodland and is a road leading east this task me thought a mee statch of words and to Italia Rd. On this part of any trip?

found some good Polytichum. Returned home vie arlington and other ofining home.

4 We must get Condended to the total is at 12 his total in

2296 4. We met at Canda staton et 12 M. To olding were in party: - May Sent. Mit Burn, May Carrie, Mit Mun. Dr. Kun, Mit Mass Shere, May Smith. We reached belowburn about 12, 20, we the went clay the trush Sandin Reys and the about the object of the words on to the bouleval and Mady had, but a we ready the boule of the war store just this aid of the chiam. We staffed have for about 1/2 as how when it remised to be raining commented have and we decided to go on to the hithward locality. It may remid against commendate bushes, but lefter by could asking it was 4.50 when we get lash again to believe what 5 when we get but Baltime

2297. 7 Election Day - Hugher-Republic and Welcon Demout - inited the lite is S. Belte for cefulle of Stramonin, Clother aham, ite.

2298 11. To day we met at termine of Wilhem as, cen line where we took can for brother. The following member took the trip: Mip Such, Mif Motherte De Kum, Mr Subow, Mrip Mothere, Mrip O'huil Mrip Burner, The day were an ideal one and the trip were keinly enjoyed. We took the trip though the buch ravine and over the usual route. On way home, while young along Cetowille as we saw a fetty yellow flowed plant while proved to be friebly poppy.

2299 12. a trip with Will, Kemp a Morrie in Kempi auto to Preduch

12. a trip with Will, Kenf a Morris in Kenefi auto to Frederich

Jefferson & Breddoch Highte. We best home at 9 !5 a. Mr. much
a juich trip down to S. Balte and then about 9 "5" started for

Frederich. It was cloudy, temperature cool, but we felt rune that
before buy the arm would be chining. This it actually died for a fur

minister toward 11 o'clock but the cloude room hid it. We really

though it about more, a trickly afriking at 12! perced right

though it and continued on towards festiven. after getting out of

the true we found a convenient afrit and stepful long enough to

ext some lands. While we were eating we material that it was

starting to rain, just the lightest kind of rain, neverthelen, rain

We were sorry to ree it, but we dedn't mend. We went an Jefferson it was our intention to go on to Herfin Trung, but just brygned Jefferson, new road was being put down and we dealed. to return & go to Breaddock Heighte. We were almost back and Induite again, when we found a road beday toward Buddick, in took this road and after a bit got an main road to Bredsh I was romewhat disefforted in B. H.; I had bound so much g it, that it was such a beautiful fleer, the curry so ground that I was expecting too much. First of all I thought it right in her ful woods which it is not and this disfloritment was sufficient. to overchedow what good forte it did force. It is brentfully be high, and as most of the serrounding region is probably treeled be quite extended view ober beautiful undulating counting extending right into the mountains. On a bright runching day the receiving must be grand. We went though the town and a chart of tence beyond it, when we decided to return and get buch he On way back we stoffed at Buddock spring. The evening bere is an putty and we were very sorry it was just raining ite hardest, no that we could not treet around a little and enjoy it. It was about four o'clock, we stoffed again & ate our second lumb. We now started for our home reached S. Balte about 6.30 and bome a little after 7. We all suggest our tip miliothetend

14. To Rimide for Housbulent tronge. The cloney weather cont. 2300 To-day it in quite raw

18. We met today at Woodlawn. Following were in party- Map Smith, 2301 mily me Shem, Mit May Maylety, De Kune, mit Buran, Mit Sarch, Mit Mate a We went out Window Rd to Helbrille and Bein Run, The day were an edu autum one a little frede juit right for walking. Or always on enjoyed the region close to the read, just as we enter on our life along the alex There to me ate a little lunch. To-day we followed a field, it to un waster a bill and then aware a small tributery of the run on then to the box of a hill when it met another real which went on to the run. We found this little diversion to an foreme route quite be can't and about us that a day could positably be apent here studying the traile. Second to day opinion of the away of acour, fine fints of Simlex belove and fiche bladde out produ We get but to Woodlan at 5,45 and home shitty after 7.
21 To S. Balter for fruits of alanthur my old specime in we large them but I found remail new one father courth and new terms water. The desire of the south and new

the water. The day wer get pleasant, The new Hamm It bridge

is refully nearing completion and will som be for to the public

341 We mit to day at Tower. It we rether blutty and I were surprised that no many attended. To bling one in the party - hopsind my he Share mip meter nip Late, De Kon, my Sende, my O'hail, hup Buman mip more influente. We decided to the the higher-day on me had beened that the Fox Che are ging to meet at Handle gate at 2 P. In and for the same the woods. We learned from me of the early come that they were going though Ridgely's, so we decided to go tomade blen Eller. We were just at the ham when they started out We hoped to see them eyein during the day, in this, however, we were deoffentled, we had the hounde reveal time, but did not see them We went on to below Ellen and just boymed climbed the hellich and get on the med to Yok Rown. This we followed on to the Printer Red which the whoch to Tourson. although it was a little blustry in the early part of the day it was not so much so that it was die quelle, in fact we all enjoyed the trip. 2304, 28. To S. Battimer, Lount Point, record of Datem, Daven, happer, Chemofording; Visited Me on Helme on the Necken, met again Mr Braum and Mr Herry. The Nicke now occupie the side of the what when the Deutabland was. 30 Thombagging Day. To the aping with Mr. Him. This morning 2305

it was somewhat cloudy, but towards wom it cleared and the day bacame delightfully fleunt, spring live

2306

2. In westertly fort to rend and notion of trips for this worth. Decided to take a trip to the persummen place to get some of the fine oval kind. The day boose four grand. The winds wilmed to be freele but not two much so. I war an Sulflin St. Rd by I P. M. it took the went rente to avalue. Stoffed at Gentle Hille for some seeds of the Blue frings butin thin made my way of to the Personium place It was delightfully pleasent of on the helle and I found my furnism place without much troubly. I was rether disappointed though for them remained whom the tree but 5 for opening. Weather were their many Worn's and then get dawn to the word; It Orange besone, could the awinging bridge and made my way in Hilden her to Catomula

5. a trip to-day with Cherlie Koethen. I got over to his home on Southern an by 9.30 a. n. We then west out Believed to Hamilton an Out Hamil. to be the when it forhe we took the left forh contined along it will we realled the duck form. here on took the right forh entering the woods and come came to Trumpo Will Rd. We turns to the right, and the atreem can the old hill, aum nearly demolibed, and took the road beding to Patty I fill. The walk is quite interesting, going along the edge of the words for some times. We came to a forking of the road, buth

go on to Belain Rd, but the me to the lift in clove to the can We took this fork, som reached Belin Rd about 1/2 miles beging the can terminm. The hip was quite a mice one. May come in

found in the early part of die trip.

9. We mit to-day at Catamorthe. But an account of the weather only. there came. - Mip Saul, Mip Barn a Mip materitie. It had stated now it was not raining, but just before one it pound down again in a chief wind for north, I didn't expect anyone and no date, had it not

been raining just at me, would have gone on. When they came about 1.1. it was cleaning and them were no more raine, in fact, before lang the a wer chiming, We went down Hilton as the way, I collished stem of

with, maple, hitray ite x tilif tree buds. We comed the rime Orange sum and then revenued the trip we generally take to the Resse

me Plan. We get to the top in due Time, on the way found flow of Better Sunt, of come, must be for gone to be worth allerting. Onthe hills collected Hefetic bon. From Heaty of Toly too, and at the Personin Place on way over to the form & then due

now made on way to the case vie. ander, Came Ril and Sulflin Sp

Read. Reall have about 7.45. We were all my much pleased with

12. To S. Balto., Riveride Park, Lount Point and Sta Neckar. Snow covers the ground. By noon it was melting away rapidly. Secured some fine specimum of Horrechestmit at the Park

16. More enow fell Wed coening and again yesterday. Hell yesterday an aframed my arm very badly so that my night arm is quite out of commission To day it is bright is cold. Snow everywhere covers the ground this day for our annual feast. On account of the cold & the enow I expected from would come. I was it rather empired to find as many. The following me for decided to brave the elements: \_ hip Smith, hip moshaw, de Knar hup San muto metacotte - mufo moses. It was 1.45 when we left the terminas. We went out Monthone are and then continued the woods. Item I get spring of Hickory & Tuly Tre. I intended taking our usual noute towards the rame, but it on the wrong path. becoming aware of it only when we reached Helter ha. I then made of my mind to visit the Boje Sante

Headquarters. We had little trouble finding the flore, a road landing ducitly to it from Hillow and It are a pretty little day but, one and a half's high built of tilit poplar lage, a lage pouch is in front, the roof bing supported

reder by, many branches were allowed to remain on each filler, there and to the rustic effect, and waved also no doubt for the propose of har cape, hote, evale te. I said above "little" by hot, it only looked to

342

2310

for it was large than it looked, it was polably 25-30 ft with and at lust as long at large chimney was built in the center of the rear wide, we doubt, for a large open fine place. We decided to build am fire in front of the home De Kum, room had a fine are, thenhe to the words bying around, and no doubt wer fortheir very purpose. The but could not have been bested such mir, the woods have being rather open; & fairing the south, it her there Rum all day. Bentifel victer extend in all directions. We stand hur until about 4.30, cooked caffee, warmed yeten, behed potetoen almost on at Oul Spring. We all enjoyed it very much. I wer very comy that my lame arm fremented one lating an active fact. Let 4.30 we started on our homewal march wheel the terminin about and down , home about 4.30

2311 19. To S. Beltina.

23. a trip was mapped out to Waven and the Sumpounder, but an one came 2312 ? therpre, a the day was ideal, duly to wolk own towards Hamilton I, went out Juffee Roed until I reached Buincille, then along Plust Plane a. to Taylor ar , from Taylor ar I went to Hillen Rd ction along lotte Ri to artingtion has

31. With Will King Mornin automobiling. We got away about 119.4 23 13 Celled for Runt, then proceeded out Balow an to n.C. R. R. tracker themen on to Juffin Rid and Townson. a busted his delayed us. Reaching Tower, Will thought he would go on to Tillen Rd, we, ", proceeded out Toppe Rd but non found to much in the get over to Itallen Rid. and leter back home, rucking the garge about 1.15 P. M. It wer a autiful morning rather cold.

344

to alugton am that he didn't to go. 23/5 6 We went to met at come of Balto, x Light Ste Troly at 12.30. Those when I get them no one we are hard. Often waiting until 12.4 I started off alme. I wit to S. Balto. It awar the bridge to Brothly and off to the swamps for Skinch Cally. after new spremen and on the return home, whom should I must but, up Sande, my mosham, my Smith, hop metwetter, mp Burne, Mr. suchan and mm Hord. They had not at 1,30, an my ported delid ( How I came to put down 1,30 inttend of 12.30, of come, in head to exp in) and then started on alone. We went again into the evampe and flagething name openim started homewood.

2316 9. To the spring. The day is quite pleasent
2317 13 We met to day at corner of Wilhim a. can at 1245 P. M.
It was cloudy and a retter raw day. The following were in our
party Dr. Kum Mr. Hurl. My Mate atte, Mif Saich, and Mif Smith
. We task can to Salphu St. Red and then freeded own usual route to and into I tomand Co, when I recent fit fall at the brution Italk rome and of Sentian cruinte. Just at this time t began to arow. The view now with this subduel light were must brantiful and we frequently stoffed to admir them. The one at the dem man bulow were exceptionally grand to day with the indepine. buly and. How fretly too were the little result coming down the deep rame! The ground wer soon count with enow and this made welking a little difficult for ben and There were see it's reached Orange some in due time here we comed the ru and made one my uf Helton On. to the core, realing Fuling Rd about 4.10 P. M.

2318. 16 To Brooklyn and vicinity. The cold weather continue and the grown is fugue. I visited the Skut Callege swamp, Let then were little to be seen. Seemed twy for clase work.

20. We met to day at Woodleson The following mention recided the the trip : - mif more my Saw, my O' Nail, mit materate, me

Burne, Me sucher and Ma Hard. During the morning it was rether cloudy and gloving but lowed now the sum began to perfort at intervals and by one it was shiring. The afternoon was their girts fine. I We took the trif along the fells to a shirt distance begand that Pilu. The false was from our and there was shating at Sugar Och. The afternoon turned out so ideal, that we all enjoyed the trif very much. A little for was built at one place and we ate our luncher It was about 5.20 when we get but to the car line and as howe later when we get took to the car line and as howe later when we get to the trip of the later when we get the trip is the trip of the later when we get to the trip is the trip of the later when we get the trip to the later when we get the trip we get to the trip and as howe later when we get the trip to the later when the later w

from the vide where enhancine were and is now again on inde where ale

wer fut.

- 2321 27. This is the colout day we have head for a transf. We must an Belie nord comment of Heinelten a. The following were in the party: May Morner, May Smith, May Barren, May Meet cate, Mr. Hand. We took the tip there is to me were the form of the words, we went out Heinette an until are resolut the fale, here we took the lift head fale. We continue along this will we resolut the road. At this point, I was not grite some how we want, decided to true to the right, why to bear, in fat, I was seen that we were going one sufficiently ground, that the road lead to Philadelphia Re, we, i, about beach to where we turned in a went in the official deciding. I never seem the doubt form and very soon get on right path to Proup Mills. We then to the word beyond the old mill, must only revine, and made on way to Party Hill. Reaching Party Hill we made one way heard to the care. On already stated, it was a cold reven day, but by walking fort we want room wow, and all of we aryoned the trainer.
- 2322 28 Mm. Ramburgh faced me a visit This morning. This eftersom we took a with though Guilford over to the ilitial line. During the might it had moved, this morning we were again living in Francis bent but by more there were only should make fout atthough the show above over most best full
- 2323 30. It trip to-day out Franklin Rd for Hepabin leave. It was a brailful apring the day ownhead the arm showe, not a cloud were to be seen but under foot! what a different! Here was much or pools of water, or ice commend with flowing water. Franklin was abound all gradation of these conditions. I had intended going out the road as for as the bridge crossing Pred comment, but I found the road two bad and not would the effort I, therefore contended suggest in turning in at the first otherm. The patient of the hillieds from much were able some or bus covered with anow, but the parts one amound and here I manight to get my auffly of leave. It was carbonly great how.

3. This is a cold windy day. It is the wedn't day this few this 2324 We were to met at Westfort for a trip to the new Browlyn o my metanthe & me Hund were the only one to been the weather We get on the new bridge and fromted as for on the draw them reto ed and made our way along the new roadway. This when finish. will be a fine boulevard with curving and endeweller. No the budge was the remain of a five, and we stopped a short twice to worm up. We then continued on to the river and along it until me came to the BxO. R. R. bridge. Here an reveal fonds whil I did not remember seeing before. We stoffed near the seened a and wilt a fire. It was quite flexiont here and we spent on how or more around the fin. We then made our way back through Weetfut and serve the roadway into S. Belle when we took can for home. We all enjoyed the trit very much. To-day U.S. broke relations with bearing on account of the latting

2325 6. I the lote out Columbia an and day the B. . O. R. R. Will to Carroll switch. There out the Island home. It is a ruther con day, fuch with out with

2326 10. We mit to day at Calmenth. - the following member were in pall D. Know, My Sand, Mip Man, Mp Moderates, My Sand, Mip Modera. We make one way vie Valente into the rawne. It was a cold windy day, a great wo much so as but Saturday homes windy eworgh, a trife? it to review were well down. We took the route board of file and the laint the office but we get down rather for almost to Bank Run, Who covered the atree, possed to old short aite and then Chrometer Here the view of the review were exceptionally great, but it was the windy to step. We therefore described the helleide gran to the above, when we bilt a fire which we against a down on that at the laid we higher the trans when the high hill area on all ender, get down to the the raw after the high hill area on all ender, get down to the the hillings. I have also the wee about a return triff going him the hillings.

2327. II. With Mr. How to the spring. This morning it is much warmen around the spring it was quite pleasant. The spring outset to be cleaned out, algae frame almost taken possession of the big tal.

so was pleased to find that we had related a mute landing

and I received home about 6.20. Ocer trispin the rain were

jujet. It am delythely plusant whom we went, probably of

328 13 The weather in still cold & fuch - To-day went to S. Bello.

Secured some puny willow Tungs for the school, also tungs of Duce
2329 17 We met to-day at Rolling Rid. It was my intention to go

To Union Dam, but the sum in the ground made me diade other crie. The following member decided to take the trans : - Mis more. hop Burn. Mif Meterthe, Mr. Hard, My South hip he Sham me Sulan and Dr Kur. On Thursday on had a heary downfall of snow - the beaut of the claser. It was a wit some & stuck when it fell, Thursday evening the trees were decasted must woodsfelly. Friedly main, the woods around were committed from the into Paryland but by more what a change Thereware was melted from the trees and all the beauty was gone. Tooday there is still her enous for even the tullisher acce in many place wereneed. On already stated on these was still some in many place I decided to change the tif and go towards Whenter. The day win ginte pleasant, the temperature delightfor only under fort it were cloudy. We took the route nie Frederich Rs,
Thatle below Rs ite. I tawing my caneve, I got a fixture of the follow
dame with the ice work and water planing over it, When we get to While
we atopped to set buch and water continued as along the Row Rd. at Deage love we ant up to ree the based, which li-day were a most wonderfee with being me lays many in. We made one way down again to the rovin and them of I felter and to Culmonth. and the snow is disffering refilly. 2330. 20 To S. Balto. During the moning them we much rain-but it clearl ofter durine. Very little mour remains in the words. 2331 23. With alle & Robert in Southi, first to the oping and then one to the sew mill. It has been a very breatiful day - the temper tun above feigning her could the roads to be in a most muchly conditime. The mill is about reedy to close down, The true are all ent down 24. We met to-day at Hamilton. The following one in party: -2333 mit Smith, Muf Sand, Dr. Kom, Mr Heard, Mit materitte, Muf M. Sham, Map, O'herle. My more. We trok can to Carry and Then took fuit wood beyond the can termine and much our way toward Lock Ram. The first atitet of real un muddy, but when we reached Old Harful Rol the entition became very much in fund. The day wer for the must part ideal occamily it bold dury a at one time it looked in if it would rain, but an abudy stated, take an a whole the day wer a grand me When we came to Old Harful Red we chall have gon along it and realed Old Could bridge, but we could and now came to another and what hoft in to wit of York Rown, We then proveded much to Y.R.

and the dam & them on the Town by way of Travoline,

morning it round, let was bowever, it short cered, The flace of weeting was Healther, but done to the nain, no are but myself decided to radius. Buy alone, I decided to change the trip and the trip to Cong to Cong states tried Alle Red Chen lounds the new brokened, 31 or St. and have me Old Joh Red. The 20. To the Franklin Rd, along Deed Rum ar for or the bridge 2332 and then to Education him, received Hefatie learn and brancher, It wer rather worm. alder & Hayl are here & there in blown. 24. We met to-day at come of Lift & Balto. St, and took the 12.30 2333 on for Centri Bay. The following were in facts: My Materithe, Mr. Heard my more, mip South, mip Smith, We got out it one would place and proceeds towards Swan Creek. When mean the Revenue Cutter breakty. Me Gulon come up to ar . Drebe verme we found in bloom. This morning early it was raining but by 8 a.m. it began to clear, by now it was heatful. It was 7 P. h. by the line we got back to the can cloudy day, this morning there we rain but it stiffed ring & rest of day of me only a thrustering rain. I want to Town and mand released eyes fourthe fourt. The lags four above hel eyes, the other one had as get nothing valenche yes me fory eyes their the other one day. We dended to got to Benfuly. Took the room their to Islandownie and them walked to B. The following were in the Islandownie and them walked to B. The following were in 3 3 6 party Dr. Kum, Me bulon, Me more, My Helmil, My Mitente, Mit more, my Smith, mip O'hall, might share. Infloren. It wer rather disqueetly worm, making our way down to B. but we did futly well and get them by 2.30. Pat me leveled of the Parify but he would not be back until about 6, We i made one way once to the boiling afing and then get back to his stre get before 6. He was home, but call not take on on he had no percey lune. We awar went down to the old will, landed about for forgegge, but found were x there made one way but to the weed and of to care ruch and the on to aremale! We get there 20 min. In late and hand that we would have an how to wait, but as something had happened on the road we bed a west of over 2 her, before a cur came. It were 1. 10.30 when we got in Baltimere and after 11, Before 2 get bone. 334 25. With hellie & hillie to Idlewill, another fretty day We went out to see the new home bought by their father Idlewild in a compaintif new development. The tome house are all fait, well butt and up to date. We execut the afternoon look ing about at the different lomes.

17 To the review, there along the Rive Ret - and I when I re-Patifice, and there along the Rive Ret - and maken I re-cound the river and founded via Common Red, and Solfh Sp. Re to arbitra when I took can home. The day were an ideal are The trif un grand. am the sum plants found in flower my be mentioned: - Decenter, Nefete Gluban, and triffic. Vite austriant, Cynitim awar. I found am fry yet in the pande num boolon. my Born. my meterate Un interly taking the 12.30 can 343 but find that it delat sitt at May so had to take the 1 Por Reading muly we found here Men Head. We set not it were for Fait Have. The day was dis greatly but, atily. Then we not much flower in welking. We make not wer own to the old down. Here are felt a for sep fring so the leding ount of to the old home & the find white against the rain which wow fell. Mr. H. x I still men the road for a bottle while but leter went of to the home. The show did not Belowing & one set out for the recomp. when we found of the plane of the serving to further is med fluste. 344 22. With Wellie though Silford to Homewood chen to the driving in the rea separating Homewood from Wymani Park. This we followed into 39 St. and back home. 25. For the rest of the rebook your I am to take Wednesday intend of Tundays for collecting. Torday went out Trumble Rd in for on Waren 345 It is a wither row day. I looked of the Coprifedin buildy in W's but did not find it. Lite however, from several represent in another oft Secured of service of a rundom of flower. 28 To-day we mit at Womliter. Following members were front - Mighten 346 my Sand, my Burner, Mif More, Mr Head, my moterate and allen, We develops, just coming into bloom, We found me that 50 plants in flow White wolf, Calofbyllow, Trillian Mitable, Ochen, hing the num our On way home found a Lune moth 2. a trif to day to Seven buch. I started early runhed Calie 3 47 Bay before 9 a. M. Within another home I went the Carele I wanted to get some water plants, but it is to early for there to have made any growth. The mount true of some of there could only be detected. Dyand is own in five whate, and

13 To Timorum. We left home about 2 P. M., had on car not been held up we would have reached Tousan in time to take the 2.40 P. M. can but as it was we reached Town a few minutes to lete. We would until 3.30 reached Prinomine about 3.45 and Wife O' Will's about \$ o'clock, her house in the 3rd from the station on right ride of the west and about 1/2-3/4 mi from it. We were then about 1/2 h. when hip Flemming & Mr. \_ celled. after suffer we took a well around the form. returning about 7 P. M. a 40 are form in grite a min-rigid favir of ground. Mr - come in his auto. I found him grite interesting - a teacher in the Howling rehall. When we returned, it wer time for Mr - to start how and we thought the same, so were in inter to go along a for a Towson. The trut back were very flowert, 16 10 Below Rd mi the ofing home, Orlington an Israilen You, 2352 Steffed to see Chalic and the west on the Hering Rum and also I along the left both of the Harfard Pd. The tip is quite witered ing how Haful Rif west down to S. Bello as du how mon, mip, Burn, mip Smith my metanthe. The P. m. We willed in the truther to Hollefilly. It was a rether were day at the trying. We stepped at the Capparighting place and found them at their but. at Hollefills we carried the 2353 the but and the wede on my book to Pelling Red vie the John Cada Rid . . 2.354 23. To Glenburnin - visited the region to routh of railroad truck but found it unettraction. Proceeded . to the sweet and arend remed fitcher plante which are now coming into bloom. I wend norming as found folige rether to wet for please. 26. Mut today of Hamillon et 1 P.M. Rollowing were in on party Muf Mate atte, Mif Hair, Mif Barun Mifs Smith & Mifs Sank. We tak can to Carry & the welled for the towned the rein Reading the rime we crosed & afect a few minutes in the words on that wide of the strong on the hidge. We then neveral the bridge & ande one way of stream herfing along the right book. Reading Crosself bridge we count of to the efficiency on the Refress? 2355 grounds. Hen we and reverel trushen My Buch, Mits Song de, Mit Johnne et te. who had stated out four Town. On it were the much of a wint for the west train, we made our way on to Town reaching our duties this short & P. M. The day our only fairly plumit, at time it was to sultry.

354 1917 - May 30 - 11. 30. Devoution Day one of the fruit days for several year meither too hot and day nor too sultry. We met at Rolling Rit, for a his to Union Dam and then of the river to Hollofeld, there towards 2356 Ellicate City via the reilians tracks. The following we in our party Mr. Himen (who geterday was 70), Dr. Know, Mif Smith, Mif South & Mif B. We ate one limed on the river beach just beyond the dam. After crowing the Shade of Death ? welhed back to look of the fatel of Enfluence any alient but field to find it. We comed the river at Hollife and the made on may along down the tracks. Inteffer at the Cypinfedim place koping to find my trouble but did not although? come night at the spot where I day of the Cypropedium. We read Elliet to the total home about 8. 2. We met to-day at the Court House, Towson at 8.30 R. Mr. for a tight 2357 Wester Run. The base left at 8.40 at 9 we were in Colleguelle The following come is one posty: - my Sarah, hit Burn, hot how my his arming at C. we made our way of the tracks to Water Rem and the went on would way along the stream. It was rethe culty & this the first part of on trend rather unpleasant. lefter we get with the words wer flearanter, for we trembled rather slowly & sloffers frequilly. My Sa hut he fort & this made on trans later more such above than I deried. This was not recognized bourness will we reached Warren. On a consequence we reached Tream about 6 P. Mr. and Timoring just about a will father. at 7 P. m. We the west nip O'Mill, who were experting in bada little buch redy for an x ice aran x cale. We stud own an hour then made one way hack to Timorum whose we took 9 P. M. can f Town. Rushed T. et 9.15 got borne about 9.45. 6. With allen to Herring Run. all morning it and off and 2358 on druggling, towards now the sun shore but it became extr by sultry, I decided to go to the run and an allow ver just coming from school, took him and alle T. along. We went via arbungton and & Bruiden Love and turned in on the cert rule of budge of stream. On one way we had a little shown but it did not get unt. at Herming Row, the boys we in wading for about 3/4 hr. We now stated in homewand top. I some sew that we we takely to have a storm at that we wild to knowny. On way found a young plicher. We reached home you in time a few minutes leter the storm broke over us, tearing down (5 on Wyambe br) and doing much danings. after the stown had spent trely, rain fell occasionly Il we and touch a night there came wither some storm with weich vivid bigthe 9. School dured greaterday, so to day I am few from collecting in 2-359

as the boat have at 6 a. In our party wer small, consisting of my Sand, nif Burn, mit mateutte a Mr. Heard. We lift retter promptly needed head of levels at 8, 15 h. Mr. We tend usual route one Justically (Doughety) Waterfood, Old Mall Poil ite. Atthough but a netty at him then were a nice bring too, and we found on the fring suggestle. Our furt stop was at the Court meeting for some time showing which we ste me bund after during my results of the highly had been a toplify. It was this time on a stepped for the head to be to the food lift heaf of ouch at 15 h m and to again to the left heaf of ouch at 6.15 h m and to argue at 7 energy have at 8. 16. We met to-day at Woodlawn at 9 a. M. I was pleased to go over the new route, it is much quicken them the old router. The following were in our party and already at the meeting place when I arrived: \_ Mip Soul, Mip Mishere, Mip Smith, Mip Burn, and Mip More. Me wanted the arrival of another can before starting out on our trip which were out Winden mille Rid to Ben's Run, and when we arrived at 11 a. Mr. We now made over way slowly down stream keeping on the left back of the the We ate on land of a new little duty work close to the stay bank of the brook. after landing we continued on to the word Here a fun minute were but withing to the bridge, for I thought for
the moment that it were but that I told her Heard that we would
await him. a going fellow coming slay, when I greatived regarding
the direction of the read come down had me that I but fry then
momentarily get also were and get are given in the form
to the Driver of Red. Armid on Dogwood Red, we found a mate from
Mr. Head stating that he had writed for one half on how any had then gone
on at 2.20 P.M. Ar this was not have right a large or any on at 2.20 P.M. arthi was just five minutes before our arrival we started on to outlike him. Ingiving at the next home, we beened that he had beind about 10 min abed of in and again at the covered hiely ates Bui Pun has to we haved that he has pand or chat time ago. We comfor up with him guit begind the rich on which were grew Conflicion Bushing. We followed the road in to alberton where we covered the row we them follow the old railines truck, and finally marked Dongs Run. We work fall up hellich to Old Fulerich Rd and then vie Joneton Rd hack to Clauds Cay. On may came to old church when a stranling futured were to be held. They we cut get ofen, but bearing that we month like to have one fend church hell about of the and we get wear, him and cal. The day wer a delightful one, all do, a grand buye which temped to some to such a dyree that transfing wer a pleasure.

weather were coming down the life from home and then wanted to the River Rig - a tech for an expuried drin - the medice wat over the endanhant, two farmer be father a moth were halled. The trif along the river wer grit a flewant me. We reached about 7 P. M. and home about 8 a visit to the Eyzimeshie colony near the sping, now, is very dustpointing. The colony is about emptibly died out; no one would were
suspect from the fear strayping remain still ferent, that there were
was a big colony of reveal hundred flents. Not a ringh me of the
spermin with the abronnessy many beaud whatle is to be found. It 1364 will be intenting of they were return.

7 With allen to Georgene Oak Park, We went first to Willale and then welled along the falls. We were in time to see the performance which take place at 4.30. We now went over to the like and after enjoying this for while took a little will around the grounds, we then started back to Willeddele. The day wer guite fluent. On July 11, Wellin Celler x 7 took as extended trif to Major Trake stoffing on our way at Philadelphi, Wathin Slew, and The on to Toute, Thomas Whenh, Clayter, Rapid of St Lawren, Wenters, Ende Returns to Montreel and the homewood via Liber Champlin x Benge, alley Under Pin, New Jul Philadelphi x at lite City The following hip were letter - for fuller accounts are ding 11 Willow Some Pak - Philadephin 366 13. Returning boot. Carbidy about 5, and Champula Beal a little after 7 reaching Baltin about 10.30 P. M. The day wer warm, but aloud the boat it was deli 25 To Brogne Och Pet with allen and Robert. We went to Willeder and then wither along the fell to the pake. It was may those days ahoning the adout of early fall. We had a very enjoyable lift. 31. With Ru. J. P. Otic to Benfild. I met him at Comben ale at 8.05 a.m. We then went up to the W. P. & a. and three took as to Milbrille. On car left it 8.40 and aring at Millerville at 9. We then ret out at me for Benfuld, at Consund, Pobround for a fout time the stone with tablet are the by the Imme humbel Society, com memorating the fast that Washington passed this point when on his we to assumption to lang down his commission as Commander in Chief of the Continental army We reached Benfield in due time and we at mee livhed of the Ly godine. We had title trouble finding aferming me with standing that the plea was overgrown weng where. Mr. Otic got see exermin for his plant from, all morning it was cloudy, but mor it byon to rain so we hartened back to the home close by and here we al lunch and awaited a letting of of the rein. It wer however, close on to 2 o'clock before we down start on. Of course the rest of the trip to Milleworlle got the 3.25 him out of am folio reached Bal about 4,30. It had not more stoffed raining. I now saw Mr. Ohi

affle a few, and a futly cottege, when we get a doch from an entire well 250 ft deep. The tack from the cottege was get a dealing, part of I being ight though words. When we get not of the words, we were at a con unde, more come of the work church. On and took on pat the hip b'hulli x harmatoffer a alt him. We then made on we decided to walk on the Town. But have before 8 P. M. To Morning were in party Mit Smith + Pearl, map Mc Shaw, mit Matachte, and Mep Burn 30. To Columbia Dor for Ocentha, referting hip of last Sudy. Day 2416 with blusty. 2 To the late for Ourthur and Safoneira and pools of Milhound. I 2417. got plenty of the Denather x also the pade but no Saponine. The afterwoon wer an ideal one. 6. We met to day at the termine of the Wilking av. cu line at 2418 12.45 P. n. for a trip along the Poletie. The following were in our party: - Mil Sach. Mif Mc Shame Mit More, Mit Burne. Mit Suter, Mit miles my Wright, mit Richarden, mit Hise my moleute, hip Bacher and lite he Heard: We continued one with on to arbutus getting out at Sulph Sp. Rd, whene we proceeded our usual vorte victualion to the soin, " we also the Rimi 1st Dage have. We stopped at Bentin Hill a found a few of the flower they are not quite on plantiful as last year. We just lift the gentian when we were werliter by Mr. It. He remained with in but a short time, when he returned left in the go on both to Elkridge. Cornid et Orange come, we covered The river and made on way of I felter land Refer freeding howen, I went of trush the revine & The recent rome The day was quite a pleasent me, clightly breezy, but not the much so 2419 I To the spring with me Homer, there who the stream for beachet 24120 9. To Lutherable for Gention. ", went the u wel way through the woods, in ad been raining so found way thing grite wet. Frund at Luthwille, I proceed to the guilian ald, found however, but for the crimite, and with we mue flentiful, no sewed enough of the latter for clear work. 13 We met to-day at Cambon station in time to take 12:30 cm jus 2421 Calenburin . The following member were present: - Mit Sanh, mip mulle Carpeni Je Inf Lute, mit mise, mit Smith, mit Burner, hup her Show, hu Heart age 67 Cornel it Blankuni we took The usual route vie Sander Rays to mady budy. after visiting the spring we set to the Blooking Bittermet place. I've found it in bed whape, it assume to be gradually getting worse x worn, due to the scale that is infecting the plante.

362 1917 - Oct. 13 - nov. 17 lifter sewing come ittersunt, we made our way to Centic Bay vie & State oud or for or Ceder Hill a then along the and to the south the cemetry. This part of the trip we get intenting, into, however, to un to a dought and this was not very pleasent. We get tack bonn about 8 P. M. 14. Will aller a Robert to Saruth. Found a fine colony of Close 2422 Isentian. the finist I have yet seen. We were out but an how and a half guite plenant. I went or for an Franklinton in the It Hille dale 2423 20 a blisting day. It was were must of the week. yesterday dies to, in the afternoon There came a been downfour of rain x in it change in temperature - today it is clear but blisting. We will 2424 at Lee come, Tower. The following member were present: - Ming Busher, Inf Metecotte, Mr. Head, Mif Soul, mit Mc Shane & Mit Burn We went to Luthemille & thought a few trungs Betiene Use the made on way and Leminary are. Returning we took road to Riderum Council the eleveted bridge and vie Joffe Rd proceeds back to Towning. Toward evening it were here blustery & there was of course a devoted charge in The temperature. We all suggest on tif very amount 21 With Wellie and aller though Builfus. It were quite a plane afternoon and we enjoyed our trans very much. Returning we prove along Cold Sping have. Drage Orage in great abundance 23 To Mit Winion in reach for fruits around a number of capula, and about form from hower no bount poda 27 With botten autin to Soldien Delight. We not at Owings he to 22 P 2 111 2427 at 1.30 P. In. following were in party: - my Smith, mig meterate, my Price, Mr Heat, May Sarah Mif Mc Shame, Mit Miller, Mit Unglit Maple hip Surver, We went our would way to Red Raw, the slay the lower road following the run. We came to the cluthest right for I detente We followed the stream of rome distance then returned by one of the other numerous by ways. Our road bed we through a fully extent. We get back to Owing Willi shally after 6. just before the rain While in the car it began to four down and we were treated to gente a Utunden storm. Readed have about 8 P.M. 2428 30 Rain, sleet, wind, then cold & clear. left ashel at now x proceeded the Hamilton, there to Carry. Seemed good of mene, of locut pool. Reluming to Hamilton, I walken from 3 We not at Catamoille at 1 P. M. following one in party: mip Him hip acher, mip Keing Me Hend Mip Materite, Mip Some Mip Burner, Mip Sarch: We went out Mederick Ry to Thirthe be

On way received some force of much key, Black I fam, alather, te. When we record the electric flant we visited it much to our catisfaction. at Orange some we crossed the river and went of Hilter an. to Cotamenthe where we get are for home. 4. With Wellie, Cellen and Cheslie Kouther for a walk though 430 Garette. The day was ideal. We got over in for as the title bridge 2431 6 To the preimmen plan. I left actual at 12.30. Had intended going by train but would have had to wint until 1.25 20 went by trailing. The day were a grand one. I had little trouble funding my tree which this year is pecked with fruit. Closely is a tree with very ley round fruits. the layet I have seen being at bast 4 x eye of the awayer. After getting a few of the fruits, I descuded to the Rim Rd by may of one of the little wille. I then decided to return by the same norte I had come; on the way were poor mentioned by an auto. after develop the follow how to find their way lack to Catomathy were asked to get in and we get a riche back to Sulflow Sf Rd. 2432 Ruby Pt. The following formed the party: - mf Kann, mf South, my me Sheer, my South, my South, my Head, mit materatte again the weather in the grandet. We stoffed to admir the midle time which this year event to be in the extending fine shape. I wan on the both of for ponde with hydre but field to find any. When above to Portion we overtook an auto that had alid down a small embenhant. a day's outing ducking. They were awaiting a team of mules just as we of dy yelping and can the eflecting of what we thought were green but later beaut that they were sween and the count were water by them. There went have been 100'r of them. At the point were the day We were not the very long when Met Sarch & Mit meterate who had stronged off came of to we, Both but expailly Mit Materatic were very anyong. Soon after the men arrived to enter the blind & we closely on one homewad trip. 13 To Revivide for Horesbutent tury and for fruits of the Eyeanne Meple. Cloudy and a little new to-day 2433 17 We met to day at Wilhin a termine following were in the party . - Mif Kairie, Mif Mr. Share, Wif Barner and Mif More. The 2434 day wer a perfect one, and I was commented surpried that so few were on hand. We took can to arbitum and get off at Sulphun Spring Road. Our route war as on form occasion out Sulphu St. Rf and then on to Carolin where we crossed the river and then founded along the Rivin

road to Gentin Place. Here we child the hillinde to the prime place. as sheiter stated (#2431) the tree with the fine fruite wer leden with them. We get a vice ouffly of them and then started on the homeward trip. This time we could the crowd the first little of and then freeded on will we came to the west fath, this took an down hill a short way across another stream and then of till age. We followed this peth and soon came to a band fill luding around the hill, we followed it as fait took we down hill and Then made one we diretty down hill. We found the way quite cary. Reaching the Rive Red. we went on up to Orange brown, comed the rive or then on to Colonie 20. along Franklin R1 to Franklinton x theme to Hilledele I wind

2435. to get some Hydre and diedes that the Witelle material might from prolifie. The day were a very pleasent one

24 We met to-day at Catonwille terminan - the following were in The pain 2436 D. Know who is up for a short varation, my more, mit Burn, my Smith, We took the would route to the oping, where we built a fine and We treated some bread and enjoyed one little feat way much.

I We were to meet to-day at Town court-home at 8:30 Q. M. in Time. 2437 to take bus to Cochequielle, which leave at 8.40 but due to the uncertain can dition of the weether early this morning, no one wer an hand. I too wer a little lete to mut the bole probably 3 minutes. I awaited another car and a went on alone. I went out Dulany Vally R'd ar far ar the river and it took the road along many main Run, finally reaching the Sampowder at Mung. The morning were ideal, at time it was cloudy, but most time the sum show brightly and way thing looked feel and beautiful. I ate my level at the Citaline polutine place, altho it we have but 11 o'clock. Reaching the river I proceeded up them to Warm and these get a few specimen of Egrophi Dillerini. From Wenen I went over towards. Tixan and then beach to Toward na Jah Rd.

4. To S. Baltimore out Fort av. Leter with words 2438

8. To Catomorble. One of the most trying days I have get experience We were to meet at the Wilking an can termina at 12.45, and I would have been there, had there mut been a tri-up of the care, I know already to thre would not likely be any one then to meet me . the arow and alut and rain would have told me that, so I decided after him waited a half how f a can that initial I would go to Citomville when I know I could quickly get the twigs I wanted. It was after 2 o'clock when I finished culturalli and not out branchy down Helter an. But what a ating driving rain from the I was very now weeked from my knew down, howen, I atuck breakly to my tech ound the aframin of hickory receded. I then get buch the can and to have 9. a beautiful day following the storm of yesterday. Tempuature 15

20° below freging, prestrictly no wind with talking about therefore beautiful overhead but grate different under foot. The chatth of yesterday in frozen with all its virgilarities and uneveness of could not get all the author'd I wanted geterday I had to go out te-day to get the maple Tings and the willow, futurely I did not have very four to go for Them, receiving as many as ments in the woods and along the stream near by 11. To Brooklyn for twy. The day was ideal overhead, on the ground, hower, was evour. This bonner only added get to the outing 244/ I link the newel route along the rim. The line point to quickly that before I know it I found that it was bigt how to return 2442 15. We were to meet to day at Woodlanen at 1P.M. It was about 1,10 however before I get there, due to the arrow, Mij Kange alone outload out, We awaited another can hoping that rememe she might come then elected out on our transf alone. We went through Wordland and then of along the falle a chart distance. We rown found ourselin in a westable fing land, engaber was the moir, which considered the friend temps. It were must bestift day, the sum abining brightly, no wind, which much the temperature just right. I collected buys of the Tulif true. We proceeded up atment to a short dietere beyond the day; we then artered and then made one way to thilledale, where we took can for home. 16. With Mr Hum to the oping and then over to Itelle RA for energeen. I left my bottle at the afring until our return. We went through Sweth working on way over to Hillen Rd, I visited The every num me Wordbon he Returning we went out askington as to the Santt enhance, there to the appropriate home. The afternoon were very pleased 18. After aturning from S. Belto. Allen and I went up to Raden and and them to the words for a tree. There we all enable but we secured two wice should over, which who fut try the will do very 2444 well. Some still come the ground. 22 Our meeting flow to day over Catonville, Mins Swith alon ventured out. We waited for another can and Them mude our way to the rame, to the spring and them back via Fox Pen. Swin in still on the ground, above ground everything ishal 28 To John Hopkin Hospital to ree Mr Head, there home vie Cliften Pal Itellen Pid and Garrette. It was clonely, wind from Mutherest and it felt ble snow war in the in, in fact before I get home, it lyer to wow although not very head 2447 29 a tremp with M. Hed. We were to meet at lower, but fortuntly met in the car, then avoiding eather of ar waiting at her corner.

## 1918.

2448 5 Mr. Heard & ) met to day at Hamilton. We troke can to Carry reaching can tourisment about 1.15 P. Mr. We went out Harful Rd to Jeffe R'd them alog it to Old Harful Rd. We now followed Old Harp R'd to are for as the school home where we turned to the left and no one way to the covered bridge. On the way down the hill we passed a member of logs far the Mrs. School for logs who were only coarting. This part of our truly bring generally new war engaged we much arrived at the covered bridge, a got a freture of it and then went in frequence by the war tittle beard of foot and at the dam. The lake here in frequence by the war tittle beard of foot and at the dam. We make one way now to the new road and then in the Providence and Formeron.

2449 8. The cold weather continue, ground still covered with more and ine I wanted some Hepathie leave, throughour diches to go out Franklin Red hoping to find some on a possibly uncovered hillride. Frailed however to find a angle leaf.

2450 12. Last night, we had a very heary downform of rain. At fait it turned in sleet but as the temperature arose it became a steady downform; much more and ice was world away. To day enon were predicted and the morning it has doubtful what hair of weather it might be. However towards more, the a slower out bright and the air were belong in fact, it termed out to be a delightful early apring day. We had decided to must at the William and terminar, where we would take can to Arbeitan. The following members were on hand: - Majo Moren, Majo Sarch, Majo Buren & Majo Smith. I had planned to go through the beach rawine, but done to the weether condition

much ice on the ground, and then the being down from frain last night I deided that we go to the river until The trif proved a most intenting one due to the rain the river was flooded and the wife broken. Scene along the River Rd man exception ally intensting, Ice bloke weighing town our strands many right on the road itself. We crosed the river again it Orange brown and fracceded up Hilten Con.

16. College was closed yesterday and in terday, on account of the lack of 451 eval. To-day I dieded to take a little trans, so severeded out Harfard Rid to Isruidon have and from their home. Isruidon have is one wheat of ice full 3/4 of its leight and had to travel over. The worst stretch were the

hill decending to Herring Run. I manged to get over it without much of. 19. We mit to-day et Cetomille for a trip into the ravine. The following members were on head: huf Kairie, Mit More, Mit Smith, and Weet Burne. We took the new route to-day and their time did not min the trail. We reached the spring without any trouble. It we one of those delightful writer days Kunh plenty of reachine, and although cold not designeedly so. We pulsed out Calley a new place for one fire which in a little while was burning bught. after a while when there wereflest, of hot wher, we touted breed, routed range and world muchunllow. The afternoon was parcel most enjoyably. Towards 4.30 we started on the homeword trip, we first descended the stream as for as Comp Rom

and them took poth beding the Scott shock and there to Helton Case and back to the care. We reached en short 5.15 and have bout 6.30.

26. Element my schools cloud all their week & will also be so next week 2 4 5 3 on account of the coal retreation. Claye we closed tenday on account of order from ful admin iteator who decland 5 days short down of all indulin a. Rombough Aled on 23rd and in addition 10 byel bulidage of Mondays: Weardy might it around the beaut this wenter, this to a great extent report the coal range actualis as the more tied of railroade & we will came in to relieve the with alin a trif wer flowed to-day to Swan Cente Neip Burne wer The only other member to go. It wound of a little gesterday and clock in the result then to we found the roads, especially so around Centie Bay when industrin are more bouning. The Pa. R.R. be laid a truck and man are still working on it. We get down to the rime and had a chance to see the ice. It come place it is filed of on the chare. We win ruther surpried at the great meander of trees that had been blown over in the woods along the review.

30 To-day it is moving again. I went through Homewood to the Seming and then liter though Builford. It was quite a pleasant experience, Snow everywhere, deeper them we have had for years, I me to the combination of came: - no coal, so much mow, little water former due to ice on rune, our car revice is terrible. affautty there is no relief in right.

this moving found ground covered again. With the sum shining bright and raining temperature, there were much about by moon. We must at Catrumble Juntem. We viscited fact of all the willow the and for four the junter. The following incembers were found the Whend May Smith, Mijo Bourne Majo Moon. Thou the willow the we went to Rolling Red and there to theme Dame Enough here were shade. It were surprisely how much somewhat had disaffered in the woods all hills from the south were featively fee for moon, on the other hand there from the water beautiful and iterating. Coming at the and shown were ment breatiful and iterating. Coming at the old from from were ment breatiful and iterating. Coming at the sime the rung was gread. We stiffy at our would stiff; place for level and their continued on of the rive to the ment attention while we then followed by finally reschiptively Rd. We were surprised to see how much moon had with just in the four home that we had lift the road, now in many flew it were guite day. We relieved to our starting foil when we tank are for home.

2 to Brindon have see the Reday is quite pleasant, an ideal afring day, Snow x in her displand, quite a context since may live.

2462

2461

2 We met to day at Calmielle for a hip to the revine. The day is a grand one, sum bright and the raine looked like fingland The following were on hard, rather a few considering the day - Mu Heard. Mif South, hip Meteathe hip Burne, hip More. We hole the route out the avenue, it is the evin way, bender I wanted some history twip. We made our way to Oul Spring and there we built a few and spet the afternoon. I'llank College is becoming gente pleatiful men the oping We were accompanied by a chaniel, who record to enjoy the orthing very much. It was about 5 when we stated honeward. We went down stream with Mr Head a short ductom to see him off, and then made our way buch we the Boy Scate Catty. I'm experiment rake we let the day fuller In Hend come detane before we started on on way. It did not take him by though to see that the whole crowd were not going along and me had proceeded but a short dutien who he freed about and came running tech to are Ruch Cotmorth about 6.30 and have about 7.30 5. after a hurried trif to S. Balto. I took can for Window Hella for a trif out pranklin Rd. The weather was usually worm and roads for the most part very roft and muddy. I reached the found in due him and there exceed some four material intelle, ite. Ice is still on fourt, but will not

let long if weather continues so weren, lefter reming material retrand

ong the oping- the weether.

my steps, as pulably the charles way tound reveal person out, enjoy-

Ump Bucher, We took would note to Beni Run. On way found Red Mufter and I down Might, White Popler, Chickweed, Danklon, alder, Jumperer and Bland Rud ranch in flower. Unnied at Ben' Run we turned i've & followed the obser . On may narigold found Hepetin, Houstoning, Skunh Cellyse, Let but of M march Manyold which wer find about & guit beginning to them. We nich our way down street to the west the Wordland our Degund Read. It was about 7.30 who me get but to the can a an home later to get home 24 With Mr Him to the oping, Weath a delightful, While it spring 2469 comean come with sweet of freje of White in full bloom. arlutur 26. Left whool at 12.30 to-day for Franklin Rd when I seemed a rice let 2470 of frozinger. 30. all-day Try. We mit at Town at 8.30 a. M. at Court Home. We 2471 expected to take but to Texas at 8.40, but bound that it did not leve now at that time but at 9.30, We! took electric car to Trinomine and then wellhed from that point. an can left et 8.55, we did not some much in time for just as we left read for til to Warren the free came along. The trif cewer the field wer an enjoyable me and we reached Warren about 11.15, on the way found Shephedi Vune and Vinea in bloom. The trif clary the run we were rather unproductive as for an flower were concerned, it was only when we were making on way to Dulany Vally Pile that any were found: - Hefatie Blockent Skock Cally, March Mayeld and brother Sox ifrage and finely rome link leaf Maple. all told about 12 plants were found in bloom. We got back to Town by 6.30 on way home which that the clock or Normal School also on Some Church should as how total - to some The day light coing gode into effect, the clocks are to be mound an how of the night but some did this already at own ret. We had a beautiful trif and a beautiful day. The following war in our pady. De Know, my Smith, Mil Barner & sinter, my Mashen, Mil Mateutte and Mil Which. 2472. 31. Nevin and I took a walk though Suilfut this afternoon Early apring is everywhere in evidence. 2473 2 To the ravine. I met Dr. Kum at Calmille at 1.30 P. M. We task the route via Valianti and towards the old pump home. It was rather worm - a little to were for conflite enjoyment - Reaching the ctream we followed it to a foint beyond old Comp Cozy. at Owl Spring we collected Enthromin, it was one of the new plante to add to

1474

this year list. Reaching Conf Cyg we retreat our step and then tod path leading parte the large courts chack but to case. Our outing was just a mice one, Puerje Tour was also added to bet of flow.

6. We met to-day at comes of Baltimore & Light Ste. for a trip to Swan Creek Due to the hij parade only two member were on hard Mip Burner & Mip Materitte. Comp Mender ones were to resuch though Baltimagic streets to day, and thought of further were already things

But no time did it rain very had, no the trip was rather ideal, no dent as he webe we to say, areron is in full bloom and so two are Desterning and Engtheorem. Mitable is coming into bloom. Maple huge are forwing, and Elim fruite one falling. Returned home wheat 6 P. M. 23. Out Franklin Rd. The day we ar ideal one. Just on ? was approaching the bridge crossing Buyunie to alle Instead award furom standing near the side of the steeply aloping hillinde \$
which rain of from the falle. Stopping to see what was the matter I learned that a young fellow had gone down the embanhament in an auto. fortunately within he see the colored fellow who were with him were hunt. The auto were executed considerably but nothing the what one would have expected. I took the usual route received a number of different flower and at the pook secured some fuge eyes. Returning home I took the Hilledele 27. although cloudy this morning, it client in the afternoon and it became very fluent. We not at Willem an can termina 2481 for a trif to belowing. The following were in our party, mit Small mit me Show, mit Sacol, mit Barne, mit me that more, We life can at behitim and the posseled vie Solfle Sf. Rola Comme Red to Couly rune and then made our way though the rain that to Cotomoville where we took can for home. 75 plante were found in flower. Of these the most intenting were my little patch of Trillian grandeflower place cutainly were beentiful - 3 fine of semine such with flower, close by were two little of semine presently cerdlings. another intenting find were a double aremorable on the way foring to the boy courts check - not for for it close to the poth; we masked the afrein by patting 3 stone around it, This opinion had not a righ stame, nor could a fittle be identified, Pertuited that then were at best 200 fitale. The trif though the rame in the cool evening was guite a test. 2484 30 To Brooklyn. Mayaffle and Dogwood one in bloom. The most intenting feature being the fuding of my old patel of Eloularie in full bloom. The widewing of the road at a certain point brings the bed right at edge of road, dangeously close and no doubt will not be for its best, homem, we will see. 4. To-day we met at Campben station at 12 o'clock for a top 2483 to Manly. It was wer of this strong days and in the region travelled. it grinly ful ten live worse then any when she, The following member took the trip: Nip More, Inf Barn, Mip Screl, and Mif Mathata

374 1918 - May 4 - June 16 and later Mr. Heard, who came as how leter, neeting in right at the: Helomin ewamp. The Helomin was in its last stage, only a few of men hing found still in their prince. On the way but to Islandinine a little shower, which bonner we not reserve enough to came any discomfat, the trip back to believe we the ment enjoy able part of one onting. We nearlest Cambon station a little after 8 P. Mr. 7. Franklin Road. I visited the Cyprifedium locality. I form. Them in full bloom. at leut 18 aprimen were counted, although & 2484 were many others not in bloom. It was het and sticky, you almost as intervely so are yesterday, which were the hotest May 6 in the history. It weather bureau the thermometer reached 93°. The route taken we the wend one returning on Hilledale. 2485 11. We mit to-day at Hamilton et 12 o'clock, The following member being on hand : - Mip Mc Shave, Mif Him Mip Sauch, Mip Burne and h Materatte, Inter Mr. Heard overtook us. We took the route down at following the right bank down as for as the ostrick for boulity, Meetincie part ite frime, Ordine afectabilie is at its best, so likein in Trilliam. New 90 plants were found in bloom. The day wer a ideal one and the wood were in a delightful freehour due to the downpour of ain yesterday. We returned via same route, when we reached the road, he Head as hartened orward, he became he wished to carle the 8 P. M. train and I to be home comment earlier on account of company 14 To sarrette to rewn opening of Vaccining stammen, Lyoning Prume originian, etc. the Fragitive is in bloom.

18 With Walter Mun Dodon and again to Washington and the see Follow of the Potoniae. We left Bellining a a 9 a. In Their resolut. Washington of 10.30 a. In. We went fut of all to the Capital when we had a chance to ree the fait flow the senate of the home. We next visited the Library of Congress, after which we had comething to all We then row the mountaint and then the falle. It the falle, I seem come afraining. Returning to Washington one 5.14 train we would have made the 6.30 can for Balto. had it not been moreover of the Red Cornelland. 2486 2487 the 6.30 can for Ballo. hed'it not been on account of the Red Com face We had it to the the 7.05 cm, realing Bathout 8.30 and home a little often 9. The day was quite an ideal one.

19. With Will & Bithe and the Dodrome automobiling, though Builty
Waymain Pack, Dried Hill, Buymin Falls etc.

21 To Slenburnie for Sarraceure and Drowne - the former is non 2488 2489 in bloom. While on the way there were a shower and again before reaches the revent, it remed. Of course it was bot and there, howere, I get my opening and then havins on back to the station and home. Kelmin a gustfolie is in bloom, ale hupiwer foremin

12490 25 We met it Hamilton it more. The following eventure were on hand: - hip he Shave. hip Burner, and hep motientte We took the esseed come - can to Canny and then by fout to the river Rushing the sumponder we went of stream to Lock Rame. It wer worm, retur etily and we moved rether slowly. The stream wer very muddy none so them I have seen it for some time, then must have been some being rain fell recently. At Soch Raven, we crossed the little bridge and tol a look at the little lill when Solve growing it We then stated on to Town. 120 flate were found in flower. 28. To Columbia and Went One of those hot designeeable dage of early summer. I visited the ordin swent, but found nothing, not a these of these intenting plants, which ream to be a thing of the part.

30 To Homewood. Let meting of the Botemiel Seming Dr. Johnson had been down to arbeit he N. C. Virities has Matches also the Durion brilly 1. With allen out Franklin Rod to bruge Och Pal. We stoffed at the the little pond to ream a few water plant. The hitelle at this time of the year in publically about. I recent what were there. We then made our way onwed to brugen Oak, here we 2493 can the show at 4,30, and their amented hellie who came about 6,30. after a short step we made our way alonely back to Itilledale when we took can for home. On June 5 left Baltimore for a trif to Colorade to ree the total celips of the sun which occurred on the 8th, and then to spend 2494 nearly 2 months in the mountains mainly of Brookwell Boulder Tolland and Coloredo Spring. 25. Upon the invitation of Mip McShane I send the following tedin at Rolling Rid and Education are at 10.30 this aurring: Mr. Mr. Shane, Mr. Burner Mr. Sand and Mr. Matentle. The tay celested went to Union Dam. It was one of these were disquestly days fit for anothing also but longing and then it haffeed that when we findly resoluted the old purping home to rest down for lunch, that we suffy got as father until it was time by wellow home. It him, the first time I have seen the folker sine my return home, all ever plened to see we again and hid me welcome We took the every found to see we again and hid me welcome We took the every father of the the war wield. Must food path all every father of the raine then we winded. Must rome are quite father and Mr. Matenthe collected a vince let of them. be about father what little divine to more about and no nextend at our luncher place until about 5 P. Mr. when we thought it write to start homewal. This time are decided to book up the spring me the form, it found to be a rather for one case so we failed to get a odich after all. We now made an very towards Johnny like and, the route was committed to be in the own way arms the form we came one in the morning, by one decided to tay it with a dam nearly beside these was fleshy of time. We fished our way arms the fields and orchande x were committed compaid to find our whom your bounds out to some whom when we go up the revise by your out at a some form home when we come out when we go up the revise by your out at a some form form one when we would not to be a rather form of the produce of the soule and orchander x were committed compaid to find our large by your out at a some form one would not be a rather form of the produce to be a rather form.

1918 - august 25 - Sept. - Oct. 378 Union Dam. We were room on familia roade roade leading in Justown. In come of time we reached the con line and soon the after were whiling homeward. Reaching home a little after 10. September 4-13. Wellie, allen a 7 tents a trip to Norfolk and vicinity. 2572 to me Watter, stationed at Naval Ban, Hauften Rdn. In one party were help South Mif Smith, Mip MeShen and Mif Bar. We trok the week water to Ulmin Dan, the along the rime to Italy 2584 where we could the the railway the back to Ellicate lity in the restured. The day was an idul one for trempy, Our to a sudden chan in temperature, it was one of the delightfully and once that we is forgetty have in only full. We found the Ortail four with chilafi it show the week & tree of the summer rain, wind and own. Two fitch funds were found much to my delight. The intentions plant found but you men the turned, affaitly intended, guing in the one once occupied by the bester, from to be a White to at 7.30 I wan known 22. With Mr. Him to the oping the along the atree for Ownthin. Only a few over found her, but lite on found go a result of flat at the end of 41 to that

24. Pother lets out Columbia a for Ownthin 2585 2586 28 We met to-day at the Court Hour, Touron at 9.30 G. M. W. 2587 hel to weit about 10 minutes longer for the bus to take us to Caheyen The following wer in our party: - Mif me Sham, Mif Send & Mets Burne It was 9.40 when the bur arrived, 20 minutes late we were in Cochegenth. welled along the truck to the old grown, now filled with with and them a the and will we resched the rige and. We then followed the batter. we resolved the rem (Beamen'). On on former occision, we found a vice

on the banks and then ate our level, after luncher, we follows the aturn of rome bitame, to a afort where the read (an old wood one) apparently come to an end, There we rected a few minute then claimly the billing to the ridge weed. We then found the old-hard beding down on the other side to the Beaverdam run . again on claimles the hill after comy of . By continuing on this read, we came to the rear of a form home. Her grew a laye chestant tree, on one of the lower bamber wer a fine hornete met. We found through the farm yel and were now might at the afect when in get the grape last year. This year they did not look not look to fine. It was all flim railing now to the old should and then on to the road bushing to Timonium. It was after 7 when we reached Vito D'hilli home just a che we coming out. We all went to the station together where it 8 we took can to Tomm. It was about 8.45 or nearly 9 when I get home. 29. Porh a wilk this morning one truck that hill. On the way and expecitly in point of the old stone home, I found platy of Ownship in factly good condition, Secund in a short time anyl afrence for to morion. Leter went own to the ofing with Me I fine. 1. To the late on Columbia an for Outher . Proceded owned to Carroll witch, would the trucker and continued my my touch the West fort can. Secund some good referming of milhoused follisher. The day were a most delightful one. 5. Did not take truf to day. For reveal day had been feeling under the weether so decided to take a day on two off. Remains in had your Landen Parke 2 P. Mr. tender and to day. The "flue is very prevalent and Ithought it wise to take presention. By the 6th I was much better and on the god again, was out. Due to the apidemia the related were closed on the 8th and have remained no of the prient (20th). During pat which even 1600 death occurred, wormally Then are been then 2000. 19. We met to-day at Hamilton. The following were in the party: Imp Burum, Mip Swith Mil Mc Shane, Mip Hin and Mip Moone We tool I o'clock on for Carry and the provided to The river. We then walked of street huping in the right book till we reached hele Rame has we tak the and rout to Town. erring the short 7, or a little after home by 7.30. The day we did . We found a fretty flee on the wine when we stopped to sent a bumb. It we intenting to watch the beaver fell in the sum and expendly the reflection of the leaf offermely felling of. The chy was about cloudline. The sum at healiful, soon therefter the moon much it affermed and as we entered Town wer whoming brilliantly. During feet 2 when have been cutting word for the winter .

26. We met to day at Camber station and touch I o'clock can for Islandwrine. In our party were: - Mr Heard, Mif More, Mif Smith, 2 Burner, mip McShare & Mif Sarch. award at Blenburnin we trok our wend route, down the tracker to the road running along the court reof Sameler range and then along it to the boulevard and to Muly he The range is of considerable size now, additional tayete have been for and a number of buildings for the invested number of men sent the arrived at Morly creek we visited the apring and then returned our steps made our way to the Bitterwest locality. This you it is in much fin shape nuch to our pleasure, after collecting the Bettermet we slop a short while to bunch. It were a grand day and we enjoyed setting down on the ground taking in the fitty seeming before a around ever. Heavy furte have already killed the tomatore only here a thew one coping, we gethind a few of their regioned them very much . It was after 5 when are started on the return trip. The on a former occasion the oceanin we again had to have someone to diet we over the first part of the route. We had on along the edge of the woods until a come to a reason path, this fath take an acrow the little streem. and to a bory puber but, once there we followed the red on part the home to the main fihe. We reched Islemburine about 6.30 and were buch to Canden station about 7.15.

2592

2. The trip to-day was to Beni Rum beyond Hebballe. We met at terminer of the Woodlaw car at 1.30 P.M. This being the first da at the University river the bar her been lefted; I started out fro there own after 12 o'clock. The following were in our party: - Wiefs. Smith Mif Mille & Wrif Letter. We proceeded out Winden Mill Rd to the run. Just before reaching it we found two fine percumentem or the right aids of the road, with exceptionally fine fruit. We found it walk a little inclined to be empleasant on them were a new wind blown and the own wer mue or bur hidden most of the line. Ever in the cover we found the wind penetraling, and it was only when we started on the turn trip and had the wind in the rear that it became welly pleased notinthatanding we enjoyed the seenery very much. Reching Bein Rem a followed our would fith. When we reached the give of finer we ctoffe short time to bunch, found the wind a little to disqueeble to tarry to and we moved onward to know and began our trip homeway. Mr. Heard b un at Rolling Rd and started howen of from that point we continued once the care at Woodlew. It was after eight when I get home 5 I left school to-day about 1 P. M. for Franklin Rt. It was a foretty day and the brif was quite enjoyable. My main object to

2593.

was to visit the food and of come water plante. On the return trif I was struck by the builtful affectione the Sycamore fearts I don't remembe ever noting this before. There we quite a number of the in all aflordar. The even Munimiting their white truth a handle. 9. I lift the University touday about 12.10 P.M. realed Wilhem lin 594 can terminian at 12,30, where we were to must for a trif along the Polapu The following members were on time: - Mit Swith Mit McShave Mit Burne and Mr. Hend. We took can to Sulpho Sf Rd then took water we would of the andon when we could the rive. We then proceeded along the Ruin RA to Bentin Place when we child the hillride to Homen The or former occurren we were delighted with the putty fine, the at night. dogwood, more in fruit, the celase, ite, etc, and the persimmen, arrived at the perimme place in collected was of the great, ate lunch. We were comewhat comprised to note that the old fallow tree new one percinam place is a walnut. It was cloudy all afternoon and this hertund the advent of darknen, so I decided rather then go down our would route we would go down the rivine close at hand. It we when we well the road it was quite dark, although only 5.30. We now started for Orangelson, but had gone but a short distance when it light to rein not very had, but more a less of a driggle. This occurred reveal times while a some way to Catomielle which increasely ed about 7.10 P. M. a little tried, but not etall wet. Mr. Heard accompenus in a short distance pother after desending & the feed about 10. a broutful mousing. lefter breshfut called for Multime x we 595 went to the spring & from the over to the old race truck. I hefre to find a few Dutiene andrewin, but they are a thing of the part 12 To the lote in S. Ballinon for spening 2596 16. The trip arranged for the day was to Turky Pt. We met at the 2597 corner of Boltimin & Holiday Ste at 12.30. Thereofour members are laid of with a zone fort. Mit Sout with afried only, Mit More & tenting of May Burn, one with ove too the other with rose heel. Notwithstanding confined, must the aga-the armedia we had I member to take the trif : - Mif Luter, hip Mille, Mif hashen Mr. Heard, Muf Smith and Dr Run accompanies me. We were all the people laborations along Balk pleased to our the Dr. who was up only on furlough & had just reput revoce. It we after 1.30 when we reached Back River Nech Road. and started on one trip. Many automobile made this pat of our trip rather unpleasent and we were glad when we revoled the road to Purky Pt, where we are longer bed them to dedge. This part of the hip is grander line, aspecially

so many bungalow are own to be found at the point, that I think is been to been married, at any rete for the botainst & the section love We went down to the whom and better found a place where stoffer the int our level. It was rether cloudy all day -a dull gray hovem day, rether warm although mut discoveredly re. It was about 6.30 well we get book to the case and about eight before on get borne. 19. To S. Balte and then to Barrette for more.

19. To S. Balte and then to Barrette for more.

2598

23. We met at the come of Light & Baltimore St. at 12.30 P. There took Centre Bay can for Brooklyn. The following were in the for huf Kairing huf how, Mif Burn, Muf Smith, Mif Mushem x Mr. He m. Heart a ? get off at the worth and of the bridge and started on walk from them. We found Sprigger in view shape not for from a bridge. We found it takes juit 20 min. to walk to Breaklyn wh the other follow got out. We judge: That the distance must be a write. Arraid in Brooklys we wolked though Comwelle got soon fruits of the Saigher and then continued on tif along the fall following river. When we resched the road to Pumply we followed it. I for some more well fruited and podrof the Robinia, and of P, we we going to continue our teif on toward Lordedown but deadly that the lien the read to Cade Will. We cayoned this reach better. On the re we found bitterment in quantity. By the time we reached Lehin it we get dealer. Seeing the old path, I dealed to follow it, Lehe bower had med some change & it was not as einly followed. It had on to home & but I met Will. I beaund that his bother died a year ogether father a mother tow are dead. We some reached the main and and before lang came to the count path along the Bullyon Park what We get "ach with Burbly by 6 o'clock. We then wellhod on to C with end of the bridge when we took can for hom. All many a during much of the afternoon it wer cloudy but cleared of bentifely Our trip home was hearly enjoyed, the chy was perfectly clear. 26 To Mit Winom & vicinity. I was very much surfried to see how the

2600

poul, 1/3 of which her been felled in. The ide is to connect the West Med. trache with those of the B x O. It was a delightful afternoon one of those, preceding a residen change in weether conditions. I caying the virtuing very much so made no attempt to hurry along. after very

2601

my aframen, I went to S. Balls, then leter to E. Ballo, to are her so Our trif to day were to the Ravine. We mut at the Calour car termine at I P. M. how party were the following: - Mif Ka Mif M. Share, Mif Smith, Mif Burner x Mr. Heart. We went vir Val

reaching Oul Sping about 2 o'clock. Here we built a fine and spent a delightful afternoon, teerting breed, ceoling checolite touting memberallem it, it Mr. Head left in at 5 deciding to walk homes vie the remin. The rest of on stail until 6 and then mude our my link to the car. The evening wer a grand one for aton gazing. 7 a raw windy day, expensely we all morning. It changed however, 602 603 in the afternoon, the own show and som thereofter it beam pleasante, We were to met at 12,45 at the Willem an can termimen; I mins the car by a minute and an a comprise we had to like the 1.15 can. The following were in the party: - Mr Hend, Mip Smith my Burn a mig Me Sham. We went our would route on Sufflu Sf R4 Came Rof to the Rive Rl and on wood way to the farming flux. Here we ate lunch and get the few remaining perimme. We then derealed again to the Rim Rf. this time by going in the Bitterment place. The route is publicly just as difficult as we the brook. When we get down on the road he I feel left on and we continued on to Orange barn and then in Hilter am to Catomirle. Towards evening, it again because cloudy and we were not able to do any ster gozing. At Orange Snow, I mut old me Christ who is again how; at his old home, 10 To S. Baltime and West put, for stem. I willed our the bridge and remed the woods on the officite ride. Was surprise to find Beach. Returning wither to Westfat with the can for home. The weather is rether cold, but remarkly. 14 Then her her a muchel changel in temperature. It is today quite were & damp, foggy and driggling most of the time We were to ment at Wordleren, Mr. Head alone cause. We willed up strem a chat distance then extract our step and wellhad back min to makin Ry to Winden Wills when we tack can for home. I we compains to here the sping cell of the Hyle, or we it only a bird?

17. To S. Balte. leter to Govern. Surpried to me is many print

St. brenge areme rune right though theare.

21. We were to must to day in Powere at the Court Home at 9.30 G. Mr. When I bounded the car hip Burn um alwey in it We get to the Court Home about 9.20 Q. M. . The met car came but 9.40 the but to Cochequille came, but we did not get in it, a we had decided to await author can Just on the bur mund off, Me thered can around the corner, has hed ruched the Court four at 8.55 hut thought he would go to the State hound School to get a pritur of it and thinking that he had abounded of time came new mining as altyden

2604

as the ben had now left, we deaded to wolk out and them, if tired out, riche home. We had reached the fishe and were just about part the cemetary when we were accorded by young darky driving a fine and who who what "if we wonted to rich. On he was on his way home which we by Coloqueith , we did not heateth but jumped it in In a mount muse one one of fining along at the rate of 40 - 45 mile as how in a fine an auto on I have one been in We reached C. before two o'clock, of the bus which we pushed on our way a Ow of persons on both would and delightful. We had travelled the 5 miles in about 8 minutes. are at C, we walked of the tracke to Wanter Rom, 1/4 we followed our would course down stream to Warren. It was nothing cloudy when we stated out, but the own come out, althout one me on his bayy all day. We ate dimen at Wolf top new. We enjoyed our trip very much, the bitem a more one in good abefo. The tref was a some a her trying one at train due to the fugue ground, when could with in and an all were covered with faller learn, it went with some them would with faller beam, it went out milet and reached Warren leder with hembook. The thought of continuing on down the stream but decided more that we would do better to take the shuter route to Town, which an dis, reaching on duti whim about 5, 45 and home before 6.30.

2609

The day is unwelly were and I could do without extre could We he little timble fishing out a tree.

2610.

## 1919

4 We met to day at the corner of Lift a Ballimon Ste. The high intended was to Brooklyn, but as I had to get some Hepstie leave, we went at to Cotomorthe intel. It is decollect day this writer, the monte rigiting 140 F. The ware weeth continued until Thursday night, the rin then beaut it snow, Jutuday it gradually grew colder and clearl. We get off it Italian lan and we proceeded down the avenue. When the words begin I alloted hickory rtem; we the west though the woods to the of fill hen I collected talighter stem. It was git all job. We the wat to Bal Spring, here I unweesfully tried to start a fine Not muching we make one way book to the can x home. I To Pinde for homehutenut tings. Mr. Baiseman hedgen to Di is Hill but I had no trouble getting the openion 2611. Il We not tender at Woodlaws at 1.30 P. Mr. Mr. Hend Mip South and Mip Burner. We don't to go up the along the right but I We interest the centres and we town and rote. The day are an id all one for training and we apply every min to that we was not. Mean the road and just alone the bridge we had been cut and were being remark. We can't of always is had been forther and the we nettered one it mad, to proof Park who 2612 be took in for bond 14 To S. Bellin 2614

18. Rain all night and this morning, consequently I were the only one at the termine of en line in Cetonwalle at 1 P.M. Dawnited I took the write in Voliati into the revine. The laye tree currounding this have are being cut down. When I left the Unwinty it had stiffed raining, on my my out, the seem made veccinal atit show out in clear why. The whole afternoon were delightful, the temperature ofing the. Due to the rim the more & behin were in full effection. I was enficielly intented in Coth arine which is some in first, covered very large father were observed, and in Clutonic insteads which in now friending, the aftheir endulty are now forwing. I follows the fath into the words with I came to the old fath we so frequently take when we have the revise. This time I decided the follow it in the official direction & would that it curved around the with winter angle of the open field, follows along the water ride a short distance, then entered the field heaping men the water with a finally left the field were the wich

western corner. Soon after berbing the field all traces of it we but. I now made my way towards the brook. What a glowing de how brantiful & grand were the woods, the book, degglin, in the Brief and then to Plymenth Red. I want for the the bout deviled to hilled intent and buch gring to come the left bear While enjoying the putty rime, I can ten logs a bankach a shall distance off to may left and I wondered what was could be the and felling trees. I bolted of the wood clothe. There fut intenting little clit with him. When I stated out, I intended the under were the pretty to been, so interest for how, I remaind for house it was fire when I get but to the termine and 6 by the time I reached home

21. To S. Baltiman 2615

25. We mit to-day in Hamilton, Mis Mora, Mr Heard, Mish Burn 2616 took and bealing weet, at blacksmithin. This leach into Juffen Rd. We soon crossed Old Harford Ret, when we come to mest ever med we took the come and leading math. This word brought an down men Luch Reven. When we get on the Vally Rof we make on my hade to To 28. To S. Bellimm.

2617

31. To the oping. Saw Venus yesterday for the first time. 2618

To-day it is again mity and I failed to see her.

1. We met at the come of Light & Baltimore St. at 12.30.
There is a change in the weether and it is gradually getting will 2619 The trip method out was to Brooklyn in reach for Skut Cally after which I hoped to go on to Landrdon. We row found that facing the wind was not very pleasants and the big to I down war give up and instead we went over the results we to on a perior occurrent when about rimide andition parall. Int wonder it was delightful, but facing the wind were rether confloring and the wind wor not mor so change at we on the let own We found Symphocopus plentift and get many specime. Eletting beyond in bloom. Ofter leving Purpling station and we had getter beyond the little church we cut though the wonder to the Han I & which back part Lehin and an to leder that. Here we ented that new entrance has been built a the old one in being de which From thehim in to Brothlye, wie found the wind at 20 - to the brad is. We come going on to Writfat, but deaded that the wind in little to wind the the form for the little to have the bound the bound

2620 4 To East Baltimon

2621

2623

8 We had the first hearf? sown fall for the wenter. It began early this probably room after midnight. This morning when I auch it wer mowing very feat and an wich or some of more covered the ground; it however, did not keep this up very long. On the morning advanced the ale enow turned into clock, and I thought we would have rain, but it did not, and rown after dinner, it should and the rem whom the net of the day. I met her Hind on the can x when we realed Cateristhe hip Burn was already them. Noone the came, This this we walked down Helten and made one way to the Boy Sate chack, from which fount I wanted to follow the new weed. It rune bown that I mind it, at any rate the road we get on we much an old wood road and we finely had to make our way though the words. I wer flend to ful rigulf in The old trax rame. so in followed hox run, down into the rawn. The woods had very little mow, were where rome was to be found; the hillinder facing the court were interely clear of it. Mr. Head took several frature thereing the rooms we proceeded to Orange laws come the river & then went up to rea the Carolin while to day were just beautiful We returned to the Rim R's & how her Heard left in and one unde our way of to Catamalle.

2622 11. To S. Baltimar

15. We met at Woodlawn at 1.30. It was cloudy a little bluetery but not disapecelle. The bray rain lest injet accompanied with themore & lightning, had coftened of the roads. The rim too on quite high and count tome of bour of Maylandi soil on towards the sean. In our party were the following: Map Moreon, Mr. Head, Ming Swith Maf McDown, Ming Berner, & Map Metertle. It was a greation which was one should go: the rain had make the trip along the falls a fally and one on the other bond, a trip along the roads, made it weening to fare the wind. We decided in form of the letter this is the life we have been westing to the for some time. We soon found the wind out as are fully disapectle after all, in fact, we all decided that the high was greater a success. We wint to Hollight me Dywood Rd the view the forestown Rd to Ellicith lity. Just before when a little fire was started, but it died not and have we also our law hom. A little fire was started, but it died not amount to round. Mr. Head by a a lellicith started but it died not allicith to round.

gite with while, whilly the pat by out the Bx U. R. R tuchs. The railward have come the run own a high bridge. We found. I toyl in quality. When we get to the Phile. Rd, we turned to the right & went out the road a short distance to the west road leding touch the left. This wer now followed to the lake . here we trust to the left and continued on to Belin Red, lowling Drahaverna, Mafle alder Cheleval in flow and Willow showing the putty silvery buds. The try were must enjoy able one, exceeding my expectation. At we place we ford page office. All afternoon we beard the fiping of the freque 11 To the lote out Columbia and for by worm. Day retter dies

2630 speedly blusting.

2631

15. In my dispuell day. It byen yeterday and the sel down and to be in eight - mi tong, at time dringsling - every thing through rocked - and a raw air permeting to the bone. I did not expect any body - but on arriving at the termine Mr. Head & Mif Mexicalle were on hand awaiting me. The car for Carry wer reedy to stort is we hoffed in and 15 minutes leter were at our destriction, We deaded a the the red leading towards both Raver, the one we have revered time been over him letely (rea Jan 25). When we reached the wand we followed on that oremine & while took are down to the "Comife" estate, we devoted to try a new route. I had forgotten just where the road toth un I had an impression that it led in to a point seit of book Rome, the Comp place, however, is west of the deline. Let any sate reing a road, (wood was) leding towards the left, we thought we would try it, this of course, would the in still father way from York Rome, but, at the time, I did not know this, what I really wented, we to go faither the other way that in father eat. We found the road extending and it took on the a fare home, het we heft on it would have taken unte Baumville. Here an mut a lady who told in that a path led werom her place to the "City him - route taken by turnel from how Raven to the city, and that that rurd led down to the Valley Rd, which would take in inte York Raver. and that we were about two miles away. We found the road very inone one or two occasions stoffed to est lunch. The walk to Look Ram am longer then I had expected, we were not no much father from Town, howen, after an got there we were flewed that we went, on the may Interted to collect atem of hickory & of tally time. Anis of York Rome we tal the route one Penden back to Tours.

13 To South Balto and Riverida The day is good plant dethough inclined the barblantings ...

2637 1- To S. Baltimer and Revivale

2.638 5. To Hebbrille and Bein Run. We sent et Wondlawn, in fact we all met in the can and resolut Woodlam at 1.20 P. Mr. The following were in the party. Mr. More, Mr. Head, Mr. Bourn, Mif Bruth. We winted for another can and then stated on on trenf. It was a closely day, during the moving it rained for more it was claiming at times the sum showe. We took the word route, the objection point we the March Manight sport while we derived last year. We had we trouble finding it, and as lest year found the fleate in bloom the #2468). Among the new decourse, hindre the Calthe, were later maria, and Droutism which were a rether weekfalls faid. As were later way, and Droutism which were a rether weekfalls faid. As were later way, and Droutism which were a rether weekfalls faid. As were later

2639 8. To Franklin Rd for Spring Beautie to. The day is quite a

fine one.

Jollowing member were in the party. Mif More, Mr. Head, Mel Berna, Mif Matautte a Mif Me Shave. We trok the route vie the Dulany Vally Rid. When we realed the Surposeder we followed the old routing up towards the old Still House we the return to the bluff and then covered the divide. On the amount we differ a while to sign the beautiful views. She Eller, the ten brige, it, it. We got to the other round at the Celthe place as expeted and the stated from them on the homeward statel. It was one of these stilly setting days and tremping were shown, we get back to Town about 9 o'clock and home shout 9.30.

The following additional flate were found in flower Dicenter Backen forcere & onlying, Obolanie, Condamin freting, Singahim Theliam,

Shtlam plan, Schoo penny hair, Vile peter x healen

2641 15 To the lote out Columbia an and to Carroll Pak

2642 19 To the Severe. We left Canden station at more and rented Earlingh Heights before 1 P. Mr. he own party were Mip Burner. Must be Materiate Mif has have and Me Heard. The day were an ideal one . We had little trouble pushing our way across the country and to the Beefeld road. The hip was become patientally wire. Very coon on were to Limbache and then to the old home now all

evon an were to Limbashe and then to the old home now all tumbled down where the old will once stand. Here we turned in to the river. We then followed the path along the blaffe of the river and come came to the old home, now also changed come deally

new which the pine words are, and in this we found to in find Schwin ityin. Now were we disoffented, we found it in great profusion. I room detected the odor and hip Burner found

26. We met to-day at the corner of Light & Balto. Ste, but due to the high would and the change in temperature cannel thurby, we dealed that until of going to Swan buch as proposed we would go to the ravine. We received Citomwille short 1,30 and proceeds via Valiante towards Oul Springs. he was party were Mif More, Multer

mit Mate cutta a mit me shame, While it Och Spring we come when mit Smith with Mr. Vichen, Im hifity, mit - a Me they were comewhat in a hurry we were together but a shut time.

We prompt though the rawin & then returned via the Observating Sixty-two plents were found in flower. among the new once were againlying Viole overte Certaining rhombouter. Carpining archie yester. Predicitive Uvulini, Okcini. Anemone arisame, Agales, Theliation

New the old sheller, we found a love opening of Cypinfeline haufler almost in bloom. Online spectabiling just about ofing we also found.

29. To Franklin Rd This time I went as for as the bridge. 2645 and entered Winanie. I found Exp. parriflere in questity, but one one in flower, although there were plenty in band. This is the sail

The parofile

3. To day one out at Hamilton. I get their just in time 2.646 for the Camp cas, hop McShow, having stopped to see a friend had not get returned, map Burner i remained behind to await her. There were but the risk fam: Me Heard, mip motor

my South and myself built the ten alone recentioned. It is again within centry on this was to a certain extent, the pleasure of the hip. We fore; who status out first being on the or

muched the little ice part on the right side of the word We stepped presently, one at the riping, as that on his

the min commend considerable time. When we needed d all company ate were attracted by a fewlin wing it

resembled one of that of the secondae, but I could headly thick that they was get in such analyse. He soon he is that it was the settle show the secondary song of tours. I have in the little show the secondary of the secondary that it is the secondary of the secondary that the secondary is the secondary of the secondary is the secondary in the secondary in the secondary is the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in the mutumin war in full bloom, Prillim at its but, Obashir afeitablin is till backward, answer part its frame 6. To Franklin R'd, this time I found Cypaintaline parvilloren in full bloom. 10. We were to meet at Rolling Rid for a trip along the Patificer and then to Union Dam turned for Cyf. pariflorer, but on wount of the 2648 rain, hip more, alone accompanied me. We waited over helf are home for another can but as no one came we took can to Elliana City and then went to Union Dan vie the tracker, when we get out I the can it was only mirting, neither did it rain at any time, in feet, it was ceased misting and for the greater part of me thank it was only cloudy. We found the Trillian a the Efficient at Union Dam. Of the a few minutes on the hillaids receiving for lyp, we continued orward to Hollofield where we come the him and made our way up stream to the road to Woodleven. More then 80 plants were found in flower. Among new ones are! Vac-Emine sterineeum, Vibronem prainfoliem arlie undicantin, Tropoliem facture, & repen, Prema Virginia, Mala votandefilie aphyllow, Medicija, Osmula cimawana + Claytoniane Le. 11. With Mr. Hime to the spring and then for form. 13. To Duhyalle and theme toward Front Pak. When I entered the going along the falls. The building of some water washe were the come of my mitche, the somete building stands right where I always intend. However, as alredy stated, I seem noted my mistake, but decided to continue orward, which I did to the old dawn , here I made my way along the ridge finally reaching the old fath ? hed in mind, when I steeted out. Whether it was just the fath, I am not quite sure, but as it were interesting I followed it. When close to Fourt Pak (1) I came upon a sunt bentaful along of

2647.

2649.

to alberton it was quite fine. We took the little path along the rime and ruted there a short time. Then returned to albuton and the on to Woodlown. We found more than 125 plante in bloom. Among the new over one the Fringe ten Commancia Genemin Carliniamum, Herfin anction die Gillime trifoliste Ribelle millipline, Robinie Prenderain, etc., 27. Went out Franklin Rd, this time all the way vie Franklin 2655 town, on to Hilledale. Secured leaves for bottemy claver 2656 30, This is Decostini Day & a let stilly one it is. Mule arrangement to meet Mr. Hend at Light & Balt. Ste for a trif to Islemburnie to see the Sameenie. The trif would have been more beenly enjoyed were the weather more appeable. Circles are weaparters. I festerday heard them for the first time. This morning they were of before day beach. Their resolut is increasent. Stoffing only for a few home during the night We must to-day at Townon for a trif to below Elle. The following were in our party: - Mif More, Mif Burner, Mif Smith Mif Me Share a Mr. I trond. We tend, the nearly route. The bounts 2657 artin defen down & all day long the noise her been increased. They are out in awarmer. We went to blue Eller & the oromes to the road and back to Town. The weether continue hot + atily 3 Percy met me to-day with his motor cycle and toh me fint to Charlie Koethin on Southen and then on to the Gampander 2658 out the Belie Rd. award at the river I walked along the left bank a shut dieten recoving what realised I needed. Returning we took road at Perry Hell anon to Harful Rd, then along Harful Rd, to Hamilton, them over to Hillen Rd, Wordhow are July Rd 2659. 7 Fruit all-day trif this recon. We cut at Hamilton at 9 a.m. hip Burner & Mif South were the only time that cause. We then went an to Carry x then on to the Sun Pourde. We had just parced the old toll get when we met Mr. Ohi who was to accompany we to the Strution locality, He had left Baldwin enty that morning took their to Glenaru & Then walked towards the river. He was to must we at the river, but heft on rather them want. It was noon by the Time we reached the Oslack form. after evening several specimen we found a nice nook & at buch. after lumbing m. Hend. We now arend the road & make me way up to Luch Raum. We reched the station just a little ahead of the storm. The storm luted but a what time, Mr. Ohi tick time but to Balling

We must at Calmadle termine at 9.30. Was took the roote in Validate it the review, Our first at you at the laws of one of the house we present. Then we found goth a run of special a companion to me to find no many, have not formed Lactarius subdictair, Boleton rooteding Russile virece R. mignicans, Amende phaladay, Supporte processes, Hygusphorus coccesses, Cantherelline Cibarius and Strobolomy cas. We followed the path on into the review. It first I hoped to go vie the open field, but in on intented convenition, I fight to hard a should be be not and so form myself returning vie assessment path. I, then made directly for the appring about one haft there to it the next of the day. We see the appring about after 12 and so sto are bornech close by it.

after bushing we continued slowly on down stream. On much on the reen, we made but little proper, rucking the Blaff alast 4 P.M. It was the devel wire to make on my back to the termina Which we did nuching it about 5,15, an how and a greater letter I were home. The day were an ideal one, & we had had a must enjoyable trip. We found 84 different spring of fluty fugi. The following mu a bur intenting over , are away them that I remember burder bathwellow cibrain, about meeting we found also be cinmabarunin. 4. b. menin; I had my attention called to Thelophone
and bour to distinguish it from Claverie; we found Thelophone Schwinetzie, P. falmete, Cleverie flaviam, Gellow, Clevenie inguelie, (che gellow), b. formore (calm put), b. vermi cularin (fet a fluty, this at love). Hypomy ees lactifluoum wer abound, this fugue allaha Lacturin. Francolm emoprem, Calendlin commofonder. We found quite a number of spring of Lectarin x Russels; Lacture teacher interesting one being " occulation, having a dark brown "eye" in the cute of the filew; Runde, for a number of Boliti and also obund, fini, of which ? remarks Boleton pallider but of all, the take them there where injured. Several spining of Hydrom were found, fini 27. a trif to Herfini Frenzy had been flowed, but due to the rain this morning, it was finally abandand. hutest, we first went to S Balter and the Toler of Blind of Contract went to S. Balte. and from there to Believe and Corpsings Bridge. The tif we gite a fine one. The wither too turned out quite while The running at a number of flow wer fine and we doubt good bottominging could be had, if I had had the time. I wan partie along flund with the ryin new the Sugarhame. It was after clown which where we left S. Bellina. We to lunch a the bridge. a little time the bridge. a little time we are spent close by, and then we stated howeverd. Just before me reached Belain, the chim boke and an how were afect mending it. We readed home at 6 o'clock. Evering a promising lane running cent, promising became of the number of wires on its line of telegroff polar, I decided to go that way. The leve wer a shut one, headly 2 agreer, at the buff on certinary also a remon fort path, I, Therefore followed the trail. It lead to a nice bothing home, some distance in and begand the this woodland I had pared though. Here, I new a and one of the banker had off father eat. I took this branch, it bed to another fine home which I branch was Clement's

citarius

2725

The road stopped here, reeing a young fellow men an auto, I asked him if then wer any path beding east and he should have one close by. The path a name one level down to the stream could it and I room came to an old word; wagen treil. In one distinct to went north to Walker are. I followed it southwards. The stream went on the fill Walter weepond, so I had an is when I were. I followed the stream down with I raw another road the the one I was on but ging cut instead of roath. The rest took me though the words a finish and on Bernged hum. Reaching the loveme all I had to do one to fellow it routhwards that me to Et Engeler and then one to Gallyte him the special words and finish home.

Dremland. We left foot of Browling shatly after 8 a. Mr. The morning wer rether fresh due to brish wind from the northwest, white cape on the bay methods enhanced its beauty. We resided Cheep Bush at norm. Here we discharged a number of paragraph and to be a few that had come down for Washingto. It was 2,45 who we reached Solomo bland is the meth of the Peters ent, an how was allowed to too off. We get off and took walk as far as the mainland returning by another route. It was 3,55 by the time we alated, but really a half how later before we get away due to the removement of the solomous and the state of the time we alated, but

"196 really a belt han leter before in get away due to the removem of channel leeding to the lawing. We had to back out from the what then man formal, but all again, & then again found a number of time before the boot wer in a position to ture & go owned, It was 7 before myst but to Changele Beach. Here a little line was efect to take the promyse left there at noons. It was fally 7,15 before we left to beach and stated boneward. Just at this line the same set, as fetter

retails considerly It was the for midnight before we really from the form of Broadway. We got off as come we could get on find as we could which we the result that clated) and by 12.40 were home

The trip as of old, wer very much enjoyed.

2728 16. To Bovan for leave for which proper 2729 20. We mit to day at Wayne are, Francet Pack at 1 P. M. The follower in our party: - My Smith, Mp Meshare, Mif Motentle, Mif Bum My Board Me Wordlam & from the along the feller of duties. My indentine were to go to Being Rome but it were unpleasely in

and we dried to get into the words on quickly or fourthe. The fruit wordland bryand Libety Rd has been dutinged and thank have in me layer a flerme, Rilming we get on the film on grathly or famille & then

willed aby it to Super Och It when we took can for home.

2 Mr. Kruger called for min at 2.30. We then went around to the school of hygim and then met Dr. Kelly a Da Find, D. Finde action of he was on hand & in a little while we were many along quite refailly touch Town. At Town - took Jeffer word. a short diturn out and we stoffed the study the words to an left. Thing differed Mutine cenie. We then got into out again after a stop from 3/4 how and much on to another but of wordland new the M . P. Z. tracks, here we found an additional 20 specimen different from these alredy listed, We stoffed here two but a short lime, It was we after 5, and or me all im arrive to get home a little leady, we aftermen, record to un quite a good chowing. On Frut there to brilly Ou & here I took can for home.

day and Friday and to -day it has been cloudy all day. We found the words git wit, rether unwell for the retire. We took would note, vie railed tech. Sande to the Maly high. We then wild the ofing, returning we went to the Bitterant builty and the on to Yang and fully the title budy coming France beach. Here Mu Head a I left the faity and willed on in the Bullyn. New The we can an anoflaw. are we atoffed a short lime to me amin it We needed Burkly about 6.30 and Balto St. by 7 P. M. I. We met at evenu of Balto. + Holliday Str. to-day at 12,30 mm, for a trip to Roley Point. It am cloudy, startling rain. and and it did before we resold the city linds. It remid to gritherd, homen the then of ar, mit Barner man I tend a anguelf went on an for an Beek ruin. Hu we get out, to eve how we would like hearting, but some divided to turn buch. This we did getting healt to the city about 3 P. h. 2 Wellie & I took a with through builfind 2743 8. Mr. Havin came yesterday. To-day he accompanied me on a hip 2744 to the Paramina flue. We mit at the term in John William ha car line. Mr. Herin am alwedy on hand. Soon after hif Born come. and as the met can hop Smith a hip hasher. We expected him Hand but dishes that he fully had not been able to make the flue on time, as each it framed to be, he cought of with wir lefter we were resolut Comme Rd. We could the rim at lande & the could the hill at an und eft, and found on funion the it let any trouble. The furnisher howen were for the must part out quite rife as we draided the base them and come again ten wales later. We mome heft to the tof of the hells with we reached homin' and there december to the Revi Rid, Cound nein at Orange beaut them on to Cetam with and home. 9. With Mr. Herri and Mr. Him to the oping and the a to the filtration flows. The day is ideal and the Tip was hearly but this war Hame enjoyed. We got back in love for dim 15. We mit at Town Court-home, at 1.15 P. M. The following member were on hand: - Mif Smith, Mif Burn, Neif Seach, Mr. Hand and Mr. Spaulding. This is Mr. Spauldings first trip, We went to Lither will, vir our would route the along tracke to Timorium. We were empired to find still any bethin in flow. at Timon, we winted . Spaulding Much B'heill, the about 5, much one way to York Rid to a little church where are oyster earffer wer being acrossed. The earffer and wer a good are, 5 yeter, church, him, had, potate calad claim, bred, himit, jelly, coffee, all for 35%, We get Then to, just at the right time, ten min who leter, and the place we heing counded,

2745

bake, couly and in crown were also cold. After suffer, we present but to the Timomin can townium. Hed we know that we would have to write as long or we had, we would have done letter to have gone on to Towner. However, the can come in due time and by 7.20 we were look in Towner & before 8 I were home.

2747

22. Refeated the lif of non. 8 th. The line Mit Beam heef here atte, Mil Mulle, Met Smith, Met Saul, May me Sheen, Men Heard & Me Sparlding accompanied rul: We mit at Wilhin an au terminin, al were an hand except hif materitte, as huf Saul x hap hee Shame awanted her. The vest of we went award, While on way to Pelit a shower overtick us, but by the line we get to believe it we one. It boled though as if it might turn out a die grently. we left on however and were glad are did for the were sure shower, and leter it chand bentifully. We were at the Comme ! lefu hip metante with hep Sand & hip her Share overtich me al were glad to be out x all one glad to have heft on in aft the shown. On the hill (Hamin) we found two hourts and in one was a tit recome. We got down via Novin' as an our lest occasion. When we get down on the River Rod, Mr. Heard & Mr. Span left us, the net of an went of Hiller am to the can at Fredrich! mit math, mit Burn, mit Mchan & hip mate atte deeded to welk to the Ellictt City car line the remain; there took can at Frederit RI 29 a trip to Slew Eller wer the order of the day, but as it wer

reining or as I had received a note from her Head that he would not be an hand. I decided the bottoming men home. It went out and living the control Months has the and from the the ature. I have I for the country back and an about of guerry. It was legal to rain a little too hard and I decided things however collected more truly had and a for hickory tengs. To and the went the offing several fine tally trees.

2949

6 a rether diagneeable day. Cloudy all morning it hopen to amon about 11 o'clock. At now the grows were here and their covered and a new wind were blowing. We were to mut at Relling Rid, however had I not thought that there were a possibility of Mr. Hend being on hand, I show not have ventured on the trip, and would have returned home to wood at the uniceoseps. What were may surprise one reading the multing flere, to find fine awaiting one: - Mr. Hend, Mr. Spaulding, Eller, the find fine awaiting one: - Mr. Hend, Mr. Spaulding, Eller Mr. Smith and Mr. Buren. I had already decided to go to The rether than Mr. Dam, so we proved to to relieve Rs and then one the all from home into the ravine. The ground was covered with more out how in the wrenty. One interesting right were recing

the capales of the finited more atiling out of the more the men plant itself being conflictly covered. We provided to Ool Spring, him in a little while we had a min fine burning, and here we remained until after 4 o'clock. We Head the stated bonement one the raving the rest of an made our way to latouristle, where we took our for home.

2751

13. We ment to day at Catomoille. It was to be one fear day.

all morning it was cloudy, but towards moon it aleased and there were forfact of a feety afternoon. However, it was all temporary clouds come obscured the same and it became as cloudy as before some.

9 boarded an Invington can so awaited the Catomoille can at other place. On I I found he I thank a Mr. Spalding. We would the Catomoille terminance as few minutes part one and found Map Brown when them We would another can but no are also come and were about going on to the review, when it was may that the service by glaving over Mr. Spallings wreter fiction. Map with care on the ment can. We went our went roots vie Valiants into the review Just as are reached one can't they to rain, and are but little shown the cut of the afternoon. We soon had a vine fair juing after a lit over our week, been to tested, rounge control and menhalled bouted. We remaind with about 5:30 then he Hay at the next of an a to Catomoille.

We were to meet at the Wilhim her can termine for the thingh the raine, but no one were on head, notwithstanding the benefit day. Some on the grand no doubt was the came of this fallen on the part of the other to be on head. Some began to full Thursday evening and full all day Friday. On me one affected, I diede to point the road that bonne St again Houfetel. I proveded none distance about to Washington RA when I turned in to the right I followed the part pare distance and then reserved a little from tree. Returned raine and to the present of the Period Red when I to the reserved of the second of the second Red when I to the form of the second of the s

## 1920.

2752 3. We met at the Court House, Town at 1 P. M. M. H. and Mr. Spaulding we alredy in the car when I boarded it, at arlington areas. We reclud Fourant the appoints time, his no one che was on hand, mithe did anyone come on The next c We then went to her Come & then awaited the next can. M Burne came on this. It was now about 1,20 and on me else we likely to come, we started on to both Run vie i Crommell Bridge Rid. It was quite a cold day, but withdre ally 20. We found Let Rove completely pozer own, and is done beautifully described with first work; we had been con off of the lake between the two dame. We took the route along the river, and were thinking of building a five when we saw the faut muche from a world exmoultering five just of the rural; it had been left by wood cutter. We went to by enough to worm of and ext lunch. We then continued The trif were just an enjoyable one.

10. We were to meet at come of Baltimore & Light Ste. is
12.30 P. har but are I had to go to S. Balto, for hornhis
tury, I deads to been college at 11.30, go to the feath and 2753 I did. We went though Commelle and them along the river for I collected bridge & talf the twings & buder let found Skuth Cally in flower, but it is not so for advanced on we find We found a mie spot close by when we stoffed to est lund to war of o'close have a through, and as Me Hend a homewal, taking the can at the bridge. Mr. Henry, Mr. If ing. My Burner, & Mit Smith were in the faity.
11. Mrs. Himin and I took is well through the woods both 2754

In mon after we left the oping. Notithetending, our secret on fruited more wer found.

2755 17. We met at the Cotonwille terminus at 1 P.M. Wif V. cotte and Mr. Heard were already in the car when I bounded it,

Info Burne we avaiting we. We reached the terminar just of I o'clock, but as we expected this Mis Mr. Shane we wanted the own

of the man case. We then went out anime and entered the

woods along the route we wently take returning from the ravine. We did this to avoid the wind as much as print ble. Summer on The ground but or it wer only a thin leger, we did not mind. Reading Oal Spring, we built a fine and enjoyed it for an how or more. We then medeous way though the revine to the treche. The canada we ice were admind more than once. Armid at the railed tracks we frounded to Change lowe; her Heart left on it this point, and the rest of an made our way of Hillen Com. When on get an for on the stone will we take the part we entered the a few bone calin . Just at this point we earn much of the woods had been cloud; we surties tong and were beyond it bed been bleged, perhaps pulming to their centiling down, We realed the termine about ten mineter before 6 o'clock.

24. The ground in covered with ice in some place over 3/4 with 2756 thich. I believe this in the first time that I have ever even such a difflay. The true and should too, are exceed in ice. It her remied off and one for three days the tempeter is just above freging and the ground is cold so much of the rein freque We were to ment at Town, but with we coming the ground and rain falling, I devold it would be for teller the go home and whilige the time in down. I .: centerty myself with a shot walk from Cold Sping Yam bound. The hew with their ing water both beautiful, in fact a glenn into the woods in our inte faing land.

29. The sleety condition of the streets lested until the middle of the with when it became warmer. Of come each day a little of the ree drefpared so that it was gradually becoming refe walking. ' andey though it is much warmen and very much we dischfuel. I got home a tale before 5 P. M. x welled our to the spring for water Walking in still the treacherour in the woode & had I know that it was still so risky, I would not have gone. However ? get own to the oping and back refely. 31. We met to-day at Hemetton. We were going to Carry and

the along the sunpowder, but we, Mr. Hear! Mr. Spalling and I , I met them in the car , got to Hemilton just as the cur resolut the top of the hill , so we deaded to change the program We went out to Old Harful Rd, then out This red to Compan.

2757

Rue. a letter lindy from I folder liferen stelling to at lan austland deal

2759

Frate Party did Feb 5. 4 a. h. truck which it crossed at Ochleigh. The wild not Haped Red and it broken which it crossed at Ochleigh. The wild not Haped Red and it bearing right in the face; but whenever went along the Confine Red were a lettle flerents, the wind came at an angle and then too the wave times when we were gift puteted by the trees. This lest received in good interesting at trium and affinity row or were flowed to dead to go in about hely way between hoch Rever x it was divided to go might on water Towner, without of going fait to Youth Tonday our tried the reibrord truth, the only objection over the trees the high bridge. We offers at the ravine, must begand Ochle and thus built a mere five, which we enjoyed for an hour or some We contend our trip and Towner along the truth will use reme Rest Towner, a thirty bropheted mayor settlement, here we get and result was in a spet of the wind. This however, had died down come to the id, during the lest part of own outing. The day was girte a least going of a complicit two here yet my the weether were guite adual, delightfully oping them yet my the weether were full which puted they fine, so much as that on the form of fine here which which puted they fine, so much as that on the form of fine here which which puted they fined, so much as that on

in the form of fine had which pulsed thelf find, so much so that on early with right over it without and in it. To-day a fich win from the west is blowing, the sky is clear a blue and is stilled the the temperature is ideal. We were to must at Relling Rd. May a wer lite, get notwithstanding, no one wer on hand when I recited the flue of meeting. I had just complete my plan as to alit. We writed for another can and then atented on our trip. Frank to Fredericke Rs then to Thitle Islan Rd and then one that west to Ulaberta x the River Rd. Our transfort Frederich Rd wer a little . agreeable, get not so much so as I had feared. After we turned into Thatle blen Rd, we found owned puteted against the wind and from Thatle blen Ros were ar along braitful, to-day with the more, the brenty were conhanced. Me Spouldey had his cines a took a more of priture. We crossed the river at Webster & then continued one tig along the Rin Rd. Beatful 'Ice Fromthe resulting whenty lenum. we the Jellenton was present. When a short diction beyond the dam we now a trail bedoing of the hallsite & decided to follow it. we thought it might had one to the Cacala. It had up the buttered to in old byest - by-cation like. However met a groung fol

who told in that the trail led on to the road, We were any in to get get to the Canala, as we heft along the exect. Here Mult. get referred for Mr Sparling or angely, be lake, a lower route. Eifte assing one some we came to another tool beding the part a wire fever, here here S. & ) become as facility ) willed to see whenthe best best , he as the other best went in the offinte direction. I some new that it is all pobability had on to the rend aludy alladed to so I reteard my step. I had an ide that the trial had part the Careador a for a time it boled or if I might be right. I desends quite refilly, all the time calling but the un no austonie from the two confamin. The tit dom une quite in tenting. I rom sow that it was going down to the old schoolhouse. I decended with within a few hundred feet of the Rivin Rd, ber, I saw a trail leading parallel to the was, along the rear of the home and over towards the Carcada. I followed the trail and we soon we at the stream within very view of the Cuerden. I remained here for about 10 minutes, calling at intervale, but no one respected. Thinking that pullipe thy bed decorded to the road and expecitly Mr. Specialding, I decorded librarion But we are an them. I went up to the little bridge and then awaited them; but now one came after a west of 40 minute. By that time I wan ruther chilled so decided to cross the rim & return to Catanwille vie Hitten line. Ruched Cetumille about 6.10 P.M. 14. To-day we met at the Catomwille tereium. I met Mit Smith in the car, when we arrived we found Wrip Mete atte & Mit Burn already on hand. The next can brought hen Hend, Mr. Spoulding and Dr. Okawa a Japane. Mr. Head asked whether we would sent go on to his home, and when we all rignified our willingmen, be telephones down to him home that we would come. We had intended going though the ravine, but as we all wished to make the top and make the 6.20 train, we dealed to go vie Helten an. This we did taking the fath though the woods. The day wer an ideal one - delightfully spring-like - no woul, and the run change warm. The hill rider foring the routh are few four mour, but there fing the north still have an exist or two covering them. When we realist Change brown, we crossed the river and have, it was reggeted that we climt the hillands to ree the Careader: Mr. 14. , Mr. S., My B. and the Dr. get clave, the next of an found one show a little to amoth to attempt make the chart. We did attempt it. With Swith now deopped out. Mut mete cathe x I printed for a while but finally your it who had one priviled ourselve with a which we would have much it all right. When they came back, we

continued our trip down the Pives Rd. We found thin part of our hands must interesting. The rim is quite a torrent and ice her been speed for beyord its broken when it is fill up to a beight of several ful. The rim word is covered with sie and one willed one quite and sie full beings and some that obstantion action of sie in mother trues were cut down backe a their, and. Several of the lee bridge our buried under tour of sie. We necked Clhridge about 4.30. At 5 Mm H. sund denive, which are getter of just betefuly. We were though at 6.08. It exceed a change to put why so, so some steed but my Metenthe & I havind away. We reclud the stelling just in time for the 6.20. We get with Combin Station half are been letter.

2761

21. We met to-day at Windlaum. It was my intention to go to Ben Run, but rown on the ground, more flether in the sin, and a most - cut wind meling condition generally amcomfateble make me change very plen. Instead was welled both to Engran Oak Park and then along the felle to While dale when we took our from. Walking was separably discycerble along the felle - the word way much covering, made welking treacherone. Mr. Heard fill and we all slid about at times rather insecuring. In the party were Maj Smith & Maj Metantho who also were on heard when I criming and Mr. Heard, Mr. Spalding & Dr Schilt who came along as mext can; In shelters please it was quite please but there were for between, We deemed it wise to shorter one high and at Billsdale took can for home.

2762

and at Willadele took can for home. 28. We met to-day at the Wilhim am. can termine at 12.45 P.1 When I reached the termine hop Burner alone wer on hand. With the overt can, the Helithape can come haf Smith, Mu Heard Mu Shan The Okwava & Dr. Schulty. We get off at Sulphu Spring Read any booking one wal route we preceded to the Beach ravine. On the way I collected a win let of purcuismon seeks. Reaching. the review we for a time beft on the left rich of the aturn, but the rum & ice here had not metted and travel ever had, so we got over an the other ride. Travel her & there was pretty led neutheless and I decided that the condition would have to improve very much before attempting the trip up along the other run. We built a fin when men the run and her enjoyed twating but and the esting lunch. Later we continued onever though the outest at Glasaiting & ther on up along the river. When we really the down Me Heart & Mr. Spaulding left we. For a time the rest was fairly parable, but before we came to the next colout at Vining we found the road littered with home blake of ice, in may place

covered with round. When we findly really the culvet, ring the book, we decided to clink of to the trucker. This we did and found it plain sailing of to Days some & Then on to Calmille Dr. Peluty gove in much interesting information about skeing. from his description it must be grand afut. D. S. in a wetting of Zunit, Sirtfuland and he said that every your about Chiefwas be would spend ten days or two wale mountain clauding; the skee is the only mean of track. The longth of the skee for a form is the hight of his reach; mine would pullely be 71/2 - 8 feet by. The skee is fully about 5 with wide. In order to claim the fort is not rained from the ground much steided along, the logue your strick the better, to fromt sliding bolement, seed- whim is tocked on the bottom of the skee. It is gjuite an art te know when it is refer to skee a their layer of mour on ice in trucknown, to chil ice flage of mutal one put on the shee. 4. To Homewood, in way home 10 P. M. a flock of wild giere were observed, flying ong low; the line on of considerable length, possilly containing 100 or more green. 6. We met to-day at Rolling Rd. My intention was to got I Umin Dame, but as on the let occasion it was blowing very much. It was blowing a gele. So I deaded to go to the ravine. he am faity were Mit South Mut Born, her Head, Mr. Spaulding. We Schult & hip Phelps. We that the road one The old purp home. formed the trip over the mine most intenting and in a short line reached the spring, there we built a five; it took some time to start the fire, but fromed very ratifactory after we had it going. after an had the fire started his Heard + Mr Spoulding went down chem a shot dictain to take some future, but in they were so slow returning we ate bunch without them. Lite they returned. after they were though lunching, we started on down the stream, could it just below the Bliff and the at a point below old Caref Cyz are arealed the billede. We then continued one transf along the court of the lies, staffing about time as note at the Observatory, The wind recent to be line atomy then when are stanted out, possibly are were use to it. Yearing The Observely we centimed award to the railroad brooks. We found a tell tree (Telf!) on the ride of which hung a large rlate.

That the enjoy bed not occurred recently could be seen for the

fact that the truck wer elevent healed over. It will be would

observing from time to time to are how the tree gets rid of the slat.

after on realist the trucker we continued up along the trucker to

2763

to Rolling Rd in due time and then took can for hand

27 a beautiful apring day. We met at the come of Light and

Baltimore Str at 12.30. In one party were - My More, My Mic Show.

Muf Barner, Dr. Know, Mr. Head, My South, Mr. Spaulding, V. Shult and

mif Phelps. We took the Centi Boy can and rode to the Termin the can now to her you within a short dutamen of the bridge. We then started at the road, When we came to the second hope we level that the draw our out of comminion and we had to and own thereafte we were on the other wile. We tak the weed route to Seven buch. Turning in it the lane that buch to Howershie. In the fields we found Drake weren in full Horan Mr. Head found Stellin andie, and the and maple also in blown. When we realed the blaff overlooking the river we founded to them & there built a fine and ate our bunch, range x much after benefing we went on to the criek, at the worth of it we found find agg in grantity. Fellowing the show line, we found alm in Horn. At on flue we manyed to get out with the cruck & there we found some hiberments of myriphyllum. also a fun ruch of . Ashitan clant ofen un cler found We get lich to the such about 7.15 and could in refety Wa get with the car about 7.30, Embody placed with high 3. We mit to-day it Woodlawn. On the car with me won my me Sham, mip Smith and Mr. Tyrell who decided to take a trip with us. When we arrived we found Map Busher, Mily Burn and De Kun, sheety on hand. The next can brought Me Hundo Mr. Spaulding & De Shulty were in Washington to attend a meeting of authorpologiste, and therefore were not on hand. The day wer an ideal one. We preceded out the Window Mills Rd to Ben Rum and then along the rem. returning on John, Cale Rd. We found much of intent - the Popular wer in blum, and also the noth on the Elin. We found Stallain undin and Blodent on the way to the run. Then on the hip down the run we found Hefatie Spring Beaty, Calthe faluting alum and Hazel, Skuch Callyn Golden Clab Draha verm. I am surfaced in not finding Golden Sax ifrye in bloom. a number of intenting haten were collected Physici tistomin P. by poleme and P. also some fine Powelle reducte. The top from start to finish were a fine one & all were pleased. Mr. Type had a predometer and fur it bound that we had your ten miles. I shall it, judge that the actual distance troubled was about 9 miles. 10. We met to-day at Towson, he's Corner. The hip wer to be to the Sumpounder vie Dulung Vally Pike and then along the rime to when the Dienter grown, I amind a little late,

2768

2770

2771

found the following awaiting me Mr Head, Mr Spaulding On Ogwava, Dr Shitize, Mr Pyrell, Mr L'albural Mif Burne, My Swith, Mif Burne, We pureled out Dolaing Villy Pile. to the rive, the ely The run to the Diente place but it was the but the gund I was the west on to the old still bone better when the old have better when the old have me at a transfer to go as to mentals, I deeded to a this. When we go to one of the old bridges, were conflitely salls away, we stoffed in a futty glade and their built a fire and ate built. We then went on to Meridithe, war in a There we took a fither of the old down cote and the gueld. tur. We the slated bowered, vie the mustel road. When right, this was a mustible as it led us to Trimonim. We get the just as the case fulled out so bed to work in. It Town. The wanny were brailful, the star were unwandly bull ant, We get to Town about 9 o'clock 12. a chut trip to Wast Winam for Duchand, School win dimensed which to the Winam for Duchand, School with Colories are to the old forthe, record a min let of Duchand and The get back to Colly in time of my ling 17. We not to day a Camber Station at more, in it can raining I was amformed that no many were as hard, Mip Bur min to Mip Smith were abreedy there seems through come Mo Head, Mr Sparleting, Mr Tyrull, x Mr 2'allement, Just an one fulled not of the station it began to pour down, and continued to do so all the way down, When we revolved langt High we staffed buy wough to east bush, " It was still remining whe we started not on one way to the Seven. It was an ideal day for thehan and they should whe fine, expenity Brown our rown, and the Cladain, C. center tetle, C, pyridate, C, rylantin, etc. We had little trulle finding our way, and rown found amuelou at the time cedan where we turn it to the Schwindyne place. It had sloff raining much to an delight, Mr. Heard found rune about an hat it was quite plantiful, Servel fection were taken of it We then went among to Best Och, here we furt a fine right on the shore. Pin wood wer flutful and we row had one of the but fine we have some had after

eating buch, we started on return hip, reached the Counder station at 8 P. Mr., all thoughty dighted 18. We headly expected a pathy day after the experience of yesterday, but so it proved to be. It was proposed to go to Riche of Den Cuch, if the weather wer all right. When we ( Nelling Watter, allend )) got to Town only Mile Burn war on hand, The Train come on time and about were Me & Men Head, & Me I founding. We get to the Rules on Time, just an un got to the water tack we raw Pray a Elle coming on motio cycle. We afect gint a flowest day on the nature, Diente was just steeting, everything lete a must fagge were found by their Barner. The day pounded must the grainful, before we were ready to go it was time to go. Train were on Time. We get beach to Town by 5:30 am home by 6 24. We met et Candle stelie at 12, for a top & 2773 Maly. Mijo Bucher, Mijo Buen a Mijo Mc Shaw, Mr. Heard her Spaulding & Dr Schultze, were on hand. We reached muly at 12.25. After enting a little lunk, we were ready to go on to The Helmin evenuel. On way remove lempings We found Helmin in full blow, evenuel a runch of reference. Returning on went over to the old will, run he ruin and then on to the path though the woude are returned to the words are returned. ed to maky in time for y P. M. Their, arining it lander station of 7.30. 1. We met to-day at Owings Will . In the case with me came hip 2774 Burner, "Mif Me Share x Mifs More, awaiting we were Mifs Smith, and with next can came Mr. I tend a Mr. Tyrull. We took the route vie Red Rom. We stuffed for lunch at the glade just before realing the Bone Wills. after lumbing we pulled on still heeping close to the run. We room came to a spot when two men were weeking the beach for chrone. There two men day out the bouch put the rid into a benel as weter were added the fine light futing them out & throwing the out, after this fuit warling the meterial was taken wer to a strice, here old his fay bare did the weeking, a way never stream of water wer allowed to some through a gutter about 15-20 ft lay, boarded, the four of water weeled away the read, but the heavy crome lay on the bottom of the gutter and wer leter should out. Mr. In ried that They hardly

Phelpe, Mip Smith, Mip McShewer, Mip Baum. We tak our would route to Unin Dam the of the rime to I fellofiely an atenting for bore were Cypic freder accounts; also whereby were account in the life in flower. I have never seen flat no covered with flower. We mended very about no found it were books when we resold I fellofield. Here he then left on taking train which was just due. The act of one heft on down tracker at floring at Unin Dam to see the Yellow Gypifedium. They were no more plantifle the best year. It was more rather dark we little bottomyry ands he down By the Time we really allicett City, it was 9 o'chel. I was the about 10.15 a 10.20. Dr. Bassles had called. He is going to Bolinia.

2780 Fan 1.62

22, a trif to break hall. There were 8 in our party! \_ Max Mr. Heard, Mr. Chem, Mr. Spaulding. Map South Map Burn, & Map McShen. also going to Sout Talle wer De John with a puty. Me Sufi, Milps Ballad, Me Person, Me Kent, Dr. Taylor Me Virhin. and assithe your fallow. We had a very enjoyable trip over to Washington. When we reached but hall status we find that we had mady an how to went for car. We spent the time on the tow path, found a tree (Paullowin) growing out of a well The time person grickly & come we were on the way to the feller aring them before moon. We then ste lunch a copie of the a little time around the felle wellhed of street to the boot landing, but researche to take as over. Bout wer too consoled. white coming get stuck on a ruch, but get of with mich and in other wide my took trent down tom poth, we pound the 6 bule and the the by thetel of four mile. We found the coul aline pare. On but come to a standitill the allowing the rope to such while the other best person over it. We slifted & affectly in any of un, and in a consequence it were about 8.30 before we really Celi John, and are how letter before we pare. It must writing a help how for the west, It was therefore 10 P. Mr. when we left Westington, and how and a bely lite we get to Beltine, too lete for the Heart to get home, so he a his wife went home with me to spee the wift. We learned that we could find some one in the Med, note to take un over to the Va side, so next him we will let can dwitty to Cabin John & then walk up stey the coul

South, My Mr. Show May Barren. I made inging regarding which we could go rie Rak Cuch on return vie Itony Cuch, but found out that we could not. The fore with way in 35 p and Tichet good with end of Engent. We devided to go vie Rach Cuch. The boot did not been will 8.40 x due to being terffic we did not got the boot did not been will 8.40 x due to being terffic we did not got the had of the Creck with 11 o'clock. We took the roots ore freelightly, resolut the companying place at noone, buyind here wanted and then moved award to the Magnothy getting to one destination at 1 P. Mr. It was about 2 15 who we stated on toward Welefor vie the would roote, but detailed did not get for when it by the reari, making it werenged to stop for shelter. The little girl have very grite intending, guite motherly attlings only going on "12 a little colored girl was also intending, gute meaning to when it by a little colored girl was also intending, gute meaning to when it by a little colored girl was also intending, gute meaning to when it by a third not rain large on a heat many on all the line, in order to get time for explosing, it ment maning on all the line, in order to get to the laiding by 5. This we did by a newworm may. It was minimale late the boat were on head, at 6.20 we were et the laiding by 5. This we did by a newworm may. It was minimale late the boat were on head, at 6.20 we were et the laiding by 5. This we did by a new best but the day of the day were best but the closely of an outland.

2784 19. To-day we met at Ellicott City. Left home about 11. 40, on way to the car caw a fiely helo around the run, quite a laye one. It was along 1.30 when? realed my destination, on the can were New New Heard, and amending me were Mif Burun & Mif Smith, Mr. Teyrrell & Mr. Mille We took the runt we would, take, this have branching toward allute. When we get to the piesa, we walked uf along the bank to the ofing, in way stoffed to bush. Returning we much one way to Woodlaw. A day followed we for Elbett City all the way, at Woodlaw. A day followed we for Elbett City all the way, at Woodlaw he wented to board the car with wa, we fett rither song for the day. The life all bly were a little own I mile.

2785 21 With Well though beneter toward arlington area and return. This her been a recentle of them der stormer, for fine days in succession there have been hery downpown accompanies with thought & lightning

2 186 26 We met to day at Town lout Home at 12.30. aning the me lemed that the 12.30 can me larger raw. Inter it was you at now and the next can at 1.40. We is deadly to go on rether than wint. It would have been wire pulsefor if we had worted and

taken the car, it would have commented with the train for Cocheguille, even any it was we get to Timonium before the electric can, a had we thought of it could have then tolen the train. I sowew we kept on to Texan them towned in town Warren, stoffing on our way at Kelly's. On the way we promy a fine changetien and repulsed ormular with the bearing fit. At Kellige we stoffed to see the old home and its interest ground. In the have in still the old farinters all of who were very intenting to see. Mr Kelly, My You & Men Law and the boys were home. We stiffed at best an home & the war. owned server the fields to Warm . We found a plus to lime above the dam a gain rested for "/2 as how. It was then 5.00 when we actually stated on the had part four transf. all enjoyed the trip refinely Mr. Typull & Mr. Sparleting who were muching their first agreent am with this intentity region. Other is the party were Mr Heard, Mit Smith, My Bucher & Mit Burner We reached the trucke at 8. The tien had lift at 7.20 and. wen it must a want of two home for the most. We beared though that then were a wrich down the road must men but. Weeling and That the next train would not go through world 10.5% and that it would be wire to wolk on to the election can, This we did & het reached Texas, when just a short distance begans, were parent by a parency Train, a it was then but 9.04 w failed to undertand where it came from, however, This would have the train that we should have wanted for an it would have tele on to Timomine in Time to connect with electric car. As it we bft & nome we had to want until 11,05 for the next, Mr. Hend who had to be at Candon station on line left on any proceeded to Joh Red, hoping to find some one who could be him on to I own, be he did not return, he widetly med out all right. It would have been wer if we all had done the rame, because we were all thoughly would up done to on well a not were just as thousangly carled off, the running Town just in time to ree can full out and another 12 min were but. It inally really home at mudnight 1. Taray took me, Walter a allen for an automobile trip. We went to Power. The by my of the Vally Ros. to Lock Rave then almy the Simp ander almost to the high bridge that to the forting of the revel. We stoffed on my for with at the appropriate alone by. Returning we get back to Town via Ovin denea. The

2787

this were are injugable one; the moon adding romarket to the breaty of the wining. We left home about 7.30 reliand by 9.30. 7/ Deinded to take a tramp over the Supertine area at Soldien Dilght, my idea being of cometime writing up a flow of the region. I had hoped to get away before mon but were delayed. It was after 12.30 when I get away, 1.25 when I really the transfer point for Emay brown can and 2.30 when I get the Owings Mills. I proceeded out the unal way reaching Red Run about 3 P. M. Forday I decided to climb the hillwide my old way of getting to Dolfields. When I realed the full one going to the home or the other to the left parts a come fuld, I diaded to try this way it being a new route for me. It led me to a darly hovel and come deally out of my way, I thought at first though that it would cut off part of the tripe are a congrue I had to trans account the filler until I readed the denied path. When I get on it, of did not take long to reach the Sufertie are . I started right in to make a lost of the pleate that I reagneyed and a collection of Lichen. I did not move for from the rual keeping it courtaitly in view. The lower policie is very barren, the surface stream with pagments of weathers with on their grow some 3 a 4 different Lichen. In between the then the are tuff of person and how a then as there is an accumentation of soil which sufferts many plant. In fact in the affer rection men road quite a wooded one in to be found & here under the true one in likely to find about aughting; affairetly bower it is all a serfection one a seem became even at the highest point the rome booker fragments of rock are to be found. A observe meander though the place & along its border many flants find argenial habitet. I found again a frequent of Greeder reterice, but only men amount. I here compain plants are Demosteration her athem and the Polygele andigue but strange to any it is not found alcomber when the time plants flowrish agually well. It was a bittle after 6 when I reached the road x dieded to return. Set amone the are by 6.45 at 7.45 I was back to Owing Mille. Here I had but a sminute or two to wait for car, In on how and a quarter that is by 9 P. M. I wer beck home.

              14. It her been a week of striky weather. There is still me
   2811
              relief in right. I had hoped that then would be a change to
               might, but the weether still continue. If I had not had my mind set on the trip tenday, I would not have undertake
               it, as to actual temperature it was not no high but it was the humidity. I writed to continue my describin at Soldier Delight. I left home about 12.30 reached Oning Mode
(v. # 2788)
               about 2 P. M. To-day I want dividly to the Supelin region. To a however, instead of following the word server paring the home, I
                owned the shear to where the old have stood, & then followed
                a branch. I found an old read beding to the home & which is tend the words, but not wishing to tree it father, I returned
               the brench followed it up a short dut one x came to another
               to for quite a while & It took me to the chrone works. Here I form
              a road leading toward the right. It remed to be the roat that I right to take, It heft along the creek of the hills. I soon came to can abaid and homestard on the left side; heeping on I came to seen
```

home clar tyste. Here I called about getting beach to Dwing Malle & bound that if I hapt on out the road it would take me to the file but that I would be some die to there from Doings mile. I heft on will I come to a foly the rund. He sty a country-stree that is hely the the the right has ful, the other would take me with Currell County. I me heft along the other word. It, too I came to show when right own for it a way had toward the right. I went told to take this right had road the other the right. I went told to take this right had road the other the world take me to the can but the right. had me would take me closest to Owing Will a I wow followed this road, ginte an unintenting one at the biging and mue or been so the atie distance, after another mile or no, I came to another fule in The road, how I talk the left finds or even thereofter, came to Delight,
I had now a two-rinks well to Deorgo Mills, very comina trust
ing reaching my dishiration about 7.30, just in line to take care
The greater fast of the afternoon were cloudy so hip wow not
as disqueelle as it would have been head the sear been
whining. I format the lettle Polygale with allete seathers
fitty well over the sinking place just as I also found the
Dermetore on for help about and the certain extent Cladoin
wint attles; on the other hand Taline in found only here x
there we then in found Greater interior. I found my trans very intenting, for beginning to end. Then wer we rain 22 Mm. Him + I, and a Mr. Edwards from Herborton Cocomon Co, Ve tale a walk over to the spring & the though the woods as for a the rece truck. The how theley weather continues. I thought that on Thursday with the downfour, followed by being rain on Friday, we were very the last of the humiday, but such is mut the care.

The part week her been one of deserte. Let Sat. - any is, Buthe Frenchi died, build on Turiday: that might have Some, committed suit cide, burned on his day; on Thursday, Kartie dad, were burned gertaley Mr. Somir death is pehape tracable to the het hamil weather On Friday morning Percy started on his trif to St Love . It was raining 24. Mr. Henre & D. took a trif to Chrafuthe Buch. We had planned to go lest Thurday, but on account of the weither postfound it. To-day to is not an chil day. It was cloudy all morning, but temperature were all right, We not on the upper most dich toward The bow. ar went was with the host

\* returned Sept. 9th

2. Mr. Hime a I went to the Timomine Fair to-day. The is an ideal one, in fact the whole much her her ideal, sta with Minday when hellie went to Dodewin. We left home at noon, took out to Town or then withed out to the groundy. The hip out were not are enjoyable or it would have been at most other to at met other time, today the string of auter, cuthin way to the ground was a runnamer. We reached the ground was out michafe, here we found that there were no larger room for sail in the grounds profes and they were turned with the laye field off site. We began a time of the grounds a found much of thent at one place to, they had "The home bentiful, a wine home, farmily mily, & built under must recetary condition. Who was surpried on the great number of centimenen now constructed just for the form - a ferom can build a home, here it fitted out with about light, elabricately generated right on his flow can plough his fills without home ate the it. In the home att builde we found hip Brithwite, she is taking a very important part in it work. We found much of intent in the midney, here people co get rid of money with just the best trouble possible one roll get rid of over \$300 werning a dall, several balle are allowed to rull in the which are numbered, if run total adds to a ned men doll is wow, if to a bluck number withing is won. We remained in the grounds until rever, the advanción new is but!

midney alone being ofen. We got to the can; after a short wort in arte came but we decided to wait for the can, it row came along 20% wer the amount of cer fore, an outrage of convey but what can be done. The can were crowded 70 or man people in the bottle cen. We got to Town refely or run der 4. With all to Symun Och Park. We left home at 1.50 P. M. reached Itilfedele as how leter. We then welled along the falls to the pack at 3.25 we were at the pack in flesh of This for the show which took plack it 4 o'clock. The show were not ninch. We then found a flew men the lake when we ate limeh, let 6. aller, and Sam, Sam Hung, who are up and we shared a now bout which they regard very much, at 630 we started can want, The can now rufe of the old can home. We went all the about 8. The tip was girts a view one. 11. Rain ora Labor Day prevented me taking a trif to Bodhim Pt and had planned. To-day in a pretty day - a little warm, but upon the whole ideal. I deaded to visit the Supertine regim. Left have shortly after move, reached Doings Wille at 2.05 and et and started own the weed route to Dolfielde. Tonday I duiles to take the path beding towards the right soon after paining the spring, the route I have so frequently toher and which lieds to the stream when the shower were being wearhed. Ruching the Sufation area as on former versions, but this time made we effect to reach the main road, remained withen low all the time, heeping cline to would an my right, and get met in the woods, soon could the dinde a found myself following The stream that I followed in my let trif here (vide # 2811), only this time down stream. It brought me to the main them, and of come The road, and I returned to Dings mill. It was delightful to aday out in the open, not but, get ground wow just right to ret ou, I alberted again many weh spen were gite intenting, different ter from there found in the die whether westly is muit or day. The divide, Which it is the duide I will have to note this west time, is shouly wooded, & how the flow in more veriet, at any rate vegetation in more becurrent, in the drie place andipyon just were coming into bloom, occuping the ground,

and Liting you in must be wint from that with a to a live the form that might be to me a come between the two. Several lags future of the conjection of found and much the cuntatelle. Only a few plants are were found in flower, which you in the dair of en flower, have the and paying at the coming into bloom, or the title Polygele curlyer are the many flats in flower. The minter flower homem when grite agree with I blidge or theline. The trip from laying to and me a most delittle one.

2817

aglow with Soliday & Felix. The trip from lynning to end we 13. a beautiful day, Mr. Him x I took in the trif to Solom Irland. We left home at 7 G. Mr. shorp; it would have been a te have left a little roomer, ray 15 min, roomer. On it were we came new being left; when we got down near the boat, we can that she war crowded, and a long time of people were in line, buying ticked On I had getten off the car fit, I get in line, for a little while is line moved fait, then I came about to a stand till, I soon all that this were become many people coming later, had counted in or has when pearon about of me to bry their lishete. Mr. I time could have tribute from Me Borley, but hed tely him that I were in line. Some line came to a stand it'll, the boat hed reached its capacity, should I very, had reached a stage when a checking of became new at any rete, we then beared that but 50 mor tichete could be rold I were fortunately among the 50. When we bounded the bout we found way place packed, it was had to find a place to set or a found a flow in the bom to locate omeelun. On the boat we a smaller of the profile when I new. Then two we much the segue lance of Muller the photographe, now retuined, but located at one he on Brunding near Bank. a Mr. Shirkmen also about a the four for hely get a good time tegether discussing various things. We did not stop at Charpeter Beach as left year but heft right on to Sol more, notwith tenting it was about 2.30 P.M. before we laulet. The what we would with puffle availing the lost. Mr. Shirk wer anximot gt over to Prima Leaje so telephing our to reight judge one there, he was at home, and fortunately some one was on hand to ante him over, fullarme, he rold his return compon for 8100 the free had originally paid for the tichet. We took a book around and the get alvard. The but left it 4 P.M. It was 4.30 before we get be to town, and it was about 12. 15 when we get home. The hip from beginning to end was an enjoy able are. We manged to be away a put off the boat, or the third a fourth in the car.

18 The first bif for the bottomy section. We met at Levi corner Town at 1 P. Mr. When I boarded the can, I found in it Dr 2818 Knue & Mr Typell. When we reached Town, we found awaiting un my more & mp misham. Dow the west can come trup Buchen, hop South a My Barner, Upon the reguest of Mip Move, we awaited m. Storty, who were invited by hip More. There were 12 of an things all tild. We went out Duleny Velly Rhe to Heapten, then thigh Hampton to Sola Ellen. It was not gente no pleasant going our this route or on former occasion, part of the read had been flugly up a con war gowing, at me plan the that wer about but. Homever, we manyed to make out all right. We stepped to bunch I the old hishe him flere. Every thing went mich until we powered into the Thicket by the Celler. and get I did not mind this get w much a the dut on the road that we reined by paring enter. We got book to Town at 8.30. and I we time what 9.

19 after going over to the ofing, Mr. How x I went down to
3. Belline for Orwellow. I found a view let along the links 2819 in fact could have gother all I needed, I think right along the weeks. I took item however, only along one wish of the toucher being the these for author time, and when we get alone to the burlin flux weekled must be the tile feeting on their get the next of the flexible We returned to Claudia are vie the old roote, and and to chind We then went though . Carroll Puch and got to William and alm me took can for home Perched have I 12.30. 21 To Carull Sintel for Ountline, I found guite a fin colony men the old Blue Tof bridge. after getting my suffly of afreman I wolked unde the bridge & then followed the road around and serve the lots to the Worlf at car, The wiffly is fully layer and I will be able to get quite a number before it is exhaulted 28 We met terday at Hamelton. The following were in the party 2821 not Smith Mif Goldard, Mif Sarah Mif albert, Mif Burner Mm. Typell, the Know. We look out Camy and the wither the the river. Crossed the bridge & then followed road down stream. Reading the aprily home we get a dink of the good water, a then continued on dum street, heefing in the woods, It was my intention to go down to the Long breen Br., but stoffed at the first little run, thinking that ist were Eng breen Br. I even beened my mustake but as it was abrely 5' sclock, deemed it wise to continue ourward We stoffed in the work near hers of path and lumbed, after rubich we continued omnand, soon resolut a field where we met a man who told

2833 \* Some with corolle smade a very

filte to flet and to the aforey. I recent ion Close Bestin's for class work. The water has been upted from an of the little lake, classy the bottom covered with with. 30 We mit to day at Cation will. When I bould the can 2834 I found on it hip Burner & Mr. Tyrell. When we reall our det tron me found mit Smith mit Suddand on Dr. Know awarding un. I took the route vie Valiante, into the rawine. a vie let of Springe war found and reverel fine blond Gentiam. True were being cut down, down win to the stream and to our old camp at Ow Spring. We built a fin and spent several hower around it. W then made our way slowly down them. It were my intertine to go. to the Obrevaloy, but when it green lete I deaded that we go. to Box Rom & The make our way buch that way. We has a little difficult and the trail had to find, but ofor the wa Things went well. We muched a large change about the our fill, but we found a road that took on toward the Boys Camp, and the on to Whiten live. We get to the can about 6

of the intenting flout, and a few walnute. Here two in stoffes long way to to bursch. After bucking we walked arm the country but to Blestonine. It was a min time of the day of me upget one walk way much. Name over seen and also move. The trip was a very diet, one, due to the sandy a and the drought. We get to the state in time to the the state of the bold their thanks are him, Cambe Italiant 6.30

31. In Him a ) went one to the oping and then on I brunk Low and Mayon Collys. The morning on ideal, it is Herring Rum near the old queries, vering some By Worm. Orga Orage ar now rife and falling.

at 12.30 P. M. When land at the meting place, I found her Typerell, Mif Burner, and Mip Smith alredy in hand. We intered that a Back River can wer on hand, this left from they of 1230 and me hed to wait 15 min. longer for a Mille Rin can. While swarting most of the way. at the Highlantton can turn me had to change care, much to our his comfort, ar would then were ground rerembly for rector. We neited the much Road about 1, 45. I have we found a much of jituye standing awaiting pourage, a plus and found German told in they would take an any flow we wanted to go an far in the black sit own & decided to go an far in the black smith in one. On the can with an were Mr. Helden & hu by aithe & another more. They were on their way to their church the fish. Then there are already in the jeting when we decided to go this dethis ation " Middlebough" and then on to oran. It we just tur when we recold the Blickswith. The trip down to Rich Pt were much enjoyed. The day were as a while one the temperation delightful and the weather propert. On the fifty sur light sifted though the bentifully colored beam, it made the same of much least. We rested Pater about 3 P. Mr. on 330 P. Mr. Jue. The men who with the point met us in rotter and lighty much, but said withing about me visiting the point. We remained, on the point over an boar and then made one way slowly howeverd. I received served fine specimen of Tuber whole on the point - our German subfrace. On one were being Portri the run over withing and we lingued to admire the wonderful culing. This morning I raw the beautiful wer- rive, one of the puthent I have seen, and we on the same day I ree the yand run-ret. Both wenderfully beatiful, the run-rice possibly the poething the ten. Som after sum-net it breame dad and no, we found ometion not my for on the bound joint when duchine without one of the a short dieter farther and we one meetake by an auto-track, and were what by the cheaffer, if we could to rich. We decided that we winds guit a that disten byand the blechmist, we were who ourselve up at the cer lin before of P. Mr. After a short week a car come along, an home lete we were look at the City Itall and about 8.30, I was home.

2837

I Mr. I fine & I tech on regular Sendey morning walk when I left home. I wanted also rome trings - some of alm Tuly lin, etc., etc. and the I wanted a fetin of the M that we raw but Sunday have a refetition of but Sanday thing. To-day we want shirtly to Italian Ref via the read to brinden have. We want at the layer touch - countrainer, being built for mayor by and thought them - flagging a part in the severy different and thought them of the playing a part in the severy different day we devided to the at them we cloudy we show the day we show that the severy we show the day the billion for one to the other a fiely to the top who stored to the top for one land. the other were longe vin John, fifth of sign of we windly what it all ment. On the other olfe were fifth but down to a very min that we being built. After very went fether to the truje that I would, we stated her let the receiving about mentioned, we saw a colored way, we arked him about the cister ete on the other will a beaud that it was the heating plant. The both wow were down on the love, and the fife beday to the building were bought if that way in a series of clife

step at the chunch for oyster suffer. Upon inquing I form out that the suffer was to be next Saturday. I thusper deviled that we take a trip toward Lock Rome. In our party were the pollowing: Mif Sinth, Mr. Typrell, Misp Met My Mine Mine Misp Bearner a Misp Goodland. On we were going out Dulaway Valley Pike, I priched up a fine prince work. I three it arisk, dierdring to take it along with one my return. We went out the Pike To Hampston, the through Hampston. To - day we touch the lever perming the to and then along the rays of the words finally reaching Prome We suggest their part of our trip very mind. Reaching Prome Rid on west one to Lock Ramen. We stopped for land it

forking of the road. We realed the Rome shortly ofter seen and It was delayleful making one way back to Towner in the frethy startlight the money of two young to show my much light Ite pety crecent a that distance above Vener weed a very futy future in the western about 7 P. M. when we got beste to Town. We looked for the wfe, but it had been taken. It was about 7.30 who I get look know.
14 a.m. Mr. Him & I went over to the filtration plant 2839 I wished to receive a fection on two. The six was futy and the distant view were not exception ally good, no I tent for two a the fitting. We then willted and a little or but to the efig, for water a then born 2840 P.M. Met the after it 4:30 P.M. at the Guilfors Dr. can place. I found D. Lewis, Mit Lit a Mup ! Fitch with (!) abouty on had; we had only to await hip Saule. We allowed time come to avin after the efforted time but his South did not come. We recold note Dame shifty often 3 P.M. and went et me into the reception and of the comment. Sinter Euclidia after on how or so, we returned & after an intendediction to Sixtua Philiam, the referme of the reboul?) we paid a visit to the town. It was jet a treat to visit it, the chieb are intending one; rether trying the let two flight of the which ever not them intended, but one wath while toking, From the town a most suggistion to view can be hed, one is just alone all the Easterhin's clair non & some of the winds he is doing to be suffer and bake by good-bye & sends one my hill to Brilfel and bonne. 20. We met to day at the William an can terrein. The top went one and were sure dutan out the Suffer Spring Pid who they winted on briging with the Mr. Hands and Must be took on went with to the Pi Pid and the their beil beding of the fill side and to Hammer. It had been cloudy all morning, but now the can our chan's and as weal at the time of the year, we found the running and beautiful, the best fill mayour are change putty, thirdy

of the way of another ante, it got too for own toffled over
the little carbon to the little culout. 37 after sweet much be cloudy days, we are being a met began to driggle. In spite of the rain we had quite a gunous turn-out. I the cur with me was the Typull, I hapfund to

take a Piheralle can, and when we changed to the Daning Mail a one found is it, hip the Share, Mp Burn & her bother, who has breis: When we well Owing Mills, Mit haddend bought hard aportable the good bought hard aport with the bound of rulbe chose, May Smith we there by to get but home again, but his dieded to go on, we had four unballer in the party & that we suffer the sold to go on, we had four unballer in the party & that we suffer the sold to go on th creet. We had got beyond Red Rem when Mup Mr. Show a Map Smith decided to return. At no line did it rain very had, however, they deemed I wisser to return, then ent of one continued our jament. Map brier was going to stop at her bother. That collected Hepetical no then was nothing the now to do but to enjoy the trank. Today we remark a fater of a former hip. We entered the large gation on a read that the ord that the coming of the rank. We formed then intenting, It trought on out to the classes works, we examined here, the fit of the time! We now form our close on a read that led to thety Pake, This were the west that hep being was to take to be destination. We row covered the need that we were to take on one return tail a proceeded but to Buy's Hill. Just before reaching it, we had a fitty view and the country, which I think surpend the view on get from Buy's Hill. We remiss but a shift him at Buy'still, formed a myte flat of Viole falte in blom - 3 fate flower when to the road of noted above I we led not preceded very for the read that I would, as now realed the Defiled Ril and in a little with our tomping along it. The Cledowing down to the sain, but fulled of wardefly in before boille finding Cl. rangifuin, Cl. often Cl. Calinian, Cl. fulle at d. withthe . There were very would in endow. And as low one or works of Paralix & Physica on the ten trucke, but the other, but the other work that we had been beinged that one of the other theory of the other than one had one of the other than one of Viole of bud of olive we the of one obend in bloom, It we want that the the the one of the the the the one of the the the the the one of the the the the the one of the the title live to be one that the title live to be one of the the title live to be one of the one of the title live to be one of the one of much to be enjoyed. after anning the respection are we dealed to stop for a slet lime to lunch. We had a fine bild, in a slet time, in ofthe of the desper. Although, on a table part forworded it was about just date. There we would be strong one stopped a few months to admin the billion count with Carlofyen, and noted the bande of color a lighter from in the darker bane It in the lite to investigate, whithe due to another flant going with the andreys or what, we finds to beam. We stoffer all teld filly but on how but the it were good dad me did, We got in con it 6.15 P In at what 7.30 I were lower. We had jut gotten confutally under way, when welding there were a kind of a cech and I what that we recent to have weth fly pass on. We had run over an automobile. It recom that the own had gotten own into the track due to the blinding light from another aute. He teist to the car by waving his hand, but did not ment.

2845. 28. h chart ugly day I went over to the sping above to day

2846

4. The trip to day was to Bein Rum. We mut it Wood law at 1, 15 % P. M. all four of us met in the car. Fruit Mr. Typell. I mut him at car. of Knowled & Howard Ste. where we boarded the car, next came Map Smith a then Map McSham. We reached Woodleam at 1,10 P. M. ait was about of the office. Then we decided to count the next car. It came at 1.30 P. M. now one che came of our party. We then forceded out Worter Mills to Bein Rum. On way stiffed for furnismon. We turned into the woods at Blems Rum. I at once byte my search for take to woods at Blems Rum. I at once byte my search for take to four them made one way down attend. Due to the clonely weather them made one way down attend. Due to the clonely weather to be care dark early and so it was quite dark some after fine of clut. We had intended bidding a five, but drieds as it was git described to down the first to boad direffered were before our had of and our bounds. By the true was we though eating it was grate dark & we had some difficulty picking our way out to the read. We reached the care affectly picking our way out to the read. We reached the care about 7.15 P. Mr. & I was born about 8.30.

2847

Tracklin Rd. I wished to get now Nitella for clan rum with. Thering the right it rained quite had. This many way it was git delightful but it became now a more blody. We enjoyed the life mortheless I recent the bottless of what to intent we. The stower come overflowing their backs. In feet brugging felle broked healful with the big flow of water. The bridge at Widen hith Rd is now when way. We got buck to the car about now a how before I o'clock

2848 11. We med to day at Catorwille. When I boarded the car I found in it hop Burner & Mr. Tyrell. We reched Cloud before the appointed hower, we awaited two more care. Info Smith co on the most one, and no me the on the record. To day we went vie menture have here have been bry river our lest visit and treve enoughment have been felled. It was quite a tack working one way around and over them to our camp. Down were to one camp treve have been clopped down. I record the tings and we findly received one camp. We come had a fair brilt, would war flestful & in a about his we would have here able to tout one but, but we deaded to wait awhich hope doing this. Tracting time finisher came and we want to be with the lived, but he with the

causager. after this come the manhandler tracting. It was empining, how quickly the wood wer commed in fact, by the time we were though with the mushmallow, the five, in after of its rige, were much so many glowing ember. We war get another nice let of wood, filed it of on the enter and some had another fine for five. I now welled off for some Christman form. On they were fleitfel I soon collected all that I needed We then get beach to the fire x then the found on set around the fine with after 6.30. We then feet at the fire x made one way lack to the can. The day, expirally the morning had been more as less. cloudy but the aftern war occasion they surry, but now the stay were cloudless. The steer show billiantly some had a chance to attady them. Of course it were not one of the secret things to get out of the woods, men the follow timber, between Cofelle on our guiding star we weeled. Who we get to the hail badley to Vallieit, we had a little bould feling out our path, but nip Burn found it, & after that, our trouble were over We reached the can about 8 P. m and have about 9 P. m 12 With Mr. I fine one to Sewith to the resetuch and The home. The morning is ideal, one of the first clin months not a doubt and just the gethet kind of a bregge I had the bottles of the spring & then we went over to the 2849 truck, when I recent specimen of buch tings. 2850 18. We mit et Camben Station at 12.30 P.M. - mit Burn, x Mis Smith were already on hand when I arrived. Mr. Typell came a few minute leter & we were cheely in the can when Mr. Head come. The trif to day on to the Seven, we get tickets to Earligh Hight 92k round trip. The day wer raw, due to a shap wind from the west, We took one would write hound on the way many little fine cut down, affautly for the purpose of widing read. We turned in at Ohull and insites Boiling Spring, found the path though & seems the would in latter alife the it has been for gens. We must stoffed at But Dela built - for & had juite a visit time for an how or more. It was 5 who we stated on homeway bif realing station about 6.45 in term to jet their realing Camber Station at \$1.30. This is the

2852 31. With Mr. Hum to Franklin Rd. We left home about 11 a. Mr. reaching Window Hille about 12,30. It has been ren markably warms the left two days. The roads are thinfur rether ruft. On the way stopped to take a picture of the putty bush, and then liter, pitan of the spream at the en-

coldet day we have hed on Schuday, This writin

were reacted, beed treated, and tite much wellow were also trasted. at 5 we started on through the ranne, getting out before doch. We then went down the trucks to brage brue, when we parted from her thead, be going on down the truthe & we up I tilton and to Catom wille. I wan home before 8 o'clock 9 m. Him & I went over to the ofing. The cloudy weether centerine. I thought that with the ching of the seem yesterday afterdrewn, it would be a thing of the part. 15 We met at the William and can turnium et 12.45 P.M. when we took on to artitue, It was upon the whole, just a putty day. The sum show mut of the time, temperature above freezing, but wind a little revo-Roch we Therefor muddy is a distuling feeture. We went through the Ctellina "huch river, he shope, we found the hip mit intenting. We aboffed for land at the interesting meeting of the two abiens; but a fine and in blow eput on how or more around it. Close by a boys scouts" cough he come into wintern - 2 loge army tente have been weters. We made our way back to Cetomville, over the wend route. 16. Mr Him a I went our to the spring. Morning delightful 2858 Lute a change in temperature by the This we returned - wind having 22. The trif to day we to Broklyn. We met at the comme of Light a Belte. She and took Cutie Bry on for Broklyn at 12.30. We went though Crownell and then along the running. When we reached the little rowne we stopped for Stand Mr. Tymba My Barne " & mith Mr. I fend. Celling & runed quite a number of specimen. We then place down the bellide a chat distance, we deaded to untigete. The flue famed to be to our thing on me deaded to stop. We built a fin in a short line. For the next confle of how we cargings on five, only bowing it when it byen to grow duck the the returned to the haid and found one way out to the weed. We then got bush to Buthy and the on to the bridge when we took can

The again
The again we the out of 7 in just a read . To day it both the rim ht. to frefered by Mr. Heard & we were to top at his home. We met. Frederich Rd R.R. Station at 1 P. Mr. got an ticket to Story Rive. (4) Inhame he are party we kind huth My M. Shee, My Barne, Mr. Tyrell, Mr. Hear O'area x my my Belle B. We get to Sty Par als 2. 40. My Trul. M. H. other it are 2.30. We then west though the sure attempting It land a the retty but to the road we felled it or the well on way to Dref Rom: On way not Mr. Smith who should in his I had horsel your retir - wenterde existe, & found exceede them better very activities, were found stong Dech Rom. The trans along Dech Row. mentering in felt bloom, in fact part the frame, and Violety gelow, weld such a deep with when . On plat we fant that foldy had 75 amon flower on it, We finally reached the wed x then

we had but a short diteren to go to Mrs. Hende home, when we found Man Plats or Mr. Tyrell already on board. We had raffer & got but to Belto chart 9.30 & have shutly often 10, Theteday the follow were at 3830 to afend the evening 23 a raing day. It just powed down this morning and it heft it of for some 2885 time. Towards 10 though it began to clear x it booked are if we were to have Mr. Henry Pear Hymn died the Ath mid to day a fin afternoon. However at 12 it began to rein your. I wer in hope that no are would come for them I would work with my Triben, but at suffither my Smith got on the car a when we reached Towar Mr. Tyrull was alredy Taly True charte found quite preparety lue to frager on hand, leter came allen and then Me Heard or Mit Burner. It was racing guite had now, but we decided to you. I had at first win tuded to go out towards the old Still House but now dender that Decentral Objection we go to York Rome, vie Providen & return vie the Valley Road Just before reaching Providence Mrs Smith had almost made of her mind to return Cely contro but finally heft on. We resolut, that Ram about 4 o'clock and found a place on ever bunker to where we might eat our lunch, For wow godflyllen Time now, it was much briggling now, by 5 It had stepper enting and there was not me rain. We decided to me the green walt, so hims In 22 of in at the road We found it in ful them. I were rungered to be that we found so many flower 60 forthe affirment the runch one way along the Vely RS weeking Tromen about 7.45, home about 8.30 let for 50 por inthe form of. We found rummour back of the left time lying on the ground; it reem an of a fangue is responde. 24. I dendes to go out to entitle Red for fuge you & visit the Experience 2886 plea. Mr. Hime went along. We left tom about 9.30 G. Mr. realing Window I fell about 80.10. It was a beatiful morning, a little warm but otherwise delightful. We found only a few fry you. We then J. Juli Senga went in into Winein and were own at the Cypinfedium place. ? was surprised to find the flat in full bloom. I was flowed too, to ree that There were plante Then usually. Bender it Coffeen, on found Polygele Legen, Podoplythen, Cadamie, Cyclin. in full bloom. 30 We met at Dearing Milh at 1.30. In our party were Mit South, My Barrie, Mr Tyris 2887 and I know. We expected by Head, but he we not on hand. We started on without him expect ing his to cometation in, but he failed to do this, although one marched the truth fully well with arom. Due to the being sin gesterday the roads ne very middy. Torday we went along the left branch of the runn, then remement the brif we would take, areman lyrate, Cerathen orien are now in bloom and are quite Avny, Nich ovate, Potable Canadam and a little Suifu one also in bloom In region covered with desper vist we found have may lack & I'm imp Vole brinde + V. pedeti, Gaylenni remi + Vareni varendani,

I thought that we night reach some of the ridge ging went, when I wan told by Dr. andrew that he had found the More Prick - Philips south lete; we therefore when we reached the main road turns to one right. and walked in that diretion a short dutane, on for an the pumbia stone wall, we then bound to the left and went down one of the vidy We spent nome time covering from ridge to ridge. Here we found Keline letifolie in bloom, we findly came to a long ridge & here a road had tometh the old Chrone fit. We had just decided that we wou go home that way when we which two men coming towards on. ?

thought possibly that they were going to ask their way but we beaut that they were officer cent out from Warbington, that they had a men in country, had confided, down in the celler of the home was the dittley, he was a light of which were a figure a light windy based, a close all of which were being demeliated; we take the to the the to the the the the state of the transfer is a conflored were a logs. bottle of the stuff that had been dailles. The officer thought botth of the steef that had been doubted. The office thought do. I would be made for this we couldn't do. I seem in it they that is the mon whim had just take promise of the place and stated their bring attact, the following the latter would be found that it took will be the latter would be found that it took will be the latter would be for the state of the transfer that we had been a form occasion. We get to Down with at 7,45 and hours of the latter would be to the state of the st an own out.

2889

7. a beautiful day after a crize of rainy weather, Monday being is Last Prip

only clear day during the week. To day, howen, it is bestiful, almitte clear, and a delightful bruge blowing. We mut at Ellists City at 1.3. In our party were Mip McShew, Mip Bodders, Mip Smith, Mip Buren, Mr. Hen Mr. Tyrell, and Mr. Jour. Mr. J. we then with his arte, he, howen, took home & room then efter caught up to un. We walked of the track to Hollofuld. a few Cypitaline was the in bloom found to Phlox in bleven als aflythe Sambre herbaco Hufin, in else ofte 50 plant. When me realing Hellfild Mr. Jam returns to Ellict Cely, The wet of we went on to Wordlam when we took can for home, We'realed W. at 8.45, how by 9.30. When a short diet are from W. we seem a see bught meter.

8 Mr. Him a I went to the spring and then around the race back. Willow och is rather interesting, the old trees are in fall leef. but the young once here rather purily completely once why this should be, done not recent to be clear. another putty don

fut much warmen then yesterday.

14. Which rain during the week to day it is clear but rather outry.

We met of Form Himleton at 1 P. M. Mif Bonn x Mr-Typull arrived at reme line as myself, late mif Smith & mif melle come. We took as Pholice weet and a colored will going recently lately who we revolut the nine we went of these herfring atong the right had. Due to the arthy wither none of we had any patients "fet", however, after a let, the temporal and it was nice. The river bothed for to-day with I much of we to day with the ruch of water. When we receled the old growing we looked at the figuret of rock but found withing guing on them a get ( vide Jan. 29). We stoffed to ant then continued one tip a short dulum faither who we riffed to land. On the way we found Trilling in the lest styre and Oreton spectalling also in the last lyre, When we finally realed the realised bridge we deaded to combine our well of aly the take, while we did, The life we wit so fine though, though the till gen and gingle. Orizilagellem was found in full blom all till 85 flat une found in flower. Reesting the road we wills 8:30 P. M. On my com the aurone which we well about 15 Mm. Him a I willed our to the filtralian flood. The eticky weether centrium. Polyticale commercia in war in fine chape. 21 Our trif to-day was to Washington The clay The tow forth from Celi John to the best trelle. We mit at the W. B. x a. station, Pask an et & a. M. In on poty were Me Miller a him siche, Mit , Muß with Mr. Head and his renter-in bu Mit Jennie and Mit Mille he Wantington, we come mit by Mr. Tymell. With tichet for Election him it cut more for 8d to Cabi plan We then made one way to the town paid by welling though the woods, guite a mengalle on a wale day, to day, home, it was lettle to worm. For a time we felt a lettle way about the flew to ever the coul, but on fin elly realist the bety and it and the way were we found the hip a little thing and it did not reme as intenting as when we have gone the other way. We stiffed in at one of the life but out of the life of the other way. in at one of the place, but we found bitch of intent, and war when we got if to the dem when on wente cear the river. We

leaved though the men at the wicker bridge where we call fit the

man to toh un aun. He we doing come wesony was not for

aff, we we bold him of, he would be reedy to tele mover at 4

450 1921 - my 21 - June 4 In the meantime two were jude come slay, this went 11 from tender the rower, bower, unch is the steephty of menthed nother the police, be took as all own at one has. He record to undertand his bringing, however, & manged his but well He tech in to the island, which we walked acome at on the other it of it it is another boat. It was the tip could the felle. This way week. We know it the fell will I P. M. who with can for Guyelon. The trip cut 42 of one #216 We get back to singeton lefe 8 P. M. and back to d W. B. a. aleti lefer 8.30. We child the tett left of tuch an the West lock how in Belle of 10 P.M. 22. Mr. Hair a ) that a but with to the ofing and Unique 2894 to the care back. Polytichen commen in the wow in friend 28 The trif to-day one to the Science bealty men 19 below Polar, 2895 at 12 15 P.M. In one party we has Tyull, my solders, to be the Juning Collecter I had to make a chat the find that the the act of the best to the line of the year we would be to the first to the land of the year we would be believe to the time of the year the part while I shall a fall of the part while Jany's 25-02 ani my Detat we realed in that orders I get the wateried I wanted say the of buch to the state . If the inter to take 2.35 cin at would Bellin slet 3,05 and been before 4 Pilm, 29. There was much rain last night. It began which we were 2896 it the dain pailly jet the an were finded and were litering to the appeal and sound all night. This is it is let a thing, but Plany we tay to behing to the we to the fine the first of the little and Bone But we had a blow.

It the time we town a body the stiff and be with a down with the little and the stiff and the down will be the stiff and the down with the little the the the the sould not the stiff and the city was a short time, ate launch and the wint 18.

started bound vie the Dymal Rd white as flowed with on Bring to Frederick Red and then have ruding our destinan time about 3. P. Ma . We all enjoyed our left very much 30. Decoration Day The weather in still werettled a try to Waterford to look of the Baylining braghy care - the box hubber being had been planned with Dr. Johnson. He raid he would go of it did not rain or look much like rain however, he was on. hand. I met him it The Pro-cathendral at 750 a. Mr. 16ft home at 730 and was on hard at 745 no had but the few min wh to west. We had a very fine bif shown to Waterford and webel our destination before 9 o'clock and that in after four little detown we had been on the wrong truck over, beinder a few detour in the city. We parled the actor at the title store just a chit disten eway and the byen one reach. It he been 16yer and I let oglassacia betted the fleet and I felt with delion about finding it, my sely cera uslin We get down one of the traile and byon our cased whit a jungle we had to go though. The fligs was wet further the rain and before boy we was rocked to the obin. After a home or more of this wale, doing which take I found read afformated, I went what the flew get each time and distincted, I want ready to grain at of and try come then trained pulled in the winder when them would be been folige to come the time. 2903 tend with home. I did not went to be haffled either, within half have haved it was we weely 11 and Dr. John said he would have to stat back by 11.15. By this time we came to another flew that booked as if it might be the plear and run wough it was. What De Johns was getting out a opening of the origination, which was about in flower, I woulded on a thought we all the besty coming a nearly for a case of ground. We full couply refer for all our expection and maked the efft well this time for fiture study. We get buck to the can and come wedy to close at 11.30 and one buch in town or at the fiture at 12,10 P. M. Here we with could receive the land on friends. I would have shifty ofte 1 P. M. .

4 The trif to-day was along the Surgularine We mit st 2898. Union deline in time to take The 8 a. M. hai to Peryolle he on party were Mr. Head Me Typell Mife Smith & Mife Burner. It links on how the nech Perry wille. I den am boarded another train, which awaited un, for Condowinger. We arrand at C. about 9,30 Q M.

500 1921 - June 4 - 18 Here we crossed the Surguehamme bridge and now be our trif of alm The old abandond town path. Right of
the byming the life is an enjoyable one one rich in beat
accounty, for alpent all the time as hed the fitty rime in for
your first flate we for I was the place. We found Richer
odorater also but it was all almy the tail. We found Richer
Containing we found as intenting form of Rhen town indeed
the flow has by built which privated ging the first are only
afferment at the remain of the old fillier. We found a

Broad Co. Here the court we covered of our the steem and it Different of the state of the s Plus toy one will see the remain of the old filler. We found a of min water done it hand, after dime we continued on of clim muching Pearl Bother at 2 P. Mr. Here in a mie Jung Bryst minie. In an an found a young bryggers. Who we canted "I de come it made a prelimitiving round: at fait I thought it might be a nettle male, but me Typel (?) we men the bid & called gattertin to it. Just before clining the hill we are the formy that wenter the we arrow the immediate affect with a feddle what in the back. Was that the total would bear at 4, no me had to be buch at that the it tak in aun in 20 mm, I her an 2 and a chet hitem from the station, and We now but the them to little time to do anything worth while, We charled a title hill & the alund hach getting buch to station in fluty of time the things shot 4 f a with while the much fully twice an und min 354. Bul Bothen to Belle "2.07 5. With me Him to the fring and to the new track. On ideal morning. By worth comfel at the race back had 2899 nome how for setted would P.M. With Wellie to Mr. Boutoin garden, when mention of the Wild Flow Presentin Society and of the Andohn Society had been 2900 united. Two or non how were spent here must pleasalty 11. We met at I own, here we had to wind with 1,30 fre a 2901 to Timouin - The one immediately preeding having left at 12 P.M. When we arrived, I mut huf South in the on, Mr. Typull wer also ther. On the next can came mif Burn & mip miles. We realled Timmi at about 1.45 we then walked along truck to the next road. I thought this was Padonie but bound letter that we should have gove to the next read. However we found the read quite intenting, it took we per an old homestuf. after a but we come to the read leading to the church and we were on familia ground. We follows the road though the woods & family reached the Padami Rd. Jut in on get two this point and what we man the affect of a storm so waited until it poul over. It found down for a about twee after it was over, it still landed the string. We man made one way toward Beau dam creek and all along we found we were retaining the lift taking on a former occasion. When we findly reached the best past of our lift we findly reached Beau Daw Ca and have in differ to levels. Mr. Typull a I walked up show a short distance + found it worth while. It was my intertin to fellow the week down streen but as it was getting lette, I dealed that we had better climb the hellich to the week. This we did, Wa the had plane earling on to the station which we realled in time for the 7.30 truis. Face to Tanonin 124, Time to Town 20 4. 12 anth stilly day Me Him x I went to the ofing and the to the resultant. 18 To Rock Creek and the Magnethy. We went at the fort

3. Mr. Typull & ? took on first trif te-day. We were to go last Saturday, but due to Perigi duth, portfound the trif until ter day. Mr. Heard were also to go along but his brotten-wir-law, called & that prevented him. We met it Owings Wille at 1.30 P. M. We out in fact, in the can, a It has been very dispently but, striby wo work in that was a little round that we had profund transfing, but after an go started, it turned out much letter them I had expected. From of all it was cloudy almost all afternoon, and read the buys loved the chitand grove. I was rether surficient to find still a few clutimet - boing trem. When we get to the glader beyond the woods, we steffed a few moments to suit. He we raw a fun creaching che to the such in the steam. To see who would hit the fun fint, we them rould which it his Three stand all around him, but he did not jo fi finally are but him + bound off, but although it tund him that and he did not juint. I the happens to had him the a fine that rested right against him, and still be did not jung. Ittengt that possibly be had been sturned, so Mr. Typull walked own to him, when we row now that he was all right. Why didn't he find when the strike struke him, did be ful our that they could be to the struct him? We would our way up to I twitch him found it was occupied by read young fallow who are going to make a club hour out of it - a face - best - club. They are are raining bounds. I am respired to must here one of our forms graduater - a 1909 graduite - a Mu Most (!). He can flower to use me. We asked him where we might get a drink and we beauth of a fine of ing just own the read. He have the of the boot bygon, and we be not that there was 4 of them and that they had been cought that night by the ten officer we had not an that contenting occasion, see second apr. 30/21.

Mr. Tyrull or I, booked of the spring and found it a fine one We nexted again a what there is them much our way book to 10. Mr. Typell & ?. met at he'r corner Townon at 1 ? Mr. an w expected Mr. Heard we waited for the record car before starting. It was then 1,30. Due to the fair at Trinomine, humberly automobile were travelling out Joh Roed. I were rather underde whether to go toward blen Ellen or towards Lok Reven, decided a form of the letter. It was again one of the pathy cloudy do

2968

es we were again provided with umbeller which proved to be quite in the way. We found one this quite intenting. It her her some time sure we have been at Such Rowen, so we were much intented in the work occomplished, and in what wer being done. Ar room as we resched Lich Rowe, we de-Boys. We had not gone for when we had the refute of some We got to the sping get on dinh and the returned truck Luk Rever. Just as we were turning into the road leveling to the daw, The war a repitation of the blacking. We stiffed until it was over them continued our trip, When we readed the spit where so much fine grante had been quarried we raw what was taking place. Here wake were bying in much confirm, lage minum builder and small frequents one above within, one night in give that him an awful enthypele bed the flee. all around were segue of activity, a bittle during was bed from The quany to the during engine, and have a foge. Lage truther carrying card, carrying cement were countaitly paining.
The lage take between the true dame is now reflected by a meadow (?) of tell words though which a cickly already thugh the rilt. Towhing towards the read dam we ree that always the new addition in towning hast above the old foundation. We were just at the second dam when we breed the warring whither a brune that another blending would seem follow and so it did. We undderly fellowed a few recents later by the refort. This time the own but 3 or 4 blants. Right at the dam is an ensure concerte avisce, when veryed it is carried up to gente a hight and then shoots down to when it is would . We wetched for guit a while and the entered one trip, stepping only a short tain at the spring for a little bushing. Here we found a lage Phellow till in egg, It is the fourthing I have I have it in help, all the alle une found, no wonder it could sping out fully comflited own right. In the old sandent beef we found many huf for those rude. We cartered our trip but to Town when we test so for home. Readed from alant 8:15.

It after getting ier, Mr. Him x I went to the spring and then we to the rece truck. It is one of those sultry Sufficient morning. When we left the spring, in fact when we stoffed at the truck, the sur was shiming but without warning, it suddenly began to rein, in a few minute it was pouring howen, we got under a true x although considerable rain for

2970

we did not get unt. 12 a trif to Solomon Island. Me Him called for me about 6.45 h. M. by 7.30 we were at the foot of Brundway. The atoms aboutly was quite crowded hower nothing the it were a year of There was no lay line of tichet buyen as on that occasion. We get our tilester and bounds the boat. It was cloudy and lad an if it would custime no all day, then wen! we wendy broking for the shely side of the both. We found a flow on the offerent dake on the fast side, towards the bown. It was 8. who the boot fulled out, she was rebuduled to law it 8 The Trif down the boy was are enjoyable one. Townde 11 the come came out and down were way prospect for a clear day.

I beared from Mr. Borby that the boot could carry 2500 frafte Sitting close to un wer a man, whom we later learned to know a Mer, Kirk hing now in Welbrook, Me Kirk has lost the hering of one can and been rather hadly from by the other. We found had quite intenting: Being about dief, he has for the must part to enterten hamilf, av ir guite a reader. We arrived at Solomonie at 2.10 P.M. We found it just hot when we got off the boil Mr. Kink got off with un, we walked around the island. The what is ro well that notwith steading our clowner of transfig on got both to the load within the home. We staffed to we then dening and show to ban et 4.10 P.M. Just about their time it began to thember, before 4 it light rim, gut had a untimes for an bour or mur. We were officiale Draw Pt before it staffed. It rained so hand that we bet to find sheller on the lower mut dech, he won in it stiffed howen, an got buck again to our old flace, The trip back wer alw. hearly enjoyed. We haved a little of the Rosselliter who are to give a tell & at rome theater in the 25th. We landed about 10.10 and by 11 we are back home

2971

IT The Botamil Section met tendeng at I tomalton at I P. M.

Just the Break and he our party were Mily Bearner,

My Smith, Mily Dowell, Mr. Tyrell & later Mr. Hend, When I

recorded Hamilton, Mrip Burow was abreedy Then, She said no

one she had as get come; it was !" quite a surprise whom Its

Cany can came to see Mr. Typull, My South a hip Downell offen they bed been around the corner. Mr. Heard had not come. We took can a started. Receling terraining, we can that the track wer been extended out the road of their toward Below road. When some dectare out the read Mr. Head overtech can. We really the breefords in duration on the walked along the lands of stream. Some we heard destant thunder which cantrained during our transfer through the woods Just on an reached the restricted the second only a short time proceed by but the 1/2 be. We found shetter at the little statem. After the rain we continued our trip reaching I am about 5, 15 18. Ofter gring to the spring. Min I frien & I went to S. Bell for Evering Prairie We took the would water day the tracker. Evering Prairie are rather exerce, three 2912 20. Repeted trif to S. Bett. for Evening Paris. From but my 2973 for. One ome trip will publy exhaut the ruffly. From I of the very.

24 We not at light a Balt. Str. at 12 30. The Courtin By 2974 can no large stafe at this course, so we had to go to Chale or ben the to boul it. We took the usual route to Sum buch Only this time for some runn we mind the min trail x we found owner for the en old chark occupied by a furthermore We! welled from this point along the show a found it very enjoyable my Smith Mr Typeoll Thousand of jell finder but been strongled, some of girte a loge eige. We found a nine of to the rested for an hour on some. We brailt a tale fine of small straded fromt backele. After bushing an continued on to I Hancerbie and Then through his place to the sum read. I was any wine to find some Evering Primer, but failed to fair any, all the flate were done blooming. We get but the can and by 8.40 we home 25 I get up early this morning and transper out Ellenbur ha in 1975 reach for Engine way for home, we to be hed. I continued on to but higher he & St beinger her then returned.

Often buckfut west towns Comments but her then were form to he found. Lete west to the sping in The to The rue come with 27 I left rehard ar room after 2.35 P.M. as possible and both can to the lete at Carrell. To-day, I was rether futurate in getting Denthem. By the line I weeked Weetfart I had all I medded. 2976

I be this is my last chance for an all-day trif I availed myself of the offertunity and planned a trif to the Sough beams rever. The day was an ideal one diliptiful for truly ing; I was! rother surprises that not more availed them relies of the five weather. The train left Mark an at about 7.30 and Town at 7.58 h. Mr. As Town is no much clave I went to Town. Here I found Neif Doud! aludy at hand. The time come in due line, and on a were Mr Head, My Santh a Kif Barm. We ready Dette an whiling time. We bessed where to find the road to Peach Bottom on the Sugarham and come were on the way, How were availe himself of metics within him great was won fruited to un. Clase by on the slete quarin. Slate, in fit is commen, Here! , my were sletted, stefe, sille, foundation, parente was of slate. We had pound several high mounde of slate when we came to a med beding towards and, I they It a good chame to see some of the grain at che range & stated to walk up it, all were intented except Mif, Said, is as she did not can to go, hip Burn, dealed to stay with here. There to !! centing and ownered abilit, Men Hend, Mef, Downell & I climber toward the mounder We came pleased with what we show the class is found in cease & after granied large holes show when the grany wer. Some of their holes were very deep, and hel water in them. We stought the read to the granie. heft mor or less parellel to main read but the wer mut the care an I cam bound. Mr Heart had to retur for his overlan & then returned to read, reteasing his stef, but Double I, followed another read which I thought would take an out to min real. It had homen to a fild & curring it we found ourselve on a read, while I bound would take un book to men and, When we realled the Peach Botte wed, we were jut 2 miles from that flue as had reached et a will begand the first when we entired . We had beaut that our companion were citting on the moderal just bymed the plus we were. ?! walked of the hellich haping to see them, but we we we in right, ? thought: that they we alred of use . We won beaut that this was not the care, a we asked felle that we must going in their duration to let the know that we were according them. They findly one both we but due to the special fielly as home of our line we but. We kept trythen after this Reached Peach Both should 131

We found a flow to bound. after dim un continued on his down stem to Converience. The top down wer quite fine, but? down stream to be rowings. The top down any grate for, bot?

Palelly the day weather bestered their blooms

8 a rainy Set, morning. It pound down I'd thought it would

le "all ff" for our top along the rain., I thought it would

le "all ff" for our top along the rain., I thought, I would have 2978 2979 2980 The "all ff" for our trip along the river, I thought, I would have to g alone of the trip are taken. I bft throwing at 12.30, welled William are to make the result. On my out the sain could a the same show out beauty of to wint for enther can but and one slee coming we started on our truft, furt as we got out of the car, it began to rain again, the wind blew and for a time it booked as if we were going to have a rainy afternoon after all. But it soon stoffed and the fact in protected flow, we hadly fett it at all, We turned in it Town Smith's to get the view, Mr. Typell, enjoyed this very much: We crossed the river and climbed the hills for Sentiem Then were a few. Just as were ready to descend, we seem below on Mil Smith a Mil Burn. We room jouring them and we the climbed the seemed Gentin Hill and off bounds.
The rem we found quite a lige colony of the Sentiain none
however very lage. We found a putty path but it wenter lete to follow it any dictaver. We return to the made and then welled toward avalon dam. When we reached the compacte new the new ligard beating Place we alfful for lunch. Refine was built and we enjoyed the warmth It them out. We the stated howevered, that it touch Ceturn willed, We stepped at Christe for a dink of water. The branch of Wilton live were kneely eggyd in efter of its muddy condi-tion. The mon show at brightly as died also the aten and

1921- Oct. 8- 23 464 we held chance to study the stare. We reached Calmith about 7 P. M. Home about 8. Thuch . On the way mut Mr. - my nighter with a laye there of I sentiain and externine. 2981 tel it will not be his fault. after a visit to the My cofedim floor we returned home 2982 12. Visited the race truck for Gention andering het foul it faity bed to get worth flower for my class my mighton has seen to this. I maded hat to flower, its in but 15 at aways plante get could not find that many. I reached with about 6 P.M. then returned home 15. a tuf to Soldier Delphit. In on pat our Men Tyrell who boarded the car with me, Muf Smith a Mif Baum, at bonded it lete - hip hille ale com on the west can We list the weed route in the Red Row The House Hours and then home in The Youly Home. When we turned in the read that follow Red Rom, I stiffed buy everyth to gether a few former. Mif Barrier courched for chestwate but found only 3 a 4 in feet, the months found for the afternow all that me but 5 or 6. However we war not out for chestwate the main object of the trif was to visit the Training best ain The the to rece routhy of the flow, expectly the list flow. We revolved the Suitie breakty after a while. They we not very abundant and in their let clays. Plate along the stame have a precurious exection on aret of the chrown collection who dig of the soil atteny the bed of the steam and file it of in brefer. We followed the steam to the old fewer and the way touch the Hook Hower now the club have of some hout club. We found then they birly here, many women were in the forty, 5 autor were standy around. We went to the sping diseased as one lest birt and them ste bush. Checky our alife to the Hank Hower and The world our way brush the read beding four the Young House you again deserted. We admind the bratiful court and the benen hell with ite lending. We have for a clear strated right, but in the we were die officials it was the begy to see the stand come the more were about bridden. We readed Doing Will chart 7.15 and an exceed over received by one of the Renewood insula This by, 24 yould, sings and bugger, he is a byg rem, an automobile, a violen, a bu, etc. To night he should what he can

do with a ruin cutting out in a few rements a ruthit un eliphent: He also sell jundy. Our car came along in deser There and an how and a quete late, I were home 16 With Mr. Him to The spring & The to The Ly cofederic flow of fleth. To-day it is such warmen, Then will be 2984 rain, the populary by tomoren 22. The Bottomy Section met to-day at the cor. of Italiday 2985 and Balto. Il at 12.30. We ought to have met at 12 20 an the can now leave at 1225. I was then but a few menule when Mr. Egete arrived, a few minutes lete Mr. Typuell put in his offere and then hip Burn ar can left at 12.25 it ment that we would have to want for next on before one could go. It wen! meanly I Phe before my toway. Mr. Hay founded can lete it Wolfe Gt. We ready on distinction Buch Rin huch Red about 2 P. Mr. The day were an idulary the sky cloudless and the temperature delightfully milk. We enjoyed on trainf down the road. We were comy to really the old gram tree with mittle to had been cut about. at find we are not so sure that it was the tree, but lete week's gatin, much it fairly culair that it was the true, The muitletoe stemm, now dead were retter at their bene, a could be einly drew from the gum her. We were delighters with The words of who there the gume & The maples wied with with with other, or to which could out thing the other in grywnum of attire. I received nome millioned pools on they way. We turned into the wood bading to Realing Pt and shortly often got there. Brye at Portion were fainting of the drings, Ready for duck abouting later to we saw that the blind at the point were in reading. Second large flocks of duche were reen. While we were ceting at the point read gulle flow due to un, alifting on the water in the rend of food. We lingued at the port will after 5 P. M. the retried one atife & wended one way beach to the care, reaching the cu line shortly after 7,30 just a few wenter to lete the certain the cut the car, mented they a staff went of his one home for the west one. One way we stopped receivedly to admin the stem. 23 Mr Him & I went over to the felteshin plat. I way 2986 in reach of beginnen & recent quite a weather on the billist multipling the old query. The day is consisted weren then juster day. I wan planed to, to get some Palenessine of our old spring.

24. Dr. Kelly called for me to day at City College and we crimite Box Hubbbury. It was about 2.45 when he called he the actor were Dr. Bowhen, where arts it was, Mr. Kurja, Dr. Some and his row. It was nainly to ahow Dr. Somell the fleet, that they were auditables. Dr. Somell is intented in the Mr. Bot he that a delightful ride. We readed on delimination about 330 The thing could have been made were quicker, but a time best he shought which consumed about 5 minutes of our limit the aute was lift at the old chat; and I but the way to the intent plant. I think I came go about deinthy to it mover. Follow the old fewer with you reach the defension and then ten to the lift of flow the title steven. Its ready the breaky in which order, not a minute was both, Dr. Kelly in colling it the kell such Plant. We afect menty as how bring over the plane By the time we get both to the active is sure 4.30. We get book to city and I was as my way how in a case by 5.30.

2988

Mr. Papall hop smil "I Burn Mr. Head beaut that the oyste suffer at Tumonin we to be this

when, we we chand on flow of muching to Town with of the

2990

30 Ma. I fine a I went to the sping & the to the received To day it is a little gloony, there will be rein.

5 We met at Catomorth. We went must at 1 P. M. but I was detained in behouting to did not get the until 1,15 P. M. In can with me came Mip Goddent. When we arrived we found Mr. I; rell & Mip South assisting in We wented for another car & Thus make one way to the rowing going one Valuate. In one a little wridy as ideal day for the rivine, overhead the shy we blue & the came

show with all the builti- aty. Great beyond Valuate, when we along

stiffed to admin the grand view we found ther home under countries

We stoffed to admin them and Them went much of them to when Mr. Heard outob un. We then continued an our trip findly reading Oal Spring. We were very much surprised to find her me thead, awaiting our coming. We some had a fine built and the rest of the afternoon wer spent arend the camp for. We truthed bed toto and Muchamellow and could ever and boun a reverge. Alterether spent a must delightful time. Often the feart we put the best enden together, and spent are how a some in convenation. It was 6.30 when we died to put out our fire & make our way howeved. We fremales up men. Head to go to Wilter an and then go dressed that way, nothing then go along the clum. We had no truble fuling our way out. The man wer shining brightly & country on meterically. When we really Hillen an Me a Men Head went dem that The avenue land Dange bown, the set of an west to Caturalle when we we get a can. It was \$.30 when I resolut home. I With Mr. Him to the sping a them to the rece with I looked for Spiregye, but did not find any. The day in remembet warmen then greater day. The me shine warmer. 12. a row hovember day during the morning it wer cloudy at time raining, let noon them was little change but we decided to take trif flamed. We met at Union Station at 12.30, in time t take 12,50 train for Chein Etation about 14 mile from the city The fare wer 57\$ each way, an outige cavideing how close to the city the fleer in We took The trif to see hif timber " show " on Donder Cuch a tribut my of The Brunfounder. We week - ed our destriction in about 20 months. Arrived at Cheri are ret out for the above about 2 mile distant on Matterin flow The strong wind made the trip comments unfluent. The week ten "Blue Bird" huck, the name gon to the plane by hip Link, we often impulsing the lay shake and the growth, much owner at home by building a five, in a shelling flow to me wide of they shock. The five added much to our compit so we spent a de-lightful afternew together after all. Wif thick prepart some chow. lete, while we enjoyed by all Menhadle were treated hard tout and, premet would over. In our party own Mip Like Brothers may South, Map Maller, Map Bourn, Mr. Hend, Mr. Pyrish and cayself We thought of walking back to Middle Rim but as wind were ex along deades to take we again at their when he did, viving at this

299/

2992

2998.

Tally tings a back and also row Hickory bull. 3 The trip to-day wer to the Persimmer Hill. We met at the Wilkin avenue termine at IP.M. It wer a besuliful day, temperalun delightfully evol, a feek wind blowing, making welling a flewer I were the first to arrive at the termine room after came Mit Bur-ner + Mul Goddad with her friend from Minimathi, a Mul Virginia Hortfild, must come Mr. Tymell, and The Mily Smith, and the war on the Helethope can, we all bounded it. Mr. I feed had and him: He wenter we, just a we buft the Sulphun Sp. Rel, and were affecting Touser Smith We stoffed to sen the fielly im and the continued on hand. Mr. H. wer is feeling Mr. H. when an realed the Rim Rd on rue a munge she had prived to the ground. stating that she would be at the dam. I fee two, an wither. a short dust and forther & we turned into the trail, buding of the hill-wite. I now second some hepatice leave, which has were plentiful. We reached the personner hill in due time there was still plenty of the fint on the trees, plenty to on the both true with the chow venity. We built a fur and tents breef what some coffee & heated some Wienin. The wining came on aface bowever, we we found it quite dark long before we were reely to devent. I willed to get now hickory Twigs, but it was to down to me them. Fortunately we pared some Househot out him beft we when we get down to the Rain Pd. The trip of thelle On war enjoyed in after of its awful condition. We slefted occurredly to me the stem reached the can about 8 P. M. home about 9.

4. Surfaint at the cloudy morning, after we fetty an evening It legar to sow about 10 a. Mr x continued we all day, It is a wet rown chinging to everything. We are now living on foiry

land

2999 10. We met at Wood lawn, It was driggling all morning, so I was rether surfacion to find in the car Mip Burne a Mip Mille and when we arraid at our destination Mip balded. Me Heard came on the west cam. On it was round at termine I decided to go along the falls and and out out to Berie Rem and had first intended. We found the trip quite worth while. We found a please must for from the public value are stopped to build a fore. So much intended our we in our first we failed to mate the flight of line, It was after 7 before an started on the homeword transp. Reaching the car about 8 P. Mr. and home what 9.

Typull + 9, i started on alone. It rained only occasion alles and our umbeller were sufficient protection. We get the The dem still in doughoft so had a chance to see the new structure. By the time we reached the spring, it was duch. We built a fire and tracted nome bread a heated rome rancyn. It was 5.15 when are started homewood reaching Tower about 6.05. Da the way it round about continuely. "reached some at 70'cbeh." 28. Mr. Hair & I went to the spring & then towards Wille Rid . Out to Woodbon en in home by way of Beaugard In It was a delightfut morning or are enjoyed the trip very much The weather has been grite delightful there whi days, he mon on the ground and no ice. 31. The last day of the year. It was is only proper to collecte the day in a becoming forkion. We mit at the Catomirable termine at 1 P. M., Mif Burne & I arrived together, Mr. Typell x Mif Goddard were already there awarding us. atthough during the morning there was every indication of a rainy or many afternoon, it cleared towards woon and the afternown a perfect one. With no mow on the ground and the temperature will above 40° and but little wind, we had ideal condition, We took the weed rule vie baliante. Two arm home how been bruilt rine one last visit, as on the last receive we went into all of them. The last are in now ready for occupilly it in farale for \$15000. On the hail though the woods we met the own of the tract nearest The steam, he was sufering taking the removed of the bank. We bound that he land way relling at \$ 2000 for acre. We but no trouble realing Oul Spring a run had a fine burning. To day an intended burning the The Hig. We had some trouble reliably a cuitable one all more with two layer or pulsefor rotten. We finally sen arrived they came of though the raine. We spent a most enjoy able time example the fine, ar would are leasted brush, could ever proposed sameger & become, It and come duelle time to be the leg. However the lime freed pleasty. It was short 8.45 when we findly full fine out + started boneward. We ned no limited full for fire out + started boneward. We ned no limited Road. It was 10:30 before ? got home. The evening

want about five a six minutes befor her Heard came. We boarded I. fuit can that come along and in a shut lane were in Burkelyn. It is rather cold, but the com show making waything bught. We sleft to explore the little ravin where Stank College grow no profundy. We found it juit as plentiful as in form year, and bad no trouble seemed a mie let of it. We then got back to the trail slay the river and followed it. We row came to the place when we had a fine la Jan. (orde 1, 22, 21), but we continued award and found a flee a chat distance away to build our five. We enjoyed the five until after smul them started homewood following the trail our word to the read, I two a delightful evening for walking so, when we reached the car line, I reggeted that we walk to the fridge. My Barner Secreted to take the car but the rest of are were ed to the bridge then acrow it, and then on up Light St. to the co

8. a raw cloudy morning. M. Him x? walked to the ofm 3008 and then on to Herring Ren, We went first to Filler Red the out the road to Grande Yane, There to Herring Rom, We crowd the buy to folled the rend of theem to the queries The along the little stream to the rear of Moyon College, what Ille Real, the but you to the afring. I hafed to find rown eyes, but in wer found. The cover the streem, and we beautified by the lorder of ing decoration. We stepped frequently to bed-

mire the putty fort work.

14 a week of searonable weether. It began to snow won after 3009 dim but Sunday and anowed considerable. On Wednesday it moned again followed by cold weather. There is ! . smule more it in the ground, although in the city one would hadly ampet it. The trif to day wer though the ravine, and we were to must at Catomalle, Mr. Typell & I came to gether. He had beed from the Head a few hip Burum, that neither world be on had, both having colle, Me Soudand, too we not covering. We however wated for and one in the world was fresh, just evoyab to mucho worlding pleasent, in the word was all much more. We eliffed at Oal Sping built a few and egypt it for a coffe of home or ame and the stated on though the regime. To day while at the fire the bogs come of to are, and then we not 3 me at Print Rich I asked Mr. Typull if he would blue to go up to the Dhuritary and he not sowing been their before, were glad to go. We get this in shart order, welled right of to the place of The own was a grand one. We then descended to the track and went of to Orange Sum. Treatment to Catamille vie Filter and went of to Orange Sum. Treatment to Catamille vie Filter and went of to the case by 6 o'clock or home about 7.

15 Mr. Somin or I went to the opping for water, and then take a short walls to the rece truck. Some in still on the take a short walls to the rece truck. Some in still on the grand.

24. The trip to-day went to Bein Rum. We met at Wordlam.

3011

3010

24. The trip te-day were to Bein Rew. We met at Woodlaws at our would time, when I arrived Mr. Typell were aboutly on head, with the next can come Mr. Head or Mr. Rockert. who came on Mr. Typelli instation. It had been cloudy a minty all morning but of now then war way wet, making welking a bettle disciplicable. We reached Bein Rom in due time. We took me would rate along the others and brief one fire at an old company please, this time with ceder and while here is very aboutdend There was mornished from our fire; in a short time we had a bed fat about 4.30. In the work in till come, although in certain flow, the about 4.30. In the work in till come, although in certain plant, we get beach to Woodlem soon after 6.30. Home before 8

3012

we walked tomet the old gate home. The day were many and remil expects to y along and make a great for. He suggest his outing as much as we do.

3013 Heavy arran

though sulful and back home. 4. We mit to-day at Wilhim an con termin, the took can to Sulphu St. read. In our party were her Tyrell, Nil Smith, hat Burn and Im Head. Mr. Typull came an same can with me, when we are at the meeting place, ine found my Ba B. awaiting we, on ment can can Im Heard. There is still much more in the ground sutwith standing the ev much har melted. We took one would route an far an Tome Smithia. Here we flugt into the woode & made on way towards the Beach revine. We found flenty of more in the words, we described one of the elefer from the north, and found still 6 or some indu of it in the gran When we reached the own old comp, we built a five, and spent an home or more around its change wormth. We did out begin too lay, became me felt me that Hille be would pullly be a men end are unbed to get over it in deglight. We is stated bomenal about 5; when we got the Shenarting, me Heart left we and the net of we made one way along the truck to Italian, We follows the truck, because we were afait to him omula to the read. We row rew that in this we had arrived rightly, the red was freetically imparable mud and ice covers it almost the whole way. It was well to that we had atanted we Heller were a meer, however, we get though referly reaching the to name about 7 P. h. and have about 8, It was girth clarky after runnet, in feet it byon to get cloudy a bettle before runnet, we! y muid the class.

3015

5. In lettle sum this morning learning leter into rin. I went men to the spring alone, Mr. Him her a rue fort. Some is well fact another week like the last on their will be more of it by II We met to-day at Catomirille. On can with me come hop So 3016 and Mr. Heart, awaiting we were Nip Burner, Mr. Typell x Mr. Ruckert. The weather man had predicted rain and all morning it wer cloudy and thathering rain, but tounds now it cleared and it turned out a would ful day. The mour is still with un, I was curpined that there we still is much on the sloper foring the north, it was indeed must

intenting, to are mater in her writer garmente when one before to face the routh and find the bill uncount without the faintest my of mon when are found the north. I sad the day been cold & disappe

able we would have gone into The review, but with such worm dup

weather we decided to go vie Thirtho to the river the wide of the river and to Orange lame & wind deately wint the Carella. The trif though Thirthe glas were wearn took one though the article regime, no much sum were wearn that to the Carellar. Here are much much much were excounted that it remades if we were in four the heart of winter. To reach the Carellar we had the formation of the hill rich, the bounds were a more of ier. We have always been in the held of coming the stream about the Carella but to day, we before the wining the stream about the Carella but to day, we before of coming the stream about the Carella but to day we before a complete or the later of the action of the work of the work of the weather the same found a rive little place faith down for our fire or the afact of the stream of the stream of the summary of hilles but the care, fast as we reached the stone wall the moon effected in the east, we stiffed to admin it, letter two as attiffed to grant which illumined by the moon wall a much clase to the grown which illumined by the moon wall a much clase to the grown which illumined by the moon wall a much clase to the sping of the total about well to can it? and home about 8.

3017

3018

18. To lay we were to take a trif to Union Dan, but a atrong wind from the moth, tryther with much anom on the ground marks are chory the rinte. In fit, it was because, it case of just and weather occurring that it would be finally to go to the rainer that Rolling Ref were related for one flere of meeting. When I ensured I found Mr. Typull in May Burner, wently me on the fit can that came after any animal came My Smith. We then awards another can but the rainer. We left and with none to to flow men, that in case the friend can the doing to the training. We then made one was to tradical Red and then to the raining, to the des funfang attain. There we a fine can't as the raining to the des funfang attain. There we have the days bedring to the desproy when we have the days bedring just a thought who at more curried, will drain the days bedring just a thought and after a considerable of the day to the property to the stand of made accurate that it was the Heart of the days to the property to the last dail and the we have a fine friend the truth, still keying to the old attempt, after a little week. In Heard a the Typull arranged to got it off a it was taken to the count, when it made an ideal section to the still and the count to the count, when it made an ideal section to the se

The room looked beautiful in its white role, and the brook was futhin them we had seen it for some time.
The first work was of the finet. It reem as if when the
find cold such come covering the waters to congral, that
the brook was routher, the water in the mention has receded, the ice was i, more of the nature of bone cape-tale, untred of robid ice. We had a fine built in about order, for 2 bus, or name we enjoyed the glow but lay before it became date we started onweld down the review coming the stran at Pilgrim Rich just below the Bluff. We then went on to a point beyond old Conf Cayy. Here we lyon on chil to the ridge road. The room for the hill ride pureted we charging seems of braily, the man game a rofline, had to drewly and get each tree stones out mut boldly. The view for the ridge we healful. It was best to ray where we found our fretherst frature. We stepped at the Obernating, and late abreaded at Orage sun I have the Heart boft on and the rest of an made on way up Hilten love, to the can. Cloudy shing after sumet prevented our ster gaging. We realized the cer, windetelly beaut that the trip of in just about 2 miles about 7 P. h., ar how lette we were home. Buther Comed dies to day in hoy of is much warm, and cloudy. There is prefet of rais. ? found the but get mollen, so much so that I could not our readily of the faller by the hund. 2.5. A beautiful spring day, no wonder 8 member were on hand to take the trough to-day. We met at Woodlawn at 1.15 ? M., On can with me come Hip Burun & Dr. Kum and according un war her. Ruchert. On west can come Mip Smith mip Miller or Mit Suddend any me Typiell. It was then 1.20 P.M. We expected me Head, but ach heren the way, we both wand with rome boys that we wan going to Ben' Run. We got to our comping place before hur Head overtook

un. On the way we found Still ain media in flow and at one can fine found Orontum agretion and Sympheater forbeton in flower I we rather respired to find Cetthe no faither advenced their when we raw it on one lest trip. We some had a fine bielt tonday with and then best to the can. We nested Wordlen about 7.15 and

home about 8.30. (My Sach had come on a visit) 26, Me frim x, went to the oping and the limed 3021 montalling. It is got cloudy & it book like then my be rem

a cold disaperable rainy day. The fefor road it would 4 be cloudy and no rain, but notwith standing it rained all day 3022 I had hope that it would clear by moon, but wer direfficiented We were to meet at Towson at 1, to take a trif to Yule Formal Sites Might win Feb 28th Reven . I wer late getting away from the University , but wer fortund an getting a can right off. Everything went well until me reality Chestrant this are here were detained 14 min.; a truck had gotten clush in the trush and had to be moved by the trouble wegen. There were fruther delay on act of case that we ahead of us. at suffich with me get into the can ahead, and "fin ally result " come at 1.40. Here I found her Topsell & her Richard awaiting me, "Ne hed a humid consultation upon whether to go on our trif or return I advocated going & charled we find condition too had we would return. mudler to say that we buft on. The condition were the wort me have up forward for some time. We had to fore the wind whit blew the rain right on an. In a short time we were everlas to the ckin, which me Typell & supelf. Mr. R. was better pefech be hed on a rain cent but he too was southed to the chin below him Jenus. We collected bude on the way, broken & toly. We reached Yesh Row in due Time found that the distance were to make by him, to predometer, We found that the like between the two dame were again full of wide. The gap in still as we saw it on one but trip. We weeked the oping after as but or have me built a fire. It me guite a hard tisk to get it clasted. Her R. had brought excelin, but we relied a little too much afor it and so but out, finally getting one classed by whitten, of some charge and ming them. It was 6. 15 when we left the free and started Tours weed realing it at 7,30. We found the dutam to, from miles. Our trip was therefore at best 10 miles in leight. It was 8 P.M. when I resched home. 5 a beautiful day - this was to be the cloudy day with rain polelly occarding to our weather man. The sur we up shall 3023 It o'dute and continued chining all day. It was a little brugg this morning but warred of life moon Well can how from his trif this morning. Mr. Him & I went to the ching and then touch the boulend. I all that tolif tings 3024 11. Rain yesterday and all morning. at noon it wer not raining but it we till cloudy. We mit at the come of Chale & Redwood Ste. Mip Burner was on had when I armid, coon thereafter Mr. Typell came, the Mr. Rushert and mit sinch, bethy he heard. We took Centie Bay can a went to Cute Boy termin. On the way we had a lit of a chome, but it had found, when we got out if the car. Ite while on the way to Swan leach

Juniperus Ving.

we had several light chance, them one quite had, so much so that we sought chelter at the church. When I were over, it byento clear & before we reached our distinction, the own was chaning We head the fuge on our way & reveal in the party welled our te the part, but found no eye. We found one walk though the and a very unt one, nearthelen, it was breaky enjoyed. We write our old rite on the bank overleshing the prine; and here built a fire. We found that a hope bit of the back had been weathed down leaving a short pecho jutting out toward the river after engine ing the fire we visited the outlet. I hefed to find or come Election but none could be found, We found may gilled purch running up into the like permelly to sparon. While booking for Edeler, Mr. Hanach (first time I ha met this brother) came down to spech to use . We found him oney friendly. He told we of enother well farther dam along in the cheer, We now walked along the show of the couch to the little landing. Here we found many hibermeda and some such of cound with getationer substance It was now close to seem down, and we deemed it wise to start bonewed. We reached to can about 7 P. M. I wan have about 8,15 12 a beautiful day, Mr. Hinse and I went to the 3025 ofing, the along the have truck looking for frogs eggs. We Cafulla Ben petin in Um examined to several pools but no you were found. We obther at our old seat, the first time this seeron, From which may P. M. main took nother, alle & regulf out in his aute the 3026 afternon. We went out Bellow a to h. C. R.R. link, then to Ruhland the To Vikewill. He then heft on the Renterior Peter te Rente tom, We went though R and the out the read to Hompted. We did not reach H. bomen but decided to returned, when a few mile begand Wardewills On my have we had a blue wit. This tack comballe Time the remely, bomen, we reached have about 8 P. Mr. We afent the evering at Main's 18. We met to-day at Wordlam at 1.15 P. M. On the car will me 3027 came Mr. Typull, D. Kom, a hip Buran, When we arrived we found mit selled and Mr Ruchhad alwely as hard, We wanted for another can, on it was hard Sin Dandeline Calcha We then act out for Bin Rum. On the way ford Dandelow in blown Chymphin

We reached Bem Ru in due line. We had forceded but a short distance

We found by you in me of the probe also some Mitable. We built

when Mr. Hend come & with him Mip Dowell & Mip Edwards

our fire et the old camp, we the betthe politice afait, To-day we found Celthe in bloom, also Chayeoplemine, after enjoying the fire we proceeded along The stream; to-day we visited the right bank below the wegorared. alum & legler were also found in bloom. On way homewas we had a chance to study the steer. We really Woodlaw alm 8 and was bone short 9, 19 Wa, Me Him + ), wither we to the sping them took our 3028 customing with, This Time along The old read my trounds The stram alder in in bloom, withour slimit, and Por answer Pou annu 25 Prite a warm day, almost two werm for a trip, at any rate w 3029 it feele when we have such a audden warm spell & we are not prefaud fait. We met at Catominelle. Mr. Tyrell, Mif Burne x I came on some can, next came hip Smith & findly Mr. Rinhet & Mr. Hand. Our trif to day won through the ravine, one went vie Valenti. and had been some time since we passed the little point on the Steddord rule Lefatre my thumin wamp maple of the brook we made our way that way, We found the book died of a of come no for eye, down father we found some salement you when we reached Oul Camp, we found multical alundy there, she had a fine built. We remained around our comp a comple of him. then started for the Observating going via Plymath Rule. We found a four It folion in them and also a four (3) Extension We found 2 auche a Heyrone & a Coffelal.

We stoffed again at the Observatory, then made our way down the clearly ride. We crossed the bridge at Orange some in when to get a deinthe 1 the Mr. Hum Went left our We new several film of old their furing & wire surfaints to fine it that two of the pilm had been stacked of again & living true. It was a brailifel infly & we had a change to see the stam. We realist Cetamille at 7.30. home at 8.30. 26 an awfully warm day, Mr. Him x I welled our to the oping x dien 3030 around the race track. We looked for page you but now were found 1. We mit at the William ar can termine at 12.45. When we started 3031. out then were but three of un, Mr. Tyrell, Mr. Ruckert x mayelf, It Know come late & overteach in before we resold the Rolling Rid. It was disidely Muchy, a chap ating wind was blowing & we found sweater none too warm It was rully a delightful day for transpiry. We went though the "Beach" ravine, clarking in at Rolling Ret: an arm on me get into the ranne cheltens of agent the wind we found weighting delightful. We built one fire office the girl comp and after enjoying it, continued our trif by evering the atream and after investigating the count, welling of the billite to get a view of the following a hail which hed to as It race truck, The will now quite new war a most delight ful me, The view of & down the ravin were very heartiful. It brought in ref to the springs and then one followed our would route

the arrang and then made our way out the rent we then on to they Run. We then followed the rear. Who but you are untin Kina found thousand upon thousands of violate, the ground attenues with then acre after acre, Mertenne, too, we found also in full bloom. Eng throusin is in its lest stage but Ochine is coming into bleve. We found some anemoner and were delighted to see them. To day we found 52 plants in flow We reached but theat ing whim Thate shortly efter 6 o'clock stand them for ruffer a left about 9.30 for Halethop which we reached at 10.10. My Grievacher directed ene, the can been on the helf how at this time at 11.30 16 Earter Sunday Mr. 1 time & I got water to day & took a 3037. that with the the spring, as for a member of Schuley and 3038 22 The trif to-day wer to the Seven. We met at the W. B x a. station at 12.30. We beaut that the can leave on the queter of the their quet Schwistzei Pyru abstifeta Sete fedeta Vendendenden Idealille canadi how. we bed! to want will quate of one before in could been. Ticket to Earligh Hight (Roms Prif 854) aught ticht 45 \$. home party were Mr. Egeter, Mr. Tyrull, hop Smith, My Burner, My Mon & Mif Willer an com a an reaches Earligh Heights, we not out at once for the Schwindyne place. From it in fair profusion. We then wet to Best Oak, here we finds a fine and rested for a home or sum. We then went to Buling Spring the returned to road & bule again to Earligh Hight. The day wer delightful, ant muther too were me too cold, midlind romewhat towns the little Present rome Try fathelien; formed too a let of Beindie vericem at the not in fruit. accound there we at many flower, we found but 82 cll toll. We needed Earligh Hight of 8 7.50; we had to went will 8.14 for tiani. reshing Battim about 9. I wan home at 9.30. Coff, acoust about in them 30 39 With Mr Him to the sping, Day my much the gesterday we took a short with around the reaction of the down to the 3040 29. We met again at the W. B. & a. station; this time we took the 12.15 P.M. their for Elvator (Round Prif 75 \$ - ringh way 40\$). In our July More, Mit Goddad & Mit Burn. Mr. Rubut care just a the train war pulling out, but managed to get about. The object of our trip were to reached Clouder Box Huchlabury Bayluncin brukyere in flower. We reached Clouder before I o'clock and at once set out for Waterford, We found and many inche dut, so the hit we get a dityon. On the way we found Lapine in blom and Cyp. searle about ofen, anotherday & the flower would be wide ofen. We had no trouble finding on way over, the route

Eigh July

3042.

Phlox

is much like it has been in form your. I noted that my old Poplar the which bow fistill ate flowing in deed. We found Orantimi at its but. We found the Box Huchleberry without trouble, will in blow I'll but no large at the but. We remained but a shut time guit long enough to get a few friction them found a sport under some from when we the lund. We then got book the Election. It were way intention to go to Travel Home but we mained then hail, found were on the way to Benfield, no had to return the Election when I we arrived just a few minutes twolets for a train so had to want an how for the met me. On the tail found Iris verse in blome all told 50 plants were found in flower. Cot station while awrite ing train in looked at the stare Verme in now a bentifit offert in the wester thy, Jupiter + Setur are reen in the sent. It were about 9 when we record the city and an home later when we get home, Mr. Him having to step at the mucht 30. Me Him + I went to the Cappinghin plan out Franklin Read. Daylight raining time is now in effect. We left at 9.30 new time. It was a beautiful morning. We learned that Franklin Red was to be widered & put into good shape. We found the Cyfir fidin just in bloom, by the mildle of the much would be the dail time. Prodeflylle felt aten in also just come, into flower 6. Several days of rain make this a fine time to visit Soldier Dolyh This morning it was cloudy a showery, this afternoon it was cloudy and threatening rain until about 4 when it became aleas a remained ro. I expected quite a crowd to war surfaces when only four sales came Mif More, mif Burne, Mif Smith & Mr. Typull. We reached Cl. Custimuin Owing Will et 1.20. We wented for another car, but more the came We took our would route; found then working for chione, or two years ago. To day are found the atream much wollow as hed to stay and right back. I miding an old trail we followed it, it took on as we had expected to the old Clot Home. On the way I whater Cl. contatelle x CO. Carolinianum, which I will send to Zahlbrucken. When we reache Dear Park Red we followed to haid to the oping. after desing it out we found a place under the tree where we landed It was efter five when we were though. Mr I yould a I than took a trank down the shown. It we gite an ideal one, over the binen hills. We went down until we raw the Wardschefel. Road when we dealed to re hund . We hand med you for in the return his who we find the Phlox growing quite less weetly. We made an way schooly besh, we were gone about 2 hrs, We wow started boneward. It won

9.20 when my of to the con line, a can had just paned so we has
42 be to wait for another It was 110'clock went we get nour I Wa Multiment, went to the oping a then to the race that, I hoped to fing Gardinasien dumne, but did not. Was 3043 found Cyp. sealer in bloom. agaler unticarter is wow in full bloom. To day the with in ideal a strang breeze from the west would idicate several days of cher weether a head, It. asant 3044. 13. a try had been planned to the Sugarhame. We hoped to go by auto, but the man could not be realed the last minute so we gove it of. The tip by him is to experience and give one too little line. I thunger proposed a trip of the Patisfier. In our party one Mis Mulle, Mis Burne, Mis Mone and Mr. Topsell. It was about 10 o'clock when we reached Ellicity City and one were ready to go of the river along the beaks. We went up the telliste to the oping and then every a trail bed minual we followed it a what dictains. We found that it would findly bed to the Hollofield was so decided to go bet to the best . We forms a vise potal of 6 spening to the forther on token. We set som to sent our to sent our token for more specime, but no men vere found. The Pholy we coming into flower. after lambing and continued one truly on to Hollofild on the to alberton & buyoned a short decition. Mr. Typell & I walked on about a mile faither to the affing at Dorrye. We then returned a got back to the girls. Right when they were, were a Red Birds mut will 2 year. We now started honemed, rown reached alberta, the covered bridge and the read to Woodland. We stopped at our old comping flee for suffer. 130 plants were formed in flower. We reached Wesdlem about \$1,15 and have about on bow leter 14. M. Himin " I went were to the fining a the took one would 3045 walk. We went down to the stren is broked up to reining on could showed me a patel of what he thought we committing new x werened. It find to be a fine patel of Okeria went to he to green some I know Calbuy. O Kini in Janeth's 20 The trif to-day wer along The Bumpowder from Hanfind Road 3046 to Yosh Raven. We met at Hamilton at I P.M. the following boeing in the farty: - Mit Serein Mit Conreth, Mit Moure, Mit Bound Mr. Tyull, Me lodgerter, Dr. Kum, It was a fairly pleased day just a little culting altho mut a way agreeable get most hime were mother able. This was Mat Consthe fait this, who is a furied of Mit meteutta, my lain, to, but out here with un for such a buyth of

of time, That she could be counted as new. We went our usual rente, dividly out Herful Rd to the river. The election road how extended its road 3 agreen for which they with to change 7 & extre, of come we get out at the old place, We found nothing new althor more than 125 plante were found in flower We stiffed sweed time to ret a at one flace ate lunch. When we reached that Rower, my brie left we having decided to which is now completed and the laye lake in filling up.
We then continued one hip returning to Town wie Providence The runt was a mut mapuficut are, Claude fronts an offertunity to see nevery. Clarke toward the weeken 30 wigh made this even factually and orthe, but just an and now after wer ram Moreny also. I don't remember reing it more beautiful. Several in low faity had never run this planet, to them paticularly it was a must writer right 21 Mr. Hime & I went the the spring and then two a what walk It is much the getterday, pirilly a little more sultry. The awant agales is now coming into bloom 27 To but Falls. We met at the W. B x a station in time to take 7 a. Me train which really wer 6 a. M. standard time. Mr. Typiell wa alundy them when I came, and told him we would go, if it were only me tow. Wathin a shat him Mit More come. Mr. T. went over by Bx O. and mut in a Weshington at 8.30 and we took Preyeton con Reaching B. a Gent Fell can war an hard x at 10 we was at But helli. To-day we deads to study the rush crown the Falle refriendly the slang the gage We ! after viewing the falls made one way along down other stoffing huguently to study the rockin; on the grew Permili compan humber at best 2 species, Synalisis (!), Gream yethor Juide fletjante, Carleland. Rhijocarpe Montagni, Rin adia orein, etc., de. We made show frequent but then we plenty of time. We found a nies flow about non & at lund. Just at the time it become grate deal x we thought it might rain, but will the exception of a very light republic we excepted rain, it wor time wan it meaning to raise our unbeller. It was cloudy however, all day, and it became cooler, in fact quite cold by evening. We got about a far down on the best in the rive, who me decided to return. On return trif we stopped gain to lumb and then got back to the falle. I thought we night go up nterm a short dictance & return for the 7 or her can hack to Washington but

I saw that world her Typell & hif Man were end and to return no Ene

Messer raw both also on may 24d

Tahel to Falle \$ 2.35

dulot got to the station x take the 6 o'clock can, We bound that the can would be late but thinking it a jobs get to the station on time, we wanted will 6.30 or then bound that there were hould in the line. I that we can had left sine 4 o'clock. We would have had hime to explore forther but decend it wie to be on hand should a can come, It did come at 7 × we all get in, It had been 2 her on the way. We were 13/4 her returning we had i', to wint for the 9.30 con for Batto, getting to staling It 11 x home by 11.30. We fand 1. 25 flaste in bloom, Hof tuful, Clending Phuslies, Phly whilete Chyrogonium, Raline, I wished to see the Operation but mind it 28 Me Him + I walked buck of the intitution to see the

3049 with of the new Stadein then one to the sping or our would well I won fleved to faid some nier flats of arive

3. a raing day. It has been raining already two day. We met at the court of the Swan Crack We met at 12.15 reaching the Cart's Bey term in at about 19.2. I have forty were has Typull, mig More, hip Bure, hip Molle. 3050 We get not at one for the crub, We had sweet above on the way but layer of all come when we were at our old company flow It was me of those met sultry disquell day. We found to word quite wet; we! twist going clay the shore but had to go along the left ground et the blaff. It was my intertion to go along do show to the next will below Swam look, but we were not able to get by Henochie, Her in the back nomen wollow het wite, when we offworthed they flew west from them. We had show after shower to the car by way of Hancelin outlet to main rued. reaching the car about 7, 45. Home about 9 9. Mr.

If I'm Him a I test on would Sunday morning with to the spring & then to the rare buch. It is sutty & me found of fluente withing on one old seet me the rear buch 3051 10. One of the hottet days this year the the mounts reaching 910 if wil 3052 more, this with the great humidity making it a very trying day. We left foot of Breading at 8.30 carrying many exeminish to Fair View, We retout reached Bushin Landing at 11 o'clock (See June 18th 1921). We retout Wet Jum and hained

at me for Jacobarth x the carp meeting ground reaching of shutty after noon. We found the roads quite wit, at flow still in undeted widetly

the had been a heavy rainfull at one place we found 3 telegraph pole that had been atruste by lightning, later we beared that then were

6 that had been struck all at me line x that the electric storm had been one of the worke that they had were reen, botto of lightning playing practic, as for example team; out the serve for during a mane by ite ite. We stoffed at the comp for during found the funt in an immable condition and no water around to start it. Later we found an ice cuan frage. and we made we of the melling in the start the free The water was for the grands we had a show letter and the Some after being the grands we had a show letter and first when we trund in two the property. We were realised friting will by this time. We now manight to get a good drick front but we may not able to stay lang the reason we have something the seeming we have something the single the Oly his Ray to the many the seeming we have something the seeming we have something the wie the Oly his Ray on to the monte was a back to Jacobine. We get good died of the church. We heaved that a week light they had had the sei eun feitiel. It take fully 40 mints to well from the chil to Burha, if one walks of ordering refer it will take of best and has and to be the same to Bake getting them there gent at 5, Mr. Tynell x 9 Presched the flow just after the boot had fulled out; les un the oceanin lest year a had to wait until 5,30 for the return of the boat. We all have deaded that the tay a taken, estimatly on a day ble it point is not with while; burefte we will take our time and return bomes by train. In our party our he Mour, he Tymes, Nep.

11. Mr. I time + I took one Sunday morning walk. The culty 3053

weather continue 9 Mm Bouton had he garden party this afterm, the ment in-terribing fact went the tell about on holly Mex open. Men trailed had fact remail borin in a fet of coul in which a Bermude by wen growing the read germinated in about 9 much. The flate are 3054 now about 2 inche tell & are about 2 in he high. It seems that it to low of muth for the reed to germine. he to thingt how old a her must be before it flower a little jul gave a clar. The sail her fether had planted a little holy when he was married & it is now blooming of the fait time, 16 yer leter. Mus B is so much interest of the little of the little holy when he was married & it is now blooming of the fait time, 16 yer leter. Mus B is so much interest of the little of the little holy when he was married & it is now here the little of the tevetid in the hely or second of its possell extraction due to its collection at Christman & Christman to cultivation would led te communical possibilition - money could be made,

17 We met to-day at Toweon in time to take the moon car for Timorium. Mr. Tyrull & I were the only once to take the tip We learned that we would have an hour to wait for the car

Ballo. Co. is still on Standard I inc. I thought i. That we had letter go & return by hair, We started but it did not take me buy to realize that with the wind going with we we would have a bet trip ?! , diales to want for the can, we would ride fait & wall late, we would then have the wind in one face on the bonumed tring: We returned to the Court Home x then ste bound Standard non come in what him x we took can to I immin. The frein of top in the 204, We had a short want at Tummin for them to Carleywith (price. 12 d) (10 d to Twee) We reading Carleywith by 10'clock standy. Then byen one hif down Western Rom, gente a stemme one this time of the year. We stoffed a and the old farmer; head about the relate & the states about at Waren we found that the water had vive to with ingr 21/2 It I the top of the old dam. he fount of the claw is now a large like, the water of which is but a few feet below the little turbules of the bridge. The weter to explain to get argues it was decided not be attempt going father but made one way but to town. We level of a fine ofing just a short dietere of for the ruing such the interfered with by the ruing the land home. I do not think it will be interfered with by the ruing witer. When a short distance beyond the come made it began to rain, but it lested but an how. Ofter a bit un came to the mun road which had to Walany Pohe, meeting it of the Toll Get. There was not much above of seeing the water except at are place 18. Mr. Him x I tech me wend Sunday morning trans It is hot on cotton, 24. Let trif for the season for beed. Mules. Notwithstanding the ideal day there were but three member to take advantage of it, the reason we doubt being that the gul are not overfood of the hip. Mr. Edgeter bounded the car at Policialle & when we realed Owing Malle, on found Me lynrell & Dr. Hum awarting un le et war 1.15, we started out at over going over our would route, We found churin ripe & etopped to the chiffs several time to get some of the fine fruit, at one place we leaved that the chang then men the entrance of the road way were to be cut down, but as this has been contemplated already for two yer, it is pulally that there is no burn about it. We take the route along Red Rim and when a short distance beyond the shiner followed the we stiffed at the "ld" fry place & ruted a short line, have it wer gut lete by the line we reached the hostel "home and the apring

3056

3057

Cherrie

nothing of expecial interest was found along the way, he delyte ful bruge was blevoing temperary the air making the walk a most delightful of one. We stepped at the sping of her we lumbed. We might have brighed even large at the come & we decided to vocate. We went down the shear in due time. Here an stapped again to adain the under for view before un. & then we started on tomach the read I Dung Mille vie The went rout pour the rolling home. To-day we found it occupied by reverel men me doubt bout by go o'click our hilled best week. We reched Deings hille by 9 o'click, had to went with 9.15 for can, resolved home about 10.30 P. her 25. Mr. Hair x I truck with to aping & then towned were truck 3058 the day accompanied us. When an most were going down the I gant road, we had firing, a regular volling of about . It was attenting to with the effect refer the day, she acted as if wild, running in a circle, finally it was too much for him a status back homement. We bound later that it 29. I walked over to see what progress were being much with the new stadium. already the outline of its shape in fling result. Severel steem showels shoul of the dist which is them one time. The weether continue disperally but a sticky 1. I tech a trip to Benfiled to-day. I had decided to with until a cold day for this tramp, but decided to accompanded. Allem we on his way to Can Ginter, Boom Stating, no I 3060 thought I would go to help him company part of the way. The tip routh weed were not we had after all, a bruge for the routhwar temperal the air. It was 10.15 when I lift belowbering and eing traped at the rete of 3 mile as how. When I get to the church I remembered being come out there on the occum that I had trailed along Sum Rome, so to-day I thought I would reven this trif. I let a little time here, because not being quite me that I could reach the remethet way, I had to worth up the red a slit way to find out & the had to return my steps. It was the right fleer as I had surmired. his dentally I bened of a fine spring which come remains out few under are ovularying rock. It was just below the right of way of the old Drew Point right of way. A boy at the house showed me how to reach it.

now so your over that much both is the old reihord right of way, now so your over that much bould is expensived frilling one way along it. He left me as some in I wan on the wift tuck and I have for found a flew to bunch. It was 12.30 when I had extreme and started orward, and it was 2 when I finally resulted the old will move a ruin. I found the trif a ment trying one, and will refer in but weather at time the proper wash was facility when I resold the read. I forward I wonde my my to Perfeld when I resold the read. I forward was. I then went a to the Boiling spring, and then with for a short time, collected also some Triff thelies orien. By the time I get talk to Beefeld it was 3.30 at any rate just in their board the time for Baltonia. At 6 I wan ready to board they John Rd can a by 6.30 I wan home.

3061 2. Two out gite so tuid out and ) expected to be but night when I get home found that the hydrate were turned off. In remaining some trace on 36th St. The water main was broken and so brilling were without water. Nellie & I walked down to Wardy & the lets Walter & I walked our to the sping from the unique of a movel experience finding one way over to the sping at night with a laster.

3062 Mr. Huin a I went own to the ofing and the took our would Sendy morning with. The wenther is still let.

3063 6 Nellie a? started on a trif to new Juh, Huden Rim to alborry.

On an all-day excursion to the Little Chaptanh Rim with Mr. Him We had to leave home at 6 R. Mr. as the bout was rehiduled to leave at 7 o'clock It was a fully morning. That to get of about 5, at which time it was still dark the moon show besitifully & Orion was fairly well of. We got away fromthy and inthat suit of transferred to the whof can at Balte. St. It was crowded but 7/25/12 we get as montheless. Things went windy will we were within a block of the while when a foolish drive, done his automable truck right in fact of the car. I other netely the case was not moving very part, otherwise The resulting cellinin night her had serious results, as it was the auto wer the only thing hunt. We had to get out a walk the remaining short distance. The but, the Eurose tal left her what it 7.05. We found a flace in The for of the boot, had just setel ownelse confet ally when our old agreentone, between hand his wome, Herry Kinh, a dref man, whom we met last year on the Solom Was lif, for in his affection, he stuck to an all days. The tip down was a bittle col. get not unconfortally so. We steffed et Your What about 10:30, mest et Taylor Island. We then entered the hale Cliftonh, went of Church lunch stiffig at what and the of Haden buch stiffing at and Spedden When. We the started on the return tout making a return trif at Lovie whof. The try of the crecks were ment intenting. It was dilyteful seiling against the wind, but when we railed with it, it was rather weren, Just before run not we found room on the " format duck and then had a chance to see the sten a they offend. It was an ideal waring for this, at fut Vene a Jufter now rether close tyether, althe, still not in conjunction all will new on the 25th. Ven her about paned Solum him in enginer this with it on the 15th Som Solumon new. Man with arten now is the distance was seen about as quilty. We really on which at 11 o'chile and an hour lets are men home. 20. To the spring and chan to the filtration plant with him Him. 3/26 a brentiful morning, with temperature ideal. It was on intention to go to the top of the town on the main building, but we found as morely have to wit helf an home for one of the onen who wis the busily enjoyed. On it was cloudy 12 o'clock, we deaded to out will must Sundy We retract our atof derne the old ren trule ovel and afte aciting a

from morninth on an old by, went on to the sping and Then have.

23. Allen to-day started on his comping trip, so I accompanied him and cow him bested. Sam Henry & alle Torpet were to be him and allow were to must them at Dange Irwe. In fort it was then I the awaying bridge that they were to must Mr. Prime who would show them a flere to comp. We left have about 9.50, () wanted to live at 9.30, but alle was along getting ready) and reached Catamirelle, Italian line at 11.10. It was a freely main and the walk down to Orange seem was a sunt delightful one I thought it would take un own on home to make the thing, but it did in fact they were then 3 has when we get them and Mr Prime had give come, it took but a few mounts to mutcher them. I found he Prime quite a min man, who took carriderable intent in the boyse, showed them several compound row to it that they were schified The can't they reliebed was 0. 9. 32, not for from Christi and close to a sping. I decided to wint and me them fut of this tent. Mr. Price chand them when to get a stick and in a short time they had the text of. While this was going on I was quite suficied to have Mr. Head with in on un. He had a young guil with him, who we have a writ, and was change her the had of the Rim Rud. He was a his way to Elliet City and asked me to your them, I composited by going with them as for an Hebriti, from wheel point I underwy way to Catminthe when I tak can for home I found a belated bount, a male one of the regular 17 you kind. I experiented with him for a time, hoping to tere him in the we of his noise pardwing offeretor, but did not awreed. I needed have about 4 o'cleck.

3128 26. With Mr. Typull to Catomirelle, through the raine the aboy the River Road to Carles and findly to Helithoop via Come Road and Relling Read. Mr. Typull ached me to call for him we we started as for Hamme a General Sta. We reached Catomirelle at 1.30 P. Mr. We that took the write one Valiation into the raine. Due to the claiming out of the woods, much undersoond her toke the flow of the time at ant, of a cover and were an infant able thislant bloke many of the former writer, then it was that we had guite a time finding one my to the office, There this point are and affinity as after reaching of the land of all undergood. Note that the rained backer it has a chard of all undergood. Note though the raine. Ruching Overy how, we at own freezeled to the comp when the boye boad field their laid. San a lell Topt were the late had led for her laid.

Ellewidge to see Mr. Head. The boy had been would out by the rain Thursday night, and all I were ready to bose for home will allen, home on the letter allen had your on to Ellings it es en, hoping to must allow in way book to the count. We sur reached 0.4, 28, and have we found enidence of Mr. Hend's activities two texts rudy to be occupied, a let of whether, his cost, who by sew, fie flow is position, cut, etc etc. We felt once he must be che at had, but there were me refly to one refeted calle. We deady to want a while and on one inspected, on how or more letter, we reme the they coming and with him alle a lettle lete the there! Butter also come alle the the world like to stay lage as he was give furious to stay until his many remost. Mr. Typul a I remaind for a time with the Hearde and the status owned to Gentler. The Rim wed in in quite a but chipe. It has bee guite a time run I have rem it in rule a embition, no datt cute are respondle for this. The confe Thatalus along the run fact are not an infrarent to the flew they are expressed may a met little thicket, too has to give way for the capate. We would the river at loveline and child the allide by way of lam Rosed. We decided to go to Helather and take can their interes of granj ant the Solfler If. Rend. It was getting duch arm or we had a dime to beh of Verme. We had as timble finding him, but Jefter on me difficult to fish and, but it not met time we files him out too. Jufite + Ven un our but a about diet am afait, having been in conprinting justiday. The 2 flants and the own made a very fretty caniguation. We risched Habth of about 8.40. Mr. Tyrull thought be would be a bettle in even no we wat into the day store for rown. I we confinis to find her Mr Conflet, on of my old type, at find I thought he was only receiving the star but I bound late that he armed it and we doing well. We had to wint will min o'clock for on car and bow lets I was home.

9 27 a cloudy mousing. Despit seving time came to a close this morning at 2 o'clock. Mr. How a I went to the ofing and them to the rear truth. Be it was one of them slicky mornings. I suggested that we get a one old sent rather than take a walk. Just as we officed our old cent we saw him stables out one the ground a men, close enough to our next to be a "formam non parte". Then he by stateless out his fell buyth trying to sleep. We saw affect that they were foreigner. Some an older men came and we mater that they were foreigner. Lith warries we have bette at their and young man was with them, they were the oldest but here often much room. We sow beaut that it was due to broge

gud-notured brench and framed to be an hard next Sandy with

3130

some home brew. 2. a trif to Swambruk. a sultry striky day. Mr. Tymell and I had planned the trip the week before. We mit at the come of Chale a Redund Ste et 12.30; Mr. Ruchert acompanie un. We took are und route When we pount though the little welly just before we realled the poth though the word a gang by dealed to follow us. We took no notice of him before he would turn back but be widently thought an good company and stuck to un. We were on the look on this time & did not take the trail leading to il ruin but heft an on an should until an realed the bluff our favorite recting flow. Here we stoffed a chart live enjoying i view aron the water and witching the stremm for by. a bottle humb use ceter in which pleaser the day paticifeth. We then we me to the char and the on to Hencother finally reaching the main me We were ettrected by the numer affler, widety their a god affle year. When an get back to The rund beding to the settlement on had poul culin in the afterno we made to day term book. The he did at one to do hit he am findly paremeded to do it. We then an on soon reaching the bittle church where we had wited a sign state that a suffer war being beld. Her on steffer for row ice cream. Il bound that they had 4 suffer a you co we left my adding that they notify an in advance when they occur. The minutes told on that the might are world orce the lest Saturday of November, in the pay-day of the men it the Reven Station. We enjoyed the even a orange and very similar and beforementer to try one of the suffer. We were sufriend of the much of time we were asked to rich, but we refund all or one were for the with, Just as we readed the bridge acom Mady back we can museum gulle flying over the last. It recent on if they was would have our the last of they was enough how our the land pulify coftening investe in the air. We heft a short last for Verm and Jufith a finally come both of them Verm in rum a considered distant to the cut of Jufither showing how fut who is moving We weeked the case in due time to how one how later

3. Mr. I fine + I wolked over to the filter olin plant, the him and better to get the one found little to see on for an a view was conserved. The winter were so duted with alume out bine, which is mixed with the wolk and the allowed to settle in the reduced to the the better that little could be seen though them. However we were fless to how the offerlindy of reeing the place. We get but to the afraing which were record of count drabby when one parent it earlies but it was atill in an example them. However of a former of a

due by a had an idea that the dayse that we had reen on the way of the water

the witer-4. author but shilly day. Mr. Him a I dealed to take the Tip to Oxford on the Steem Orienland. We lift the inty of 8 G. Mr. The ty down the run a beg wer delightful. We revolved Champala Beach It Il o'clock him a number of flethe get off to spend the day, a number of others got about for the rail account the boy to Oxfael which we realed about 1,30. We had 3 home to afeel at Oxford, ample Time to re the fleer, beautifully located on the Trud Own Rim. The time has are min street with reveal rich strate, all clearly buft. about the but we met Mr. Wille one time a plotograffer, mor watch maken, atit, the quite an atunting character, when we get off the best he assumpained are and we had quite a min time together. We went to the end of the main stant, or better when it returned the town, her we raw the railway tracke, we the returned stock in come of the ride abset. We found the ice feeting, her is an arterian well gooft deep. Return from the we flow in took a ride street but to the main street. Here we met 3 fencles in bething niglarhow he Wille tuch a fitur. We get book to the boat, and we left proftly at 4.30 P.M. On the with we a frame boat that could go very feet, we enjoyed wotaling it. We get back to Chempale Beach before 6.30. I have Me I head get along he had come down in the morning & afait the day there We had a mee tip of the boy. Send time we thought we would reme into a storm but it recent or if on keft only along the edge of these distributions.
We had a chose to run Verme a Juffle and world the distantly are afact. We get both to Bradeny about 10 P. M. on him letter on weather 9 To Soldier Delight. We were to ment at Owing Mills at

3133 9 Po Soldier Delight. We were to meet at Owing Mills at 130 9. Mr., but I mund my can a get them at 1.50, Mr. Typele was the Mr. Hund were always them. It was a stilly sultry day, buy during the morning it had been cloudy, but the sum began to chine about noon. We took one would route on the run. We slifty at our old resting flee for a short time, but upon the whole, much no delays with our result the oping. Here we steffy an how or layer and suggest the futty sceney around are We all thought it as that for a camp. We then started back to Owing Mills going by any of the "love" home. We reached the care about 8 P. Mr.

3134 10. With Mr. Him to the sping. The sticky weather continue We noted that again several term have been cent along, and this trunks cut into leight, as suf morning that Maller is doing this. So is one center we went over to the old race come, etopping their a form

minutes to chet & du returned

16. First trip for member of the botomy section. We met at Hamilton 3 1 3 5 at 1 P. M. The following mesulus were on hand: Mij Smith, Mr. Head Mr. Tymer a Mip Burner, The trip was to the sumpounder We look the wend route out Horful Re to the river them along the river to Gul Rown. The day was an ideal one, wiching to be a little wown but as much mice the the days we have been having that it are grand. We reted once on the way, on a rock prijecting out into the streem. The dam is now complete but the water is at we higher beal the it was whom we last raw it, fully 20 feet below highest level. Yearing the dan are I stated on toward the rew will spring, but seeing a trail leading off towards the left we decided to follow it and beam when it bed. We thought it was a short cut + ro it from to be it took on to the Providence Rid and we cet of menty a reide of the jump. We reclude the ? road about duck and now thereofter new Verm and a little later Juffle come ditame away. We readed Town It 8 and bon about 8.30. 17. With Mr. Hamin to S. Balling for Every Primares. The aroning 3136

3136 17. With Mr. Hemi to S. Balling for Evering Primare. The aroning was delightful. I had little trouble getting my outfly. We then went on to the Walfat line when we took can for home

3137 19 Repeted teef of the 17th for Denother. This line I writed the old like feets
The at one time green many aprecion but to-day I found but form. I found also
come fine opening of Bouring Bet.

23. We met to-day it Town for a trip to Christmet Ridge. On we had 3138 had a faculty meeting at the City College in the morning, I were a little to getting to own meeting place. Mr. Typull did not come, nuther did Nep Six Mily Burn, hower, was on hand. In an auto we hip Mille & her father, and My Leter, The Whether was out for wish but come out Honoras Town to on me. We letter for help how a me then started on our trip, Win went one Joh Rd to Guthwill. It was a but sleely day a we forms the trip retter trying. Reaching Touthernth on freeled to Trimounin then on to the fit wed noth of the station. We follows this road on to the clouch & them on to the home where we may rought sheller from the storm last year ! here we get a durch from the well which is 90 ft. deep. On the way we fromed though a fine effle orchard and There were many apple on the ground & we seemed a number of them, lefter realing the home we follows the road to Falle Rd them we wither aby it will we come to the west that tent we back to Galtweith. I have wanted on for Town. We get book to Town about 8.30 or long shout 9.

3139 24 With hu. Him to S.W. Belto for Occuthen. I remed a mis 3141 let of them. We then went on to Welfout when we hash cur for home 3140. 30 a trif to-day to the Peteper. We mut at Rolling Rid at 1.15 P.M.

When I arrived Mr. Tynell, Mr. Hend, Dr. Sweet, Map Burm a My Smith were also

on hand. We took the went route to Hum Dawn, The weether war delightful, retter two worms pelishes for welking. We found the growing very day the roads rethe duity refinely old country ones, for it is now 18 days mise it he raind. We found paper fully rife , an of the neutro, but be did it find any of the spin he wants, He deaded to been on when we get to the read run, or he willed to be bour by 6 o'clack We follow the new of to Jumber or the returns via Rolling Post to consterling point. We now Venue, also Man. Petimes have the 8. 22 a factorisis in her Bouton godon. It byon at 4 P. M. 3141 under soupie of the Weld Flower Presenting Sounty. The children Lit their parter very well & the gode made a delightful settling Returning home, Mr. Him a Man Mchally a I dealed to well. to In . Hair a I went to Went fort for Ownthe . We not out bolished and, the coeffort, the around it to not Win an oteting the out the 3142 wed pare the colored country, when we can the grown of their colored pagelist for some to the can it West fat. The day in just adul. H. To Greath for Listin. I left the univerity about 4.30. It we i'. after 5 when I reached my collisting grounds. I recould the requeste number of afrenin and Then havind homerand I after a dought of over 3 who we are having rain. Considering han 3144 had it poul down I we not expeting our went turn out. However who I rubs our muting place, William an can termin I found Map South & Map Burn shorty the x also Men Buchle x be doughthe Balue age 13 an English women ling her temporish x who joined the leading is that also might the the haif for the buff of Below who is intented in betany & who her collectes always our 300 afrain. Our objection point was the builty. We went our wend runte. While wente it rains resulting but not refficient to danger our aprile We really Isutin Hills in due tim in over flowed the first gitte a much of the frety flower. We without the came flow on visites lest you. Galling but to the River Rd we followed it to Orange some We alffed en-Come to Cata ath when we take on for hom. I found Barbon guile an authorist, che delytte is all their, ruber, foge, tentle, flow. 8 Not with study the now. it is till study. Mr. Hair & I must 3145 own to the sping a then to the new trush for Sentian. I found very few of them, poleby they have been collected. I went a few howen, We then welled down to the steem a return, get a were within a few feet of an old decaying true, the top blem are I fell in the road. I fed I and stoffers for a green, we filly would have been it the flow where the top full at the top it stand the ground.

3146

3149

14. To Soldier Delight. We met at Owing Mille et 1.30 P. M. In car with me came Mif Stewart, Mr. Hand a Mr. Tynell. When in arrived I found assisting un Mu Backler & Backer, Mit Heilme & Mit brief and Dr. Serra. The young It alim when are furt and Turky evering at the academy. We we us fretal hip Smith, Mr. I know a Min Tyrull deaded to awart her, she came on the next on x cles on !! Dukel the young German who we fut met Turdy wing, they went we before we reached Red Rem. We i had girthe a laye getting I took an averail burnets with me in when to been the highest of the ! hills overlinking the welly. I found that Owings hall are one 3 or ft We found some butting in bloom aby the stream We had built at the afing or built a fire. Every body seemed to have bed a grow, von a fine une the whole wester shy we exten Veget but to the cer about 7,15 and have chart 5,30

15 Mr. Him x I went to the sping & the clay Helle Red 3147 to Orligher aver & lack ? collected beginne while were quite

fluliful 21 We mit to-day at the Cataworlle termine for a trif though the raini When I arrived chatty before one I found Mr. Buckele a Bahan about the with the meet can came Mif Barner, Mip Smith, Mif Forter & Mit Heaten we waited for another can it came this Goddard, Mr. Tymell & Mer. Kell. We com thought set out for the raving going one Valianti. It was one of those ideal autum days and we enjoyed every nimente of our rauble. In due time we reached Out afring, her we staffed a shot time, built a fin & Mr. Typell him, brught now range, there were in due time roseted. We brigand around the fire until nearly four o'clock who we fut out the fire x started for the Observatory, from which point we descended to Crange law

> much rower than I wished, however, we deathed to yo on to Catamorthe ruly the can alut 6.15 Pm. Dept home about 7.30.

22. Mr. Him + I went over to South the to the stedium a home It is a little wormer them it was yesterday. I recomed some fruit of a few

noticel standing that we transfer nother slowly, we reached Orang lum

compositer, du come tunge to show phyllolary 28 a. trif to Bine Rome. We met at Woodlain at 1 P.M., my car com 3150 a little lite, so found the followerting one. In the party were hop Ban mit Hilm, mit mille, mit Waght, mit Letter, Dr. Duhel, Mr. Kelle a Ham Mr. Ruchert, Mr. Tyrell a letra Mr. Heard, who came on the next car It was an ideal day, just fine for a transf. We took one wered rute and stepped at our would come when a fine fine were come bleging mif Hulus brought rome pof com w this added another future to one

can life - the com p fly beautifully. In the stream cline by ? found and fin hitella. We lunged around the fire with about 4.30 when we bobe count a started touch the homewood. We teach are usual rent vie the Hamin ille rend & findly Doyned RI both to Woodlam. I readed have about 8 P. My 29 Mr. I fine a I tuch a short walk to Itale Rex the 3151 to his he Law a back vie Coligh an. The weether continue 4 a cloudy day, in fact onty paint November day, in this report. 3152 Thetif was to blenhamie. We met it the Q. Wa B. Litim at 12.30 although train left et 12.45. When I arrived at the Latin I found Mip Heilen alundy The , so to hip sing. a little later The Typell came & Then Mr. Pholl a Haven & finely D. Known. We reached Glerhami in due time x net out at me for Sandin Rays on the seron country to Maly lack. Her are found a new settle ment in freguen of development. The fur tem bonding the erech have been cent down. The oping we alway visited her displaced. We went made one way to the Chimbing Bithe Sout region. The two On the way we faid great attinty in red what development, just at the flow ahe as here the main read, on found hildring but his out. and several even bonne in come of exection. Let first I want quite our that we had reached the night flee. However who in going I beaut that the painte had more, that one his just it this point. We found the Bithout without limble, it was futtin them it has been for several years. after extry lund, and evering some of the flat we started both to blenhaire, This time are followed a road gente new to me and while brought in not to the boulevast byand belenharing The old nego colled it the "belliwher". We deided with the will ely of Santin Roge & The aby the trak. We get back to Islentime. about 6 P. M. and have about 7.30 5 M. Herri & I took a short walk. I wonted to find me bount 3 153. forde but in this was unwecenful! We welked along the road in Santhi touch the home the take road beding worth, this finally brought we out to aligher Course. We then went it Beaugas and to within a short distance of and, but it are flow one bout to be found. We then started on The return hip again we examined the storm water cover that they are hilding on allengton area. We found but bittle propen had been to made rim let Sanday. The cerose in so little below the surface men The stream that an ful were that the will be a filling in. We returned how one

werd route for the point
